

DEMONSTRATION PROJECT OPPORTUNITY

Clean and Renewable Energy Installation Services for Various Energy Storage Batteries
Demonstration Project - PIN# 85615D0007- Due 3/13/2015 at 5:00 PM

Standard Services

The Department of Citywide Administrative Services' (DCAS) Office of Energy Management intends to enter into negotiations with Ecoult Holding Co. Corporation / East Penn Manufacturing Co., Encell Technology Inc., UrbanElectric Power LLC., and UniEnergy Technologies, LLC. to conduct a demonstration project on clean and renewable energy installation services for various energy storage batteries. Battery energy storage is an emerging technology that the City has not pursued before; therefore, the City lacks experience with the technology and lacks current capacity to directly provide the services of applying this technology. Due to the newness of the technology and the lack of City experience in utilizing this energy storage technology for electric demand peak shaving and resiliency benefits, demonstration of this energy storage technology is required to determine the suitability for larger-scale investments (opportunities for larger-scale investment include DCAS Energy Management's Clean Energy Program and Accelerated Conservation and Efficiency, or ACE, Program). Informed by the results of the discussions with vendors, as well as potential host agencies and the Department of Buildings, DCAS Energy Management has selected four technologies for demonstration through the Innovative Demonstrations for Energy Adaptability ("IDEA") Program.

Any firm which believes that it can provide such services is invited to send a letter or an e-mail by March 13, 2015, addressed to: Ozgur Manuka, Contract Manager, omanuka@dcas.nyc.gov, Department of Citywide Administrative Services, Office of Citywide Purchasing, 1 Centre Street, 18th Floor, New York, NY 10007. Letters must be received by 5:00 PM on March 13, 2015.
