CERTIFICATION

I, Kevin Brussee, am a Qualified Environmental Professional, as defined in RCNY § 43-1402(ar). I have primary direct responsibility for implementation of the Remedial Investigation for the Redevelopment Project located at 207 Harrison Avenue, Brooklyn, New York, (NYC VCP Site No. 13CVCP074K.). I am responsible for the content of this Remedial Investigation Report (RIR), have reviewed its contents and certify that this RIR is accurate to the best of my knowledge and contains all available environmental information and data regarding the property.

EXECUTIVE SUMMARY

The Remedial Investigation Report (RIR) provides sufficient information for establishment of remedial action objectives, evaluation of remedial action alternatives, and selection of a remedy pursuant to RCNY§ 43-1407(f). The remedial investigation (RI) described in this document is consistent with applicable guidance.

Site Location and Current Usage

The Site is located at 207 Harrison Avenue in the Williamsburg section of Brooklyn, New York and is identified as Block 2272 and Lot 3 on the New York City Tax Map. Figure 1 shows the Site location. The Site is 4,990-square feet and is bounded by Bartlett Street to the north, several three-story mixed use buildings (Block 2272, Lots 2 and 55) to the south, a one-story auto repair shop (Block 2272, Lot 6) to the east, and Harrison Avenue to the west. A map of the site boundary is shown in Figure 2. Currently, the Site is used for accessory vehicle parking for the auto repair shop to the east. The lot is undeveloped and has an exposed soil cover

Lot 3 is a corner lot located on the southeast corner of the intersection of Harrison Avenue and Bartlett Street. The Lot has 100 feet of frontage on Bartlett Street and 50 feet of frontage on Harrison Avenue.

Summary of Proposed Redevelopment Plan

The proposed future use of the Site will consist of two new apartment buildings. Layout of the proposed site development is presented in Figure 3. The current zoning designation is R7A. The proposed use is consistent with existing zoning for the property.

The lot will be redeveloped with two new residential buildings (20 Bartlett Street and 16 Bartlett Street).

The proposed building at 16 Bartlett Street will be a 4-story, 3-family, residential building with a full cellar level that will extend below the entire footprint of the building. The 40ft by 55ft building will be located on the corner of Bartlett Street and Harrison Avenue, leaving a 10 ft wide concrete capped alley way behind the building. A portion of the alleyway will be occupied

by a handicapped access ramp. Excavation for the building's cellar and foundation will require excavation to a depth of approximately 8 feet below grade. The basement will be utilized for accessory storage space for the building's occupants, and will contain an electric meter room, boiler room, gas meter room, house trap closet and a small restroom. The first floor and upper floors will consist of dwelling units.

The proposed building at 20 Barlett Street will be a 3-story, 3-family, residential building with a full cellar level that will extend below the entire footprint of the building. The 40ft by 45ft building will be located east of 16 Bartlett Street and will front Bartlett Street. The 10 ft wide concrete capped alley that will extend behind the rear of the 16 Bartlett Street building will continue behind the rear of the 20 Bartlett Street building. Excavation for the building's cellar and foundation will require excavation to a depth of approximately 11 feet below grade. The basement will be utilized for accessory storage space for the building's occupants, and will contain an electric meter room, boiler room, gas meter room, house trap closet and a small restroom. The first floor and upper floors will consist of dwelling units.

Both buildings will be constructed along Bartlett Street, leaving a 10 ft wide concrete capped alley way behind the buildings. Excavation for the 45ft by 40ft 3-story building (20 Bartlett Street) to a depth of 11 ft will generate approximately 733 yd³ (1,100 tons) and excavation for the 55ft by 40ft 4-story building (16 Bartlett Street) will generate approximately 650 yd³ (975 tons).

Summary of Past Uses of Site and Areas of Concern

Historical information (DOB records, Sanborn Maps and City Directory listings) reviewed for the Site note the Site as being developed prior to 1887 with three 3-story apartment buildings with first floor stores. One of the 3-story mixed use buildings was labeled as a club house in the 1904 Sanborn map. By 1918, the entire Site was redeveloped with a 6-story apartment building along Harrison Avenue. The first floor was divided into four commercial spaces and the upper floors were residential. An smaller adjoining 1-story commercial building was constructed along Bartlett Street. The adjoining building had five separate commercial spaces, one of which was labeled as a knitting mill.

The Site remained relatively unchanged until the buildings were demolished in the early 1980's. The Site has remained undeveloped since 1981 and has been used for parking/vehicle storage.

The AOCs identified for this Site include:

1. Historic fill is present at the Site from grade to a depth ranging from 6 to 10 feet below grade.

Summary of the Work Performed under the Remedial Investigation

1. Conducted a Site inspection to identify AOCs and physical obstructions (i.e. structures, buildings, etc.);
2. Installed 3 soil borings across the entire project Site, and collected 8 soil samples (plus one duplicate) for chemical analysis from the soil borings to evaluate soil quality;
3. Installed 3 temporary groundwater monitoring wells throughout the Site, collected a groundwater sample from each new temporary monitoring well, and collected a groundwater sample from two permanent monitoring wells located within the sidewalk to establish groundwater flow and to evaluate groundwater quality;
4. Installed 3 soil vapor probes around Site perimeter and collected 3 samples for chemical analysis.

Summary of Environmental Findings

1. Elevation of the property is approximately 13 feet.
2. Depth to groundwater is approximately 8 feet at the Site.
3. Groundwater flow is generally from north to south beneath the Site.
4. Depth to bedrock is at the Site is greater than 100 feet.
5. The stratigraphy of the Site, from the surface down, consists of 6 to 8 feet of urban fill underlain by a native brown fine silty sand.
6. Soil/fill samples collected during the RI showed no PCBs or VOCs at detectable concentrations. Only one VOC, naphthalene was detected at a low concentration of 2.9 ppb within one sample. Four SVOCs were detected within the each of the three shallow samples collected from the historic fill layer at concentrations above their RRSCOs. The same four SVOCs were detected above their RRSCOs within the soil sample collected

from 6 to 8 feet below grade in one boring. These SVOCs were all PAH compounds and their concentrations and distribution indicate that they are associated with historic fill material observed during the sampling. Five metals including barium, lead, mercury, nickel and zinc exceeded UUSCOs in shallow soil samples, and of these, barium (max of 4,210 ppm) and lead (max of 619 ppm) also exceeded RRSCOs. Lead and zinc also exceeded UUSCOs in one of the three deep soil samples. Pesticides including 4,4,4-DDT (maximum of 380 ppb), 4,4,4-DDE (maximum of 140 ppb), 4,4,4-DDD (maximum of 150 ppb), chlordane (maximum of 230 ppb), and dieldrin (maximum of 72 ppb) were detected within the shallow soil samples at concentrations above UUSCOs, but well below RRSCOs. No VOCs, SVOCs, PCBs or pesticides were detected above Unrestricted Use SCOs within any of the deep soil samples collected at the Site. Overall, the findings were unremarkable and consistent with the observation of historic fill and do not indicate a source of contaminants in soil on the property.

7. Groundwater samples collected during the RI showed no detectable concentrations of VOCs, pesticides or PCBs. The dissolved metals including iron, magnesium, manganese, and sodium were detected above their respective NYSDEC Groundwater Quality Standards (GQS). Several (8) SVOCs, all PAHs, were detected above their corresponding GQS. The RI indicates that groundwater is impacted by SVOCs.
8. Soil vapor samples collected during the RI showed several petroleum and chlorinated VOCs at generally low concentrations. Except for acetone and toluene, most detected concentrations were below $10 \mu\text{g}/\text{m}^3$. PCE was identified in two of the soil vapor samples at a maximum concentration of $36.5 \mu\text{g}/\text{m}^3$, TCE was also identified in all three soil vapor samples at a maximum concentration of $2.79 \mu\text{g}/\text{m}^3$. PCE and TCE were not detected in soil or groundwater. Their concentrations in soil vapor samples were reported below the monitoring level ranges established within the State DOH soil vapor guidance matrix.

REMEDIAL INVESTIGATION REPORT

1.0 SITE BACKGROUND

Webster Avenue Management has enrolled in the New York City Voluntary Cleanup Program (NYC VCP) to investigate and remediate a 0.115-acre site located at 207 Harrison Avenue in Williamsburg section of Brooklyn, New York. Residential use is proposed for the property. The RI work was performed between June 13, 2012, and June 15, 2012. This RIR summarizes the nature and extent of contamination and provides sufficient information for establishment of remedial action objectives, evaluation of remedial action alternatives, and selection of a remedy that is protective of human health and the environment consistent with the use of the property pursuant to RCNY§ 43-1407(f).

1.1 Site Location and Current Usage

The Site is located at 207 Harrison Avenue in the Williamsburg section of Brooklyn, New York, and is identified as Block 2272 and Lot 3 on the New York City Tax Map. Figure 1 shows the Site location. The Site is 4,990-square feet and is bounded by Bartlett Street to the north, several three-story mixed use buildings (Block 2272, Lots 2 and 55) to the south, a one-story auto repair shop (Block 2272, Lot 6) to the east, and Harrison Avenue to the west. A map of the site boundary is shown in Figure 2. Currently, the Site is used for accessory vehicle parking for the auto repair shop to the east. The lot is undeveloped and has an exposed soil cover.

Lot 3 is a corner lot located on the southeast corner of the intersection of Harrison Avenue and Bartlett Street. The Lot has 100 feet of frontage on Bartlett Street and 50 feet of frontage on Harrison Avenue.

1.2 Proposed Redevelopment Plan

The proposed future use of the Site will consist of two new apartment buildings. Layout of the proposed site development is presented in Figure 3. The current zoning designation is R7A. The proposed use is consistent with existing zoning for the property.

The lot will be redeveloped with two new residential buildings (20 Bartlett Street and 16 Bartlett Street).

The proposed building at 16 Bartlett Street will be a 4-story, 3-family, residential building with a full cellar level that will extend below the entire footprint of the building. The 40ft by 55ft building will be located on the corner of Bartlett Street and Harrison Avenue, leaving a 10 ft wide concrete capped alley way behind the building. A portion of the alleyway will be occupied by a handicapped access ramp. Excavation for the building's cellar and foundation will require excavation to a depth of approximately 8 feet below grade. The basement will be utilized for accessory storage space for the building's occupants, and will contain an electric meter room, boiler room, gas meter room, house trap closet and a small restroom. The first floor and upper floors will consist of dwelling units.

The proposed building at 20 Barlett Street will be a 3-story, 3-family, residential building with a full cellar level that will extend below the entire footprint of the building. The 40ft by 45ft building will be located east of 16 Bartlett Street and will front Bartlett Street. The 10 ft wide concrete capped alley that will extend behind the rear of the 16 Bartlett Street building will continue behind the rear of the 20 Bartlett Street building. Excavation for the building's cellar and foundation will require excavation to a depth of approximately 11 feet below grade. The basement will be utilized for accessory storage space for the building's occupants, and will contain an electric meter room, boiler room, gas meter room, house trap closet and a small restroom. The first floor and upper floors will consist of dwelling units.

Both buildings will be constructed along Bartlett Street, leaving a 10 ft wide concrete capped alley way behind the buildings. Excavation for the 45ft by 40ft 3-story building (20 Bartlett Street) to a depth of 11 ft will generate approximately 733 yd³ (1,100 tons) and excavation for the 55ft by 40ft 4-story building (16 Bartlett Street) will generate approximately 650 yd³ (975 tons).

1.3 Description of Surrounding Property

The area surrounding the Site consists of a mix of residential and industrial properties. Figure 4 shows the surrounding land usage of the adjacent properties listed below as well as additional properties located up to 500 feet away from the Site. No hospitals are located within a 250 ft radius of the Site. The Beginning with Children Charter School is located at 11 Bartlett Street,

which is located approximately 200 feet to the southwest on the north side of Bartlett Street. Children attending the school range in age from kindergartners to 8th graders. No other day care facilities are schools are located within 250 ft of the Site.

| Direction | Property Description |

2.0 SITE HISTORY

2.1 Past Uses and Ownership

Historical information (DOB records, Sanborn Maps and City Directory listings) reviewed for the Site note the Site as being developed prior to 1887 with three 3-story apartment buildings with first floor stores. One of the 3-story mixed use buildings was labeled as a club house in the 1904 Sanborn map. By 1918, the entire Site was redeveloped with a 6-story apartment building along Harrison Avenue. The first floor was divided into four commercial spaces and the upper floors were residential. An smaller adjoining 1-story commercial building was constructed along Bartlett Street. The adjoining building had five separate commercial spaces, one of which was labeled as a knitting mill.

The Site remained relatively unchanged until the buildings were demolished in the early 1980's. The Site has remained undeveloped since 1981 and has been used for parking/vehicle storage.

2.2 Previous Investigations

EBC has not been made aware of any previous subsurface investigations conducted at the Site.

2.3 Site Inspection

Mr. Kevin Waters of EBC performed the Site inspection on Thursday, May 10, 2012, beginning at approximately 12:00 pm. The reconnaissance included a visual inspection of the Site, the sidewalk immediately in front of the Site, and the exterior of adjacent properties. At the time of the inspection, the undeveloped lot was used to store automobiles by the automobile repair facility operating at the adjacent property to the east. An 8 foot high chain link fence surrounded the property on the north, south and west sides. An access gate to the lot was located on Bartlett Street. The groundcover consisted of soil and vegetation over the entire lot. A small amount of trash was strewn about the lot. A plywood shed and dog house were present in the southeast corner of the lot.

Mr. Waters observed one monitoring well within the Harrison Avenue sidewalk and one monitoring well within the Bartlett Street sidewalk. Both monitoring wells were located immediately in front of the Site.

2.4 Areas of Concern

The AOCs identified for this site include:

1. Historic fill is present at the Site from grade to a depth ranging from 6 to 10 feet below grade.

A copy of the Phase 1 Report is presented in Appendix A.

3.0 PROJECT MANAGEMENT

3.1 Project Organization

The Qualified Environmental Profession (QEP) responsible for preparation of this RIR is Mr. Kevin Brussee.

3.2 Health and Safety

All work described in this RIR was performed in full compliance with applicable laws and regulations, including Site and OSHA worker safety requirements and HAZWOPER requirements.

3.3 Materials Management

All material encountered during the RI was managed in accordance with applicable laws and regulations.

4.0 REMEDIAL INVESTIGATION ACTIVITIES

Webster Avenue Management performed the following scope of work:

1. Conducted a Site inspection to identify AOCs and physical obstructions (i.e. structures, buildings, etc.);
2. Installed 3 soil borings across the entire project Site, and collected 8 soil samples (plus one duplicate) for chemical analysis from the soil borings to evaluate soil quality;
3. Installed 3 temporary groundwater monitoring wells throughout the Site, collected a groundwater sample from each new temporary monitoring well, and collected a groundwater sample from two permanent monitoring wells located within the sidewalk to establish groundwater flow and to evaluate groundwater quality;
4. Installed 3 soil vapor probes around Site perimeter and collected 3 samples for chemical analysis.

4.1 Geophysical Investigation

A geophysical investigation was not performed as a part of this assessment.

4.2 Borings and Monitoring Wells

Drilling and Soil Logging

On June 13, 2012 a total of three soil borings (B1-B3) were performed in the approximate locations shown on Figure 5. The three soil boring locations (B1-B3) were chosen to gain representative soil and groundwater quality information across the Site. For each of the soil borings, soil samples were collected continuously from grade to a final depth of 12 feet below existing grade using a four-foot steel macro-core sampler with acetate liners and Geoprobe direct-push equipment. One soil sample was retained from each soil boring representing the interval 0 to 2 feet below grade and one soil sample was retained from each soil boring representing the interval 8 to 10 feet below grade.

Soil recovered from each of the soil borings was field screened for the presence of VOCs with a photo-ionization detector (PID) and visually inspected for evidence of contamination. No PID readings above background concentrations were obtained from any the of soil borings with the exception of slightly elevated readings (10 to 20 ppmv) noted for soil recovered from

approximately 6 to 8 feet below grade from soil boring B2. The soil exhibited a slight odor, and was stained grey/black. EBC retained an additional soil sample B2(6-8) from the interval that exhibited the highest PID reading for laboratory analysis, and an additional soil sample representing the interval 10-12 feet below grade. Soil boring details are provided in Table 1. Boring logs were prepared by a Qualified Environmental Professional and are attached in Appendix B. A map showing the location of soil borings and monitoring wells is shown in Figure 5.

Groundwater Monitoring Well Construction

On June 13, 2012, a temporary 1-inch diameter PVC monitoring well with 10 feet of 0.010 slot screen was installed at borings SB1 (GW3), SB2 (GW2), and SB3 (GW1) set to intersect the water table. Since groundwater was encountered at approximately 8 feet below grade, monitoring wells were installed to a depth of 13 feet. Monitoring well sampling details are provided in Table 1. Monitoring well locations are shown in Figure 5.

Survey

Soil borings and wells were located to the nearest 0.10 foot with respect to two or more permanent site features.

Water Level Measurement

Approximate groundwater level measurements were collected using a Solinst oil/water interface meter to ensure the surface of the water table was within the screened section of the monitoring well. No free product was observed within the three monitoring wells. Water level data is included in Table 1.

4.3 Sample Collection and Chemical Analysis

Sampling performed as part of the field investigation was conducted for all Areas of Concern and also considered other means for bias of sampling based on professional judgment, area history, discolored soil, stressed vegetation, drainage patterns, field instrument measurements, odor, or other field indicators. All media including soil, groundwater and soil vapor have been sampled and evaluated in the RIR. Discrete (grab) samples have been used for final delineation of the nature and extent of contamination and to determine the impact of contaminants on public

health and the environment. The sampling performed and presented in this RIR provides sufficient basis for evaluation of remedial action alternatives, establishment of a qualitative human health exposure assessment, and selection of a final remedy.

Soil Sampling

Eight soil samples and one duplicate soil sample were collected for chemical analysis during this RI. Data on soil sample collection for chemical analyses, including dates of collection and sample depths, is reported in Tables 2 through 5. Figure 5 shows the location of samples collected in this investigation. Laboratories and analytical methods are shown below.

The 8 soil samples and the duplicate were collected in pre-cleaned, laboratory supplied glassware, stored in a cooler with ice and submitted for analysis to Phoenix Environmental Laboratories (Phoenix) of 587 East Middle Turnpike, Manchester, CT 06040, a New York State ELAP certified environmental laboratory (ELAP Certification No. 11301). Each of the soil samples collected from 0 to 2 feet below grade and 8 to 10 feet below grade were analyzed for the presence of volatile organic compounds (VOCs) by EPA Method 8260C, semi-volatile organic compounds (SVOCs) by EPA Method 8270C, pesticides/PCBs by EPA Methods 8081/8082 and target analyte list (TAL) metals. The two additional soil samples retained from SB2 representing the intervals 6 to 8 and 10 to 12 feet below grade were only analyzed for the presence of VOCs by EPA Method 8260C (CP51 list) and SVOCs by EPA Method 8270C (CP51 list).

Groundwater Sampling

Five groundwater samples were collected for chemical analysis during this RI. Three groundwater samples were collected from one-inch diameter temporary PVC monitoring wells installed 5-feet below the water table interface (set at approximately 13 feet below grade) and two groundwater samples were collected from two 4" diameter PVC monitoring wells located within the sidewalk along Harrison Avenue and Bartlett Street.

Each of the five groundwater samples were collected in pre-cleaned, laboratory supplied glassware, stored in a cooler with ice and submitted to Phoenix for analysis of VOCs by EPA Method 8260C, SVOCs by EPA Method 8270C, pesticides/PCBs by EPA Methods 8081/8082

and TAL metals. The groundwater sample collected from MW1 was only analyzed for SVOCs because additional glassware could not be filled with groundwater. The parking area security had attempted to remove the monitoring well by pulling it out of the ground, causing the bottom of the monitoring well to only be approximately 8.5 feet below grade. Therefore, only a small quantity of water and mud was present within the monitoring well when EBC returned to sample the monitoring well on June 15, 2012. The groundwater that was recovered over a long period of time using the peristaltic pump was too muddy for collection for VOC, or metals analysis.

Groundwater sample collection data is reported in Tables 6 through 10. Sampling logs with information on purging and sampling of groundwater monitor wells are included in Appendix D. Figure 5 shows the location of groundwater sampling. Laboratories and analytical methods are shown below.

Soil Vapor Sampling

Three soil vapor probes were installed and three soil vapor samples were collected for chemical analysis during this RI. Soil vapor sampling locations are shown in Figure 5. Soil vapor sample collection data is reported in Table 11. Soil vapor sampling logs are included in Appendix E. Methodologies used for soil vapor assessment conform to the *NYS DOH Final Guidance on Soil Vapor Intrusion, October 2006*.

The three soil vapor implants were installed using Geoprobe™ equipment and tooling. The approximate location of each of the soil vapor implants is shown on Figure 5. The vapor implants that were installed were the Geoprobe™ Model AT86 series, which are constructed of a 6-inch length of double woven stainless steel wire. The implants were installed to a depth of 5 feet below grade at all locations due to a groundwater depth of approximately 6 to 7 feet below grade. Each implant was attached to ¼ inch polyethylene tubing which extended approximately 18 inches beyond that needed to reach the surface. The tubing was capped with a ¼ inch plastic end to prevent the infiltration of foreign particles into the tube. Coarse sand was placed around the vapor implant to a height of approximately 1 foot above the bottom of the implant. The remainder of the borehole was sealed with a bentonite slurry to the surface.

Soil vapor sampling for the three implants installed on June 13, 2012, was conducted on June 14, 2012. Prior to sampling, each sampling location was tested to ensure a proper surface seal had been obtained. In accordance with NYSDOH guidance (NYSDOH Guidance for Evaluating Soil Vapor Intrusion in the State of New York, February 2005), a tracer gas (helium) was used as a quality assurance/quality control device to verify the integrity of the sampling point seal prior to collecting the samples. Prior to testing and collecting samples, the surface immediately surrounding the polyethylene tubing of the vapor implant was sealed using a 1 ft by 1 ft square sheet of 2 mil HDPE plastic firmly adhered to a wetted layer of granular bentonite. The seal was then tested by enriching the air space above the seal with a tracer gas (helium) while continuously monitoring air drawn from the implant with a helium detector (Dielectric Model MGD-2002, Multi-Gas Detector) for a minimum of 15 minutes. The tracer gas test procedure was employed at all three soil vapor sampling locations. No surface seal leaks were observed at any of the locations.

Following verification that the surface seal was tight, one to three volumes (i.e., the volume of the sample probe and tube) of air was purged from the implant using a calibrated vacuum pump. After purging, a 6-liter Summa® canister, fitted with a 2-hour flow regulator, was attached to the surface tube of each of the vapor implants. Prior to initiating sample collection, sample identification, canister number, date and start time were recorded on tags attached to each canister and in a bound field note book. Sampling then proceeded by fully opening the flow control valve on each canister in turn. Immediately after opening the flow control valve on a canister, the initial vacuum (inches of mercury) was recorded in the field book and on the sample tag. When the vacuum level in the canister was between 5 and 8 inches of mercury (approx 2 hours), the flow controller valve was closed, and the final vacuum recorded in the field notebook and on the sample tag.

The soil gas sample identification, date, start time, start vacuum, end time and end vacuum were recorded on tags attached to each canister and on a sample log sheet (Appendix E). Samples were submitted to Phoenix for laboratory analysis of VOCs EPA Method TO-15.

Chemical Analysis

Chemical analytical work presented in this RIR has been performed in the following manner:

| Factor | Description |
|--------------------------------|---|
| Quality Assurance Officer | The chemical analytical quality assurance is directed by Phoenix Environmental Laboratories |
| Chemical Analytical Laboratory | Chemical analytical laboratory(s) used in the RI is NYS ELAP certified and was Phoenix Environmental Laboratories |

Results of Chemical Analyses

Laboratory data for soil, groundwater and soil vapor are summarized in Tables 2 through 11, respectively. Laboratory data deliverables for all samples evaluated in this RIR are provided in digital form in Appendix E.

5.0 ENVIRONMENTAL EVALUATION

5.1 Geological and Hydrogeological Conditions

Stratigraphy

Subsurface soil at the Site consisted of historic fill, which was primarily comprised of brick, concrete, wood and other debris in a brown silty-sand matrix. The layer of historic fill extended to a depth ranging from ground surface to approximately 4 to 6 feet below grade. Native soil consisting of a brown sand is present below the historic fill layer.

Hydrogeology

A table of water level data for temporary monitoring wells GW1, GW2, GW3, and permanent monitoring well GW4 is included in Table 12. The average depth to groundwater is approximately 8 ft. A map of groundwater level elevations with groundwater contours and inferred flow lines is shown in Figure 9. Groundwater flow is from north to south.

5.2 Soil Chemistry

A summary table of data for chemical analyses performed on soil samples is included in Tables 2 through 5. Results were compared to NYSDEC Unrestricted Use Soil Cleanup Objectives (UUSCOs) and Restricted Residential Soil Cleanup Objectives (RRSCOs) as presented in 6NYCRR Part 375-6.8 and CP51. A copy of the laboratory report is provided in Appendix F. Figure 6 shows the location and posts the values for soil/fill that exceed the UUSCOs and RRSCOs.

Soil/fill samples collected during the RI showed no PCBs or VOCs at detectable concentrations. Only one VOC, naphthalene was detected at a low concentration of 2.9 ppb within one sample. Four SVOCs were detected within the each of the three shallow samples collected from the historic fill layer at concentrations above their RRSCOs. The same four SVOCs were detected above their RRSCOs within the soil sample collected from 6 to 8 feet below grade in one boring. These SVOCs were all PAH compounds and their concentrations and distribution indicate that they are associated with historic fill material observed during the sampling. Five metals including barium, lead, mercury, nickel and zinc exceeded UUSCOs in shallow soil samples, and of these, barium (max of 4,210 ppm) and lead (max of 619 ppm) also exceeded RRSCOs. Lead

and zinc also exceeded UUSCOs in one of the three deep soil samples. Pesticides including 4,4,4-DDT (maximum of 380 ppb), 4,4,4-DDE (maximum of 140 ppb), 4,4,4-DDD (maximum of 150 ppb), chlordane (maximum of 230 ppb), and dieldrin (maximum of 72 ppb) were detected within the shallow soil samples at concentrations above UUSCOs, but well below RRSCOs. No VOCs, SVOCs, PCBs or pesticides were detected above Unrestricted Use SCOs within any of the deep soil samples collected at the Site. Overall, with the exceptions of the high levels of barium detected in two shallow soil/fill samples, the findings were consistent with observations for other historical fill sites in Brooklyn.

5.3 Groundwater Chemistry

Data collected during the RI is sufficient to delineate the distribution of contaminants in groundwater at the Site. A summary table of data for chemical analyses performed on groundwater samples is included in Tables 6 through 9. Figure 7 shows the location and posts the values for groundwater that exceed the New York State 6NYCRR Part 703.5 Class GA groundwater standards.

Groundwater samples collected during the RI showed no detectable concentrations of VOCs, pesticides or PCBs. The dissolved metals including iron, magnesium, manganese, and sodium were detected above their respective NYSDEC Groundwater Quality Standards (GQS). Several (8) SVOCs, all PAHs, were detected above their corresponding GQS. The RI indicates that groundwater is impacted by SVOCs.

5.4 Soil Vapor Chemistry

Soil vapor samples collected during the RI detected several petroleum and chlorinated VOCs at generally low concentrations. Except for acetone and toluene, most detected concentrations were below $10 \mu\text{g}/\text{m}^3$. PCE was identified in two of the soil vapor samples at a maximum concentration of $36.5 \mu\text{g}/\text{m}^3$, TCE was also identified in all three soil vapor samples at a maximum concentration of $2.79 \mu\text{g}/\text{m}^3$. PCE and TCE were not detected in soil or groundwater. Their concentrations in soil vapor samples were reported below the monitoring level ranges established within the State DOH soil vapor guidance matrix.

Data collected during the RI is sufficient to delineate the distribution of contaminants in soil vapor at the Site. A summary table of data for chemical analyses performed on soil vapor samples is included in Table 10. Figure 8 shows the location and posts the values for soil vapor samples with detected concentrations.

5.5 Prior Activity

Based on an evaluation of the data and information from the RIR, disposal of significant amounts of hazardous waste is not suspected at this site.

5.6 Impediments to Remedial Action

There are no known impediments to remedial action at this property.

EXECUTIVE SUMMARY

Environmental Business Consultants (EBC) prepared this Phase I Environmental Site Assessment (ESA) for the following property on behalf of Webster Avenue Management, LLC: 207 Harrison Avenue, Brooklyn, NY, 11206. The purpose of the Phase I ESA was to identify and evaluate the presence of recognized environmental conditions at the Site. Recognized environmental conditions are the presence or likely presence of any hazardous substance or petroleum product under conditions that indicate an existing release, a past release or material threat of a release of any hazardous substance or petroleum product into structures on the property or into the ground, groundwater or surface water of the property.

The work was conducted in accordance with the American Society for Testing and Materials (ASTM) Standard E 1527-05 (Standard Practices for Environmental Site Assessment: Phase I Environmental Site Assessment Process), 40 CFR Part 312 (Standards and Practices for All Appropriate Inquiry; Final Rule), and EBC's proposal for services.

