INTRODUCTION

Develop framework for urban design
based on:

- Previous Task Force Urban Design Meetings
- Open House with Urban Design Model
- Initial CB3 Urban Design Principles

SEWARD PARK SITES

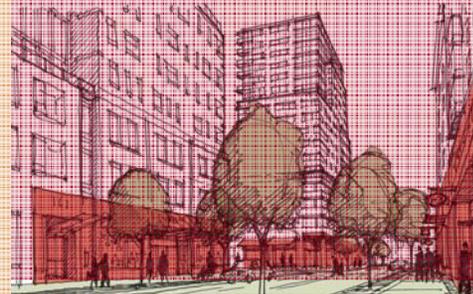

CONNECTIONS

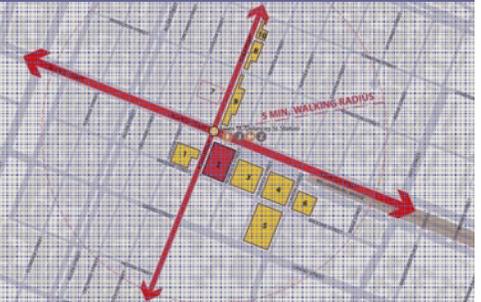

DENSITY & FORM

HUMAN SCALE & STREETScape

IDENTITY & PROGRAM

- Site Development to respond to street scale
- Reconnect the grid
- Restore pedestrian connections
- Frame view corridors
- Weave together the urban fabric

- Employ the same density as in the neighborhood
- Combine best aspects of neighborhood building forms
- Provide streetwalls to create a pedestrian environment
- Use variation of height to maximize light and air

- Create a human scale and neighborhood character
- Mixed-use buildings above street-oriented retail
- Maximize ground floor activity
- Create new streetscapes with strong pedestrian realm

- Provide flexible layouts for non-residential uses
- Locate non-retail commercial uses to maximize transit access and visibility (Site 2)
- Locate tallest elements at gateways
- Relate a variety of retail types to street scale

URBAN DESIGN STEPS FEBRUARY 28TH SUMMARY

CONNECTIONS

DENSITY & FORM

HUMAN SCALE & STREETSCAPE

IDENTITY & PROGRAM

- **Urban Fabric and Village Fabric**
- **Pedestrian safety at Delancey Street**
- **Traffic shortcuts to and from the bridge**

- **Balancing building form and height with open space, light and air (Lego Model)**

- **Balancing pedestrians and cars on side streets (Orchard Street example)**
- **Study future design of each street**

- **Restore vibrancy of Delancey Street Retail**

COMMENTS FROM FEBRUARY 28TH MEETING

Street & Pedestrian Network

- Maintain the neighborhood street grid in the public realm
- Provide access and retail visibility, but address the challenge of through traffic
- Balance vehicular access with pedestrian activity

Open Space

- Understand existing open space resources in the area
- Consider open space opportunities on the site
- Balance open space with building massing and program
- Refine open space options such as playgrounds, plazas, etc.

Building Massing & Height

- Accommodate the Program with flexibility for potential uses
- Use lower rise elements to frame the public realm
- Locate taller buildings at “gateway” sites
- Delancey Street width can handle additional massing
- Consider sun and wind in building design

URBAN DESIGN THEMES MARCH 30TH SUMMARY

OPEN HOUSE THEMES

- **Height**
 - Location, in particular on Delancey
 - Relation to open space
 - Sun and wind patterns
- **Context**
 - History and culture of the LES
 - Essex Street Market
 - Architecture of future buildings
- **Programmatic Elements**
 - Integration of affordable housing
 - Accommodating a school
 - Family oriented activities
 - Parking
