

## Public Comment Period

June 1, 2016  
to  
July 1, 2016

## Where can I view project documents?

### Online at:

<http://www.nyc.gov/html/oer/html/repository/RBrooklyn.shtml>

Internet access to view documents is available at the public library.

The closest location is:

Brooklyn Public Library  
Bedford Branch  
496 Franklin Avenue,  
Brooklyn, NY

Please call (718)-623-0012 for hours of operation

## Whom can I contact for project information?

Horace Zhang  
Project Manager  
NYCOER  
100 Gold Street, 2<sup>nd</sup> Floor  
New York, NY 10038  
212-788-8484  
[hzhang@dep.nyc.gov](mailto:hzhang@dep.nyc.gov)

and

Shaminder Chawla  
Deputy Director  
NYCOER  
(212) 442-3007  
[Schawla@dep.nyc.gov](mailto:Schawla@dep.nyc.gov)

## NYC VCP Cleanup Plan Available for Review and Comment

The New York City Office of Environmental Remediation (OER) provides this Fact Sheet pursuant to New York City's Voluntary Cleanup Program (VCP). An application has been submitted by Big Apple Developers for enrollment of the property located at 1019-1033 Fulton Street in the Clinton Hill section of Brooklyn, New York and identified as Block 1991, Lots 1, 2, 3, 4, 5, 6, 7, and 106 into the VCP. The Remedial Investigation Report (RIR) details the results of an environmental investigation at the site including the nature and extent of contamination. The draft Remedial Action Work Plan (RAWP) proposes remedial actions to address contamination delineated in the RIR.

### Public Comments on the RAWP

OER is accepting public comments on the draft RAWP for 30 days until July 1, 2015. The RIR and draft RAWP are available for review at the document repositories identified in the box on the left including a public library branch and through a link to OER's website. Comments should be sent to Mr. Shaminder Chawla via mail or e-mail (see contact information at left).

### Site Description

The Site is 7,524 square feet and is currently is undeveloped vacant land. The proposed future use of the Site will be a 8-story mixed-use building with a cellar the full size of the building footprint.

### Summary of RIR

The environmental investigation identified one Volatile Organic Compound (VOC), several Semi-Volatile Organic Compounds (SVOCs), metals, and pesticides above cleanup guidelines. Groundwater samples were not collected at the site due to refusal at 20 ft below sidewalk grade. Soil vapor samples showed one chlorinated VOC above the monitoring/mitigation level range established by the New York State Department of Health.

### Summary of the Remedy

The specific elements of the proposed remedial action include:

- Preparation of a Community Protection Statement and performance of all required NYC VCP Citizen Participation activities according to an approved Citizen Participation Plan;
- Implementation of a Community Air Monitoring Plan for particulates and volatile organic carbon (VOCs) compounds;
- Establishment of Site Specific (Track 4) Soil Cleanup Objectives (SCOs);
- Excavation and removal of soil/fill exceeding Track 4 Site Specific SCOs. The footprint of the new building will cover the entire site and will be excavated 12 feet below grade. Approximately 5,460 tons of soil will be excavated and removed from Site;
- Transportation and off-Site disposal of all soil/fill material at permitted facilities in accordance with applicable laws and regulations for handling, transport, and disposal, and this plan. Sampling and analysis of excavated media as required by disposal facilities and appropriate segregation of excavated media onsite;
- Implementation of storm-water pollution prevention measures in compliance with applicable laws and regulations;
- Collection and analysis of end-point samples to determine the performance of the remedy with respect to attainment of SCOs;
- Submission of a Remedial Action Report (RAR) that describes the remedial activities and certifies that the remedial requirements have been achieved and lists any changes from this RAWP;
- Installation of a vapor barrier/waterproofing system below the concrete slab underneath the building, as well as behind foundation walls of the proposed building;
- Construction and maintenance of an engineered composite cover consisting of 8" thick concrete slab over the entire site;
- Submission of an approved Site Management Plan (SMP) in the RAR for long-term management of residual contamination, including plans for maintenance, inspection and certification of Engineering and Institutional Controls and reporting at a specified frequency; and
- Continued registration with E-designation for the property.

## Next Steps

OER will review the draft RAWP and consider all public comments submitted during the comment period before it approves a final RAWP. The approved RAWP will be placed on OER's website and a second fact sheet will be issued before remedial work begins.

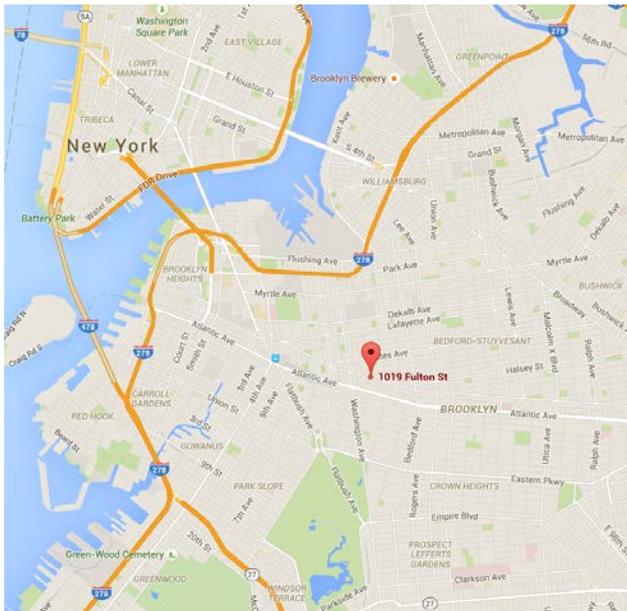

If you have any questions or know of any neighbor that would like to be added to the site contact list, please contact the OER Project Manager listed on the front page of this Fact Sheet. We encourage you to share this Fact Sheet with neighbors and tenants and/or post it in a prominent area of your building.