The street address for the Site is 207 Harrison Avenue, Brooklyn, New York 11206. The Site is identified as Block 2272, Lot 3 on the Borough of Brooklyn Tax Map (Kings County). Lot 3 is a corner lot located on the southeast corner of the intersection of Harrison Avenue and Bartlett Street. The Lot has 100 feet of frontage on Bartlett Street and 50 feet of frontage on Harrison Avenue. The total area for the Site is approximately 4,990 ft² (0.11 acres). The lot is uncapped and consists of an exposed soil cover. At the time of the inspection, an 8 foot high chain link fence was erected around the north, south, and west sides of the property and the lot was used to store automobiles by the automobile repair facility operating on an adjacent property (24 Bartlett Street).

Historical information (DOB records, Sanborn Maps and City Directory listings) reviewed for the Site identified the Site as being developed prior to 1887 with three 3-story apartment buildings with first floor stores. One of the 3-story mixed use building was labeled as a club house in the 1904 Sanborn map. By 1918, the entire Site was redeveloped with a 6-story apartment building along Harrison Avenue. The first floor was divided into four commercial spaces and the upper floors were residential. An adjoining 1-story commercial building was built along Bartlett Street. The building had five separate commercial spaces, one of which was labeled as a knitting mill.

The Site remained relatively unchanged until the entire lot was demolished in the early 1980's. The site has remained undeveloped since 1981 and has been used for parking/vehicle storage.

RECOGNIZED ENVIRONMENTAL CONDITIONS

Based upon reconnaissance of the Site and surrounding properties, interviews and review of historical records and regulatory agency databases, *the following recognized environmental conditions were noted for the Site.*

- *The past and current use of the adjacent property to the south (up gradient) as a drycleaner.*
- *NYSDEC Spill Number 01-04597 is listed for the Amoco gas station located at 655 Flushing Avenue, which is identified as an adjacent property to the west (up gradient).*

EBC recommends performing a Phase II Subsurface Investigation to determine if the use of the adjacent property to the south as a drycleaner and NYSDEC Spill Number 01-04597 (gasoline spill) has negatively impacted the Site. The Phase II Subsurface Investigation should include the collection and laboratory analysis (VOCs via EPA Method 8260) of groundwater samples from each of the monitoring wells located within the sidewalk immediately in front of the Site, and the installation of several temporary monitoring wells along the south property line to collect groundwater samples for laboratory analysis of VOCs via EPA Method 8260. Soil samples should be retained from soil borings performed within each of the groundwater sampling locations if evidence of soil contamination is encountered.

However, it should be noted that nearly any development scenario for the Site is subject to the E-designation Environmental Review Program administered by the New York City Office of Environmental Remediation (OER) due to the hazardous materials "E" designation assigned to Lot 3. If the Site is to be redeveloped in any way that requires obtaining NYCDOB building permits, EBC recommends performing the typical OER Phase II investigation/sampling requirements for hazmat "E" sites as shown below.

- Ground penetrating radar (GPR) survey to identify underground storage tanks, buried drums, or other subsurface waste disposal areas.

- Collection and laboratory analysis of surface soil samples (0-2 feet) for volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs), target analyte list (TAL) metals, PCBs and pesticides.
- Collection and laboratory analysis of subsurface soil samples (from 2 feet below the deepest basement level) for VOCs, SVOCs, TAL metals, PCBs and pesticides.
- Collection and laboratory analysis of groundwater samples for VOCs, SVOCs, TAL metals (filtered and unfiltered), PCBs and pesticides.
- Collection and laboratory analysis of soil gas samples for laboratory analysis of VOCs via EPA Method TO-15.

1.0 INTRODUCTION

1.1 Purpose

Environmental Business Consultants (EBC) prepared this Phase I Environmental Site Assessment (ESA) for the following property on behalf of Webster Avenue Management, LLC: 207 Harrison Avenue, Brooklyn, NY, 11206 (**Figure 1**). The purpose of the Phase I ESA was to identify and evaluate the presence of recognized environmental conditions at the Site. Recognized environmental conditions are the presence or likely presence of any hazardous substance or petroleum product under conditions that indicate an existing release, a past release or material threat of a release of any hazardous substance or petroleum product into structures on the property or into the ground, groundwater or surface water of the property.

1.2 Scope of Services

The assessment consisted of a visual inspection of the site and surrounding areas, interviews, a review of historical information and maps, and a review of pertinent local, state, federal and facility records. Environmental Data Resources (EDR) of Southport, Connecticut, provided the following information: a computerized database search of environmental compliance records of sites within an ASTM standard radius of the property, a Sanborn fire insurance map search, and a historical telephone directory search.

EBC reviewed the environmental database report compiled by EDR as a part of the assessment. The purpose of the review was to identify reported listings for the Site or other properties in the site vicinity. Databases reviewed included federal and state lists of known or suspected contaminated sites, lists of known handlers or generators of hazardous waste, lists of known waste disposal facilities, and lists of aboveground and underground storage tanks (ASTs and USTs). EBC's review of the database has been incorporated into this report along with a copy of the EDR report.

The work was conducted in accordance with the American Society for Testing and Materials (ASTM) Standard E 1527-05 (Standard Practices for Environmental Site Assessment: Phase I Environmental Site Assessment Process), 40 CFR Part 312 (Standards and Practices for All Appropriate Inquiry; Final Rule), and EBC's proposal for services.

1.3 Significant Assumptions

EBC has made the following assumptions in the preparation of this report:

1. Groundwater – The depth to groundwater at the Site is approximately 5 to 8 feet below grade. Based on the findings reported within a spill located on an adjacent property, groundwater beneath the Site is expected to flow towards the northeast.
2. Regulatory Records Information – EBC assumes that all information provided by EDR regarding the regulatory status of facilities within the ASTM Standard approximate minimum search distance is complete, accurate and current.
3. Other - EBC assumes that all information provided through interviews is complete and unbiased.

1.4 Limitations and Exceptions

The conclusions presented in this report are professional opinions based on the data described in this report. These opinions have been arrived at in accordance with currently accepted engineering and hydrogeologic standards and practices applicable to this location, and are subject to the following inherent limitations:

1. The data presented in this report are from visual inspections, examination of records in the public domain, and interviews with individuals having information about the site. The passage of time, manifestation of latent conditions, or occurrence of future events may require further exploration of the site, analysis of data, and re-evaluation of the findings, observations, and conclusions presented in this report.
2. The data reported and the findings, observations, and conclusions expressed are limited by the scope of work. The scope of work was defined by the request of the client.
3. No warranty or guarantee, whether expressed or implied, is made with respect to the data reported, findings, observations, or conclusions. These are based solely upon site conditions in existence at the time of the investigation, and other information obtained and reviewed by EBC.
4. EBC's Phase I ESA report presents professional opinions and findings of a scientific and technical nature. While attempts were made to relate the data and findings to applicable environmental laws and regulations, the report shall not be construed to offer legal opinion or representations as to the requirements of, nor compliance with, environmental laws, rules, or

regulations, or policies of federal, state, or local government agencies. EBC does not assume liability for financial or other losses or subsequent damage caused by or related to any use of this document.

5. The conclusions presented in this report are professional opinions based on data described in this report. They are intended only for the purpose, site location, and project indicated. This report is not a definitive study of contamination at the site and should not be interpreted as such.
6. This report is based, in part, on information supplied to EBC by third-party sources. While efforts have been made to substantiate this third-party information, EBC cannot attest to the completeness or accuracy of information provided by others.

1.5 Special Terms and Conditions

Authorization to perform this assessment was given by a proposal for services between Webster Avenue Management, LLC, and EBC.

1.6 User Reliance

This report was prepared for the exclusive use of Webster Avenue Management, LLC; no other party may use the report without the written authority of EBC.

2.0 PROPERTY DESCRIPTION AND PHYSICAL SETTING

2.1 Location and Legal Description

The street address for the Site is 207 Harrison Avenue, Brooklyn, New York 11206. The Site is identified as Block 2272, Lot 3 on the Borough of Brooklyn Tax Map (Kings County) as shown in **Figures 1 and 2**. Lot 3 is a corner lot located on the southeast corner of the intersection of Harrison Avenue and Bartlett Street. The Lot has 100 feet of frontage on Bartlett Street and 50 feet of frontage on Harrison Avenue. The total area for the Site is approximately 4,990 ft² (0.11 acres). An aerial photo of the Site and surrounding properties is provided as **Figure 3**.

A copy of the most recent deed for Lot 3 is attached in **Appendix B**. According to the most recent deed, the current owner of the Site is Faye Industries Corp.

2.2 Site Characteristics

The Site is a rectangular, undeveloped corner lot. The lot is uncapped and consists of an exposed soil cover. At the time of the inspection, an 8 foot high chain link fence was erected around the north, south, and west sides of the property and the lot was used to store automobiles by the automobile repair facility operating on an adjacent property (24 Bartlett Street). Photos taken during the site inspection are attached in **Appendix A**.

2.2.1 Utilities

At the time of the site inspection, the Site was not developed with a building. Therefore, no utilities could be identified.

2.3 Physical Setting

The elevation of the property is approximately 13 feet above the National Geodetic Vertical Datum (NGVD). The topography in the immediate area of the property generally slopes upward to the north, south and east.

2.3.1 Surface Water

The nearest body of water to the Site is the English Kills, which is located approximately 5,000 feet to the northeast.

2.3.2 *Groundwater*

Based on the findings reported within a spill located on an adjacent property, groundwater is present beneath the Site at a depth ranging from 5 to 8 feet below grade, and generally towards the northeast. No Public Supply Wells were identified within a one-mile radius of the Site.

2.3.3 *Radon Risk Evaluation*

Radon is a colorless, radioactive; inert gas formed by the decay of radium and may be present in soils and rocks containing granite, shale, phosphate and pitchblende. The USEPA's "Map of Radon Zones for New York State", September 1993 indicates that Kings County is not a radon risk area. The EDR report provides information from the New York State Department of Health radon survey which indicates that 100% of those sites tested in Kings County were below the United States Environmental Protection Agency (USEPA) radon action level of 4 Pico curies per liter (pCi/L) in the living area.

3.0 PROPERTY USAGE

3.1 Current Property Usage

At the time of the inspection, the Site was an undeveloped lot with an exposed soil cover. An 8 foot high chain link fence was erected around the north, south, and west sides of the property and the lot was used to store automobiles by the automobile repair facility operating on an adjacent property (24 Bartlett Street).

A review of New York City Department of Buildings (NYCDOB) records and the NYC Department of City Planning Zoning map indicates that the Site is zoned R7A with a C2-4 commercial overlay (**Figure 4A**). The 1961 NYC Department of City Planning Zoning Map indicates that the Site was formerly zoned M1-2 (**Figure 4B**).

3.2 Current Usage of Adjoining/Surrounding Properties

A summary of the uses of the surrounding/adjacent properties is described below. Photos of the exterior of adjacent properties are attached in **Appendix A**.

Surrounding Property Usage

| Direction | Property Description |
|---|---|
| <p>North Opposite side of Bartlett St Down Gradient of Groundwater Flow</p> | <p><u>Block 2269, Lot 52</u> (31 Bartlett Street) – A 50’ by 100’ lot developed with a 5-story apartment building, built around 1931. The apartment building appears to be currently vacant.</p> <p><u>Block 2269, Lot 1</u> (23-27 Bartlett Street) – A 200’ by 200’ irregularly shaped lot developed with a 1 to 2-story warehouse used for metal working.</p> |
| <p>South Adjacent property Up and Cross Gradient of Groundwater Flow</p> | <p><u>Block 2272, Lot 2</u> (209 Harrison Avenue) – A 19’ by 66’ lot developed with a 3-story mixed use residential/commercial building. The first floor of the building is currently utilized as a drycleaner.</p> <p><u>Block 2272, Lot 55</u> (659 Flushing Avenue) – A 25’ by 100’ lot developed with a 3-story mixed use residential/commercial building. The first floor of the building is utilized as a bar and lounge.</p> |
| <p>East Adjacent Property Cross Gradient of Groundwater Flow</p> | <p><u>Block 2272, Lot 6</u> (24 Bartlett Street) – A 75’ by 93’ lot developed with a 1-story commercial building currently utilized as an auto repair facility.</p> |
| <p>West Opposite Side of Harrison Ave Up Gradient of Groundwater Flow</p> | <p><u>Block 2271, Lot 1</u> (212 Harrison Avenue) – A 66’ by 106’ triangular lot currently utilized as a gas station.</p> |

3.3 Historical Usage of Site and Surrounding Properties

Historical sources researched to determine past usage of the Site and surrounding properties are as follows:

Sanborn Fire Insurance Maps - Sanborn fire insurance maps for the Site and surrounding area were reviewed for the years 1887, 1904, 1918, 1935, 1947, 1950, 1965, 1977, 1979, 1980, 1981, 1982, 1984, 1986, 1987, 1989, 1991, 1992, 1993, 1995, 1996, 2001, 2002, 2003, 2004, 2005, 2006 and 2007. The review is summarized in Section 3.3.1 and 3.3.2. Copies of Sanborn maps are included as **Appendix C**.

City Directory Abstract - A directory of historical telephone listings at the Site and surrounding properties were reviewed from approximately five year intervals for the years spanning 1922 through 2005. The review is summarized in Sections 3.3.2 below. A copy of the City Directory is included in **Appendix D**.

3.3.1 Sanborn Fire Insurance Maps - Site and Adjacent Properties

The historical usage of the Site and adjacent properties, identified through Sanborn map review, is summarized below.

1887

Site:

The Site was divided into two separate lots with the street addresses 205 and 207 Harrison Avenue. Each address was developed with a 3-story apartment building with a first floor store. A second 3-story mixed use building was constructed behind the building located at 205 Harrison Avenue and was listed with the address 22 Bartlett Street.

Adjacent Properties:

North

- Block 2269, Lot 1 (23-27 Bartlett Street) – The lot was divided into several smaller lots. 23 Bartlett Street was developed with a 3-story apartment building with a first floor store. The lots with the addresses 25 and 27 Bartlett Street were each developed with 3-story apartment buildings.

- Block 2269, Lot 52 (31 Bartlett Street) – Developed with two 2-story apartment buildings and a 1-story fur dresser in the rear yard.

West

- Block 2271, Lot 1 (212 Harrison Avenue) – The lot was divided into three separate lots. The lots were developed with two 3-story apartment buildings with first floor stores, two 2-story houses, and some outbuildings.

South

- Block 2272, Lot 2 (209 Harrison Avenue) – The lot was combined with the adjacent lot to the south (211 Harrison Avenue). The property was developed with a 3-story apartment building with a first floor store and two outbuildings in the rear yard.
- Block 2272, Lot 55 (659 Flushing Avenue) – The lot was developed with a 3-story building with a first floor store and an adjoining 1-story building in the rear of the lot.

East

- Block 2272, Lot 6 (24 Bartlett Street) – The lot was divided into three separate lots (24, 26, and 28 Bartlett Street). 24 and 28 Bartlett Street were each developed with a 3-story apartment building. 26 Bartlett Street was undeveloped.

1904

Site:

The 3-story apartment building located at 22 Bartlett Street was labeled as a “club house”.

Adjacent Properties:

North

- Block 2269, Lot 52 (31 Bartlett Street) – Redeveloped with a 5-story apartment building with a first floor store.

1918

Site:

205-207 Harrison Avenue and 16 Bartlett Street were redeveloped with a single 6-story apartment building with a first floor store. The first floor was divided into four separate commercial spaces. A portion of the lot with the street address 18-22 Bartlett Street was developed with a 1-story commercial

building. The building was separated into 5 separate commercial spaces and one space was labeled as a knitting mill.

Adjacent Properties:

North

- Block 2269, Lot 1 (23-27 Bartlett Street) – The buildings located at 23 to 25 Bartlett Street were vacant.

West

- Block 2271, Lot 1 (212 Harrison Avenue) – The lot was redeveloped with a 3-story apartment building with a first floor store and a 1-story garage. A 550-gallon underground gas tank was present within the garage building.

1935

Site:

No significant changes were noted for the Site on the 1935 Sanborn map when compared to the 1918 Sanborn map.

Adjacent Properties:

North

- Block 2269, Lot 1 (23-27 Bartlett Street) – The lot was redeveloped with a large 1-story garage building. Three gasoline tanks were present within the garage building near Harrison Avenue.

West

- Block 2271, Lot 1 (212 Harrison Avenue) – The western portion of the lot was redeveloped as a filling station. The filling station had four gas tanks and a small building.

East

- Block 2272, Lot 6 (24 Bartlett Street) – 26 Bartlett Street was utilized as a stone yard.

1947

Site:

No significant changes were noted for the Site on the 1947 Sanborn map when compared to the 1935 Sanborn map.

Adjacent Properties:

North

- Block 2269, Lot 1 (23-27 Bartlett Street) – The building was utilized by Pfizer as a warehouse.

West

- Block 2271, Lot 1 (212 Harrison Avenue) – The property was redeveloped with a 1-story auto repair facility.

East

- Block 2272, Lot 6 (24 Bartlett Street) – The lot was redeveloped with a 1-story commercial building utilized for shipping and bottling.

1950

No significant changes were noted for the Site or any adjacent properties on the 1950 Sanborn map when compared to the 1947 Sanborn map.

1965

Site:

No significant changes were noted for the Site on the 1965 Sanborn map when compared to the 1950 Sanborn map.

Adjacent Properties:

North

- Block 2269, Lot 1 (23-27 Bartlett Street) – The building was utilized as a metal workshop.

South

- Block 2272, Lot 2 (209 Harrison Avenue) – The 3-story building was utilized as a dry cleaner.

East

- Block 2272, Lot 6 (24 Bartlett Street) – The 1-story commercial building and lot were vacant.

1977

Site:

No significant changes were noted for the Site on the 1977 Sanborn map when compared to the 1965 Sanborn map.

Adjacent Properties:

West

- Block 2271, Lot 1 (212 Harrison Avenue) – The 1977 Sanborn map no longer depicts the four gas tanks from the former filling station.

1979-1980

No significant changes were noted for the Site or any adjacent properties on the Sanborn maps provided from 1979 to 1980 when compared to the 1977 Sanborn map.

1981

Site:

The Site was undeveloped.

Adjacent Properties:

No significant changes were noted for the adjacent properties on the 1981 Sanborn map when compared to the 1980 Sanborn map.

1982-1984

Site:

No significant changes were noted for the Site or any adjacent properties on the 1982 through 1984 Sanborn maps when compared to the 1981 Sanborn map.

1986

Site:

No significant changes were noted for the Site on the 1986 Sanborn map when compared to the 1984 Sanborn map.

Adjacent Property

South

- Block 2272, Lot 55 (659 Flushing Avenue) – The property was undeveloped.

1987

No significant changes were noted for the Site and adjacent properties on the 1987 Sanborn map when compared to the 1986 Sanborn map for the Site.

1989

Site:

No significant changes were noted for the Site on the 1991 Sanborn map when compared to the 1989 Sanborn map.

Adjacent Property

East

- Block 2272, Lot 6 (24 Bartlett Street) – The 1-story building was utilized as an auto repair facility again.

1991-2007

No significant changes were noted for the Site and adjacent properties on the 1991 through 2007 Sanborn maps when compared to the 1989 Sanborn map for the Site.

3.3.2 City Directory Listings - Site and Adjacent Properties

City Directory Listings available for the Site and adjacent properties was reviewed. The following information was obtained for the Site:

Site:

207 Harrison Avenue

Residential Listings (1928 and 1934)
Jacob Shoes (1928-1934)
Rivera Benny pasajes (1949-1960)
Bazar Hispano pasajes (1949-1960)
Perez Felix Radio & Television Service (1965)
Shell Furnace & Chimney Clean (2005)

205 Harrison Avenue

Polar Electic Co (1928)
Residential Listings (1934-1965)
Borenquen Grocery Store (1976)

14-22 Bartlett Street
Residential Listings (1934)

Adjacent Properties:

East

63-67 Throop Avenue
Residential Listings (1928, 1934)

West

212 Harrison Avenue
Residential Listings (1928)

South

209 Harrison Avenue
Residential Listings (1928, 1934 and 1960)
Ace Rapid Cleaners (1949-1997)
Harrison Dry Cleaners (2005)

659 Flushing Avenue
Jankowitz Max Store Fixtures (1928-1940)
Residential Listings (1945-1949 and 1997-2005)
Ideal Photo Service (1960-1976)

Summary

Historical information (DOB records, Sanborn Maps and City Directory listings) reviewed for the Site identified the Site as being developed prior to 1887 with three 3-story apartment buildings with first floor stores. One of the 3-story mixed use building was labeled as a club house in the 1904 Sanborn map. By 1918, the entire Site was redeveloped with a 6-story apartment building along Harrison Avenue. The first floor was divided into four commercial spaces and the upper floors were residential. An adjoining 1-story commercial building was built along Bartlett Street. The building had five separate commercial spaces, one of which was labeled as a knitting mill. The Site remained relatively unchanged until the entire lot was demolished in the early 1980's. The site has remained undeveloped since 1981.

4.0 USER PROVIDED INFORMATION

4.1 Title Records

As of the date of this report the user has not requested that EBC perform a title search.

4.2 Environmental Liens

An environmental lien is a charge, security or encumbrance upon title to a property to secure the payment of a cost, damage, debt, obligation, or duty arising out of response actions, cleanup or other remediation of hazardous substances or petroleum products upon a property, including, but not limited to, liens imposed pursuant to CERCLA 42 USC § 9607 (1) & 9607(r) and similar state and local laws.

The user has not made EBC aware of any environmental liens against the Site and has not requested that EBC perform an environmental lien search for the Site.

4.3 Specialized Knowledge

The user has not made EBC aware of any specialized knowledge regarding the chemicals or processes formerly in use at the Site or surrounding property.

4.4 Commonly Known or Reasonably Ascertainable Information

The user has not made EBC aware of any commonly known or reasonably ascertainable information regarding the past uses of the Site, specific chemicals in use at the Site or any spills, chemical releases or environmental cleanups at the Site.

4.5 Valuation Reduction for Environmental Issues

The user has not made EBC aware of any valuation reduction regarding the sale price of the property.

4.6 Owner, Property Manager and Occupant Information

According to Office of City Register records, the current owner of Lot 32 is Faye Industries Corp.

4.7 Reason for Performing Phase I ESA

The Phase I ESA was performed to identify recognized environmental conditions at the Site as part of the due diligence to support the redevelopment of the property by Webster Avenue Management, LLC.

5.0 RECORDS REVIEW

5.1 Standard Environmental Record Sources

Environmental Data Resources (EDR) of Southport, Connecticut was retained to provide a computerized database search of the project area within an ASTM-standard radius of the Site. A list of the databases searched and the search radius is shown on the summary table below. EBC reviewed the database output to determine if the property appears on any of the regulatory agency lists. Detailed information concerning each database list is provided in the EDR report (**Appendix E**). A summary of standard environmental record sources researched is as follows:

5.1.1 Federal Databases

The table below summarizes the Federal databases that were searched.

Federal Databases Searched

| Agency | Listing Name or database Searched | Abbreviation | Search Distance |
|--------|--|----------------------|--------------------|
| USEPA | National Priority List | NPL | 1.0 mile |
| USEPA | National Priority List Deletions | Delisted NPL | 1.0 mile |
| USEPA | Comprehensive Environmental Response Compensation and Liability Act Registry | CERCLIS | 0.5 mile |
| USEPA | CERCLIS No Further Remedial Action Planned | CERCLIS-NFRAP | 0.5 mile |
| USEPA | Resource Conservation and Recovery Act Corrective Action Activity | CORRACTS | 1.0 mile |
| USEPA | Resource Conservation and Recovery Act Treatment/Storage/Disposal Facilities | RCRA TSD | 0.5 mile |
| USEPA | Resource Conservation and Recovery Act Small/Large Quantity Hazardous Waste Generators | RCRA SQG/LQG | Site and Adjoining |
| USEPA | Federal Institutional/Engineering Control registries | US INST/ENG Controls | Site |
| USEPA | Emergency Response Notification System | ERNS | Site |
| USEPA | Superfund (CERCLA) Consent Decrees | CONSENT | 1.0 mile |
| USEPA | Records of Decision | ROD | 1.0 mile |
| USEPA | Mines Master Index | MINES | 0.25 mile |

Federal NPL List - The National Priority List (NPL) is the United States Environmental Protection Agency (EPA) database of uncontrolled or abandoned hazardous waste sites identified for priority remedial actions under the federal Superfund Program.

Findings: The Site is not listed as an NPL facility. No NPL sites were identified within a 1-mile radius of the Site.

Federal Delisted NPL List – NPL Delisted Sites are former NPL sites that have been remediated and removed from the EPA’s priority list. Sites are deleted where the EPA has determined that no further response is appropriate.

Findings: The Site is not identified as a Delisted NPL facility. There were no Delisted NPL sites identified within a 1-mile radius of the Site.

Federal CERCLIS List - The Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) list is a compilation of sites that the EPA has investigated or is currently investigating for a release or threatened release of hazardous substances.

Findings: The Site is not listed as a CERCLIS facility. There are no CERCLIS sites identified within a ½ mile radius of the Site.

Federal CERCLIS-NFRAP List – No Further Remedial Action Planned (NFRAP) sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA’s knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL).

Findings: The Site is not listed as a CERCLIS-NFRAP facility. Two CERCLIS-NFRAP sites were identified within a ½ mile radius of the Site.

Borden Chemical Adhesives and Chem is listed as a CERCLIS-NFRAP site. The facility is located at 56 Nostrand Avenue, Brooklyn, NY 11205 (approximately 1,828 feet west-southwest of the Site). The facility is also listed within the RCRA-NonGen, and FINDS databases as wells as HSWDS (under Borden Chemical). However, due to the distance and

location of the facility from the Site, it is not considered a significant environmental concern for this assessment.

Slattery J B & Bros Inc. is listed as a CERCLIS-NFRAP site. The facility is located at 171-187 Wallabout Street, Brooklyn, NY 11206 (approximately 1,629 feet west of the Site). The facility is also listed within the RCRA-NonGen, FINDS and MANIFEST databases. However, due to the distance and location of the facility from the Site, it is not considered a significant environmental concern for this assessment.

Federal RCRA CORRACTS List - The RCRA Corrective Actions (CORRACTS) database is the EPA's list of hazardous waste treatment, storage or disposal facilities subject to corrective action under RCRA.

Findings: The Site is not listed as a RCRA CORRACTS facility. Two RCRA CORRACTS sites were identified within a 1 mile radius of the Site.

Pfizer Inc. is listed as a RCRA CORRACTS site. The facility is located at 13 Bartlett Street, Brooklyn, NY 11206 (approximately 120 feet west-southwest of the Site). The facility is also listed within the RCRA-LQG, FINDS, RAATS and Manifest databases. Due to the location of the facility (down gradient), the facility is not considered a significant environmental concern for this assessment.

Techtronics Ecological Corp. is listed as a RCRA CORRACTS site. The facility is located at 8 Walworth Street, Brooklyn, NY 11205 (approximately 2,192 feet west-southwest of the Site). The facility is also listed within the RCRA-Nongen, FINDS, and Manifest databases. Due to the distance of the facility from the Site, it is not considered a significant environmental concern for this assessment.

Federal RCRA Treatment, Storage and Disposal - The EPA Resource Conservation and Recovery Act (RCRA) program identifies reporting facilities that treat, store or dispose of hazardous waste.

Findings: The Site is not listed as a RCRA TSD facility and no TSD facilities were identified within a ½ mile radius of the Site.

Federal RCRA Generators - The RCRA Generators database is a compilation of reporting facilities that generate hazardous waste. A Small Quantity Generator (SQG) is a site which generates more than 100 and less than 1000 kg of hazardous waste during any one calendar month and accumulates less than 6000 kg of hazardous waste at any time; or a site which generates less than 100 kg of hazardous waste during any one calendar month and accumulates less than 1000 kg of hazardous waste at any time. Large Quantity Generators (LQG) generate more than 1000 kg of hazardous waste per month. Although a property may be identified as a generator of hazardous waste, it does not mean that this material has been released to the environment. RCRA Generators which have released hazardous materials are identified in the appropriate state or federal listing.

Findings: The Site is not listed as a RCRA-SQG, RCRA-CESQG, RCRA-LQG or RCRA-NonGen facility. Five RCRA-LQG facilities, four RCRA-SQG facilities and seven RCRA-CESQG facilities were identified within a 1/4 mile radius of the Site.

Con Edison – Manhole Nos. 15641 and 56039 are listed as a RCRA-LQG site. Con Edison listings such as these are typically associated with small cleanups within manholes due to small equipment leaks. Therefore, the listings are not considered a significant environmental concern for this assessment.

Pfizer Inc. is listed as a RCRA-LQG site. The facility is located at 13 Bartlett Street, Brooklyn, NY 11206 (approximately 120 feet west-southwest of the Site). The facility is also listed within the RCRA CORRACTS, RCRA-LQG, RAATS and Manifest databases. Due to the location of the facility (down gradient), the facility is not considered a significant environmental concern for this assessment.

Pfizer Inc. – Brooklyn Plant is listed as a RCRA-LQG site. The facility is located at 630 Flushing Avenue, Brooklyn, NY 11206 (approximately 269 feet southwest of the Site). The facility is also listed within the FINDS and Manifest databases. Based on the distance and location of the facility in relation to the Site, it is not considered a significant environmental concern for this assessment.

Bais Ruchel High School Inc is listed as a RCRA-LQG. The facility is located at 177 Harrison Ave, Brooklyn, NY (approximately 444 feet northwest of the Site). The facility is also listed within the MANIFEST database. Due to the absence of inclusion within a database which would indicate a spill or release had occurred at the facility, it is not considered a significant environmental concern for this assessment.

The NYCT – Broadway – Lorimer Station is listed as a RCRA-SQG. The facility is located at 143 Lorimer Street, Brooklyn, NY 11206 (approximately 1,110 feet northwest of the Site). The facility is also listed within the Manifest database. Due to the absence of inclusion within a database which would indicate a spill or release had occurred at the facility, it is not considered a significant environmental concern for this assessment.

Arlington Press is listed as a RCRA-SQG. The facility is located at 191 Harrison Avenue, Brooklyn, NY 11206 (approximately 219 feet northwest of the Site). The facility is also listed within the FINDS and MANIFEST databases. Due to the absence of inclusion within a database which would indicate a spill or release had occurred at the facility, it is not considered a significant environmental concern for this assessment.

MTA NYCT – Deep Well #2713 – G and Deep Well #2714 – G are listed as a RCRA-SQG. Due to the absence of inclusion within a database which would indicate a spill or release had occurred at the facility, it is not considered a significant environmental concern for this assessment.

Con Edison – Several Con Edison facilities are listed as a RCRA-CESQG. The facilities are located at Whipple Street and Flushing Avenue, 747 Park Avenue, Lorimer Street and Broadway and 274 Wallabout Street, Brooklyn, NY 11206. Con Edison listings such as this one are typically associated with small cleanups within manholes due to small equipment leaks. Therefore, the listing is not considered a significant environmental concern for this assessment.

Pfizer Inc. is listed as a RCRA-CESQG site. The facility is located at 73 Gerry Street, Brooklyn, NY 11206 (approximately 301 feet north-northwest of the Site). The facility is

also listed within the FINDS, MANIFEST, and VCP databases. The facility was also identified as a RCRA-SQG in 1995. Drums of hazardous waste were shipped from the property in 2002, 2004 and 2005. The address 73-87 Gerry Street is also listed as a NYS Spill site under spill number 9516449. The spill number was assigned to the site in March of 2006. DEC notes provided by EDR provide limited information except for “construction work at site uncovered contaminated soil appears gasoline was spilled at site at some time in past.” The spill number was closed by the NYSDEC. A second spill (9704207) was reported to the DEC in July of 1997 for the same address. The person that reported the spill noted that an environmental study was done on the property and soil was found to be contaminated. A third spill number (9203348) was listed under Pfizer Inc./Gerry Street. DEC notes provided by EDR indicate the following: “contaminated soil stockpiled in dumpsters after tank pull. Sampling, testing and will dispose.” No additional notes were provided, but the spill number was closed by the DEC in 1992, three days after the spill was reported. The site is still being monitored. Due to the closure of the spill files and the ongoing remediation of the site, this site is not considered a significant environmental concern for this investigation.

CAS Developers is listed as a RCRA-CESQG. The facility is located at 70 Union Avenue, Brooklyn, NY 11206 (approximately 947 feet west-southwest of the Site). The facility is not listed in any other databases. Due to the distance and location of the facility and absence of inclusion within a database which would indicate a spill or release had occurred at the facility, it is not considered a significant environmental concern for this assessment.

MTA – NYCT – Flushing Ave Station G Line is listed as a RCRA-CESQG. The facility is located at Flushing and Union Avenue, Brooklyn, NY 11206 (approximately 796 feet west-southwest of the Site). The facility is also listed within the FINDS and MANIFEST databases. Due to the absence of inclusion within a database which would indicate a spill or release had occurred at the facility, it is not considered a significant environmental concern for this assessment.

Federal Institutional/Engineering Controls – Federal Institutional/Engineering Controls databases list sites with institutional/engineering controls in place. Institutional controls include administrative

measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Findings: No Federal Institutional/Engineering Controls were listed for the Site and no sites were identified within a ½ mile radius of the Site.

Federal Emergency Response Notification System - The Emergency Response Notification System (ERNS) is national database used collect information on reported releases of oil or hazardous substances.

Findings: The Site was not identified in the ERNS databases.

Federal Superfund Consent Decrees - The Superfund Consent Decrees (CONSENT) list identifies major legal settlements that establish responsibility and standards for cleanup at NPL sites.

Findings: Neither the Site nor any property within one mile of the Site is identified in the CONSENT databases.

Federal Records of Decision - Record of Decision (ROD) documents mandate a permanent remedy at an NPL site containing technical and health information to aid in the cleanup.

Findings: Neither the Site nor any property within one mile of the Site is identified a ROD site.

Federal Master Mines Index - The Master Mines Index (MINES) file contains all mine identification numbers issued for mines active or opened since 1971. The data also includes violation information.

Findings: Neither the Site nor any property within ¼ mile of the Site is listed in the MINES database.

5.1.2 New York State Databases

The table below summarizes the State databases that were searched.

New York State Databases Searched

| Agency | Listing Name or database Searched | Abbreviation | Search Distance |
|--------|---|-------------------|--------------------|
| NYSDEC | Inactive Hazardous Waste Disposal Sites in New York State | SHWS | 1.0 mile |
| NYSDEC | Hazardous Substance Waste Disposal Site Study | HSWDS | 0.5 mile |
| NYSDEC | Solid Waste Facility Register | SWF | 0.5 mile |
| NYSDEC | Registered Recycling Facilities | SWRCY | 0.5 mile |
| NYSDEC | Registered Waste Tire Storage Facilities | SWTIRE | 0.5 mile |
| NYSDEC | Leaking Underground Storage Tank Sites | LTANKS | 0.5 mile |
| NYSDEC | Petroleum Bulk Storage (PBS) | UST/AST | Site and Adjoining |
| NYSDEC | Chemical Bulk Storage (CBS) | CBS AST/UST | Site and Adjoining |
| NYSDEC | Institutional/Engineering Control registries | INST/ENG Controls | Site |
| NYSDEC | Voluntary Cleanup Agreements | VCP | 0.5 mile |
| NYSDEC | Brownfield sites | Brownfields | 0.5 mile |
| NYSDEC | Major Oil Storage Facilities | MOSF | 0.5 mile |
| NYSDEC | New York State Spills | NYSPILLS | 0.125 mile |
| NYSDEC | Dry Cleaner Site | Drycleaners | 0.25 mile |

NYS Inactive Hazardous Waste Disposal Sites - The New York State Department of Environmental Conservation (NYSDEC) maintains a state priority list of Inactive Hazardous Waste Disposal Sites (SHWS) considered to be actually or potentially contaminated and presenting a possible threat to human health and the environment. Referred to as the State Superfund Program, the Inactive Hazardous Waste Disposal Site Remedial Program is the cleanup program for inactive hazardous waste sites and now includes hazardous substance/waste sites.

Findings: The Site is not listed as a SHWS site and no sites were identified within a 1 mile radius of the Site.

NYS Hazardous Substance Waste Disposal Site Study - The Hazardous Substance Waste Disposal Site Study (HSWDS) list includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the HSWDS registry and non-registry sites that EPA Preliminary Assessment reports or Site Investigation reports were prepared.

Findings: The Site is not listed as a HSWD site. One HSWDS site was identified within a ½ mile radius of the Site.

Borden Chemical Adhesives and Chem is listed as a HSWD site. The facility is located at 56 Nostrand Avenue, Brooklyn, NY 11205 (approximately 1,828 feet west-southwest of the Site). Borden Chemical Adhesives and Chem is discussed in the CERCLIS-NFRAP section above.

NYS Landfill - The NYSDEC Solid Waste Facility Register records contain an inventory of solid waste disposal facilities or landfills in New York State.

Findings: The Site is not listed as a landfill. However, two SWF/LF facilities were identified within a ½ mile radius of the Site.

Cooper Tank & Welding Co. is located at 222-26 Siegel Avenue, which is approximately 2,301 feet northeast of the Site. The facility is an inactive, regulated transfer station. Due to the distance of the transfer station from the Site, it is not considered a significant environmental concern for this assessment.

Bedford Auto Sales is located at 984 Myrtle Avenue, which is approximately 2,083 feet southeast of the Site. Due to the distance of the transfer station from the Site, it is not considered a significant environmental concern for this assessment.

NYS Registered Recycling Facilities - The Registered Recycling Facilities List (SWRCY) is a NYSDEC list of recycling facilities.

Findings: The Site is not listed as a SWRCY site. No SWRCY sites were identified within a ½ mile radius of the Site.

NYS Registered Waste Tire Storage Facilities - The Registered Recycling Facilities List (SWTIRE) is a NYSDEC list of Registered Waste Tire Storage & Facility List.

Findings: The Site is not listed as a SWTIRE site. There were no SWTIRE sites identified within a ½ mile radius of the Site.

NYS Leaking Underground Storage Tank Sites - The Leaking Underground Storage Tank Sites (LTANKS) database contains a NYSDEC inventory of reported leaking storage tank incidents. They can be either leaking underground storage tanks or leaking aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills.

Findings: The Site is not identified as a LTANKS site. However, 30 LTANK and 34 Historical LTANK sites were identified within ½ mile of the Site. All of the LTANK spill numbers have been closed by the NYSDEC. Due to the closure of all spills by the NYSDEC, none are considered to be a significant concern for this assessment.

NYS Petroleum Bulk Storage - The NYSDEC Petroleum Bulk Storage - Underground Tanks (UST) database lists facilities with a petroleum storage capacity of more than 1,100 gallons and less than 400,000 gallons. The NYSDEC Petroleum Bulk Storage - Aboveground Tanks (AST) database lists facilities with registered above ground storage tanks.

Findings: The Site is not listed as a UST or AST site. However, 15 UST sites, 8 Hist UST sites, and 9 AST sites are registered within a ¼ mile radius of the Site. Properties with registered ASTs or USTs do not necessarily pose a hazard unless the tanks are leaking or a spill occurs. Most tanks in the area hold home heating oil for on-site boilers and furnaces. Sites with leaking tanks or spills are addressed in the appropriate section.

NYS Chemical Bulk Storage - The Chemical Bulk Storage (CBS) database is a NYSDEC list of facilities that store regulated hazardous substances in aboveground tanks (AST) with capacities of 185 gallons or greater or underground tanks (UST) of any size.

Findings: The Site is not identified as a CBS facility. One CBS AST facility was identified within a ¼ mile radius of the subject search. Sites with leaking tanks or spills are addressed in the appropriate section.

NYS Institutional/Engineering Controls – NYSDEC list of Environmental Remediation sites with Institutional or Engineering Controls in place.

Findings: Neither the Site nor any site within a ½ mile of the Site was identified in the NYSDEC Institutional/Engineering Controls databases.

NYS Voluntary Cleanup Agreements - The NYSDEC Voluntary Cleanup Program (VCP) database identifies hazardous waste sites undergoing private sector cleanup as part of redevelopment.

Findings: The Site was not identified as a VCP site. Three VCP sites were identified within a ½ mile radius of the Site.

The former Pfizer, Inc. facilities (Sites B & D) located at 59-71 Gerry Street and 73-87 Gerry Street, are approximately 301 feet north-northwest of the Site. Although remedial activities have been performed at the two properties, both petroleum related and chlorinated volatile organic compounds have been detected at elevated concentrations in soil, groundwater and soil gas. Soil remediation has been completed and an air sparging system operated at the property to remediate groundwater. Quarterly monitoring is still ongoing. Due to the closure of the spill numbers and the progress of the remediation, the two former Pfizer, Inc. facilities are not considered a significant environmental concern for this investigation.

A former Texaco gas station was located at 630 Flushing Ave, which is approximately 269 southwest of the Site. The gas station is also included within the LTANKS, HIST LTANKS, HIST UST, AST, HIST AST, MANIFEST, NY Spills, NY Hist Spills and CBS databases. All spills associated with the Texaco Station have been closed by the NYSDEC, therefore the Texaco gas station is not considered a significant environmental concern for this investigation.

Pfizer Inc. – (Organics/Suciac Block) is located at 630 Flushing Avenue, which is approximately 410 feet west-southwest of the Site. Hazardous soil was excavated from the site and a deed restriction was filed with Kings County Registrars Office. However, no description of off-site contamination was provided. Therefore, the facility is not considered a significant concern for this assessment.

NYS Brownfields - A Brownfield is any real property where redevelopment or re-use may be complicated by the presence or potential presence of a hazardous waste, petroleum, pollutant, or contaminant.

Findings: The Site was not identified as a Brownfield site. No Brownfield sites were located within ½ mile of the Site.

NYS Major Oil Storage Facilities - The NYSDEC Major Oil Storage Facilities (MOSF) database lists facilities or vessels with a petroleum storage capacity of more than 400,000 gallons.

Findings: The Site was not identified as an MOSF. No MOSF UST site or MOSF AST sites were identified within ½ mile of the Site.

NYS Spills - The New York State Spills Information Database (NY SPILLS) contains data collected on chemical and petroleum spill incidents reported to NYSDEC since April 1, 1986.

Findings: The Site was not listed within the NY SPILLS database. However 17 spill sites and 11 historical spill sites identified within ¼ mile of the Site.

NYSDEC Spill Number 01-04597 is listed for the Amoco gas station located at 655 Flushing Avenue, which is identified as an adjacent property to the west. During the Site inspection, EBC noted several monitoring wells on the gas station parking lot and several within the Harrison Avenue sidewalk immediately in front of the Site. Notes provided within the EDR Radius Map Report indicate groundwater flow direction is routinely to the northeast, towards the Site. The monitoring wells at the Amoco station are gauged and sampled on a quarterly basis. The laboratory results of the groundwater samples have repeatedly shown high levels of MTBE and BTEX over the last 10 years. The spill notes provided within the EDR Radius Map Report do not clearly indicate the concentration of MTBE and BTEX within the off-Site monitoring wells located within the sidewalk immediately in front of the Site.

This gasoline spill is considered a recognized environmental condition. The spill occurred at a location that is up gradient of groundwater flow and several monitoring wells were

installed within the sidewalk immediately in front of the Site as a part of the remedial program to monitor the off-Site groundwater contamination. The up gradient spill of gasoline can migrate on to the Site in vapor phase or through groundwater, creating a vapor intrusion condition. Any redevelopment of the Site under the E-designation program administered by the New York City Office of Environmental Remediation (see Section 5.2.1) would require additional costs for (1) proper handling and disposal of any contaminated soil encountered at the groundwater interface, (2) Site dewatering if gasoline contaminated groundwater is detected, (3) installation of a vapor barrier and passive/active sub-slab depressurization system, and (4) adhering to a Site Management Plan for inspection and certification of Engineering and Institutional Controls.

Based on the decision of the NYSDEC to close these spill sites, they are not considered to be a significant concern for this assessment.

Drycleaner Sites - The NYSDEC maintains a listing of all registered drycleaners. Drycleaner sites do not necessarily pose a hazard unless a spill occurs. Sites at which spills have been identified are addressed in the appropriate section.

Findings: The Site is not identified as drycleaner. One drycleaner was identified within ¼ mile of the site.

Three drycleaners have operated on the adjacent property to the south (209 Harrison Avenue). The drycleaners were listed as Harrison Dry Cleaners, Yorktown Drycleaners and Ace Rapid Drycleaners. According to the EDR Radius Map Report listing, the dry cleaning operations conducted on the adjacent property utilized tetrachloroethylene, often referred to as PCE or PERC.

The past and current use of the adjacent property to the south (up gradient) as a drycleaner is considered a recognized environmental condition. The Manifest listings note PCE waste was generated from as early as 1988. Sanborn maps (see Section 3.3.1) indicate the property was utilized as a drycleaner as early as 1965, and City Directory Listings (see Section 3.3.2) indicate Ace Rapid Cleaners operated at the property from 1949 to at least

1997. Due to the shallow groundwater present in the area (approximately 5 to 8 feet below grade), even small spills/releases could contaminate groundwater. The up gradient spill or release of PCE or other hazardous dry cleaning fluids can migrate on to the Site in vapor phase or through groundwater, creating a vapor intrusion condition. Any redevelopment of the Site under the E-designation program administered by the New York City Office of Environmental Remediation (see Section 5.2.1) would require additional costs for (1) proper handling and disposal of any contaminated soil encountered at the groundwater interface, (2) Site dewatering if contaminated groundwater is detected, (3) installation of a vapor barrier and passive/active sub-slab depressurization system, and (4) adhering to a Site Management Plan for inspection and certification of Engineering and Institutional Controls.

MANIFEST: Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a TSD facility.

Findings: The Site is not listed as a MANIFEST site. However, 27 manifest sites were identified within a ¼ mile radius of the Site. Since none of the manifest sites are either adjacent to the Site and/or do not appear in other EDR databases which would indicate a release has occurred, they are not considered to be a significant concern for this assessment. Facilities that may appear in an EDR Database which would indicate a release has occurred are discussed under the appropriate headings.

NYS Manufactured Gas Plants - Manufactured gas plants (MGP) were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar, sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

Findings: The Site is not identified as an MGP site. However, 5 MGP sites were identified at a distance greater than ½ mile (but less than 1 mile) of the Site. Due to the distance of the MGP facilities from the Site, none are considered a significant concern for this assessment.

5.2 Additional Environmental Record Sources

5.2.1 Local Agency Review

A Freedom of Information Act (FOIA) request was sent to the New York City Department of Health (NYCDOH) for information regarding hazardous operations including the registration of fuel storage tanks, past spills, or violations. As of the date of this report, a response had not been received for the FOIA request. Regulatory agencies usually take six to eight weeks to process FOIA requests. Any pertinent information received will be reviewed and forwarded upon receipt. Copies of FOIA requests and regulatory agency responses are included in **Appendix B**.

In addition, a tank request form was submitted to the City of New York Fire Department to obtain certified reports outlining information regarding any listed tank information held in FDNY District Office Folders and computer files. As of the date of this report, a response had not been received. Any pertinent information received will be reviewed and forwarded upon receipt. A copy of the tank request form forwarded to the City of New York Fire Department is included in **Appendix B**.

The NYC OASIS Interactive Maps (<http://www.oasisnyc.net/map.aspx>) were reviewed to obtain a New York City Department of Buildings Property Profile Overview for the Site. Information available on the interactive website include historic Certificate of Occupancies, boiler records and DEP Boiler Information, records of complaints and both DOB and ECB violations, site restriction status (such as little "E", TA, UB, or SRO restrictions), additional DCP addresses, as well as job filings and permits. Information from the website has been attached in **Appendix B**. No information was available on the NYC OASIS Interactive Maps.

Lot 3 is listed with an Air and Hazmat little "E" restriction. The Site has been assigned an E-designation (E-238) for Air Quality-#2 Fuel Oil or Natural Gas for heating, exhaust stack limitations (Air-E) and Hazardous Materials Phase I and Phase II Testing Protocol (Hazmat-E) as part of the Broadway Triangle Rezoning enacted in December of 2009 (CEQR No. 09HPD019K). Additional information regarding "E" sites can be found on the New York City Office of Environmental Remediation website:

http://www.nyc.gov/html/oer/html/e_designation/e_designation.shtml.

The Department of Finance Building Classification is G7-Garage/Gas Station.

5.2.2 *Internet Search Results*

The street address of the Site was entered into the online search engine www.Google.com to obtain Site occupant/use information. The results of the search found an advertisement for "Shell Furnace & Chimney Clean", located at 207 Harrison Avenue.

http://brooklyn.citysearch.com/profile/map/7340024/brooklyn_ny/shell_furnace_chimney_clean.html

5.2.3 *Historic Zoning Map*

A review of the NYC Department of City Planning Zoning Map for 1961 indicates that the Site was formerly zoned M1-2 (**Figure 4B**).

6.0 SITE RECONNAISSANCE

6.1 Methodology and Limiting Conditions

Mr. Kevin Waters of EBC performed the Site inspection on Thursday, May 10, 2012, beginning at approximately 12:00 pm. The reconnaissance included a visual inspection of the Site, the sidewalk immediately in front of the Site, and the exterior of adjacent properties. Photos taken during the inspection are attached (**Appendix A**).

6.2 Observations

At the time of the inspection, the undeveloped lot was used to store automobiles by the automobile repair facility operating at the adjacent property to the east. An 8 foot high chain link fence surrounded the property on the north, south and west sides. An access gate to the lot was located on Bartlett Street. The groundcover consisted of soil and vegetation over the entire lot. A small amount of trash was strewn about the lot. A plywood shed and dog house were present in the southeast corner of the lot.

Several monitoring wells were observed within the sidewalk surrounding both the Site and the adjacent properties.

6.3 Aboveground Storage Tanks (AST)

No evidence of an aboveground storage tank was identified during the Site inspection.

6.4 Underground Storage Tanks (UST)

No evidence indicating the presence of an underground storage tank was noted during the Site inspection.

6.5 Hazardous and Non-Hazardous Chemical Storage and Disposal

No evidence of hazardous and/or non-hazardous chemical storage was observed during the Site inspection.

6.6 Polychlorinated Biphenyls (PCBs)

No evidence of PCBs or PCB containing equipment was observed during the Site inspection.

6.7 Asbestos

The lot was undeveloped at the time of the inspection.

6.8 Lead-Based Paint (LBP)

The lot was undeveloped at the time of the inspection.

6.9 Mold

The lot was undeveloped at the time of the inspection.

7.0 INTERVIEWS

7.1 Owner

Abe Strulovitch of Webster Avenue Management, LLC, was contacted on May 21, 2012 for an interview. Mr. Strulovitch stated the current owner of the property was Faye Industries Corp. Mr. Strulovitch stated the Site was undeveloped but, used for automobile storage. Mr. Strulovitch was not aware of any other environmental investigations performed at the Site. He has no records or knowledge of any storage tanks located on the site. Mr. Strulovitch provided a copy of a survey completed on January 15, 1997 and updated in November, 2010 (attached in **Appendix F**). The survey notes the Site as “vacant (auto storage)”.

7.2 Occupants

The property is currently vacant with the exception of use of the Site as vehicle storage by a automotive repair facility that operates on an adjacent property. No one was available for an interview during the Site inspection.

7.3 Local Government Officials

A Freedom of Information Act (FOIA) request was sent to the New York City Department of Health (NYCDOH) for information regarding hazardous operations including the registration of fuel storage tanks, past spills, or violations. As of the date of this report, a response had not been received for the FOIA request. Regulatory agencies usually take six to eight weeks to process FOIA requests. Any pertinent information received will be reviewed and forwarded upon receipt. Copies of FOIA requests and regulatory agency responses are included in **Appendix B**.

8.0 FINDINGS AND OPINIONS

Based upon reconnaissance of the subject and surrounding properties, interviews and review of historical records and regulatory agency databases, the following recognized environmental conditions have been identified in connection with the Site.

- ***The past and current use of the adjacent property to the south (up gradient) as a drycleaner.***

The Manifest listings note PCE waste was generated from as early as 1988. Sanborn indicate the property was utilized as a drycleaner as early as 1965, and City Directory Listings indicate Ace Rapid Cleaners operated at the property from 1949 to at least 1997. Due to the shallow groundwater present in the area (approximately 5 to 8 feet below grade), even small spills/releases could contaminate groundwater. The up gradient spill or release of PCE or other hazardous dry cleaning fluids can migrate on to the Site in vapor phase or through groundwater, creating a vapor intrusion condition. Any redevelopment of the Site under the E-designation program administered by the New York City Office of Environmental Remediation would require additional costs for (1) proper handling and disposal of any contaminated soil encountered at the groundwater interface, (2) Site dewatering if contaminated groundwater is detected, (3) installation of a vapor barrier and passive/active sub-slab depressurization system, and (4) adhering to a Site Management Plan for inspection and certification of Engineering and Institutional Controls.

- ***NYSDEC Spill Number 01-04597 is listed for the Amoco gas station located at 655 Flushing Avenue, which is identified as an adjacent property to the west (up gradient).***

The gasoline spill occurred at a location that is up gradient of groundwater flow and several monitoring wells were installed within the sidewalk immediately in front of the Site as a part of the remedial program to monitor the off-Site groundwater contamination. Notes provided within the EDR Radius Map Report indicate groundwater flow direction is routinely to the northeast, towards the Site. The monitoring wells at the Amoco station are gauged and sampled on a quarterly basis. The laboratory results of the groundwater samples have repeatedly shown high levels of MTBE and BTEX over the last 10 years.

The up gradient spill of gasoline can migrate on to the Site in vapor phase or through groundwater, creating a vapor intrusion condition. Any redevelopment of the Site under the E-designation program administered by the New York City Office of Environmental Remediation would require additional costs for (1) proper handling and disposal of any contaminated soil encountered at the groundwater interface, (2) Site dewatering if gasoline contaminated groundwater is detected, (3) installation of a vapor barrier and passive/active sub-slab depressurization system, and (4) adhering to a Site Management Plan for inspection and certification of Engineering and Institutional Controls.

8.1 Additional Environmental Issues

Lot 3 has been assigned an Air and Hazmat little “E” restriction. The Site has been assigned E-designation (E-238) for Air Quality-Natural Gas Heat & Hot Water as well as Exhaust Stack Location Limitations (Air-E) and Hazardous Materials Phase I and Phase II Testing Protocol (Hazmat-E) as part of the Broadway Triangle Rezoning enacted in December of 2009 (CEQR No. 09HPD019K). An E-designation does not interfere with the present use of the site; however E-designations do prevent the release of building permits subject to a detailed environmental review and release by the NYC Office of Environmental Remediation. Such release may require a full subsurface investigation, remedial and health and safety planning, implementation of a remedial program and documentation that the remedial program was completed during redevelopment of the property.

Additional information regarding “E” sites can be found on the New York City Office of Environmental Remediation website:

http://www.nyc.gov/html/oer/html/e_designation/e_designation.shtml.

9.0 CONCLUSIONS AND RECOMMENDATIONS

EBC performed a Phase I Environmental Site Assessment in conformance with the scope and limitations as described under ASTM Practice E1527-05 for the property identified as Block 2272, Lot 3 in Brooklyn, New York. Any exceptions to, or deletions from, this practice are described in **Section 1.4** of this report. *This assessment has revealed the following recognized environmental conditions in connection with the Site:*

- *The past and current use of the adjacent property to the south (up gradient) as a drycleaner.*
- *NYSDEC Spill Number 01-04597 is listed for the Amoco gas station located at 655 Flushing Avenue, which is identified as an adjacent property to the west (up gradient).*

EBC recommends performing a Phase II Subsurface Investigation to determine if the use of the adjacent property to the south as a drycleaner and NYSDEC Spill Number 01-04597 (gasoline spill) has negatively impacted the Site. The Phase II Subsurface Investigation should include the collection and laboratory analysis (VOCs via EPA Method 8260) of groundwater samples from each of the monitoring wells located within the sidewalk immediately in front of the Site, and the installation of several temporary monitoring wells along the south property line to collect groundwater samples for laboratory analysis of VOCs via EPA Method 8260. Soil samples should be retained from soil borings performed within each of the groundwater sampling locations if evidence of soil contamination is encountered.

However, it should be noted that nearly any development scenario for the Site is subject to the E-designation Environmental Review Program administered by the New York City Office of Environmental Remediation (OER) due to the hazardous materials “E” designation assigned to Lot 3. If the Site is to be redeveloped in any way that requires obtaining NYCDOB building permits, EBC recommends performing the typical OER Phase II investigation/sampling requirements for hazmat “E” sites as shown below.

- Ground penetrating radar (GPR) survey to identify underground storage tanks, buried drums, or other subsurface waste disposal areas.

- Collection and laboratory analysis of surface soil samples (0-2 feet) for volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs), target analyte list (TAL) metals, PCBs and pesticides.
- Collection and laboratory analysis of subsurface soil samples (from 2 feet below the deepest basement level) for VOCs, SVOCs, TAL metals, PCBs and pesticides.
- Collection and laboratory analysis of groundwater samples for VOCs, SVOCs, TAL metals (filtered and unfiltered), PCBs and pesticides.
- Collection and laboratory analysis of soil gas samples for laboratory analysis of VOCs via EPA Method TO-15.

10.0 DEVIATIONS

This Phase I ESA was conducted in accordance with the scope and limitations of the American Society for Testing and Materials (ASTM) Standard E 1527-05 (Standard Practices for Environmental Site Assessment: Phase I Environmental Site Assessment Process) and 40 CFR Part 312 (Standards and Practices for All Appropriate Inquiry; Final Rule). Excluding additional services outlined in Section 11.0, there were no deviations or deletions from this practice.

11.0 ADDITIONAL SERVICES

EBC has included, in addition to those items outlined by ASTM E 1527-05, a general evaluation of radon impact potential based on USEPA maps.

12.0 REFERENCES

Standard practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process, ASTM Standard E 1527-05

All Appropriate Inquiry, Final Rule, 40 CFR Part 312

13.0 SIGNATURE OF ENVIRONMENTAL PROFESSIONAL

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in Section 312.10 of 40 CFR 312. I have the specific qualifications based on education, training and experience to assess a property of the nature, history and setting of the Site. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR 312.

**Re: Freedom of Information Request
207-205 Harrison Avenue & 14-22 Bartlett Street,
Brooklyn, NY 11206
Block 2272, Lot 3**

Dear Sir or Madam:

Environmental Business Consultants (EBC) has been retained to prepare a Phase I Environmental Site Assessment for the properties located at the above referenced addresses (Block 2272, Lot 3 in Brooklyn).

We are requesting available copies of environmental files, records, and memoranda concerning the property. This information should include: 1) past and present underground storage tank registration(s); 2) reported spills or releases of hazardous substances; 3) generation, storage, treatment, or disposal of hazardous substances; 4) past or present groundwater, surface water, and soil investigations; 5) environmental permits/violations.

We will gladly pay copying costs.

Please advise if this request can be accommodated in an expedient manner. We would like to schedule an appointment to copy the file/records if this is not possible. Feel free to call with any questions or if additional information is needed to respond to this request.

Very truly yours,

Dominick Mosca
Environmental Scientist

THIS INDENTURE, made the 17th day of March, nineteen hundred and eighty-two, between THE CITY OF NEW YORK, a municipal corporation, having its principal office at the City Hall, Borough of Manhattan, City and State of New York, the first party and

~~FAYE INDUSTRIES, located at 527 Bedford Avenue, Brooklyn N.Y. 11211~~

FAYE INDUSTRIES CORPORATION, a domestic corporation having a place of business at 527 Bedford Avenue, Brooklyn N.Y. 11211, hereinafter designated as the second party.

WHEREAS, the Board of Estimate of The City of New York, by resolution adopted on the 24th day of September, 1981 (Calendar No. 135), and after the appraisal under the direction of said Board, duly ordered and directed the sale at public auction of the premises therein and hereinafter described for the minimum or upset price of

THREE THOUSAND DOLLARS (3,000.00) and

WHEREAS, after advertisement in the manner provided by law, said premises were duly sold by and under the direction of the Deputy Commissioner of the Division of Real Property at public auction at the time and place set forth in such advertisement for the sum of

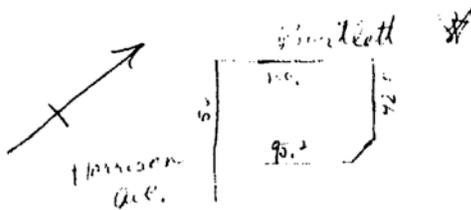

2,722 FOUR THOUSAND EIGHT HUNDRED (4,800.00) DOLLARS

3 that being the highest bid therefor at said sale,

NOW, THEREFORE, WITNESSETH: That the first party, in consideration of the sum of FOUR THOUSAND EIGHT HUNDRED (4,800.00) DOLLARS

lawful money of the United States, paid by the second party, does hereby grant and release unto the second party, the heirs or successors and assigns of the second party forever,

ALL that certain piece or parcel of land, together with any improvements thereon, situate, lying and being in the Borough of BROOKLYN, City and State of New York, designated on the Tax Map of the City of New York, for the Borough of BROOKLYN, as said Tax Map was on January 17, 1978 Block 2272 Lot 3

TO HAVE AND TO HOLD the premises herein granted unto the second party, the heirs or successors and assigns of the second party forever.

Subject to: (1) Any state of facts an accurate survey would show; (2) The rights, if any, of tenants and persons in possession, if any; (3) All violations of any local, State or The Federal Government having jurisdiction thereof existing at the time of closing; (4) Building restrictions and to zoning regulations in force at the time of the delivery of the deed and to covenants, restrictions of record, and easements affecting the subject property; (5) The trust fund provisions of section thirteen of the Lien Law; and (6) All pending assessments, if any, which the second party will assume; and (7) All provisions of The Standard Terms and Conditions of Sale in force and effect at the time of the Sale that are applicable.

In the event of the acquisition by The City of New York by condemnation or otherwise of any part or portion of the above premises lying within the bed of any street, avenue, parkway, expressway, park, public place or catch-basin as said street, avenue, parkway, expressway, park, public place or catch-basin is shown on the present City Map, the party of the second part the heirs or successors and assigns of the party of the second party, shall only be entitled as compensation for such acquisition by The City to the Amount of one dollar, and shall not be entitled to compensation for any buildings or structures erected thereon within the lines of the street, avenue, parkway, expressway, park, public place or catch-basin so laid out and acquired. This covenant shall be binding upon and run with the land and shall endure until the City Map is changed so as to eliminate from within the lines of said street, avenue, parkway, expressway, park, public place or catch-basin any part or portion of the premises and no longer.

IN WITNESS WHEREOF, the party of the first part has caused these presents to be subscribed to by the Deputy Commissioner of the Division of Real Property and by the City Clerk and its corporate seal to be hereunto affixed the day and year first above written.

THE CITY OF NEW YORK

By [Signature] Commissioner of the Division of Real Property Deputy Commissioner of General Services, Division of Real Property

S... 1068... 946

THIS INDENTURE, made the day of April, nineteen hundred and seventy nine BETWEEN

CATANIA REALTY CORP., A New York corporation having its office at 842 Broadway, New York, N.Y.

party of the first part, and

JOSE GONZALEZ, residing at 215 Avenue F, Brooklyn, N.Y.

party of the second part,

WITNESSETH, that the party of the first part, in consideration of Ten Dollars and other valuable consideration paid by the party of the second part, does hereby grant and release unto the party of the second part, the heirs or successors and assigns of the party of the second part forever.

ALL that certain plot, piece or parcel of land, with the buildings and improvements thereon erected, situate, lying and being in the Borough of Brooklyn, County of Kings, City and State of New York, known as a part of lots 34 and 35 on map entitled "Map of Land of Peter Delmonico filed October 1849, 7th & 9th Wards and which lots when taken together are more particularly bounded and described as follows:

BEGINNING at a point on the northwesterly side of Whipple Street distant 27 feet 7 inches northwesterly from the corner formed by the intersection of the northwesterly side of Whipple Street with the northeasterly side of Flushing Avenue; thence NORTHWESTERLY at right angles to Whipple Street 100 feet; thence NORTHEASTERLY parallel with Whipple Street 37 feet 6 inches; thence SOUTHEASTERLY at right angles to Whipple Street and part of the distance through a party wall 100 feet to the northwesterly side of Whipple Street; and thence SOUTHWESTERLY along the northwesterly side of Whipple Street 37 feet 6 inches to the point of BEGINNING Known as 5 Whipple Street.

PARCEL ... BEGINNING at the corner formed by the intersection of the southeasterly side of Bartlett Street with the northeasterly side of Harrison Avenue; running thence northeasterly along the southeasterly side of Bartlett Street 100 feet to the northwesterly side of lot 24 on "Map of property in 7th & 9th Wards of Brooklyn belonging to Peter A. Delmonico surveyed July 1849 & filed 10/21/1814 as Map 131 Vol 15, p24 in Kings County Register's Office; thence southeasterly parallel with Harrison Avenue and along Lot 24 on said map 42 feet 8 inches; thence southerly along said lot 8 feet 9 inches to Lot 28 on said map; thence southwesterly parallel with Bartlett Street and along lots 27 and 28 on said map 95 feet 2 inches to the northeasterly side of Harrison Avenue; thence northwesterly along the northeasterly side of Harrison Avenue 50 feet to the point or place of BEGINNING.

24,

Being same as deed recorded on Reg 334 page 1752 SUBJECT TO all all liens and encumbrances and violations Parcel 2 known as 22 Bartlett Street & 205-207 Harrison Avenue TOGETHER with all right, title and interest, if any, of the party of the first part in and to any streets and roads abutting the above described premises to the center lines thereof; TOGETHER with the appurtenances and all the estate and rights of the party of the first part in and to said premises; TO HAVE AND TO HOLD the premises herein granted unto the party of the second part, the heirs and assigns of the party of the second part forever.

AND the party of the first part covenants that the party of the first part has not done or suffered anything whereby the said premises have been encumbered in any way whatever, except as aforesaid.

AND the party of the first part, in compliance with Section 13 of the Lien Law, covenants that the party of the first part will receive the consideration for this conveyance and will hold the right to receive such consideration as a trust fund to be applied first for the purpose of paying the cost of the improvement and will apply the same first to the payment of the cost of the improvement before using any part of the total of the same for any other purpose.

The word "party" shall be construed as if it read "parties" whenever the sense of this indenture so requires.

IN WITNESS WHEREOF, the party of the first part has duly executed this deed the day and year first above written.

REC. 144 PAGE 356

THIS INDENTURE, made the 18th day of May, nineteen hundred and sixty-six, BETWEEN

SYLVIA ZALISKY, Residing at 1073 Eastern Parkway, Brooklyn, New York.

party of the first part, and

EMELKAY CONSTRUCTION CORP. a domestic corporation having its principal office at 117 Siegel Street, Brooklyn, N.Y.

party of the second part.

WITNESSETH, that the party of the first part, in consideration of Ten Dollars and other valuable consideration paid by the party of the second part, does hereby grant and release unto the party of the second part, the heirs or successors and assigns of the party of the second part forever,

ALL that certain plot, piece or parcel of land, with the buildings and improvements thereon erected, situate, lying and being in the Borough of Brooklyn, County of Kings, City and State of New York, known as Nos. 22 Bartlett Street and 205-207 Harrison Avenue; known and distinguished on a certain map entitled "Map of property in Seventh and Ninth Wards of Brooklyn, belonging to Peter A. Delmonico, surveyed July, 1849, as Map No. 131 as and by the lots Nos. 25 and 26, which said lots taken together according to said map, are bounded and described as follows, to wit:-

BEGINNING at the corner formed by the intersection of the southeasterly side of Bartlett Street; with the northeasterly side of Harrison Avenue; running thence northeasterly along the southeasterly side of Bartlett Street, one hundred feet to the northwesterly side of Lot No. 24 on said map; thence southeasterly parallel with Harrison Avenue and along lot No. 24 on said map forty two feet and eight inches; thence southerly along said lot No. 24, eight feet and nine inches to lot No. 28 on said map; thence southwesterly parallel with Bartlett Street and along lots No. 27 and 28 on said map, ninety-five feet and two inches, to the northeasterly side of Harrison Avenue, and thence northwesterly along the northeasterly side of Harrison Avenue fifty feet to the point or place of beginning. Be said several distances more or less. Premises being known as 22 Bartlett Street and 205-207 Harrison Avenue, Brooklyn, New York.

Be the said distance and dimensions more or less.

SUBJECT to any state of facts an accurate survey may show.

SUBJECT TO present tenancies.

TOGETHER with all right, title and interest, if any, of the party of the first part in and to any streets and roads adjoining the above described premises to the center lines thereof; TOGETHER with the appurtenances and all the estate and rights of the party of the first part in and to said premises; TO HAVE AND TO HOLD the premises herein granted unto the party of the second part, the heirs or successors and assigns of the party of the second part forever. SUBJECT to a first mortgage now a lien on the premises reduced to \$33,538.09; and to a lien for oil burner installation reduced to \$6,282.10 and to a purchase money mortgage filed simultaneously herewith.

AND the party of the first part covenants that the party of the first part has not done or suffered anything whereby the said premises have been encumbered in any way whatever, except as aforesaid.

AND the party of the first part, in compliance with Section 13 of the Lien Law, covenants that the party of the first part will receive the consideration for this conveyance and will hold the right to receive such consideration as a trust fund to be applied first for the purpose of paying the cost of the improvement and will apply the same first to the payment of the cost of the improvement before using any part of the total of the same for any other purpose.

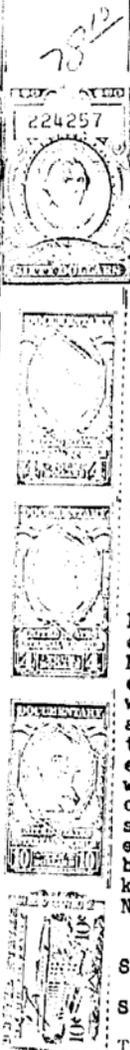

The word "party" shall be construed as if it read "parties" whenever the sense of this indenture so requires.

IN WITNESS WHEREOF, the party of the first part has duly executed this deed the day and year first above written.

IN PRESENCE OF:

Joseph H. [Signature]

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1928 through 2005. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 100 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

| <u>Year</u> | <u>Source</u> | <u>TP</u> | <u>Adjoining</u> | <u>Text Abstract</u> | <u>Source Image</u> |

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

TARGET PROPERTY INFORMATION

ADDRESS

207 HARRISON AVENUE
BROOKLYN, NY 11206

COORDINATES

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS NFRAP site List

CERC-NFRAP: Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

A review of the CERC-NFRAP list, as provided by EDR, and dated 12/28/2011 has revealed that there are

EXECUTIVE SUMMARY

2 CERC-NFRAP sites within approximately 0.5 miles of the target property.

Federal RCRA CORRACTS facilities list

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 08/19/2011 has revealed that there are 2 CORRACTS sites within approximately 1 mile of the target property.

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 03/15/2012 has revealed that there are 5 RCRA-LQG sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/15/2012 has revealed that there are 4 RCRA-SQG sites within approximately 0.25 miles of the target property.

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 03/15/2012 has revealed that there are 7 RCRA-CESQG sites within approximately 0.25 miles of the target property.

State and tribal landfill and/or solid waste disposal site lists

SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the list.

A review of the SWF/LF list, as provided by EDR, and dated 04/11/2012 has revealed that there are 2 SWF/LF sites within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

State and tribal leaking storage tank lists

LTANKS: Leaking Storage Tank Incident Reports. These records contain an inventory of reported leaking storage tank incidents reported from 4/1/86 through the most recent update. They can be either leaking underground storage tanks or leaking aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills

A review of the LTANKS list, as provided by EDR, and dated 03/29/2012 has revealed that there are 30 LTANKS sites within approximately 0.5 miles of the target property.

HIST LTANKS: A listing of leaking underground and aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills. In 2002, the Department of Environmental Conservation stopped providing updates to its original Spills Information Database. This database includes fields that are no longer available from the NYDEC as of January 1, 2002. Current information may be found in the NY LTANKS database.

A review of the HIST LTANKS list, as provided by EDR, and dated 01/01/2002 has revealed that there are 34 HIST LTANKS sites within approximately 0.5 miles of the target property.

State and tribal registered storage tank lists

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Environmental Conservation's Petroleum Bulk Storage (PBS) Database

A review of the UST list, as provided by EDR, and dated 04/03/2012 has revealed that there are 15 UST sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

AST: The Aboveground Storage Tank database contains registered ASTs. The data come from the Department of Environmental Conservation's Petroleum Bulk Storage (PBS) Database.

A review of the AST list, as provided by EDR, and dated 04/03/2012 has revealed that there are 9 AST sites within approximately 0.25 miles of the target property.

CBS AST: Chemical Bulk Storage Database. Registration data collected as required by 6 NYCRR Part 596. It includes facilities storing hazardous substances listed in 6 NYCRR Part 597, in aboveground tanks with capacities of 185 gallons or greater, and/or in underground tanks of any size. Includes facilities registered (and closed) since effective date of CBS regulations (July 15, 1988) through the date request is processed.

A review of the CBS AST list, as provided by EDR, and dated 01/01/2002 has revealed that there is 1 CBS AST site within approximately 0.25 miles of the target property.

State and tribal voluntary cleanup sites

VCP: Voluntary Cleanup Agreements. The voluntary remedial program uses private monies to get contaminated sites remediated to levels allowing for the sites' productive use. The program covers virtually any kind of site and contamination.

A review of the VCP list, as provided by EDR, and dated 03/29/2012 has revealed that there are 3 VCP sites within approximately 0.5 miles of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Lists of Registered Storage Tanks

HIST UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Environmental Conservation's Petroleum Bulk Storage (PBS) Database

A review of the HIST UST list, as provided by EDR, and dated 01/01/2002 has revealed that there are 8 HIST UST sites within approximately 0.25 miles of the target property.

Records of Emergency Release Reports

NY Spills: Data collected on spills reported to NYSDEC. is required by one or more of the following: Article 12 of the Navigation Law, 6 NYCRR Section 613.8 (from PBS regs), or 6 NYCRR Section 595.2 (from CBS regs). It includes spills active as of April 1, 1986, as well as spills occurring since this date.

A review of the NY Spills list, as provided by EDR, and dated 03/29/2012 has revealed that there are 17 NY Spills sites within approximately 0.125 miles of the target property.

NY Hist Spills: This database contains records of chemical and petroleum spill incidents. Under State law, petroleum and hazardous chemical spills that can impact the waters of the state must be reported by the spiller (and, in some cases, by anyone who has knowledge of the spills). In 2002, the Department of Environmental Conservation stopped providing updates to its original Spills Information Database. This database includes fields that are no longer available from the NYDEC as of January 1, 2002. Current information may be found in the NY SPILLS database.

A review of the NY Hist Spills list, as provided by EDR, and dated 01/01/2002 has revealed that there are 11 NY Hist Spills sites within approximately 0.125 miles of the target property.

Other Ascertainable Records

RCRA-NonGen: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA-NonGen list, as provided by EDR, and dated 03/15/2012 has revealed that there are 16 RCRA-NonGen sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

HSWDS: The List includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity. The latest version of the study is frozen in time. The sites on the study will not automatically be made superfund sites, rather each site will be further evaluated for listing in the registry. So overtime they will be added to the registry or not.

A review of the HSWDS list, as provided by EDR, and dated 01/01/2003 has revealed that there is 1 HSWDS site within approximately 0.5 miles of the target property.

| BORDEN CHEMICAL | 56 NOSTRAND AVE. | WSW 1/4 - 1/2 (0.346 mi.) | W163 | 720 |

MANIFEST: Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a TSD facility.

A review of the MANIFEST list, as provided by EDR, and dated 01/10/2012 has revealed that there are 27 MANIFEST sites within approximately 0.25 miles of the target property.

EDR PROPRIETARY RECORDS

EDR Proprietary Records

Manufactured Gas Plants: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the Manufactured Gas Plants list, as provided by EDR, has revealed that there are 5 Manufactured Gas Plants sites within approximately 1 mile of the target property.

Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

DEC Region: 2
DER Facility ID: 215665
DEC Memo: 3/14/03 REASSIGNED FROM ROMMEL TO VOUGHT. 12/4/03 Reassigned from Vought to Foley. See spill #8401982. See PIN file 4393. HISTORY: Leaks were detected and repaired at the threaded bushings of the piping run in 1984. MWs and an extraction well were installed in 1985. LNAPL was detected in 10 of 11 on-site wells ranging in thickness from trace to approx 1'. A product recovery system(scavenger pumps) was installed and activated. Approx 3000gal of LNAPL was removed. In 1990, the 12X550gal tanks were removed and new 4000gal double-walled tanks, islands and dispensers were installed. Subsequent to the rebuild, four new MWs were installed. Approx 0.06' LNAPL was observed in one well. Tyree had monitored these wells from 1990 to 1995. In July 1995, Tyree also installed three temporary wells in the sidewalk across Bartlett St. No BTEX or MTBE above GW standards was detected in these. In Oct 1997, Baltec installed MW-5 which contained VOCs above standards. The site transitioned to Delta in April 1999. In May 1999, an EFR event was conducted on MW-3. Approx 700gal of impacted GW was treated(approx 9lbs VOCs removed). The results of the EFR event indicated that the residual contamination was no longer significantly volatile and therefore indicative of an older release. In July 2001, LNAPL was observed in tank mat well TW-1 during routine monitoring events at a thickness of 0.41' and was determined to be fresh. Spill #0114597 was reported. The LNAPL may have been related to a leaking impact valve at dispenser 5/6 which was discovered 6/11/01 and repaired 6/12/01. LNAPL was last detected in TW-1 in 1/02. An EFR program was initiated in 7/01. Between 7/01 and 2/02, nine EFR events were conducted on tank mat well TW-1. Approx 1gal of LANPL, 4116gal water and a total mass of 255lbs of VOCs were recovered and treated. Between 3/6/02 and 4/24/02, six MWs were installed and VOCs in excess of soil cleanup objectives were detected in all samples. Between 9/22/03 and 10/27/03, spill containment was installed around the submersible pumps, deep spill containment boxes were installed under the dispensers, 50' of steel piping was replaced with double walled fiberglass, anad leak detection was installed at each spill containment box and tied to the Veeder Root. 12/8/03 Received Line Closure and Dispenser Upgrade Report (Delta, 12/4/03). Depth to groundwater approx 6-7'bgs. VOCs were not detected above TAGM cleanup objectives in any of the soil samples collected. Soil samples were collected from beneath the three dispensers(2.5-3.5'bgs). Three post-ex soil samples were collected along the product piping(3-3.5'bgs). Four samples were collected during the sump upgrade(2.5-3'bgs). 3/19/04 Received 2Q, 3Q, and 4Q 2002 reports. Dissolved BTEX and MTBE at high concentrations. 0.01ft LNAPL detected in MW-3 10/8/02, 0.13ft in MW-3 on 7/17/02 and 4/15/02. 5/4/04 Overdue for tightness test since 5/1/02. Spartan Petroleum Corp. was previous owner. 5/25/04 Keyspan was installing 300ft of natural gas line and noticed a gasoline odor in the soil they excavated. Reported spill #0402082. See notes. 5/26/04 Stip mailed out and due back 6/28/04. Two Pfizer buildings, one located across Flushing Ave and one across Bartlett St. The one on Bartlett has a Charter School and

S105141059

playground area south of school(crossgradient of station). Delta was on-site to collect endpoints from Keyspan excavation. One of four (composite) endpoints returned with VOCs in excess of soil cleanup objectives. 5/28/04 1Q03, 2Q03, 3Q03, 4Q03 and 1Q04 monitoring reports submitted. 1Q04 BTEX from ND(MW-7,12,A) to 35,740ppb(MW-F). MTBE from ND(MW-6,7,12) to 39,300ppb(MW-9). 6/29/04 Stip executed by T. Kunkel. 7/6/04 Passing tank test results submitted. Investigation Report due 8/28/04. 8/17/04 2Q04 monitoring report received. BTEX from ND(MW-6,7,12,A) to 62870ppb(MW-F). MTBE from ND(MW-6,7,12) to 18500ppb(MW-9). 8/31/04 Received Investigation Summary Report. Delineation complete. RAP due 10/27/04. 11/18/04 A. Lapine update- On November 11, 12, and 15th, Delta collected ground water samples for geochemical analysis in support of a potential Biostimulation Remedial Action Plan. The suite of analytes are extensive, so the laboratory analysis usually takes a few weeks. Awaiting a status from the lab and plan on a requesting a rushed turnaround. Will expedite the preparation of the report. 1/14/05 Received RAP for biological stimulation. MW-1, MW-5, MW-11 and MW-13 are proposed to be used to inject nitrate/sulfate solutions into the subsurface. A workplan describing the specific application of nitrate and sulfate solutions with regard to quantity, concentration and expected rate of injection, as well as a future monitoring program to determine a level of effectiveness will be submitted upon approval of the RAP. An exposure assessment was conducted identifying chemicals of concern(COC), identifying potential receptors and exposure pathways, determining complete exposure pathways, estimating COC concentrations at points of exposure(POE) for each complete pathway, estimating potential baseline exposure at POEs and estimating site-specific target levels(SSTLs). The assessment concluded concentrations of BTEX and MTBE are protective of potential receptors. Delta conducted geochemical sampling from 11/11/04 to 11/23/04. Samples from MW-6 and MW-7 were from upgradient to assess conditions outside of the impacted zone. Samples from MW-4, MW-5 and MW-11 were within the impact zone. The evidence suggests: Dissolved oxygen levels are depressed in the source zone and recover in downgradient wells. ORP readings support depletion of electron acceptors in the source zone, as compared to upgradient background. Nitrate concentrations are depleted in the source zone, as compared to upgradient and downgradient(nitrate-reducing activity). Concentrations of dissolved manganese increases in the source zone(manganese-reducing activity). Concentrations of ferrous iron increases in the source zone(iron-reducing activity). Concentrations of sulfate are depleted in the source zone(sulfate-reducing activity). Highly elevated concentrations of dissolved methane in the impacted zone indicate methanogenic biological activity. Introduction of exogenous nitrate and sulfate solutions (by injection into existing wells), will provide for additional electron acceptors to increase the rate of biodegradation. 3/22/05 Approved RAP which is to be implemented by 7/21/05. Delta to submit workplan outlining specific application of nitrate and sulfate solutions with regard to quantity, conc, and rate of injection in addition to OMMP. 4/27/05 Portfolio meeting- Injection workplan to be submitted 6/05, O&M 7/05, RAP implementation by 9/05. 7/15/05 4Q04- DTW 5 to 7'bgs, northeast. No LNAPL present. BTEX from ND(MW-6,7,14,15,16) to 51170ppb(MW-13). MTBE from ND(MW-6,7,13,14,16) to 3170ppb(MW-9). 11/8/05: Reviewed quarterly report dated October 27, 2005. Twelve of 16 wells were sampled on January 27, 2005. No free product. Max BTEX is 8,950 ppb (MW12), max

MTBE 702ppb (MW12). Contamination in all on-site wells. Increased BTEX concentration in MWs-2,12,& 17. 11/25/05 2Q05 - Fifteen wells sampled on 4/29/05. Max BTEX 66,750 (MW13), max MTBE 1,210 (MW10). Fluctuating contaminant trends. 3Q05 - DTW 6.10-7.66' bgs. BTEX from ND(MW-6,7,14,15) to 58980ppb(MW-13). MTBE from ND(MW-6,7,14) to 1000ppb(MW-10). 3/3/06 All 16 wells sampled 10/20/05. MW-8 was paved over. DTW 5.36-7.79' bgs. No LNAPL present. BTEX from ND(MW-6,7,14,15) to 23770ppb(MW-13). MTBE from ND(MW-6,7,14) to 816ppb(MW-9). Off-site wells are non-detect. Evaluating biostimulation as remedial strategy. 3/16/06 Meeting held with BP and Delta. K. Endriss of BP was questioning biostimulation as a strategy. There will be an internal review prior to submitting RAP and OM&M Plan. 6/8/2006 - Feng - project reassigned to RjFeng. (RjF) 9/22/2006 - Feng - Quarterly Monitoring Report, 1Q2006, 8/17/2006, by Delta. Groundwater sampling and gauging on 1/30/2006. 14 of the 16 monitoring wells were sampled. MW-6 was not sampled due to an obstruction. MW-16 was not sampled due to an insufficient volume of water in the well. Groundwater flows to east at the depth of 5.37' to 7.67' bg. MW-1, 128.6 ppb BTEX, 7.5 ppb MTBE. MW-2, 8,513 ppb BTEX (381 ppb B, 2,670 ppb T, 382 ppb E, 5,080 ppb X), 63.6 ppb MTBE. MW-3, 4,239 ppb BTEX (3,790 ppb B, 102 ppb T, 48 ppb E, 299 ppb X), 591 ppb MTBE. MW-4, 232 ppb BTEX, 13.6 ppb MTBE. MW-5, 2,801 ppb BTEX, 57.2 ppb MTBE. MW-7, ND. MW-9, 974.8 ppb BTEX, 2,270 ppb MTBE. MW-10, 263.6 ppb BTEX, 163 ppb MTBE. MW-11, 8,220 ppb BTEX (1,920 ppb B, 1,300 ppb T, 1,330 ppb E, 3,670 ppb X), 788 ppb MTBE. MW-12, 4,933 ppb BTEX (1,780 ppb B, 480 ppb T, 573 ppb E, 2,100 ppb X), 39.2 ppb MTBE. MW-13, 15,550 ppb BTEX (4,200 ppb B, 5,040 ppb T, 1,190 ppb E, 5,120 ppb X), 67.8 ppb MTBE. MW-14, ND. MW-15, ND. MW-17, 974.2 ppb BTEX, 43.1 ppb MTBE. (RjF) 9/28/2006 - Feng - Portfolio meeting with BP and Delta. RAP plan changed. Delta began engineering design/construction of the automatic bio-stimulation system. Sulfate injection plan and O&M plan will be submitted. Sulfate concentration will be monitored downgradient which should not exceed the groundwater standard. (RjF) 12/6/2006 - Feng - Quarterly Monitoring Report, 2Q2006, 11/27/2006, by Delta. Groundwater sampled and gauged 5/5/2006. 14 of 16 monitoring wells were sampled. MW-6 was not sampled due to an obstruction. MW-16 was not sampled due to insufficient volume of water in the well. DTW 4.9' to 7.24'. Flows northeast. No LNAPL. BTEX range ND to 45,980 ppb (MW-13). MTBE range ND to 2,660 ppb (MW-9). (RjF) 6/12/2007 - Feng - Quarterly Monitoring Report, 3Q2006, 1/29/2007. Groundwater sampled 7/24/2006. 14/16 monitoring wells were sampled. DTW 5.52' to 7.21' bg. No LNAPL. Flows to northeast. MW-1, 88.3 ppb BTEX, 7.9 ppb MTBE. MW-2, 6,765 ppb BTEX, 30 ppb MTBE. MW-3, 4,027 ppb BTEX, 198 ppb MTBE. MW-4, 104 ppb BTEX, 8.5 ppb MTBE. MW-5, 980 ppb BTEX, 29.3 ppb MTBE. MW-6, not accessible. MW-7, ND. MW-9, 589 ppb BTEX, 434 ppb MTBE. MW-10, 159 ppb BTEX, 124 ppb MTBE. MW-11, 3,506 ppb BTEX, 163 ppb MTBE. MW-12, 4,550 ppb BTEX, 50.4 ppb MTBE. MW-13, 23,940 ppb BTEX, 34.2 ppb MTBE. MW-14 and MW-15, ND. MW-16, not enough water. MW-17, 807 ppb BTEX, 44.2 ppb MTBE. (RjF) 7/24/2007 - Feng - 4Q2006, 4/30/2007. Groundwater sampled 10/30/2006. 12/15 monitoring wells were sampled. DTW 5.79' to 7.21' bg. Flows to northeast. LNAPL in MW-13 (0.05'). MW-1, 132 ppb BTEX, 4.8 ppb MTBE. MW-2, 28,400 ppb BTEX, 27 ppb MTBE. MW-3, 3,627 ppb BTEX, 253 ppb MTBE. MW-4, 203 ppb BTEX, 5.1 ppb MTBE. MW-5, 707 ppb BTEX, 7.7 ppb MTBE. MW-6, not accessible. MW-7, 209 ppb BTEX, 14.3 ppb MTBE. MW-9, 358 ppb BTEX, 139 ppb MTBE. MW-11, 264 ppb BTEX, 112 ppb MTBE. MW-12, 5,312 ppb BTEX, 496 ppb MTBE. MW-13, 762 ppb BTEX, 53.8 ppb MTBE. MW-14, MW-15,

ND. MW-16 and MW-17, not accessible. 1Q2007, 5/7/2007. Groundwater sampled 1/5/2007. 15/16 monitoring wells were sampled. DTW 5.71' to 8.98' bg. Flows to northeast. No LNAPL. MW-1, 161 ppb BTEX, 4.4 ppb MTBE. MW-2, 29,260 ppb BTEX, 19.8 ppb MTBE. MW-3, 149 ppb BTEX, 639 ppb MTBE. MW-4, 277.5 ppb BTEX, 6.1 ppb MTBE. MW-5, 2,013 ppb BTEX, 20.1 ppb MTBE. MW-6, not accessible. MW-7, Nd. MW-9, 837 ppb BTEX, 285 ppb MTBE. MW-10, 2.51 ppb BTEX, 108 ppb MTBE. MW-11, 4,532 ppb BTEX, 330 ppb MTBE. MW-12, 24,563 ppb BTEX, 1,200 ppb MTBE. MW-13, 2,935 ppb BTEX, 23.8 ppb MTBE. MW-14, MW-15 and MW-16, ND. MW-17, 1,428 ppb BTEX, 24 ppb MTBE. (RJF) 12/12/2007 - Feng - 2Q2007, 8/30/2007. Active Service Station. The monitoring well network was gauged and sampled on 4/4/2007. 15/16 monitoring wells were gauged. DTW 5.31' to 6.81' bg. Flows to northeast. No LNAPL. 14/16 monitoring wells were sampled. BTEX range ND to 12,400 ppb (MW-11). MTBE range ND to 671 ppb (MW-9). (RJF) 1/8/2008 - Feng - 3Q2007, 11/5/2007. Active Service Station. The monitoring well network was gauged and sampled on 7/13/2007. 12/16 monitoring wells were gauged. DTW 5.64' to 7.91' bg. Flows to northeast. No LNAPL. 12 monitoring wells were sampled. BTEX range ND to 40,760 ppb (MW-13). MTBE range ND to 2,040 ppb (MW-3). (RJF) 2/13/2008 - Feng - 4Q2007, 11/19/2007. Active service station. the monitoring well network was gauged and sampled on 10/3/2007. 14/16 monitoring wells were gauged. DTW 6.51' to 7.87' bg. Flows to northeast. No LNAPL. 13 monitoring wells were sampled. BTEX range ND to 8,190 ppb (MW-11). MTBE range ND to 249 ppb (MW-3). (RJF) 3/20/2008 - Feng - Email to K. Endriss (BP) for the status of biostimulation/sulfate solution injection. (RJF) 6/16/2008 - Feng - 1Q2008, 2/15/2008. Active service station. The monitoring well network was gauged and sampled on January 21, 2008. 12 monitoring wells. DTW 5.72' to 7.39' bg. Flows to northeast. No LNAPL. BTEX range ND to 29,200 ppb (MW-13). MTBE range N Dto 470 ppb (MW-3). (RJF) 8/26/2008 - Reviewed the Work Plan Addendum Bio-Stimulation Remediation Pilot Study, dated July 29, 2008, by Delta. The work proposed in this work plan was originally proposed in the approved RAP dated 1/13/2005. A pilot study will be performed to address DEC's concern regarding the application of elevated sulfate concentrations. 784 lbs of magnesium sulfate will be mixed with 1,000 gallons of tap water (75,000 mg/L) will be added into MW-1 by gravity. DTW of all monitoring wells will be gauged immediately after the application. Gauging and sampling of the wells will be performed the day after the application and then on weekly basis for 12 weeks. (RJF) 9/12/2008 - Comments on the Work Plan Addendum Bio-Stimulation Remediation Pilot Study were provided to Delta. 11/10/2008 - 2Q2008, 8/7/2008, by Delta. Active Service station. the monitoring well network was gauged and sampled on 4/25/2008. 14 wells were gauged. No LNAPL. DTW 6.01' to 7.60' bg. Flows to northeast. MW-6 and MW-7 were not found and not gauged. 13 wells were sampled. MW-16 didn't have sufficient volume for sampling. BTEX range ND to 29,100 ug/L (MW-13). MTBE range ND to 1,000 ug/L (MW-9). 10/28/2008 - 3Q2008, 9/29/2008, by EnviroTrac. Active BP service station. The monitoring well network was gauged and sampled on 7/14/2008. 14 wells were gauged. No LNAPL. DTW 5.90' to 7.72' bg. Flows to northeast. 13 wells were sampled. MW-6 and MW-7 couldn't be located. MW-16 has insufficient sample volume. Max benzene 4,500 ug/L (MW-13). Max BTEX 26,200 ug/L (MW-13). Max MTBE 650 ug/L (MW-9). (RJF) 3/4/2009 - 4Q2008, 1/5/2009, by EnviroTrac. Active BP Service Station. The monitoring well network was gauged and sampled on 10/2/008. 14 wells were gauged. NO LNAPL. DTW 5.75' to 8.25' bg. Flows to northeast. 13 wells were sampled. 3 wells were not

sampled, MW-6 and MW-7 were paved over and MW-16 was dry. Max benzene 2,500 ug/L (MW-13). Max BTEX 13,970 ug/L (MW-13). Max MTBE 410 ug/L (MW-9). (RJF) 5/21/2009 - Reviewed Drilling Work Plan, dated 3/31/2009, by Delta. Delta is installing 2 monitoring wells at the site. Proposed MW-18 will be in downgradient instead replacing the two wells across street. Work plan is approved. SHARA due within 90 days, August 21, 2009. (RJF) 1/8/2010 - Reviewed Subsurface Hydrocarbon Assessment Report Addendum, dated 10/16/2009, by Delta. Between June 18 and June 19, 2009, EnviroTrac, on behalf of Atlantic Richfield, advanced two soil borings (MW-18 and MW-19) to 12 feet and 15 feet respectively, using Geoprobe 6620 hollow stem auger and direct push, macro-core sampling unit. 2 soil samples were collected. MW-19 (6-6.5'), NO PID, VOCs ND. MW-19 (14.5-15'), NO PID, VOCs ND. On July 13, 2009, all the wells were gauged and sampled. DTW 5.89' (MW-13) to 7.46' (MW-16). BTEX range ND to 3,450 ug/L (MW-13). MTBE range ND to 470 ug/L (MW-9). MW-18, VOCs ND. MW-19, 0.61 ug/L benzene, 0.61 ug/L total VOCs. The sulfate injection pilot is scheduled for October 21, 22, 2009, and will have a 12-week monitoring plan. (RJF) 6/9/2010 - 4Q2009, 1/17/2010, by EnviroTrac. The monitoring well network was gauged and sampled on 10/6/2009. 16 wells were gauged. NO LNAPL. DTW 6.22 - 7.58' bg. Flows to northeast. 15 wells were sampled. MW-16 with insufficient water, not sampled. Max benzene 2,600 ug/L (MW-11). Max BTEX 4,280 ug/L (MW-11). Max MTBE 280 ug/L (MW-3). 1Q2010, 4/9/2010, by EnviroTrac. The monitoring well network was gauged and sampled on 1/15/2010. 16 monitoring wells were gauged. NO LNAPL. DTW 6.19 - 7.92' bg. Flows to northeast. 15 wells were sampled. MW-16 with insufficient water, not sampled. Max benzene 3,900 ug/L (MW-3). Max BTEX 5,160 ug/L (MW-11). Max MTBE 810 ug/L (MW-3). 2Q2010, 5/19/2010, by EnviroTrac. The monitoring well network was gauged and sampled on 4/9/2010. 16 wells were gauged. NO LNAPL. DTW 5.59 - 7.33' bg. Flows to northeast. 15 wells were sampled. MW-16 not enough water, not sampled. Max benzene 3,900 ug/L (MW-13). Max BTEX 21,780 ug/L (MW-13). Max MTBE 530 ug/L (MW-3). 6/21/2010 - Enhanced Bioremediation Pilot Summary and Full Scale Application Work Plan, dated 4/1/2010, by Delta. On 10/20/2009, pre-application groundwater monitoring including gauging for DTW, well depth, sampling for BTEX, MTBE, sulfate and sulfide. On 10/21, 22/2009, a 1,000 gallon of 28,000 mg/L sulfate solution was added to MW-1. Post-application groundwater monitoring for sulfate and sulfide was conducted, 10/23, 11/4, 11/12, 11/20, 11/24, 12/4, 12/11, 12/16, 12/22, 12/29/2009, 1/15/2010 and 2/19/2010. Some orders of magnitude of sulfate was detected in MW-2, MW-4, MW-12 and MW-13. The concentration of sulfate up to 27,000 mg/L was dissipated in MW-1 within 120 days. Delta proposes to apply full scale, adding 500 gallon MgSO4 at 28,000 mg/L into MW-1, MW-3, MW-5 and MW-13 for 12 events in 36 months, namely quarterly application. Gauging and monthly sampling will be conducted. Reviewed the quarterly report. comments to Delta. MW-2, MW-4, MW-12 and MW-13 seem not show effectiveness on remediating the dissolved as the BTEX/MTBE concentration is still remaining the similar level after the pilot application. And question if sulfate addition is still an appropriate remedy. 6/28/2010 - approve the full scale application work plan, dated 4/1/2010. The work plan implementation and results shall be included in the quarterly reports, and a report summarize the remedy shall be submitted after the 36-months application activities. 8/6/10 Spill case temporarily transferred from June Feng to J.A. Maisonave. - JAM 4/11/2011 - Spill transferred back to JFeng. 6/27/2011 - received

Environmental Interest/Information System

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D008
Waste name: LEAD

Waste code: D011
Waste name: SILVER

Waste code: U002
Waste name: ACETONE (I)

Waste code: B001
Waste name: B001

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that

these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

DEC Memo: Prior to Sept, 2004 data translation this spill Lead_DEC Field was "SUN" 1/2/2004 Reassigned from Rommel to Sun. (Also refer to Spill # 93-03325 for this site) 07/08/04 This spill is closed. To be investigated and remediated under Spill #93-03325. 01/12/06-The spill is reopened since this spill was caused by gasoline, while Spill #93-03325 was caused by #6 fuel oil. 1/12/2006 - Feng - Called Pfizer Inc and spoke with Manuel Lopez (718-780-0947). He remembers that they have been sent the some report to DEC. He would contact his engineer and find the information DEC need and get back to DEC. (RJF) 1/12/2006 - Feng - Faxed the two spill report to Samantha Plourde (718-780-8380) and request to send 1) tank closure report, 2) any other site investigation/site assessment, to DEC. (RJF) 1/27/2006 - Feng - Reviewed the Tank Closure Report of 12/10/1999, sent on 1/20/2006 by Pfizer. These 6 USTs were discovered during pre-construction activities in the northwestern corner. The site was a former Texaco gasoline station some time in the 1940's. 6 USTs in the northwestern corner of the site were confirmed by the insurance maps. Pfizer registered and removed the USTs performed from 5/17/1999 to 9/30/1999. 6 soil boringw were done prior the removal activities. Analyticals show SB-6 (10'-12' bg) with high contamination, 840 ppb Toluene, 10,000 ppb Ethylbenzene, 51,800 ppb Xylene, 20,000 ppb 1,3,5-Trimethylbenzene, and 40,000 ppb 1,2,4-Trimethylbenzene. To further delineate the SB-6, SB-6A to SB-6E (12'-14')were drilled and sampled, lab result indicated low VOCs. And removed all the soil above the clay layer (12' bg plus 0.5'-1.0' of the clay). The tankks found no carcks or holes. After tank removal, precipitation occurred for several days and the rain water run into the excavation, water removed and tested, found 6,047 ppb BTEX. All the piping associated with the USTs were removed. Soil removal extented to where the pre-USt removal soil samples contained concentration of VOCs below DEC STARS. Total of 286.18 tons of soil were removed. The report

attached with lab analyticals sheet for soil sample, but not indicated the location of sample taken and not mentioned in the narrative text. Backfilled with clean sand and permanent asphalt pavement was placed on top. Requested spill closure. (RJF) 1/27/2006 - Feng - Send letter to Pfizer request of 1) groundwater sample in the vicinity of the former SB-6 boring location, 2) clarification of the soil sample presented in the lab report attached in App C. Result due 4/3/2006. Faxed to Scott Glash (Roux). (RJF) 02/09/06: This spill transferred from R.Feng to S.Kraszewski. 03/06/06: Received letter from Pfizer, dated March 2, 2006. Pfizer is requesting that the Department suspend the April 3rd deadline for the subsurface investigation. Pfizer believes that the Department is not familiar with all documentation related to this spill. Pfizer will collect and review all historic documentation and correspondence related to the closure and removal of the gasoline USTs. This information will be submitted to the DEC by March 15, 2006. Pfizer believes that based on the contents of this letter that an additional investigation will not be necessary. - SK 03/24/06: Received detailed summary of closure activities from Pfizer. Currently under review. - SK 03/27/06: Reviewed all documents for the UST closure. This additional information was sent in response to the DEC's request for a complete subsurface delineation both on-site and off-site. Pfizer believes that with the information supplied in this closure summary that there is no need for further investigation and NFA should be issued. Pfizer has also included documentation and explanations in response to R.Feng's letter issued January 2006 and previous DEC requests: No post-exc samples taken: Pfizer contests that retrieving samples would cause stockpiling of contaminated soil and leave the excavation open, which is a hazard. Instead, they conducted soil borings to eliminate the hazards associated with an open excavation. Furthermore, Pfizer feels that the soil borings properly delineated the horizontal extent of the contamination since they were conducted until no VOCs were detected by PID. Rainwater from the excavation was sampled and found to contain high levels of BTEX: It was a waste characterization sample, a composite from several sources. Pfizer states this water sample was mixture of rainwater from the USTs, the excavation and waste water used to clean each UST. A soil samples with highly elevated VOC concentrations was detected but it was not mentioned in the report summary nor is it given a location on the site plan: This sample was also a composite sample, collected from each UST. Sand material was discovered within the USTs and this sample was used to characterize the tank solids for proper disposal. It did not come from the excavation. R.Feng requests GW samples: Pfizer attached results from two GW samples taken from the former tank area in June 2004. The samples were taken from 8 to 10 fbg using low-flow purging techniques. Actetone was detected in both samples, a common laboratory contaminant. Naphthalene and Xylenes were detected but below GW standards. Boring logs, PID logs, information of perched GW and explanations of work methods are also included in response to a February 2000 letter from DEC to provide information for these shortcomings in the UST closure report from 1999. - SK 03/27/03: Called Manuel Lopez to ask about the report. He said it would be best to contact Omar at Roux & Associates. I called and left Omar (631-232-2600) a voicemail to call me back. - SK 03/28/06: Rob Kovacs for Roux and Associates called in place of Omar. I asked Rob about the clay layer and he said based on historic production wells used by Pfizer and Roux & Associates' experience with the surrounding area

Remarks: they have mapped out the extent of the clay layer. Rob is emailing me a map with the known extent of the clay layer. - SK 03/31/06: Received PDF of the geologic cross section for that area and an overhead map. After careful consultation and consideration with supervisor J.Kolleeny, we feel that based on all of the available information at hand, this spill poses no threat to GW, the environment or the public. NFA letter sent out. Closed out. - SK

DEC Memo: Prior to Sept, 2004 data translation this spill Lead_DEC Field was "ZHAO/DEMEO" 7/14/2002 - 21:05pm: Ms Zhao spoke with Nathan Edeson. Spill has been contained. There is no drains or valves involved. Clean up was in progress by contractor Tradewind by the time of contact. Zhao has requested clean up statement from Tradewind and will follow-up on it. 7/16/2002 - A follow up call Zhao made to Mr Edeson. Spill cause was found due to the gauge system, not the pump. Tradewind went back yesterday and have got clean up completed. Clean up statement will be furnished within two days by Tradewind. Mr Edeson will then forward it to DEC with some requested clean up pictures. 9/17/2003 - Spill closed upon a site visit on 9/15/2003 and final clean up statement received on 9/16/2003.
Remarks: BUILDING 16 (MAIN BUILDING), FIRST FLOOR. LEAK FROM A PUMP ON THEIR HEATING SYSTEM. MOST WAS CONFINED WITHIN THE BUILDING. ABOUT 5 GALLONS SPILLED ONTO THE SIDEWALK. SPEEDY DRI APPLIED BY PLANT EMPLOYEES. TRADEWIND ENVIRONMENTAL WAS CONTACTED FOR CLEAN UP. SIDEWALK HAS BEEN CLEANED UP. THEY'RE NOW WORKING INSIDE. PUMP TAKEN OUT OF SERVICE FOR REPAIRS.

DEC Remarks: 4/2/2001 Sangesland and NYCDEP Wai Man Wan made a site visit to the Pfi er facility to look for a reported Acetone leak. After initial inspection, DEC - ECO Shawn Dussault arrived to make a similar inspection of the roof top equipment. According to Pfi er Engineer Mr. Daniel Shiel the following is a description of the process and then the system problem: Process: Acetone is used in the process of coating pills. After the material leaves the pills bath area, the vapor acetone is collected and piped to a chiller/condensor on the plant roof. This Edwards Unit chiller/condensor has 3 stages which drops the vapor temperature in 3 steps to 85 F below ero. At that point the acetone is in liquid form and is recovered via pipe and collected. This material is then tanked and removed from the site. Pfi er states that a company purchases this recondensed acetone from them). Problem: Somewhere in the second stage of this unit is a leak. The Pfi er representative stated that there is probably a crack in the line someplace, but the exact location has not been found. Pfi er states that they first became aware of the problem in early March 2001 and took the system out of service for approx. 10 days to perform routine maintenance to the unit and to try to find the problem. The specific problem was not found and not fixed. The equipment was put back into operation. At the site visit, it was clear that acetone was leaking to the atmosphere. Pfi er says that they have done a mass balance which shows that they are still retrieving approx. 91 of the total process acetone, above their legal limit limit is someplace in the low 80 s). Pfi er also had LEL meters on the equipment to show that they have remained below approx 50 of the LEL explosive limits. However, there is no alarm on this meter. The meter is read several times per day by plant personnel. Pfi er rep also said the units are actually 2 separate parallel process lines running at the same time. He believes that the leak is only in one side of the system. The system can operate with only one side of the process system in operation, only at a lower volume and therefore a lower pill production rate. In order to repair the system, the unit would need to be lifted off the roof of the building, lowered to the street level, opened and re-welded. Pfi er said they had an equipment rep on site later today to quote them on the cost and time needed to build a

U003074670

replacement unit. ECO Dussault issued 2 tickets. 6NYCRR Part 595.3.a.2.ii and .iii with a May 17, 2001 court appearance date. Since this is a release to the atmosphere it may include the NYSDEC Air Unit. Since it is a material AFTER production of the pills) it may be considered by NYSDEC RCRA Dept. 4/3/2001 Officer Dussault spoke with Dan Shiel Pfi er) later on the afternoon of 4/2. Mr. Shiel said that Pfi er met with the manufacturer of the Edwards unit and he said it would take about 6 to 8 weeks to build and install a new unit. Until that time, Mr. Shiel said they may try to find a way to run just the first and third stage of the system and bypass the second unit. This will still allow some condensation of the process acetone and may allow the production line to operate perhaps at a reduced rate)

Remark: caller states that the company has had a leak since June on the roof of the building from the Edwards unit. They do not want to fix this due to the downtime and the cost. Dennis Pappas engineer of charge

Site Description:

The Citric Block Site is located in the Williamsburg section of Brooklyn, New York. Gerry Street, Harrison Avenue, and Union Avenue border the Citric Block Site to the north, east, and west, respectively, while Flushing Avenue border the Citric Block Site to the south. The Citric Block Site is situated within a high-density, mixed urban residential commercial industrial zone, approximately one mile east-southeast of the East River. Pfizer decommissioned the Citric Block Site for future redevelopment and/or beneficial use. As part of the decommissioning process, all Citric Block Site buildings were demolished, with demolition activities being completed in August 1995. Presently, the reinforced-concrete slab foundation is the only aboveground remnant of the former buildings. The concrete slab is continuous throughout most of the Citric Block Site, and varies in thickness between approximately 0.5 and 1.5 feet. The remaining portion of the Citric Block Site is covered with asphalt pavement approximately two inches thick with a four-inch aggregate subgrade. The entire Citric Block Site is surrounded by a 10-ft high chain-link fence, and is under continuous security surveillance. The Citric Block Site was developed for chemical manufacturing between 1854 and 1888 and it operated continuously until 1985, and was demolished in 1995. Redevelopment is likely to include paved areas for outdoor activities in the center of the Citric Block Site and a small park in the western portion. The remainder of the Citric Block Site would be capped by either the existing concrete slab or by new pavement. The cap will prevent any direct exposure of future users of the property with fill material. Institutional controls involving deed restrictions have been implemented. The property can be used for industrial/ commercial usage. Site Management Plan requires proper management of all future subgrade construction activities and proper notification to the Department.

 Town: New York City
 Acres: 1.470
 Date Record Added: 11/30/2000 4:06:00 PM
 Date Record Updated: 9/12/2011 3:02:00 PM
 Updated By: JHOCONNE
 Site Description: Location: Pfizer Sites B and D (collectively Site No. V00350) are located at the addresses 59-71 and 73-87 Gerry St. (Pfizer Site B), and 191 Harrison Ave and 60-66 Gerry St. (Pfizer Site D) in Brooklyn New York. Pfizer Site B is comprised of Block 2266, Lot 46 and part of Lot 1, and Pfizer Site D is comprised of Block 2269 Lot 1. It should be noted that references to Site B and Site D below are names designated by the Volunteer (Pfizer Inc.) for their properties and do not refer to Department designated Sites or operable units. Site Features: The VCP site comprised of Pfizer Site B and Site D is 1.47 acres in size. Pfizer Site B, located on the north side of Gerry Street, is bordered by Harrison Avenue to the west; multi-family residences, a former auto body garage and vacant land to the north; vacant land to the east; and Gerry Street and Pfizer Site D to the south. Pfizer Site B is currently vacant. Pfizer Site D, located on the south side of Gerry Street, is bordered by Harrison Avenue to the west; vacant lots to the east; Gerry Street and Pfizer Site B to the north; and a vacant, condemned apartment building and Bartlett Street to the South. Pfizer Site D consists of five interconnected buildings. These buildings surround three sides of a condemned apartment building (not Pfizer owned) that abuts Site D to the south and fronts on Bartlett Street. Current Zoning/uses: The Site is located in a commercial district overlay within a residential zoning district. Historical Use: Pfizer leased the western portion of Site B from the previous owner from 1954 to 2004; it has been vacant since the 1950s and occasionally used as a parking lot. The western portion of Pfizer Site B was sold by then-owner Ruth Apfelbaum to

MAP FINDINGS

PFIZER SITES B AND D (Continued)

S106906497

Congregation YGS in 2004. The eastern portion of the property was purchased by Pfizer in 1964 and used as a warehouse for the storage of raw materials/dry goods, spare equipment parts, and packaging materials. Prior to Pfizer's ownership, it was used as a garage and truck rental facility. Site D was formerly leased from Pfizer by Arlington Press, a company that specializes in labels and package inserts for the pharmaceutical industry. Soil removal activities were performed on the eastern portion of Pfizer Site B in 2002, and included the excavation of 9 Underground Storage Tanks (USTs), 2 tank-like structures, and removal of 4,735 tons of impacted soil and 18,449 gallons of groundwater (including perched groundwater). Sampling performed since the removal activities indicate that VOCs are no longer present in soil; and that petroleum-related VOCs in groundwater have been substantially reduced. Operable Units: An operable unit represents a portion of a remedial program for a site that for technical or administrative reasons can be addressed separately to investigate, eliminate or mitigate a release, threat of release or exposure pathway resulting from the site contamination. Because of the separate ownership and separate remediation and development schedules, the Site has been divided into two Operable Units. The eastern portion of Site B as well as Site D, owned by Pfizer, is Operable Unit 1 (OU-1). The western portion of Site B, owned by Congregation YGS, is Operable Unit 2 (OU-2). Site Geology and Hydrogeology: The Site is underlain by a layer of fill material approximately 8 to 10 feet thick. Beneath the fill layer is a green clay/silt stratum of approximately 2 to 3 feet thick, followed by a brown fine to medium sand stratum with small amounts of clay and silt of approximately 15 feet. Beneath the sand is a silt/clay layer which has been identified as a confining layer. Groundwater is approximately 6 to 10 feet below surface grade. On Site B, groundwater flow direction is generally northeast in the eastern portion of the Site and west/northwest in the western portion of the site. It has not yet been confirmed if groundwater flow direction is similar for Site D.

Env Problem:

Nature and Extent of Contamination: OU-1 Eastern portion of Site B and Site D (Pfizer-owned properties): Soil: On the OU-1 portion of Site B, investigations have identified volatile organic compounds (VOCs) in soil; both petroleum-related BTEX compounds (benzene, toluene, ethylbenzene and xylenes) and chlorinated solvents (cVOCs). The source area was determined to be the eastern portion of Site B to a depth of approximately 8 to 10 feet below grade. Soil removal activities were performed in 2002, and included the excavation of 9 Underground Storage Tanks (USTs), 2 tank-like structures, and removal of 4,735 tons of impacted soil and 18,449 gallons of groundwater (including perched groundwater). Following the removal activities, sampling indicated that VOCs in soil no longer exceed NYSDEC Soil Cleanup Objectives (SCOs). Semi-volatile organic compounds (SVOCs) and metals have also been identified on Site B. Metals include lead as high as 2,020 parts per million (ppm), mercury as high as 61.4 ppm, arsenic as high as 307 ppm, barium as high as 1,250 ppm, and chromium as high as 75.7 ppm. SVOCs include benzo(a)anthracene as high as 75 ppm, chrysene as high as 87 ppm, benzo(a)pyrene as high as 59 ppm, indeno(1,2,3-cd)pyrene as high as 43 ppm, and dibenz(a,h)anthracene as high as 25 ppm. On Site D, only preliminary sampling has been performed to date. A Remedial Investigation Work Plan is being prepared. Preliminary sampling has identified chlorinated VOCs in soil at elevated levels in one boring on the

PFIZER SITES B AND D (Continued)**S106906497**

eastern part of the site. Tetrachloroethene was detected at 2.2 ppm, trichloroethene at 2.7 ppm, cis-1,2-dichloroethene at 120 ppm, and vinyl chloride at 1.2 ppm. Groundwater: On the OU-1 portion of Site B, investigations have identified two distinct contaminant plumes: a BTEX plume and a cVOC plume. Chlorinated VOCs (cVOCs) were found to persist throughout the majority of the Site, whereas BTEX compounds were limited to the eastern portion of the Site to a depth of approximately 10 to 30 ft bls. The cVOC plume is present across the entire Site to an approximate depth of 10 to 30 ft bls. In 2006, an air sparge/soil vapor extraction (AS/SVE) system was installed to address groundwater contamination remaining at the site following the above-mentioned source removal work. The system was operated from October, 2006 to February, 2011. Quarterly groundwater monitoring performed during that time period indicated that the system was effective (approximately 158.67 pounds of VOCs were removed throughout the operation of the system); however, removal of VOCs became asymptotic and operation of the system was therefore discontinued in February 2011. The system remains intact, however. The AS/SVE system has been effective in reducing BTEX compounds in groundwater to below groundwater standards. Currently, some petroleum-related contaminants are still present; however, the primary contaminants of concern remaining following operation of the AS/SVE system are cVOCs. In February 2011 groundwater sampling on Site B, cVOCs detected in groundwater included: tetrachloroethene as high as 22 ppb, trichloroethene as high as 18 ppb, cis-1,2-dichloroethene as high as 350 ppb, and vinyl chloride as high as 29 ppb. A Remedial Action Work Plan is being prepared to address remaining contamination. On Site D, preliminary sampling performed to date has identified chlorinated VOCs in groundwater on the eastern part of the Site. Tetrachloroethene was detected as high as 4,500 ppb, trichloroethene as high as 1,300 ppb, cis-1,2-dichloroethene as high as 110,000 ppb, and vinyl chloride as high as 15,000 ppb. These contaminants have been identified at levels exceeding standards, criteria and guidance as deep as 30-35 feet below surface grade. Soil vapor: Soil vapor has been monitored quarterly on OU-1 from two sampling points since August, 2010. Chlorinated solvents have been detected in soil vapor at a maximum concentration of 120 ug/m³ (tetrachloroethene). OU-2: Western portion of Site B (Congregation YGS-owned) Soil: Soil on OU-2 contains metals and SVOCs indicative of urban fill, which exists throughout this OU, to depths of approximately 10 feet below grade. Metals that exceed SCOs include lead as high as 6,730 parts per million (ppm), mercury as high as 16.1 ppm, arsenic as high as 20.5 ppm, chromium as high as 33.6 ppm, and barium as high as 2,000 ppm. SVOCs include benzo(a)anthracene as high as 250 ppm, chrysene as high as 270 ppm, benzo(a)pyrene as high as 220 ppm, indeno(1,2,3-cd)pyrene as high as 110 ppm, and dibenz(a,h)anthracene as high as 58 ppm. Groundwater: Chlorinated solvents have been detected in on-site groundwater and are suspected to be coming from the Pfizer property (OU-1) to the east and south. Prior to the operation of the air sparge/soil vapor extraction (AS/SVE) system on OU-1, cis-1,2-dichloroethene was detected as high as 390 parts per billion (ppb) and vinyl chloride as high as 45 ppb. Groundwater sampling performed in 2008 (during the time period of AS/SVE system operation) indicated that these contaminants have decreased in concentration but are still present: cis-1,2-dichloroethene was detected at 97 ppb and vinyl chloride at 21 ppb. Groundwater sampling in 2008 also detected benzene at 1.6

PFIZER SITES B AND D (Continued)

S106906497

Health Problem: ppb. Soil vapor: Chlorinated solvents and BTEX compounds have been detected in soil vapor. In May 2009 (the most recent soil vapor data available), tetrachloroethene was detected in each of 2 soil vapor sampling points, as high as 180 ug/m3. Individual BTEX compounds were detected below 50 ug/m3.

Since the site is fenced and covered with weathered asphalt and gravel people will not come into contact with site-related soil and groundwater contamination unless they dig below the surface. People are not drinking the contaminated groundwater because the area is served by a public water supply that is not affected by this contamination. Volatile organic compounds in the groundwater may move into the soil vapor (air spaces within the soil), which in turn may move into overlying buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. The potential exists for people to inhale site contaminants in indoor air due to soil vapor intrusion in any future on-site building development and occupancy.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Site Description: The "Organics/SuciAc Block" site is located in the central portion of the Pfizer Inc. facility in the Williamsburg section of Brooklyn, NY. Gerry Street, Harrison Avenue, Union Avenue and Wallabout Street border this block. The site was first developed for chemical manufacturing between 1854-1888. Operations continued there until 1989 and all buildings were demolished by March of 1995. The Organic/SuciAc block is situated within a high-density, mixed urban/commercial/ industrial zone. Pfizer decommissioned the Organic/SuciAc block with the intent to utilize it for future redevelopment and/or beneficial use. As part of the decommissioning process, all buildings were demolished. The present concrete slab is continuous throughout the Block and varies in thickness from 0.5 and 1.5 feet. In 1997, waste from the site was excavated and disposed off site, which included 18.12 tons of mercury and lead hazardous soils. Also, a total of 1,930 tons of benzene hazardous soils were excavated and disposed off-site. In 1999/2000, the excavated soil (approximately 420.3 tons) was classified as a petroleum contaminated non-hazardous material, and was transported off-site and disposed. Institutional Controls: On June 22, 2001, Pfizer presented the deed restrictions for recording in the Kings County Registrar's Office. These restrictions state that unless additional response actions are performed at the Site to allow its use for residential purposes, the Site shall be prohibited from being used for purposes other than industrial, commercial and/or recreational purposes without the expressed written permission from the Department.

Env Problem: In 1997, waste from the site was excavated and disposed off site, which included 18.12 tons of mercury and lead hazardous soils. Also,

DER Facility ID: 272394
DEC Memo: Sangesland called "Earth Tech Environmental" back to ask about this "spill" Contact said a 20 gal drum of unknown oil was found on the property during soil borings (part of a phase 2 on the site). Sangesland informed Earth Tech that the property owner was responsible for removing the drum from the site, NOT the DEC. Sangesland told Earth Tech to remove the drum, over excavate any contaminated soil, take 1 end point sample, forward a report to DEC with writeup, test results and waste manifest. 04/13/06- Case was transferred from Jake Krimgold to Koon Tang. 08/27/2009 - Copy of Phase 2 report was submitted by Earth Tech. In 2005, during excavation of Test Pit #29 on the site, a drum was discovered at approx 7 ft depth. Drum contained unknown black oil which was leaking. Spill was called in to DEC. Visually contaminated soils were excavated from a depth of 10 ft below grade (approx 35 tons) of soil was removed. Soil sample #TP29-10 was tested and came back No VOCs, or SVOCs therefore no additional excavation work was necessary at this site.
Remarks: 1-25 GALLON DRUM IN A TEST PIT: DEC CALL TO SEE IF IT CAN BE PICKED UP:

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:

-Prior to Sept, 2004 data translation this spill Lead_DEC Field was "SUN" 12/29/2003 Reassigned from Rommel to Sun. 11/03/05-File Update by Sun: A stipulation Agreement was mailed to Susion Developers LLC on 11/03/05 and required to be signed and returned by 11/25/05. (Sun) 11/18/05-File Update by Sun: Final New Order of Consent was sent to Howard D. Stave, Esq. (Attorney for Northland) on 11/15/05. (Sun) 02/21/06-File Update by Sun: On 02/10/06, Sun received Phase I and II Environmental Investigation Report fro the Responsible Party, Leo Lefkowitz (718-218-7880). Review of the above reports is in progress. (Sun) 06/15/06-Sun: Phase II investigation report showed two soil samples were taken on South Cellar 2' below follor level and one soil sample was taken on North Cellar 2' below Floor Level. Additional investigation is required. (Sun) 10/19/06-The Legal Department received a fax copy (pdf version) of signed Stipulation Agreement from Responsible Party, Sosoin Developers LLC. The Department requires an original of signed Stipulation to be executed by DEC Regional Director. (Sun) 11/13/06-Sun called John Urda, DEC's Assistant Regional Attorney about the execution of Stipulation Agreement. He said that he still has not received the original of signed stips by RP. He will call RP's Lawyer, David Yudelson. (Sun) 11/29/06: The Stipulation Agreement was signed by RP on 10/30/06 and executed by DEC on 11/29/06. 03/12/07: A copy of executed stipulation agreement was mailed to Sosoin Development, LLC and also sent to David Yudelson of Sive, Paget & Riesel, P.C. (Sun) 03/12/07: Sun received from David Yudelson the Investigation Work Plan on 03/12/07. (Sun) 05/11/07: Sun approves the Site Investigation Work Plan with some conditions. The Site Investigation Summary Report is due 08/13/07. (Sun) 07/08/08-Sun: Sun sent thr following email to David Yudelson,"Dear Mr. Yudelson: On May 11, 2007, the Department approved a Site Investigation Work Plan submitted by P.W. Grosser Consulting, dated February 8, 2007 for the above referenced site. The Department requires that a Final Investigation Report be submitted by August 13, 2007. As of today, the Department has not received the subject report. Therefore, you will be given two weeks to submit, via email or mail, a copy of the Final Investigation Report . A Final Investigation Report must be received by July 22 2008 or the case will be referred to the Department's Legal Affairs office for initial enforcement proceedings." (Sun) 7/8/08-Sun: Sun received the following email from David Yudelson,"Joe - thank you for the email. I have not been in contact with the former client for many months. I will reach out to them and find out what the story is. I will report back. Dave." (Sun) 7/15/08-Sun: Sun sent the following email to David Yudelson,"Hi David, Thanks for your response. Can you tell me the phone No and email address of your former client, Sosoin Developers, LLC and its owner, Mr. Leo Lefkowitz. My certified mail to him was twice returned as undeliverable. I need to speak to him. He has

DEC Memo: 7/26/2005 Sangesland spoke to Christopher DeCarlo (cell #201-694-4943) with Flemming Lee Shue Environmental Consulting. Approx. 20 years ago this site was a gasoline station. There is no DEC - PBS or Spill history for the site. Chris DeCarlo works for the new owner of a property which is now under construction. Apparently the former owner dug out the tanks and left a pit. Now that the new owner has started construction, approx 8 ft below the bottom of the pit they found floating gasoline product. They are in the process of removing product and contaminated soil. Since the consultant knew the DEC procedure and had already started, no contaminated soil letter was sent. 7/26/2005 Sangesland - a second "Spill Report" came in on this site (#0505029). A vapor complaint from a neighbor with the smell of gasoline (95 degree temp today). Sangesland left a voice mail with Chris DeCarlo at Flemming Shue asking him to confirm that the stock piled material is covered and as much "Vapor Abatement" as possible has been done. 9/19/05-Reassigned to A. Obligado. (Sun) 9/19/05- Obligado- Reviewed fax from Christopher De Carlo of Fleming Lee Shue consultants dated 9/8/05 requesting case manager be assigned to site. Called De Carlo to give him contact info. DeCarlo stated that they completed excavation of soil and taken clean soil endpoint samples. GW sample from bottom of excavation is 18 ppm MTBE and 3.9 ppm benzene. Asks if they can request closure of spill number. Tell him the NYSDEC needs to see the UST closure report before a judgement can be made. DeCarlo says report is in progress and NYSDEC should receive it shortly. 9/19/05 - Obligado - Follow up phone conversation with De Carlo. Ask him to send DEC foundation and vapor barrier details. Inquire about site status - site construction on hold pending permit for excavation. Ask him not to begin construction until the department reviews designs and UST excavation results. 10/28/05 - Obligado - Received phone call from De Carlo, says he had sent DEC Remedial Action Report and was waiting for DEC response.

Told him that haven't seen report yet, and to email pdf of report.
10/31/05 - Obligado - review Remedial Action Report. 5 gasoline USTs removed previously, no records of soil disposal or analyticals. Upon beginning of FLShue's involvement of the site, the USTs had already been removed and an excavation 3 to 4 ft deep was on site. Continued excavation to 9-10 ft bgs. Excavated laterally until no contaminated soil encountered. 354 tons of soil removed from site. Soil results show no VOC exceedences in endpoint samples, only PAH exceedences in one soil sample, SB-2. Ground water sample collected from bottom of excavation show 3.9 ppb benzene and 18 ppb MTBE. Building construction will include 20 mL high polypropylene vapor barrier. Request NFA based on low concentrations and vapor barrier. Call Chris and leave message. Sent email approving building construction. Need to discuss closure. 11/3/05 - Obligado - Call Chris De Carlo (212) 675-3225, left message

Remarks:

OWNER OF PROPERTY IS WALMARR LLC REALTY : REMOVING TANKS AND LLEFT A HOLE IN MIDDLE OF PROPERTY AND FOUND CONTAMINATED SOIL; AND FREE PRODUCT: ARE RMOVING SOIL AT THIS TIME;

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and its Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

 DEC Memo: 12/09/05: This spill transferred from J.Kolleeny to S.Kraszewski.
 07/28/06: NYCHA update summary states that two 35K USTs installed in 1982 and stored #4 and #6 oil were closed-removed in 2001. A 2K Diesel tank installed in 1982 was closed-removed in 2001. In 1999, a 20K UST was installed. In 1996, a 4K AST was installed. Both were disconnected in 2001. In 2001, two 25 USTs that store #2 oil and one 2K diesel tank were installed and are currently in service. No recovery system and no MWs on site. NYCHA recommends that DEC review the available site assessment. - SK 12/11/07: Closed and consolidated with spill 9315457. Reassigned to J.Kann -J.Kann

03/23/06: This spill transferred to K.Tang - SK 12/11/07: J.Kann.
This spill transferred to J.Kann. Consolidated with 9611167 (closed)
and 9614725 (closed). Spill 9611167 indicates "07/28/06: NYCHA update
summary states that two 35K USTs installed in 1982 and stored #4 and
#6 oil were closed-removed in 2001. A 2K Diesel tank installed in
1982 was closed-removed in 2001. In 1999, a 20K UST was installed. In
1996, a 4K AST was installed. Both were disconnected in 2001. In
2001, two 25 USTs that store #2 oil and one 2K diesel tank were
installed and are currently in service. No recovery system and no MWS
on site. NYCHA recommends that DEC review the available site
assessment." 3/10/11: J.Kann - Investigative work plan submitted on
3/3/11.

Remarks: LEAK RATE OF 0.08 GPH REPORTED AS PASSED BY TESTER.

DEC Remarks: 10/14/93: Old tank has been removed. Contaminated soil has been stockpiled for removal off-site. NYCHA must re-design tank installation to include a cradle for the tank. There was no cradle under the old tank, which caused the tank to settle and leak. The contractor has not shored up the hole (it is about 20 feet deep) and the soil is improperly stockpiled (not covered). Soil has been stockpiled since 10/12 and there was a severe rains storm on 10/13. 10/10/95: This is additional information about material spilled from the translation of the old spill file: TANK REMOVAL.

Spill Cause: CONTAMINATED SOIL FOUND DURING TANK PULL. SOIL EXCAVATED, STOCKPILED. TO BE REMOVED.

DEC Region: 2
DER Facility ID: 367555
DEC Memo: CSL letter prepared by Sangesland and forwarded to Zhune for signature Mr. Jay Silverberg Lindsay Park Housing Corp 202 Union Ave Brooklyn, NY 11211 10/06/09-Hiralkumar Patel. discussed with DEC Austin about multiple spill numbers (0701867, 0905544, 0906148 & 0905433) under Lindsey Park Housing Corp.. as same management and same contractor working at the site, transferred case 0906148 to Patel.
11/10/09-Hiralkumar Patel. 2:15 PM:- visited site. met Tom from Protest and Mr. Silverberg. 550 gal diesel tank removed and excavation was backfilled. contaminated soil found at the site. contamination at this site will be removed, once protest done working with other buildings where major contamination found. will remove clean fill and any contamiation. 01/22/10-Hiralkumar Patel. 3:22 PM:- spoke with Tom at Protest. asked him to send updates.
04/12/10-Hiralkumar Patel. 3:17 PM:- received email from Tom. he mentioned that removal of contaminated soil has been completed and will submit report soon. 05/11/10-Hiralkumar Patel. 11:11 AM:- received email from Tom with updates. cleanup completed. will submit report. 2:53 PM:- sent letter to Mr. Silberberg requiring endpoint samples. letter emailed to Mr. Silverberg and Tom.
06/25/10-Hiralkumar Patel. 1:15 PM:- office meeting with DEC Urda, DEC Morenzi, DEC Austin, Mr. Silverberg, Tom, Scott Smiw and Chris O'Donnell. during meeting, agreed upon following: - completion of excavation work at 31 Leonard Street - installation of 6 inch monitoring wells around USTs at 67 Manhattan Ave and pump out of product (as an interim measure before excavation starts) - either installation of soil boring (and three monitoring wells based on results of groundwater sample from soil boring) or soil excavation at 24 Boerum Street and 54 Boerum Street - installation of 6 inch monitoring wells around previously abandoned USTs at 30 Montrose avenue Tom will submit revised work plan for 30 Montrose Ave and work plan for wells installation at 67 Manhattan Ave and boring/well installation at 24 and 54 Boerum Street. site visit needed during collection of endpoint samples from north end of excavation at 31 Leonard Street. DEC Urda asked to issue multi-sites STIP.
09/21/10-Hiralkumar Patel. 11:07 AM:- received email from DEC Urda with copy of signed STIP. DEC regional director signed STIP on 09/16/10. as per the CAP of the signed STIP, following documents are due: - a work plan for free phase product removal at 67 Manhattan Ave is due by end of 10/01/10 - an interim spill cleaup report for 31 Leonard Street is due now - tank closure report for buildings 24 Boerum and 54 Boerum street are due on 12/21/10 - a remedial investigation report for groundwater investigation at 30 Montrose is due on 02/28/11 10/27/10-Hiralkumar Patel. 9:46 AM:- received report from Protest. abstract: - a 550 gal diesel tank was removed - final excavation was 25 ft long, 5 ft wide and 13 ft deep - endpoint sidewall samples were collected at 12 ft depth - two endpoint bottom

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Region: 2
DER Facility ID: 254294
DEC Memo: 01/30/06: This spill transferred from J.Kolleeny to S.Kraszewski.
This site previously served to two 23K USTs installed in 1960. Both were removed and replaced by two 20K tanks in 2004. They all stored #2 fuel oil.
Remarks: 20 YDS OF SOIL FUEL LINE RUPTURED IN EXCAVATION BY BACKHOE, BRINGING IN CONTAINER FOR THE SOIL.

Material:

Site ID: 207177
Operable Unit ID: 953530

DEC Region: 2
DER Facility ID: 141497
DEC Memo: Prior to Sept, 2004 data translation this spill Lead_DEC Field was "KOLLEENY" Initial site investigation soil data found soil contamination, however, additional soil sampling by URS failed to duplicate those results and only contaminant in groundwater was MTBE, which seemed likely to be coming from upgradient 90th Precinct. In March 2005, J. Kolleeny approved NFA for the soil at site (and monitoring of groundwater combined with 90th Pct. monitoring), but cautioned that if there were indications that on-site soil contamination was impacting groundwater, additional investigation and/or remediation could be required. In November 2004 URS Groundwater Monitoring report for 90th Precinct and Engine Co. 216, MTBE levels in Eng. Co. 216 wells seem persistent and possibly unrelated to 90th Precinct plume. JK spoke with Jane Staten of URS and agreed that if next round of GW sampling still showed high MTBE levels, situation at Eng. Co. 216 would be re-evaluated. Spill transferred from Kolleeny to A. Zhitomirsky on 4/4/05. - JK 8-14-2006 Reviewed monitoring report by Roux dated July 28, 2005 for March through June 2006.MW-3 - 150 PPB mtbe in groundwater.Recommendations: maintainn DPE and Oxygen delivery remediation systems shut down; continue gw monitoring, discontinue SVOCs analyses, evaluate alternative technologies. AZ 04-5-2007 Reviewed Monitoring Reports submitted in November 2006 for July through September 2006 and on March 23, 2007, for October through December 2006. Residual MTBE contamination was detected in four wells with concentrations up to 60 ppb(July 2006). Benzine and naphthalene were encountered in one well. DPE was inactive. ORC injections and ORC socks were discontinued. In October 2006 sampling event MTBE ranged from 16 ppb to 136 ppb. Some increase of MTBE concentrations was observed. ORC socks will be installed in MW 216-MW-01, 216-MW-03 and MW-09. Recommended maintaining shutdown status of DPE system, reducing monitoring and reporting to semi-annual. These recommendations were approved. An e-mail was sent to Brian Morrissey (ROUX). AZ 10-22-2007 Reviewed Monitoring Reports submitted in August 2007 for January through June 2007. Residual MTBE contamination was detected in five wells with concentrations up to 85 ppb. ORC socks were reinstalled in three monitoring wells at the NYSDEC request. Roux recommended continuing semi-annual groundwater monitoring program. AZ 7-2-2008 Reviewed Monitoring Reports submitted in April 2008 for July through December 2008. MTBE is the only VOC detected at a concentration greater than its NYSDEC AWQSGV in multiple wells. Roux recommended continuing semi-annual groundwater monitoring program. AZ 2-13-2009 Reviewed Monitoring Reports submitted in October 2009 for January through September 2008. Residual MTBE contamination was detected in four wells of the six wells with concentrations up to 66 ppb. ORC socks were reinstalled in three monitoring wells at the NYSDEC request.

MTBE is the only VOC detected at a concentration greater than its NYSDEC AWQSGV in multiple wells. Roux will conduct a site wide groundwater sampling round in preparation for NFA. AZ 11-6-09 An e-mail was sent to Brian Morrissey/Fatemeh Ashkan/ V. Brevdo: "I have reviewed a semi-annual report for the above site dated May 22, 2009 add covering the period of June 2008 through March 2009. Roux proposed conducting soil sampling and analyses in areas of residual groundwater contamination (i.e.e 216-MW-02 and MW-08) in order to determine current status of soil impacts. Also, you proposed considering enhanced bioremediation for this site. These proposals are approved and should the work plan should be included in the next monitoring report." AZ 4-25-2011 Reviewed LiRo status report. This spill is associated with four closed in place 550 gallon gasoline USTs. Two soil borings will be installed near these USTs. AZ 11-28-2011 A report dated 9-8-2011 stated that drilling for the borings approved by DEC was scheduled for August 2011. AZ

DEC Region: 2
DER Facility ID: 328078
DEC Memo: 3/27/07 bf: Spoke with Matt of Associated Environmental (631)234-4273. Epoxy patch from previous repair at top of tank was problem. Tank is AST. They plan on having the tank cleaned out, inspected, remove epoxy, and weld a steel patch to tank. Then tank will be tightness tested. They plan on starting work next week. One problem is getting a tanker to be dedicated to the building while the repairs are made. Petroleum Tank Cleaners will be doing repairs and testing in conjunction with Associated. Sent ttf letter to: David Rochlitz 544 Park Avenue Brooklyn, NY 11205 7/13/07 On 7/12/07, received call from Antionette Ollivierre of American Environmental Associates and Solutions (718)209-0653. She requested a call back. Called her back today. I faxed her a copy of the ttf letter dated 3/27/07. fax:(718)622-5807. bf 9/20/07 Received call from Aron Weinstein tesla Environmental 732-904-4618. Called him back at 2:45 PM. He will send email letting me know where project stands. Tank is encased in concrete and there may be structural concerns regarding the building. A Phase II was done on the property and eight borings were done. I told him I need to see those. I asked him why the tank

failed and he could not answer except that the Horner EZ 3 should not be allowed. He was on a cell phone and was hard to hear. bf 11/13/07 On 11/8/07, received call from Donna of ABC Tank. Ph.(718)272-2800 Fax.(718)272-3147. She requested any paperwork regarding the spill. I sent her the ttf letter and the spill report. Called her back, but she is not in until Thursday. bf 3/4/08 Site inspected on 2/29/08. NOV issued. Received call to day from John of Gianco (contractor doing tank test/repair). I faxed ttf letter to him. Fax: (631)952-5975. bf 4/2/08 Signed order hand-delivered with check for \$1100 panalty. bf 4/30/08 Received faxed letter on 4/9/08 from John Sinatra of Gianco, dated 4/8/08, to Robert Hoffman. Tank passed pressure test over the weekend holding 7 pounds of air. No contamination was found on, near, or surrounding the tank. It is his belief that the tank can be out online as a backup. 6/19/08 Called Robert Hoffman requesting tank test report. He faxed letter to close spill, not report. Sent tt return letter to him since document is not a tank test report. bf 7/1/08 Received passing test report on 6/30/08. NFA. bf

DER Facility ID: 114349

DEC Memo: Prior to Sept, 2004 data translation this spill Lead_DEC Field was "ZHITOMIRSKY" The spill is referred to spill # 8809462. The site is currently under remediation by LiRo Engineers. - II (03/02/05). 4/28/05- Reviewed the monthly monitoring report-Jan/05. A multi-phase extraction system is in place and is performing well. Both vapor and water effluent are under compliance. A trace (.01 ft) of free product persists at one well only as revealed from monthly monitoring data. Quarterly groundwater sampling results show persistently decreasing trend and are close to under compliance. Soil sampling is done semiannually. Routine site monitoring to continue. 3 monthly electronic files have been installed in the eDoc Folder.- II 6/6/05- Reviewed Feb/05 & Mar/05 monthly monitoring reports. The MPE system monitoring data shows that it is working effectively. Neither of the scheduled Quarterly GW sampling nor Semi-annual soil sampling were done during the monitoring period as they were not due in this period. All monitoring wells have become free from Free Product. Routine monitoring to continue as scheduled.- II 7/22/05- Reviewed the Monthly Monitoring Report prepared by LiRo Engineers dated May 27, 2005. The report presents MPE system performance monitoring data for the month of April, 2004. The system monitoring data indicate that vacuum measurements were not taken at two monitoring wells and six (50%) extraction wells. This lack of readings prevents DEC from properly evaluating the system's effectiveness. Sent the above comment to DDC and LiRo via email. Installed the monthly monitoring reports for Feb., Mar. & Apr./05 in the eDoc Folder. - II 8/23/05- Reviewed the May/05 monitoring report. The report presents MPE system operating data and GW sampling results for the month of May/05. Apprx. 0.3 lbs VOC was collected and the MPE system is functioning effectively. Monthly GW sampling could not be done on wells EW-6 & MW-8 due to deposits lining the inside of the drop tube and well EW-1 & MW-13 for being under water. Over all, the GW contamination has reduced substantially and four of the wells sampled in May/05 still exceed NYSDEC quality criteria for one or more compounds. Routine monitoring will continue.- II. 9/19/05- Reviewed the June & July/05 monthly monitoring reports. MPE system is operating effectively. Apprx. 2.8 lb VOC was collected during July month which is very high compared to the June month. LiRo did not explain the reason. Quarterly GW sampling was not due during the monitoring period. Routine system monitoring will continue. - II. 10/25/05- Reviewed the August/05 monitoring report. The MPE system collected about 0.5 lb VOC during the month and the last month's spike (2.8 lb) is said to be an anomaly. Overall GW contamination at most wells has been

Map ID
Direction
Distance
Elevation

MAP FINDINGS

Site

Database(s)

EDR ID Number
EPA ID Number

NYC DDC (Continued)

S104621574

significantly reduced. Low level Product has appeared in two wells and they have been sampled for fingerprint analysis. Of the four wells sampled, two wells were non-detect for STARS list compounds. Other two wells showed a very slight increase in TVOC contamination. However, routine monitoring will continue.- II 11/18/05- Reviewed the Sept. & Oct/05 monthly monitoring reports. Product appearance in wells LW-1 & MW-1 have been found to be mineral spirit and hydraulic oil respectively by fingerprint analysis. In Sept. & Oct/05 the MPE system collected 4.2 lbs and 2.4 lbs of VOCs respectively. LiRo states this increase in influent VOC levels during the period due to system cleaning and drop tube adjustments which the contractor Franklin conducted during this period. GW sampling was not due during this two months of monitoring period. LiRo recommends to continue operation of the MPE system with improved induced vacuum. LiRo also recommends installation of passive skimmers in two wells having product. LiRo's recommendation for passive skimmers installation and plan for next round of annual soil sampling four borings) are approved with an additional boring to be located in the vicinity of GPR-13. Filed the monthly reports in the eDoc folder.- II 01/31/06: This spill transferred from Imdad to Q.Abidi. Reviewed November/05 monthly monitoring report. Quarterly groundwater sampling was not performed during this monitoring period. On Dec.6, 2005 Liro pumped out wells LW-1 and MW-1 with a vacuum truck, removing 1,412 gallons of contaminated fluids, of which an estimated 14 gallons was free product. Liro recommends to continue the system operation. No response letter necessary.- QA 02/07/06: Reviewed December/05 Monthly monitoring report. Quarterly groundwater sampling was not performed during the monitoring period. LiRo recommends that the vacuum truck should return to the site to treat wells LW-1 and MW-1. Site is being transferred to Greyhawk. Data show decrease in induced vacuum levels, possibly indicating a line blockage.Liro suggest New CM should evaluate the site and determine whether system should be cleaned, or shut down and only use a vacuum truck on LW-1 and MW-1. Filed the monthly report in the eDoc folder.- QA 08/18/06: Transferred to S.Kraszewski. According to URS Bi-monthly update report Rouc performed GW sampling and gauging on April 5, 2006. VOCs detected range from 6 ppb to 532 ppb. SVOCs were below detection. Monthly gauging on May 5, 2006 revealed 0.22 ft of product in LW-02 and 0.01 ft in LW-01. On June 15, 2006 no free product in LW-02 and 0.01 ft of product in LW-01. An absorbent sock was placed in LW-01. - SK 08/31/06: Reviewed Quarterly O&M and MOnitoring Report for April-June 2006 submitted on July 7, 2006 by Greyhawk/Roux. On April 5, 2006 Roux gauged and monitoring wells EW-1, EW-4, EW-6, EW-9, LW-1 and LW-2. Gauging occured on May 5 and June 15 as well. GW flow direct was determined to be southernly. No free product in April, but 0.01 ft for LW-1 and 0.22 ft for LW-2 in May. In June, LW-1 had 0.01 ft. All six MWs revealed VOCs ranging from 6 ppb to 532 ppb with several TAGM exceedances. No SVOCs detected in GW. Greyhawk plans on contiuing quarterly GW sampling but recommends reducing the gauging and free product removal frequency from monthly to quarterly visits. Low PID readings for influent and effluent air. However, influent air TVOCs reveal 3250 ug/m^3 in April and 877 ug/m^3 in June. Since the system is still effectively removing volatiles Greyhawk recommends contiued operation and maintenance of the MPE system. They will attempt to increase the vacuum in EW-3 and EW-12. SK called Andris Ledins at Greyhawk (718-943-1100.) Left a message to call back. - SK 10/27/06 Spill case transferred from S. Kraszewski to J. Maisonave. -

S104621574

JAM 5/31/07 Reviewed Quarterly Monitoring Report for July through September 2006 submitted by Roux and dated Nov. 10, 2006. Free phase product was detected in wells LW-02 (0.01 foot) and product sheen detected in EW-06 on July 20, 2006. During the previous quarterly monitoring period (April through June 2006), free product was detected in well LW-01 (0.01 ft) and LW-02 (0.22 ft). Groundwater samples were collected from wells on the quarterly schedule (more wells are sampled on an annual schedule at this site) and the highest level of TVOCs was 693ug/L in LW-01. The MPE system continues to run however restricted vacuum readings have been observed in multiple monitoring wells and ventilation wells. 6/11/07 Reviewed Quarterly Monitoring Report for October Through December 2006 submitted by Roux and dated March 15, 2007. Free-phase product was detected in wells LW-02 (0.10 ft) and EW-06/MW-08 (0.15 ft) and product sheen was observed in LW-01 during the October gauging event. Wells EW-06/MW-08 was not gauged in December because of a DOS truck was obstructing and LW-01 and LW-02 had petroleum absorbent socks which were removed. Groundwater samples were collected from wells on the quarterly schedule and the highest level of TVOCs was 261ug/L in LW-01. The MPE system has had an uptime of approximately 80 percent during this monitoring period. However, the system has been hampered by the decreased inlet header vacuum, which resulted in the system's inability to extract groundwater and expose the smear zone. Attached in the appendices were an Enhanced Bioremediation Work Plan and Additional Site Investigation Work Plan. The Enhanced Bioremediation Work Plan proposed injecting a bacteria/enzyme mixture at wells LW-01, LW-02 and MW-16. These wells would be monitored to evaluate the effectiveness of the injection. I requested that EW-07/MW-09 be included in the monitoring program and approved the work plan. The Additional Site Investigation Work Plan proposed the advancement of seven soil borings in locations as shown in Figure 8. I requested that the new borings be advanced as close as possible to the original soil samples collected at the beginning of the site investigation and approved the work plan. Additional recommendations to the O&M Procedures are as follows: 1) Convert MPE system to SVE system 2) Reduce frequency of the quarterly groundwater monitoring program to semi-annual 3) Reduce frequency of gauging from monthly to quarterly 4) Remove SVOCs from the groundwater sampling program 5) Remove wells EW-05, MW-12 and MW-15 from the groundwater sampling program. Recommendations 1, 3, 4, and 5 were approved. Since a new remedy is being implemented at the site groundwater monitoring should continue on a quarterly basis for several more rounds. The reduction of monitoring frequency from quarterly semi-annual will be reevaluated at a later date. A letter was sent today with these approvals and can be found in edocs. - JAM 3/3/08 Reviewed Quarterly O&M and Monitoring Report for period January through June 2007 submitted by Roux and dated September 18, 2007. MPE system operated at the site and as currently configured the MPE system is not operating efficiently to remediate residual soil and groundwater. Groundwater samples were collected from select wells in January and April 2007 for VOCs and SVOCs. No SVOCs were detected in any wells and TVOCs were observed ranging from ND to 84ug/L. Roux states the MPE system has effectively reduced levels of free product and residual soil and groundwater contamination. During the next monitoring event Roux will conduct quarterly monitoring, implement the approved bioremediation WP and convert the MPE system to an SVE system. - JAM 6/10/08 Spoke to Brian Morrissey at Roux. He said the DOS is terminating their lease and

S104621574

moving from the site. They will maintain liability for the spill. Several tanks on the site will be closed. The In-situ Bioremediation work plan should be implemented soon. The MPE system will also be converted to an SVE system. I have received emails from Envirotrac notifying the DEC that the MPE system has been shut down due to a faulty solenoid valve. The valve will be replaced and the estimated down time is 1 week. - JAM 6/23/08 Spill number 0001698 was closed and consolidated with this spill number. Hoist oil was observed in several wells which has been evacuated or removed by petroleum absorbent sock. I added Hoist Oil to the material list on this spill case. I called Brian Morrissey and let him know that spill number 0001698 was closed and consolidated with this spill. - JAM 7/28/08 Reviewed Quarterly Monitoring Report for period July 2007 through May 2008 submitted by Roux and dated June 24, 2008. The MPE system operated at the site with an uptime of 81 percent. As configured the MPE system is not operating effectively and needs optimization. Free product was detected in 4 of the on-site monitoring wells with a max thickness of 0.38feet in well EW-09/MW-03. Product identified as hydraulic oil or heavy lubricating oil. VOCs were detected in several wells with the max detection during the reporting period of 512ug/L in LW-01 in July 2007. Roux advanced six soil borings as per the approved work plan to a depth ranging between 24 to 31 feet. VOCs were detected in 4 of the six borings with a max of 249400ppb in RXSB-02 from interval 19-21fbs. Roux recommends the following: 1. Continue quarterly groundwater monitoring program. 2. Continue using petroleum absorbent socks in wells LW-01 and LW-02. 3. Conduct a soil investigation (as proposed in Appendix E) near the three UST areas in the south-southwester part of the site. 4. Optimize the MPE system performance. I sent an email today approving these recommendations. A work plan should be submitted in a separate letter for approval that describes the optimization of the current MPE system in more detail. The letter should include a process and instrumentation diagram and a site diagram showing the additional extraction points. The report and email are uploaded to eDocs. - JAM 9/12/08 Received an email from Tom Hug at Envirotrac. The MPE system was shut down because the discharge line has become clogged and the system is shutting down on a "high water alarm." As soon as the blockage is cleared the system will be restarted. Estimated downtime is 1 week. - JAM 5/12/10 Received an email from Stephen Frank at LiRo and Fatemah Ashkan at the NYCDDC. LiRo proposed a conceptual remedy, which includes excavation and removal of USTs on-site as well as injecting chemical oxidants to treat smear zone and groundwater contamination. I sent a reply email stating that, "The proposed approach is acceptable; however, a remedial action work plan (RAWP) must be submitted to the DEC for approval. The RAWP should include a detailed description of the proposed excavation/tank removal work with figures showing the proposed excavation limits and an end-point soil sampling plan. The RAWP should also include a chemical oxidant injection plan with a detailed description of the chemical oxidant to be used, how the chemical oxidant will be applied and a monitoring plan to evaluate the effectiveness of the remedy." I also notified them that the EPA Underground Injection Control Program needs to be notified and an application must be submitted to perform the chemical oxidant injections. - JAM 6/25/10 Reviewed the Proposed Site Pre-Design Investigation Work Plan for the above referenced site submitted by LiRo Engineers, Inc. (LiRo) dated June 16, 2010. The work plan was prepared for the tanks located on the adjacent property at 314

Rutledge Street and proposes advancing nine soil borings and installing two groundwater monitoring wells. The purpose is to locate the three previously abandoned tanks and delineate soil and groundwater contamination, and to determine the limits of the planned soil excavation and design a chemical oxidation injection program, which constitute the remedial strategy approved by the NYSDEC via email on May 12, 2010. The work plan is uploaded to eDocs. I issued a letter today approving this work plan. A summary report including appropriate diagrams, soil boring logs, well construction logs, and tables summarizing soil and groundwater analytical data should be submitted to the NYSDEC for review. A detailed remedial action plan based on the findings of this investigation should also be included for review and approval. Letter uploaded to eDocs. - JAM 11-10-2010

The spill was transferred from J. Maisonave to Alex Zhitomirsky, as per V. Brevdo/J. Kolleeny. AZ 2-14-2011 Reviewed revised additional soil and geophysical investigation summary report and remedial action work plan dated 10/13/2010 and received from J. Kolleeny on Dec. 20, 2010. The plan proposed an in-situ chemical oxidation system to treat smear zone and phreatic zone at 314 Rutledge St. Also, the plan proposed excavation of the remaining USTs and excavation of the remaining residual soil contamination and injections of a metal solution, hydrogen peroxide, and a biological treatment at 306 Rutledge Street. An e-e-mail was sent to S. Frank, V. Brevdo and F. Ashkan: "I have reviewed a Revised Soil and Geophysical Summary Report and Remedial Action Work Plan dated October 13, 2010. The Work Plan is approved. The Responsible Party and Contractors are responsible for the safe execution of the Work Plan." AZ 8-18-2011

The following e-mail was received from S. Frank (LiRo) on 8/18/2011: "At the Quarterly meeting we discussed Brooklyn 3/3A. As you know, NYCDOS moved out of the leased site several years ago. There is currently litigation over rent payments and site impacts that have been ongoing between the property owners and NYC. To complicate matters, the former DOS site includes two separate properties (306 Rutledge and 314 Rutledge) that are owned by two different parties. Both parties are separately in litigation with the City. The City is committed to remediating both properties, but in the past, all site contamination was being addressed under a common spill number associated with fuel oil releases on the 306 Rutledge property. We have acquired Sanborn Fire Insurance maps that show that the 314 site had historically been used for dry cleaning and the historical mapping shows "solvent tanks" in the portion of the site where the contamination was identified as mineral spirits (see attached Sanborn Map). A mineral spirits derivative was historically used for dry cleaning. The City has inquired if it would be possible to open a separate spill number for the mineral spirits release at the 314 Rutledge Street property. At the meeting, Vadim indicated that NYSDEC would review the site information and advise DDC with regard to opening a new spill for mineral spirits at 314 Rutledge Street. I was wondering if you have had an opportunity to discuss this issue with him." AZ 8/22/2011

The following e-mail was sent by S. Frank (LiRo) to Vadim Brevdo and AZ on 8/22/2011: "Dear Mr. Brevdo, I am writing to follow-up on our quarterly meeting conversation regarding the former use of 314 Rutledge Street for Dry Cleaning and the identification of a mineral spirits release. Mr. Alex Zhitomirsky called me to inquire whether chlorinated dry cleaning hydrocarbon compounds (i.e., tetrachloroethene and/or its breakdown products) were present. LiRo tested for full Target Compound List (TCL) volatile organic compounds

during our February 2011 groundwater sampling of wells in the area of concern (314 Rutledge and 306 Rutledge at the common wall with 314 Rutledge) and the results are summarized in the attached table. Based on the February 2011 sampling, there is no evidence that chlorinated compounds are present in groundwater and all samples showed a chemical identification of mineral spirits. Thank you for your attention to this matter and do not hesitate to contact me if your office needs additional information." AZ 10/26/2011 An e-mail with the information regarding the Owner of "314 Rutledge, LLC. Contact info: c/o Abraham Glanzer, 718 855-9100. Mailing address: Edith Kahan and/or Abraham Glanzer, 170 Hewes St, Brooklyn, NY 11211."AZ 10/31/2011 Discussed this site w/V. Brevdo. Contacted S. Frank of LiRo and requested a technical memo which will summarize all information related to a mineral spirits spill. 12-13-2011 Received an email from S. Frank:"Dear Alex, I wanted to update you on the status of remedial work at Brooklyn 3/3A. We are installing injection wells for the ISCO work at both properties (314 Rutledge and 306 Rutledge) as well as removing tanks that were formerly closed in place in the building interior at 306 Rutledge. In conjunction with the tank removal work, we are over-excavating contaminated soil to the extent possible. We are hoping to finish the well installation and tank removal work this week. We expect the ISCO injection work will begin within a couple of weeks after the well installations are completed." AZ 2-13-2012 Reviewed and discussed with V. Brevdo a report by LiRo Former DSNY Brooklyn 03/3a Garage Request for spill number for mineral spirits released at 314 Rutledge. The report states that contamination at 314 Rutledge is a different spill and plume from 206 Rutledge. A spill at 316 Rutledge is allegedly caused by mineral spirits. According to the report, this site was a dry cleaning operation between 1947 and 1965. The Sanborn maps indicate the presence of solvent tanks located along eastern wall of 314 Rutledge which is adjacent to the 306 Rutledge Street property. Petroleum based mineral spirits (Stoddard solvent was historically used in dry cleaning operations. Soil and groundwater investigation completed by EBC (contractor working for 314 Rutledge owner) at 314 Rutledge in 2008 indicated petroleum related VOC in soil and groundwater. EBC recommended the DEC Hotline be notified, however, it was not done. Free phase product fingerprint analysis for the sample from MW-18 (located at 314 Rutledge) identified the product as mineral spirits. Routine groundwater sampling completed in February 2011 from 314 Rutledge wells MW-17 and MW-18 indicated petroleum identification as mineral spirits. DSNY records indicate that petroleum fuel storage and fueling operations were never conducted by DSNY at the 314 Rutledge parcel. However, PBS records indicate that there are three 1,500 gal tanks closed and registered by DSNY in 2000. Product stored indicated as gasoline. This discrepancy must be resolved. S. Frank indicated that these tanks were filled with concrete and will be excavated by LiRo. I requested to attempt fingerprinting any remaining product or sludge in the tanks in question. Also, the tanks design should be described. The Sanitation is leasing this site from 1993. LiRo should submit tank inspection results. LiRo should submit any information supporting statement that DSNY did not use 314 Rutledge for fueling or storage. LiRo should include fingerprint analysis of the alleged mineral spirits. The site was discussed with J. Urda. It was decided that V. Brevdo will contact A. Samani and request a conference call with a City lawyer AZ U.G. TANK INSIDE BLDG, NOT USED FOR 10 YEARS. EXCAV. Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

excavation work at 31 Leonard Street - installation of 6 inch monitoring wells around USTs at 67 Manhattan Ave and pump out of product (as an interim measure before excavation starts) - either installation of soil boring (and three monitoring wells based on results of groundwater sample from soil boring) or soil excavation at 24 Boerum Street and 54 Boerum Street - installation of 6 inch monitoring wells around previously abandoned USTs at 30 Montrose avenue Tom will submit revised work plan for 30 Montrose Ave and work plan for wells installation at 67 Manhattan Ave and boring/well installation at 24 and 54 Boerum Street. site visit needed during collection of endpoint samples from north end of excavation at 31 Leonard Street. DEC Urda asked to issue multi-sites STIP. 09/21/10-Hiralkumar Patel. 11:07 AM:- received email from DEC Urda with copy of signed STIP. DEC regional director signed STIP on 09/16/10. as per the CAP of the signed STIP, following documents are due: - a work plan for free phase product removal at 67 Manhattan Ave is due by end of 10/01/10 - an interim spill cleanup report for 31 Leonard Street is due now - tank closure report for buildings 24 Boerum and 54 Boerum street are due on 12/21/10 - a remedial investigation report for groundwater investigation at 30 Montrose is due on 02/28/11 12:46 PM:- spoke with Tom. he mentioned that they have installed wells at 30 Montrose ave. 01/04/11-Hiralkumar Patel. 11:33 AM:- left message for Tom. 11:35 AM:- spoke with Mr. Silverberg about required documents. he will talk to Tom. 11:47 AM:- sent email to Mr. Silverber (and copied to Tom) to submit following documents/information by the end of 01/07/11, to avoid legal enforcement: - work schedule for groundwater investigation at 31 Leonard St - work plan and schedule for product removal at 67 Manhattan Ave - work schedule for groundwater investigation at 30 Montrose Ave - tank closure report for 24 Boerum St 01/05/11-Hiralkumar Patel. 2:56 PM:- received call from Tom. he will submit updates by end of 01/12/11. 01/11/11-Hiralkumar Patel. 3:52 PM:- received email from Tom with updates. during Oct-Nov. 2010, protest installed six groundwater observation wells. found product in one of the well. due to inclement weather, wells were not sampled, but will be sampled in this week. due to product in well, Protest proposes four additional wells. they will submit work plan by end of 01/21/11. 01/18/11-Hiralkumar Patel. 10:40 AM:- spoke with Bob at Protest inquiring about summary report of recent well installation. he mentioned that it will be included in the work plan. 01/25/11-Hiralkumar Patel. received work plan from ProTest (at 11:27 PM on 01/24/11). in 2010, six monitoring wells were installed and found about 4.5 inches of product in one well. due to findings of free product on water, contractor has proposed to install four more wells. 01/26/11-Hiralkumar Patel. after discussing with DEC Austin, case transferred to DEC Vadim due to free product on groundwater. 11:33 AM:- sent email to Tom informing that case has been transferred to remediation group. email copied to DEC Vadim and Mr. Silverberg. summary: - spill # 0103137 was reported as found #6 oil tank failed tightness test - two 30,000 gal tanks sitting close to each other near building foundation wall - found oil seeping into basement through wall adjacent to tank location - soil borings and wells installed around two 30,000 gal #6 oil tanks - total of four wells installed nearby tanks: MW-1 on south side of southern tank, MW-2 on north side of northern tank, MW-3 at north-western corner of northern tank and MW-4 further west of MW-3 (between tank and building wall) - found 124 ppm on PID in soil at 10-14 ft bg in well MW-3 - wells MW-1

to MW-3 were installed on 09/07/01 and well MW-4 was installed on 09/20/02 - all four wells were gauged monthly since installed - no product observed in well MW-1 and MW-2 - found 0.03 ft product in well MW-3 on 09/11/01 during first gauging event and no product observed after that - found product in well MW-4: 0.03 ft in Sep. 2002 and 0.02 ft in Oct. 2002. no product observed in Nov. or Dec. 2002 - no gauging record available after Dec. 2002 - no information about site specific groundwater flow direction **see also spill #s: 0103137, 0701867, 0905544, 0906148 and 1000673.** 03/29/2011: This spill case was transferred to A. Doronova. -AD Reviewed the Supplemental Investigation Work Plan, dated January 17, 2011, submitted by Pro Test Environmental (ProTest). The work plan proposes subsurface investigation to fully delineate free product plume via installation of four permanent monitoring wells with collection of soil and groundwater samples for laboratory analysis. A report summarizing all findings with conclusions and recommendations for further actions will be prepared and submitted to DEC. AD 03/31/2011: Called and spoke with Mr. Tomasello of ProTest over the phone. Later sent him an e-mail with RP's updated contact info request. AD 04/01/2011: Sent a letter approving a work plan. DL pdf copy of the letter to eDocs. AD 08/16/2011: Received a phone call from Mr. Tomasello of ProTest. He informed me that ProTest would like to perform excavation of contaminated soils found in the vicinity of the wells MW-2 and MW-4 during wells installation. Asked him to submit a brief work plan with a site diagram depicting limits of excavation. AD 08/17/2011: Received a IRM work plan for hot spot excavation. ProTest proposes to excavate area around well MW-2 and MW-4, which exhibit free product, as an interim remedial measure. The limits of excavation will be approximately 35 by 40 feet. The depth of excavation will be approximately 12 feet. End-point soil samples will be collected. A report summarizing all findings, with conclusions and recommendations for further actions, will be prepared and submitted to DEC. Will discuss it with J. Kolleeny of DEC. AD 08/18/2011: Discussed the work plan with J. Kolleeny. Additional monitoring wells may be necessary depending on the investigation results. Will issue an approval letter. AD 08/19/2011: Issued and sent the letter approving the work plan to Mr. Silverberg with the following comments: " Wells MW-2 and MW-4 should be replaced, if destroyed during the proposed excavation; If the excavation extends into the water table so that it is not possible to collect an end-point soil sample from the excavation bottom, then a groundwater grab sample should be collected; Depending on the final results of the investigation, installation of additional monitoring wells may be required to fully delineate subsurface impacts." DL pdf copy of the letter to eDocs. Put site priority as P1. AD 11/21/2011: Received an info from Spill Response Division of DEC regarding a reported spill on this property from anonymous caller. He reported that there it an oily water in a excavation hole around USTs. Caller stated that NYC Dept. of Buildings "shut them down for having no permits". Tried to contact Mr. Urban of ProTest Env. He was not in the office. Contacted Mr. Tomasello regarding this issue. Required him to send me an e-mail summarizing all info he has on this issue regarding permits and performed remediation, and also required him to make sure that Mr. Urban will contact me. Newly opened spill case No. 1110310 will be closed by Spill Response Division and referred to this case. 11:20 - Called and spoke with Mr. Urban of ProTest. He told me that ProTest put safety fence around excavation pit without obtaining fence

APARTMENT BLDG (Continued)

S105055138

permit, and that DOB put restriction on further excavation work at the site, but ProTest is allowed to proceed with backfilling activities. ProTest is resolving this permit issue with DOB. I required Mr. Urban to send me an e-mail with a detailed explanation of situation. Will visit the site tomorrow afternoon. 12:44 PM - Received an e-mail from C. Tomasello saying: "Ainura, After speaking to you, I spoke to Bob Urban of Protest. We determined that it is best for him to e-mail that status of the permit and partial stop work order issues. As you discussed with him, I will be meeting you on site tomorrow at 2:00 pm. Please feel free to call me again if you require anything additional. See you tomorrow. Regards, Christopher P. Tomasello, IH Reliant Consulting Services, Inc." 13:41 PM - Received requested e-mail from B. Urban saying: "Ainura Doronova, As per our phone conversation earlier today, I am writing to you with an update as to the status of the remediation of contamination at 30 Montrose Avenue, Brooklyn NY. As per the work plan we started excavation of contaminated soil at well MW-2 on September 20, 2011. Prior to excavation we had our Permit Expeditors inquire with the NYC DOB if we required an excavation permit to remove the contaminated soil and backfill with clean soil. Our expediter was told by two persons at the DOB that there was no excavation permit needed for the excavation as long as we where not altering the building or effecting the foundation of the building. Once we started excavating the soil it was determined that there was a lot more contaminated soil to be removed then we expected. Since September 20, 2011 we have removed approximately 2,100 yards of contaminated soil. The overall dimensions of the excavation to date is 85 feet long (along the building wall) and 75 feet wide (into the parking area) and about 15 feet deep (to ground water). Of that overall excavation an area of 85 feet x 25 feet has already been backfilled along the building wall. Please see attached drawing. The entire excavation area is surrounded by construction safety fencing. We have pumped out oil contaminated water from the excavation on 3 separate occasions, October 18 (1,000 gallons), November 10 (4200 gallons), and November 14th(2,000 gallons). Currently any water in the excavation does not have an oil sheen to it. My work crew have indicated to me that there is no odor issue at the site. On November 16, 2011 an inspector from the NYC DOB came to the site and told us that we needed a "Fence Permit". We were given a "Partial Stop Work Order" that required us to stop excavating at the site. We are allowed to continue to backfill the excavation. The inspector told us that as soon as our permits are in order we can continue to work. We are currently in the process to obtain the required permit (s). Robert Urban Pro Test Environmental protest410@hotmail.com 631-321-4670 Long Island 718-815-6292 NYC 631-539-0822 Fax" AD 11/22/2011: DEC received a second call from the same anonymous caller, who stated that backfilling of the excavation is resulting in sludge coming out of the excavation pit onto the sidewalk and the street. Visited the site. Met at the site with Chris Tomasello, Thomas Leddy and Tom Boccio of ProTest Environmental. Observed the fenced area of remediation, excavation pit, driveway and a sidewalk. The sidewalk did not contained any mad or soil slurry. It was dry and clean. Workers were sweeping driveway and the sidewalk of any soil coming from truck's weels. Excavation pit has a L-shape due to partial backfilling. There is some GW in the excavation pit approximately - 15' bgs. No free product or petroleum sheen were noted on the GW. No petroleum odors were detected. The two 30,000-gallon USTs are on a concrete slubs, but were not encompassed

in concrete. Took multiple pictures of the site. As of today - 10 end-point soil samples were collected from the excavation. GW grab samples will be collected next week from the excavation pit. Additional soil samples will be collected from the other walls of the pit, after completion of the excavation. Excavation is pending decision from DOB. ProTest will inform DEC on any changes at the site. AD 11/23/2011: The anonymous caller again contacted DEC, alleging that other violations have occurred in the past, such as loading trucks not suitable for such load, with water-saturated soil that dripped on the ground. DEC has required that ProTest submit all necessary documents to prove that site remediation has been performed in accordance with all applicable regulations. 3:04PM received an e-mail from ProTest saying: "From: Pro Test Environmental [mailto:protest410@hotmail.com] Sent: Wednesday, November 23, 2011 12:34 PM To: Chris Tomasello Subject: information for 30 Montrose Avenue Attached is a PDF file of the stockpile sample results from 08/26/11. This report was based on a hand augered sample taken from near the M2 well taken before work started. SoilSafe has done subsequent stockpile samples. I've attached the two reports they provided us from 10/05/11 and 10/12/11. The answers to your other questions will follow in another email. --Victoria Pro Test Environmental protest410@hotmail.com 631-321-4670 Long Island 718-815-6292 NYC 631-539-0822 Fax" 3:19PM Received another e-mail from C. Tomasello saying: "Ainura, Below are the answers to the questions you raised with respect to the 30 Montrose site. the soil is being transported to Soil Safe's facility in Bridgeport, NJ utilizing trucking supplied by Soil Safe. To our knowledge, all there permits are up to date and correct. The soils were accepted by the disposal facility. Protest has receipts for the plastic rolls that can be supplied upon request. Please feel free to call me if you have any further questions. Have a happy holiday Regards, Christopher P. Tomasello, IH Reliant Consulting Services, Inc. 2450 Lakeside Drive Baldwin, NY 11510 Office/fax 516 632-9707, Cell 516-233-7944 reliantconsulting@live.com From: Pro Test Environmental [mailto:protest410@hotmail.com] Sent: Wednesday, November 23, 2011 12:45 PM To: Chris Tomasello Subject: more information for 30 Montrose Soil Safe Inc is listed as the desination on the soil manifests: Soil Safe Inc - Bridgeport 378 Route 130 Logan Township, NJ 08085 Contaminated soil removed from the site so far: 34 plastic-lined twenty-yard containers each carrying approximately 15 yards of soil 80 triaxle dump trucks each carrying approximately 20 yards of soil All SoilSafe Inc and their transporters have all required permits for transporation of the contaminated soil, including a Part 364 permit. Both tanks were opened and have small amounts of sludge-like liquid at the bottom. Plastic sheeting information... The plastic sheeting consisted of 100-foot rolls. Over the course of the excavation process, Pro Test provided seven and All-Boro provided six rolls. --Victoria Pro Test Environmental protest410@hotmail.com 631-321-4670 Long Island 718-815-6292 NYC 631-539-0822 Fax" I, J. Kolleeny, V. Brevdo and P. John discussed this site. It was decided to alert the ECOs of DEC of the caller's allegations and request that they investigate the claims. AD 12/02/2011: The anonymous caller again contacted DEC and claimed that yesterday ProTest broke water main feeding drinking water supply for two building which is about 700 people, and that they did not report this water main break to DEP. He also stated that during this water main repair it was contaminated by groundwater from the excavation

APARTMENT BLDG (Continued)

S105055138

pit. His other claims stated that: - Contaminated pile from excavation is sitting on non-contaminated grassy area. - Oily water in excavation runs off site during rain. Contacted and spoke with Chris Tomasello and Bob Urban of ProTest Environmental regarding the issue with the broken water main of the building. I was told by Mr. Urban that their company did not brake the water main, and that ProTest was not at the site repairing it, as per caller's claim. But they confirmed the information that water line did broke at the property and that some plumbing company performed it's repair. According to Mr. Urban, water pipe is 10-15 feet away from the excavation pit, and is not in the excavation pit, as per caller's claim. The anonymous caller claim that contaminated water from the excavation pit was fed into drinking water supply line to two buildings while water main was repaired is highly unlikely, because depth to groundwater at the site is 15 feet below grade surface, while the water pipe is on much shallow depths, so they cannot interact. - According to Mr. Urban there are no any piles of contaminated soil from excavation around excavation pit or on non-contaminated grassy area. - As it was mentioned previously, depth to groundwater in the excavation pit is 15 feet below grade surface, so, given depth to groundwater and size of excavation pit, water in excavation cannot reach the grade surface and overflow the excavation pit during the rain and run off site. During my site visit, no free product or product sheen were noted at the groundwater in the excavation pit. Informed J. Kolleeny and V. Brevdo of DEC of the caller's claims. After getting a call from this called second time in a day referred him to V. Brevdo. Prepared and submitted a brief memo for this issue to J. Kolleeny and V. Brevdo. Cc this info to Alan Brassard of ECO. 2:17 PM - Received an e-mail from A. Brassard of ECO saying: "to add: I patrolled to site on 11/23 (was raining this day) and did not see any violation of anything on the road. Also Officer Okonuk patrolled location on 11/25 (in the morning) and did not find any violations. ECO Alan Brassard State DEC Police Region 2- Richmond County 4740 21st Street Long Island City, NY 11101 Office 718-482-4885 Cell 718-979-0610" Mr. Urban will follow up with more detailed information regading issue with the water main. AD 12/06/2011: Received an e-mail from T. Leddy of ProTest: "Ainura Doronova, Here is the update on 30 Montrose Avenue as you requested. We have stopped excavating contaminated soil as of November 16, 2011 as per the instructions we received from the NYC DOB. We have been continuing to back fill the existing excavation and expect to complete that back fill by next week December 16th. We are working with a professional engineering firm and a lawyer who specializes in NYC DOB permits and violation issues to obtain the proper permits for this site. All issues with the NYC DOB will be resolved before we move forward with any more excavation at 30 Montrose Avenue. Last week a 5 inch hot water pipe that is located near the excavation site (along the steam piping that heats the building) broke. Attached is a report from All-Boro Plumbing explaining what was done to repair the pipe. This pipe is at least 50 years old and Lindsay Park Management is discussing replacing the whole pipe. During the repair, the hot water was shut down, the piping was fixed then flushed, and the hot water was restored. Any temporary discoloration in the hot water after the pipe was repaired came from residue from within the piping during the flushing process. The pipe is no longer leaking. As soon as all issues with the NYC DOB are resolved we will let you know prior to continuing any excavation. Thomas Leddy President Pro Test

Environmental protest410@hotmail.com 631-321-4670 Long Island
718-815-6292 NYC 631-539-0822 Fax" AD 12/15/2011: Spoke with Chris
Tomasello regarding site's current status. He told that they ara
planing to backfill the excavation temporarily while Lindsay Park
Management will decide on the next course of actions. GW samples will
be collected from the excavation pit prior to backfilling. AD
12/28/2011: Called and spoke with B. Urban of ProTest. later received
from him the following e-mail: "Ainura Doronova: Here is a brief
update on the remediation at 30 Montrose Avenue, Brooklyn NY. We have
completely backfilled the excavation. In the area where contaminated
soil still remains we have put plastic down prior to backfilling that
area. We have created a temporary restoration of the parking area
using a dry stone base. This will allow residents to park during the
winter months without concern from muddy conditions with the wet
weather. Ground water samples have been taken prior to the
backfilling of the excavation. We will forward the results to you
when we receive them. We will be taking down at least on section of
the construction safety fence to all residents unfettered access to
the parking area. This will happen after the New Year holiday. Robert
Urban Operations Manager" AD

DEC Memo: Prior to Sept, 2004 data translation this spill Lead_DEC Field was "KOLLEENY" CALLED WILLIAM KLEIN, (1.32 PM) AT LEAST 4 TIMES. NO RESPONSE FROM ANSWERING MACHINE. DISCUSSED SPILL WITH STEVE, WHO SUGGESTS THAT I TALKED TO JON KOLLEENY. I DISCUSSED WITH JON, WHO WAS WILLING TO TAKE OVER THE INVESTIGATION & MONITOR ANY FURTHER DEVELOPEMENT. - E.R. Franklin Co. excavated some contaminated soil but had to return some soil to the pit to stabilize edge of pit under sidewalk adjacent to precinct. Franklin took end point samples and did some follow-up Geoprobe borings. Found only minor impacts to vadose zone soil, and gasoline-related impacts at water table. Site is being remediated by URS under DDC Consent Order. OK to close this spill; see open spill for this site, no. 9512590. - J. Kolleeny 4/4/05.

Groundwater monitoring still ongoing. - JK 4/4/05 Spill transferred from Kolleeny to A. Zhitomirsky on 4/4/05. - JK 10/31/2005 Reviewed report dated September 2005. MTBE is at 230 ppb. AZ 8-14-2006 Reviewed monitoring report by Roux dated July 28, 2005 for March through June 2006. MW-3 - 150 PPB mtbe in groundwater. Recommendations: maintain DPE and Oxygen delivery remediation systems shut down; continue gw monitoring, discontinue SVOCs analyses, evaluate alternative technologies. AZ 04-5-2007 Reviewed Monitoring Reports submitted in November 2006 for July through September 2006 and on March 23, 2007, for October through December 2006. Residual MTBE contamination was detected in four wells with concentrations up to 60 ppb (July 2006). Benzene and naphthalene were encountered in one well. DPE was inactive. ORC injections and ORC socks were discontinued. In October 2006 sampling event MTBE ranged from 16 ppb to 136 ppb. Some increase of MTBE concentrations was observed. ORC socks will be installed in MW 216-MW-01, 216-MW-03 and MW-09. Recommended maintaining shutdown status of DPE system, reducing monitoring and reporting to semi-annual. These recommendations were approved. An e-mail was sent to Brian Morrissey (ROUX): I have reviewed Monitoring Report for October- December 2006 dated March 15, 2007. The report recommended reducing monitoring and reporting frequency to semi-annual. ORC socks should be placed in wells where VOC concentrations exceed NYSDEC Guidance Values. AZ 10-22-2007 Reviewed Monitoring Reports submitted in August 2007 for January through June 2007. Residual MTBE contamination was detected in five wells with concentrations up to 85 ppb. ORC socks were reinstalled in three monitoring wells at the NYSDEC request. Roux recommended continuing semi-annual groundwater monitoring program. AZ 7-2-2008 Reviewed Monitoring Reports submitted in April 2008 for July through December 2008. Residual MTBE contamination was detected in four wells of the six wells with concentrations up to 56 ppb. ORC socks were reinstalled in three monitoring wells at the NYSDEC request. MTBE is the only VOC detected at a concentration greater than its NYSDEC AWQSGV in multiple wells. Roux recommended continuing semi-annual groundwater monitoring program. AZ 2-13-2009 Reviewed Monitoring Reports submitted in October 2009 for January through September 2008. Residual MTBE contamination was detected in four wells of the six wells with concentrations up to 66 ppb. ORC socks were reinstalled in three monitoring wells at the NYSDEC request. MTBE is the only VOC detected at a concentration greater than its NYSDEC AWQSGV in multiple wells. Roux will conduct a site wide groundwater sampling round in preparation for NFA. AZ 11-6-09 An e-mail was sent to Brian Morrissey/Fatemeh Ashkan/ V. Brevdo: "I have reviewed a semi-annual report for the above site dated May 22, 2009 add covering the period of June 2008 through March 2009. Roux proposed conducting soil sampling and analyses in areas of residual groundwater contamination (i.e.e 216-MW-02 and MW-08) in order to determine current status of soil impacts. Also, you proposed considering enhanced bioremediation for this site. These proposals are approved and should the work plan should be included in the next monitoring report." AZ 3-29-2011 Reviewed 4,000 gal gasoline tank closure report. 3 bottom samples were collected at depth 13 to 16 bgs. Sidewalls samples could not be collected due to the steel sheeting that was previously installed during the original tank installation. Groundwater sample was collected from approximately 13 ft bgs. No visible evidence of contamination was detected. PID readings 0.6 - 2.1 ppm. The tank was in good condition. 456.4 tons of soil was transported for offsite

disposal. No VOCs or SVOCs were detected in the soil samples. Groundwater sample contained VOCs detected above NYSDEC TOGs total VOCS 438 ppb. AZ 4-27-2011 An e-mail was sent to LiRo/DDC/V. Brevdo: "I have reviewed the Site Turnover Status Report and Semi-Annual Monitoring Report dated January 24, 2011. I concur with the LiRo's recommendations to install two wells near a former 4,000 gal gasoline UST. Since the groundwater contamination was discovered when this UST was removed, two additional wells are required near this tank (a total of four wells). Well MW-01 could be removed from the monitoring schedule, as per LiRo's recommendation. Additional soil borings are approved. There is a number of USTs, including gasoline tanks, closed in place at this site. I recommend that these tanks be removed, if feasible." AZ 11-27-2011 Reviewed report dated Aug. 29, 2011. The report stated that the latest groundwater results show VOCs were detected above AWQSGVs in four wells. LiRo will ORC socks and continue semi-annual monitoring. AZ

DER Facility ID: 263580
DEC Memo: 11/10/05: This spill transferred from J.Kolleeny to S.Kraszewski. Reviewed ISRP prepared by Gannett Fleming dated February 2003. 03/22/06: This spill transferred to K.Tang - SK 02/13/09: J.Kann - Spill transferred to J.Kann. Spoke with Ivy Olberding of PW Grosser to discuss a proposed work plan. Two borings should be advanced with soil samples collected around the groundwater interface. 4 existing monitoring wells will be sampled for analysis of STARS VOCs and SVOCs. 4/28/09: J.Kann - Draft work plan received on 2/25. Comments sent on 3/26. Final Work Plan received on 4/24 and approved on 4/27. 10/06/09: J.Kann - Site visit to observe gw sampling. 1/27/10: J.Kann - ISR submitted on 1/20/10. Spill Closure request. Report needs to be reviewed. 7/12/10: J.Kann - Based on review of the ISR, the spill was closed. Report shows on-site soil samples to have no SVOC or VOCs detected. On-site wells have not been impacted by the UST. One off-site upgradient well did have minor VOCs detected. NFA.
Remarks: housing tested tank, tank failed.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RES DECL: Restrictive Declarations Listing

A restrictive declaration is a covenant running with the land which binds the present and future owners of the property. As a condition of certain special permits, the City Planning Commission may require an applicant to sign and record a restrictive declaration that places specified conditions on the future use and development of the property. Certain restrictive declarations are indicated by a D on zoning maps.

State and tribal voluntary cleanup sites

VCP: Voluntary Cleanup Agreements

New York established its Voluntary Cleanup Program (VCP) to address the environmental, legal and financial barriers that often hinder the redevelopment and reuse of contaminated properties. The Voluntary Cleanup Program was developed to enhance private sector cleanup of brownfields by enabling parties to remediate sites using private rather than public funds and to reduce the development pressures on "greenfield" sites.

State and tribal Brownfields sites

ERP: Environmental Restoration Program Listing

In an effort to spur the cleanup and redevelopment of brownfields, New Yorkers approved a \$200 million Environmental Restoration or Brownfields Fund as part of the \$1.75 billion Clean Water/Clean Air Bond Act of 1996 (1996 Bond Act). Enhancements to the program were enacted on October 7, 2003. Under the Environmental Restoration Program, the State provides grants to municipalities to reimburse up to 90 percent of on-site eligible costs and 100% of off-site eligible costs for site investigation and remediation activities. Once remediated, the property may then be reused for commercial, industrial, residential or public use.

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

HIST SPILLS: SPILLS Database

This database contains records of chemical and petroleum spill incidents. Under State law, petroleum and hazardous chemical spills that can impact the waters of the state must be reported by the spiller (and, in some cases, by anyone who has knowledge of the spills). In 2002, the Department of Environmental Conservation stopped providing updates to its original Spills Information Database. This database includes fields that are no longer available from the NYDEC as of January 1, 2002. Current information may be found in the NY SPILLS database. Department of Environmental Conservation.

Other Ascertainable Records

RCRA-NonGen: RCRA - Non Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HSWDS: Hazardous Substance Waste Disposal Site Inventory

The list includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-Registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity. The last version of the study inventory is frozen in time. The sites on the study will not automatically be made Superfund sites, rather each site will be further evaluated for listing on the Registry. So overtime they will be added to the registry or not.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SPDES: State Pollutant Discharge Elimination System

New York State has a state program which has been approved by the United States Environmental Protection Agency for the control of wastewater and stormwater discharges in accordance with the Clean Water Act. Under New York State law the program is known as the State Pollutant Discharge Elimination System (SPDES) and is broader in scope than that required by the Clean Water Act in that it controls point source discharges to groundwaters as well as surface waters.

E DESIGNATION: E DESIGNATION SITE LISTING

The (E (Environmental)) designation would ensure that sampling and remediation take place on the subject properties, and would avoid any significant impacts related to hazardous materials at these locations. The (E) designations would require that the fee owner of the sites conduct a testing and sampling protocol, and remediation where appropriate, to the satisfaction of the NYCDEP before the issuance of a building permit by the Department of Buildings pursuant to the provisions of Section 11-15 of the Zoning Resolution (Environmental Requirements). The (E) designations also include a mandatory construction-related health and safety plan which must be approved by NYCDEP.

EDR PROPRIETARY RECORDS

EDR Proprietary Records

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Electric Power Transmission Line Data

Source: Rextag Strategies Corp.

Telephone: (281) 769-2247

U.S. Electric Transmission and Power Plants Systems Digital GIS Data

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

|-----------------------|-----------------------|
| Target Property Map: | 40073-F8 BROOKLYN, NY |
| Most Recent Revision: | 1995 |

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

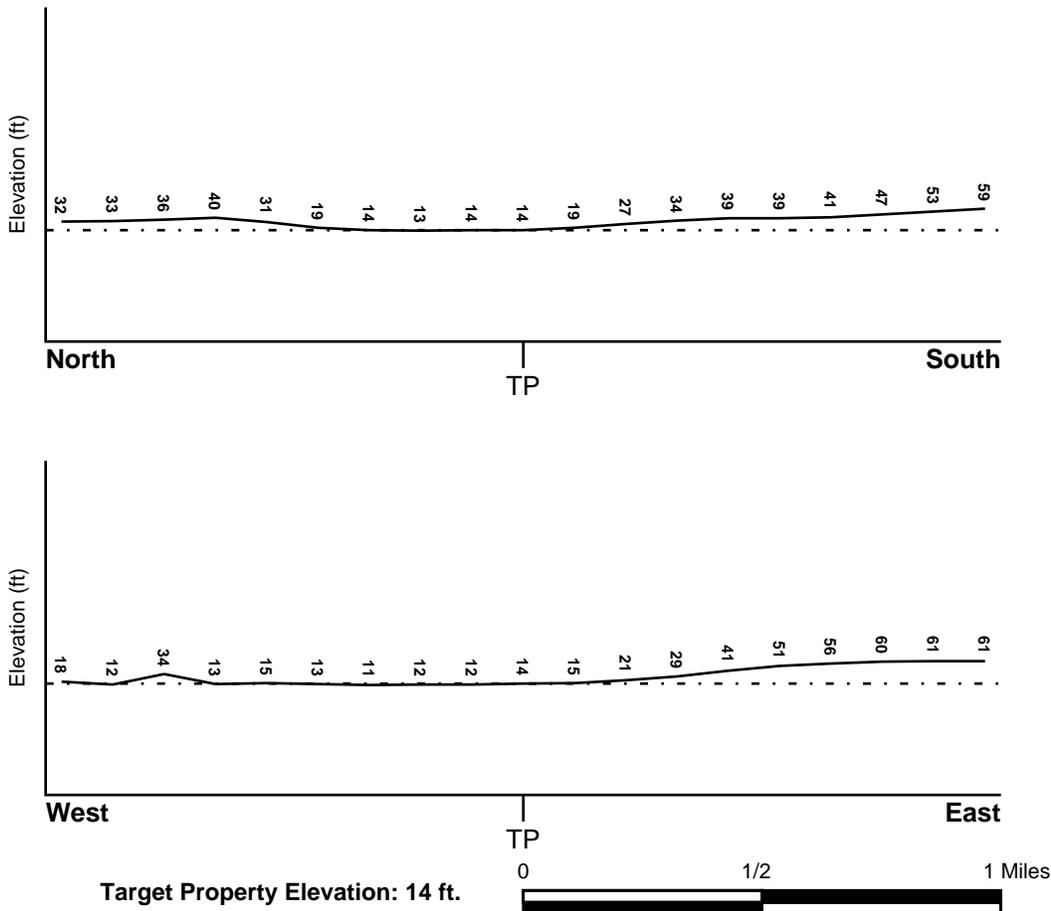

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

| | |
|-----------------------------|--|
| Search Radius: | 1.25 miles |
| Location Relative to TP: | 1 - 2 Miles West |
| Site Name: | Naval Station Ny |
| Site EPA ID Number: | NY5170022250 |
| Groundwater Flow Direction: | NOT AVAILABLE. |
| Measured Depth to Water: | 14 feet in a well located 1 mile southeast of the site. |
| Hydraulic Connection: | Information is not available about the hydraulic connection between the surficial aquifer (upper glacial till) and underlying aquifer(s). Bedrock is present at an estimated depth of 100 feet. |
| Sole Source Aquifer: | A sole source aquifer is present at or near the site |
| Data Quality: | Information is inferred in the CERCLIS investigation report(s) |

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

| <u>MAP ID</u> | <u>LOCATION</u> <u>FROM TP</u> | <u>GENERAL DIRECTION</u> <u>GROUNDWATER FLOW</u> |
|---------------|-----------------------------------|---|
| Not Reported | | |

* ©1996 Site-specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era: Mesozoic
System: Cretaceous
Series: Upper Cretaceous
Code: uK (decoded above as Era, System & Series)

GEOLOGIC AGE IDENTIFICATION

Category: Stratified Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

| Soil Layer Information | | | | | | | |
|------------------------|----------|----------|--------------------|----------------|--------------|---------------------------|------------------------|
| Layer | Boundary | | Soil Texture Class | Classification | | Permeability Rate (in/hr) | Soil Reaction (pH) |
| | Upper | Lower | | AASHTO Group | Unified Soil | | |
| 1 | 0 inches | 6 inches | variable | Not reported | Not reported | Max: 0.00 Min: 0.00 | Max: 0.00 Min: 0.00 |

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: silt loam
loamy sand
sandy loam
fine sandy loam

Surficial Soil Types: silt loam
loamy sand
sandy loam
fine sandy loam

Shallow Soil Types: sandy loam

Deeper Soil Types: unweathered bedrock
very gravelly - loamy sand
stratified
sandy loam

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

| Country: | US | Map scale: | Not Reported |
| Location map: | KE1203 | | |
| Altitude: | 47.0 | | |
| Altitude method: | Level or other surveying method | | |
| Altitude accuracy: | 0.1 | | |
| Altitude datum: | National Geodetic Vertical Datum of 1929 | | |
| Hydrologic: | Northern Long Island. New York. Area = 915 sq.mi. | | |
| Topographic: | Not Reported | | |
| Site type: | Ground-water other than Spring | Date construction: | Not Reported |
| Date inventoried: | Not Reported | Mean greenwich time offset: | EST |
| Local standard time flag: | N | | |
| Type of ground water site: | Single well, other than collector or Ranney type | | |
| Aquifer Type: | Not Reported | | |
| Aquifer: | GLACIAL AQUIFER,UPPER | | |
| Well depth: | Not Reported | Hole depth: | Not Reported |
| Source of depth data: | Not Reported | | |
| Project number: | Not Reported | | |
| Real time data flag: | 0 | | |
| Daily flow data end date: | 0000-00-00 | Daily flow data begin date: | 0000-00-00 |
| Peak flow data begin date: | 0000-00-00 | Daily flow data count: | 0 |
| Peak flow data count: | 0 | Peak flow data end date: | 0000-00-00 |
| Water quality data end date: | 0000-00-00 | Water quality data begin date: | 0000-00-00 |
| Ground water data begin date: | 1937-11-08 | Water quality data count: | 0 |
| Ground water data count: | 475 | Ground water data end date: | 1975-10-07 |

Ground-water levels, Number of Measurements: 475

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Freshwater Wetlands

Source: Department of Environmental Conservation

Telephone: 518-402-8961

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

State Database: NY Radon

Source: Department of Health

Telephone: 518-402-7556

Radon Test Results

Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

Project ID: 207 HARRISON AVE., BROOKLYN, NY3
Sample ID#s: BB98642 - BB98650

This laboratory is in compliance with the NELAC requirements of procedures used except where indicated.

This report contains results for the parameters tested, under the sampling conditions described on the Chain Of Custody, as received by the laboratory. All soils and sludges are reported on a dry weight basis unless otherwise noted in the sample comments.

A scanned version of the COC form accompanies the analytical report and is an exact duplicate of the original.

If you have any questions concerning this testing, please do not hesitate to contact Phoenix Client Services at ext. 200.

Sincerely yours,

A handwritten signature in black ink that reads "Phyllis Shiller". The signature is written in a cursive style.

Phyllis Shiller

1 = This parameter is not certified by NY NELAC for this matrix. NY NELAC does not offer certification for all parameters at this time.

1P = This parameter is pending certification by NY NELAC for this matrix.

1O = This parameter is not certified by NY NELAC for this matrix.

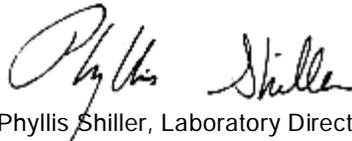

Comments:

If there are any questions regarding this data, please call Phoenix Client Services at extension 200.

ND=Not detected BDL=Below Detection Level RL=Reporting Level is equivalent to NELAC LOQ (Limit of quantitation)

All soils and sludges are reported on a dry weight basis unless otherwise noted in the sample comments.

This report must not be reproduced except in full as defined by the attached chain of custody.

1 = This parameter is not certified by NY NELAC for this matrix. NY NELAC does not offer certification for all parameters at this time.

1P = This parameter is pending certification by NY NELAC for this matrix.

1O = This parameter is not certified by NY NELAC for this matrix.

Comments:

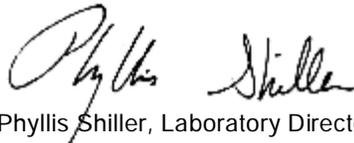

* Due to a matrix interference and/or the presence of a large amount of non-target material in the sample, an elevated RL was reported for the semivolatile analysis.

If there are any questions regarding this data, please call Phoenix Client Services at extension 200.

ND=Not detected BDL=Below Detection Level RL=Reporting Level is equivalent to NELAC LOQ (Limit of quantitation)

All soils and sludges are reported on a dry weight basis unless otherwise noted in the sample comments.

This report must not be reproduced except in full as defined by the attached chain of custody.

1 = This parameter is not certified by NY NELAC for this matrix. NY NELAC does not offer certification for all parameters at this time.

1P = This parameter is pending certification by NY NELAC for this matrix.

1O = This parameter is not certified by NY NELAC for this matrix.

Comments:

* Due to a matrix interference and/or the presence of a large amount of non-target material in the sample, an elevated RL was reported for the semivolatile analysis.

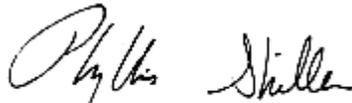

**Poor IS recovery was observed for volatiles due to matrix interference. Sample was analyzed twice with similar results.

If there are any questions regarding this data, please call Phoenix Client Services at extension 200.

ND=Not detected BDL=Below Detection Level RL=Reporting Level is equivalent to NELAC LOQ (Limit of quantitation)

All soils and sludges are reported on a dry weight basis unless otherwise noted in the sample comments.

This report must not be reproduced except in full as defined by the attached chain of custody.

1 = This parameter is not certified by NY NELAC for this matrix. NY NELAC does not offer certification for all parameters at this time.

1P = This parameter is pending certification by NY NELAC for this matrix.

1O = This parameter is not certified by NY NELAC for this matrix.

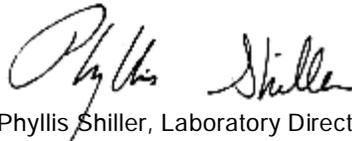

Comments:

If there are any questions regarding this data, please call Phoenix Client Services at extension 200.

ND=Not detected BDL=Below Detection Level RL=Reporting Level is equivalent to NELAC LOQ (Limit of quantitation)

All soils and sludges are reported on a dry weight basis unless otherwise noted in the sample comments.

This report must not be reproduced except in full as defined by the attached chain of custody.

Comments:

If there are any questions regarding this data, please call Phoenix Client Services at extension 200.

ND=Not detected BDL=Below Detection Level RL=Reporting Level is equivalent to NELAC LOQ (Limit of quantitation)

All soils and sludges are reported on a dry weight basis unless otherwise noted in the sample comments.

This report must not be reproduced except in full as defined by the attached chain of custody.

1 = This parameter is not certified by NY NELAC for this matrix. NY NELAC does not offer certification for all parameters at this time.
1P = This parameter is pending certification by NY NELAC for this matrix.
1O = This parameter is not certified by NY NELAC for this matrix.

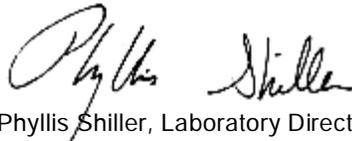

Comments:

If there are any questions regarding this data, please call Phoenix Client Services at extension 200.

ND=Not detected BDL=Below Detection Level RL=Reporting Level is equivalent to NELAC LOQ (Limit of quantitation)

All soils and sludges are reported on a dry weight basis unless otherwise noted in the sample comments.

This report must not be reproduced except in full as defined by the attached chain of custody.

1 = This parameter is not certified by NY NELAC for this matrix. NY NELAC does not offer certification for all parameters at this time.

1P = This parameter is pending certification by NY NELAC for this matrix.

1O = This parameter is not certified by NY NELAC for this matrix.

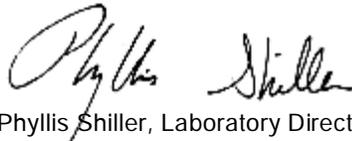

Comments:

If there are any questions regarding this data, please call Phoenix Client Services at extension 200.

ND=Not detected BDL=Below Detection Level RL=Reporting Level is equivalent to NELAC LOQ (Limit of quantitation)

All soils and sludges are reported on a dry weight basis unless otherwise noted in the sample comments.

This report must not be reproduced except in full as defined by the attached chain of custody.

Client ID: DUPLICATE

| Parameter | Result | RL | Units | Date | Time | By | Reference |
|-----------|--------|----|-------|------|------|----|-----------|
|-----------|--------|----|-------|------|------|----|-----------|

1 = This parameter is not certified by NY NELAC for this matrix. NY NELAC does not offer certification for all parameters at this time.

1P = This parameter is pending certification by NY NELAC for this matrix.

1O = This parameter is not certified by NY NELAC for this matrix.

Comments:

* Due to a matrix interference and/or the presence of a large amount of non-target material in the sample, an elevated RL was reported for the semivolatile analysis.

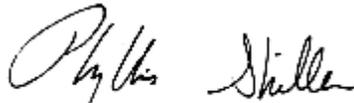

**Poor IS recovery was observed for volatiles due to matrix interference. Sample was analyzed twice with similar results.

If there are any questions regarding this data, please call Phoenix Client Services at extension 200.

ND=Not detected BDL=Below Detection Level RL=Reporting Level is equivalent to NELAC LOQ (Limit of quantitation)

All soils and sludges are reported on a dry weight basis unless otherwise noted in the sample comments.

This report must not be reproduced except in full as defined by the attached chain of custody.

Phoenix Laboratories does not assume responsibility for the data contained in this report. It is provided as an additional tool to identify requested criteria exceedences. All efforts are made to ensure the accuracy of the data (obtained from appropriate agencies). A lack of exceedence information does not necessarily suggest conformance to the criteria. It is ultimately the site professional's responsibility to determine appropriate compliance.

Subject: 207 Harrison Avenue, Brooklyn, NY

Sarah,

The Phoenix courier just picked up soil samples for 207 Harrison Avenue, Brooklyn, NY.

I need to make a slight correction to the analysis request.

Soil samples SB2(6-8) and SB2(10-12) should both be run only for VOCs CP51 and SVOCs CP51. Therefore, disregard the note about placing soil sample SB2(10-12) on hold.

I've attached a revised copy of the COC. If it's still confusing, please call me.

Thanks again,

Kevin Brussee
Project Manager

This laboratory is in compliance with the NELAC requirements of procedures used except where indicated.

This report contains results for the parameters tested, under the sampling conditions described on the Chain Of Custody, as received by the laboratory. All soils and sludges are reported on a dry weight basis unless otherwise noted in the sample comments.

A scanned version of the COC form accompanies the analytical report and is an exact duplicate of the original.

If you have any questions concerning this testing, please do not hesitate to contact Phoenix Client Services at ext. 200.

Sincerely yours,

A handwritten signature in black ink that reads "Phyllis Shiller". The signature is written in a cursive style.

1 = This parameter is not certified by NY NELAC for this matrix. NY NELAC does not offer certification for all parameters at this time.

1P = This parameter is pending certification by NY NELAC for this matrix.

1O = This parameter is not certified by NY NELAC for this matrix.

B = Present in blank, no bias suspected.

Comments:

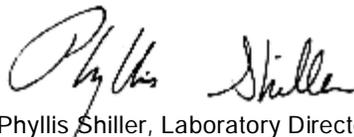

* The continuing calibration standard that followed the sample was slightly low. Sample was rerun with the same result. A sample matrix problem is suspected.

* For Pesticides, due to matrix interference from non target compounds in the sample an elevated RL was reported.

If there are any questions regarding this data, please call Phoenix Client Services at extension 200.

ND=Not detected BDL=Below Detection Level RL=Reporting Level is equivalent to NELAC LOQ (Limit of quantitation)

This report must not be reproduced except in full as defined by the attached chain of custody.

1 = This parameter is not certified by NY NELAC for this matrix. NY NELAC does not offer certification for all parameters at this time.

1P = This parameter is pending certification by NY NELAC for this matrix.

10 = This parameter is not certified by NY NELAC for this matrix.

B = Present in blank, no bias suspected.

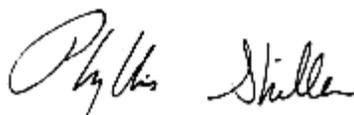

Comments:

* For Pesticides, due to matrix interference from non target compounds in the sample an elevated RL was reported.

If there are any questions regarding this data, please call Phoenix Client Services at extension 200.

ND=Not detected BDL=Below Detection Level RL=Reporting Level is equivalent to NELAC LOQ (Limit of quantitation)

This report must not be reproduced except in full as defined by the attached chain of custody.

*** No Data to Display ***

Phoenix Laboratories does not assume responsibility for the data contained in this report. It is provided as an additional tool to identify requested criteria exceedences. All efforts are made to ensure the accuracy of the data (obtained from appropriate agencies). A lack of exceedence information does not necessarily suggest conformance to the criteria. It is ultimately the site professional's responsibility to determine appropriate compliance.

Ridge NY 11961-2406

Project ID: 207 HARRISON AVE
Sample ID#s: BB99706 - BB99708

This laboratory is in compliance with the NELAC requirements of procedures used except where indicated.

This report contains results for the parameters tested, under the sampling conditions described on the Chain Of Custody, as received by the laboratory. All soils and sludges are reported on a dry weight basis unless otherwise noted in the sample comments.

A scanned version of the COC form accompanies the analytical report and is an exact duplicate of the original.

If you have any questions concerning this testing, please do not hesitate to contact Phoenix Client Services at ext. 200.

Sincerely yours,

A handwritten signature in black ink that reads "Phyllis Shiller". The signature is written in a cursive style.

Phoenix Laboratories does not assume responsibility for the data contained in this report. It is provided as an additional tool to identify requested criteria exceedences. All efforts are made to ensure the accuracy of the data (obtained from appropriate agencies). A lack of exceedence information does not necessarily suggest conformance to the criteria. It is ultimately the site professional's responsibility to determine appropriate compliance.
