DEC Memo: Sangesland spoke to DEP rep. Apparently several days ago this building had a problem with an oil leak in it's basement. DEP was notified but not DEC. Building Manager is "Neil" at R.A.Cohen & Associates (212-972-5900 ext 203) Neil said that he has had some work done in the basement on the tank, but he did not know any details and he did not know if the problem was solved. Unless he can describe exactly what happened to the tank and what work has been done, a site visit may be required to confirm that the floor is clean and the repairs have been made. 12/6/05 - Raphael Ketani. I tried calling Neil Gevertz, the building manager, at the above phone number, but could only leave a voice mail. He has a new direct phone number:

(212) 835-9530. I left a voice mail message there, also. 12/8/05 - Raphael Ketani. Mr. Gevertz called me back. We arranged a site visit on 12/12 at 2PM. 12/12/05 - Raphael Ketani. I met Mr. Gevertz (management company rep.), Mr. John Masini, Vice President M.M.I. Mechanical Inc. (718) 449-4166 (boiler and tank maintenance), and Bill Herrera, superintendent of the building, at the site. The boiler room was fresh painted and dry with no odors. There were no cracks in the floor. No stains were visible on the floor, or on the piping. The spill had been called in due to a defective valve. I saw the replacement valve. The valve appeared to be installed properly. Next, we went to the boiler room. The boiler room showed no signs of spills. There was a new oil pump and assembly on the boiler. There were no odors. Lastly, I checked around the vent and fill pipes. There were no stains. Based on the inspection, I am closing the case. OVERFILL OF TANK, NO FURTHER INFO AVAILABLE

DER Facility ID: 309129  
DEC Memo: 02/03/06 Feroze talked with Mr. Minick (owner) 212-604-9898. He informed that there was a leak in the tank, they have closed the leak and pumped the oil out. It is above ground tank, floor is made of concrete. An environmental company is working for them. TTF is sent to : Mr. Minick 440 west 22nd Street New york, NY 10011. 02/10/06 Mr. Minick called and told me that they will close the tank by PTC. He will submit DEC the documents soon. 03/02/06 Feroze; Mr.Minick told me that PTC has taken soil sample. He will submit soil analysis result and tank closer report to DEC soon.It was 275 gallon tank. 03/10/06 Feroze received a certificate and soil analysis result. The result shows that VOC and SVOC are within acceptatble limit. They also submitted a manifest for removal of contaminated soil. The spill is closed.

Remarks: ruptured tank in basement:

Tibbe knows about a major spill site just upgradient from this site. 2/5/03 - TRANSFERRED FROM SAWYER TO ROMMEL 3/1/04 Reassigned from Rommel to K Foley. Spill Remediation Plan received 12/22/03 for removal of four 260gal gas USTs, one 500gal gas UST, and one 500gal no. 2 fuel oil UST. Site under development but once contained three buildings. A former auto service and plastic manufacturing existed on site. Five USTs from NW corner were removed 9/29/03 (four 260gal gas USTs and one 500gal gas UST). Soil excavation was postponed due to safety concerns. Will excavate and direct load for disposal. A minimum of four post-ex samples will be collected at PID hot spots on each sidewall. DTW is 6'bgs and therefore a bottom sample will probably not be feasible. If there is potential for structural damage to the adjacent building, two soil samples will be collected from that sidewall. Two samples will be collected from sidewalls greater than 20' in length. Analysis by VOCs (8021) and SVOCs (8270). Spill #9704542 was previously reported for a fuel oil release from UST. Scaled site map with former tank locations/hot spots and Phase I and II reports. There have been site investigations and proposed remediation plans submitted for 543-547 West 23rd St (spill #8605848). There is documented fuel oil and gasoline contamination of groundwater associated with sites to the east that have encroached upon the site. Mendon Leasing, 527 W 23rd file(#9605688,9808740,9511782, 9513588). 3/22/06 Reassigned from Foley to Tang. (KMF) 4/3/06: Reassigned to Andersen. Three sources of contamination: Fuel oil leak from a UST in northeast corner. Gasoline leak from five USTs in northwest corner. Gasoline groundwater contamination from adjacent Mendon Leasing site. All six tanks were removed by Fleming Lee Shue (FLS). The tank closure report was not received. Spoke with FLS and they will resend a report that was sent to Albany. 4/7/06: Received and reviewed tank closure report. Soil was excavated from three areas of contamination. Residual SVOC contamination from urban fill and VOC contamination from the adjacent spill site is present. The site will be redeveloped with a vapor barrier. NFA letter sent.

Remarks: CALLERS COMPANY PERFORMING EXCAVATIONS ON SITE, AND SOIL SAMPLES ARE SHOWING GASOLINE CONTAMINATION OF THE SOIL AROUND SOME UNDERGROUND TANK SITES ON THE PROPERTY

DEC Region: 2  
DER Facility ID: 127520  
DEC Memo: Prior to Sept, 2004 data translation this spill Lead\_DEC Field was "TIBBE/SANGESLAND" 12/10/2002 Sangesland reviewed a report prepared by David Winslow of ATC Associates Inc (212-353-8280). Report states that contamination was found around a buried 1000 gal tank under the floor of the building. The tank was cleaned out and excavated around. Because of foundation issues, the tank could not be removed and not all of the contaminated soil could be removed. Based on the soil conditions, Sangesland requested groundwater samples from the area. ATC took four groundwater samples in the area of this tank. GW is at approx 8 ft below the cement floor level. 3 of 4 samples are clean. One has some VOC hits just over 8020. Based on the location and the inability to excavate further, and that the surrounding water samples were clean, we can conclude that the contamination is localized and not spreading. Spill closed

Remarks: CALLER STATES UPON REMOVAL OF THE UNDERGROUND TANK - FOUND HOLES IN THE TANK AND CONTAMINATED SOIL

DEC Memo: Prior to Sept, 2004 data translation this spill Lead\_DEC Field was "SAWYER" 4/22/03 SAMUEL- RCVD TANK CLOSURE & SITE ASSESSMENT REPORT. CONTACT PERSON:- HUGH J FREUND 212 705 7000- ATTORNEY FOR THE MARY BOONE GALLERY (R.P) 2/9/06- DEC Piper spoke w/ LEE WESTCHOTT at Whitman CO. As per conversation there was free floating product discovered at the property. There is a monitoring well network. It has been recently sampled and Lee will forward a summary status report to the dept. including analytical summaries within the next month. Case referred to Koon Tang. 06/08/06: This spill transferred to S.Kraszewski. - SK 08/14/06: Received a voicemail from Ira

S104782023

Whitman, concerning the status of the site. He gave no callback number. SK reviewed the Tank Closure Report from Fall 2001. It is evident that high levels of VOCs were detected around the fuel oil UST. Lower exceedances were also found around the gasoline USTs and the Oil/Water separator. No mention if GW was encountered; the site lies next to the Hudson River so GW is probably shallow. No MWs were installed during the investigation. Must know the GW condition above all else at this point. - SK 08/15/06: Called Ira Whitman (732-553-4333) after he left a voicemail. He is no longer the consultant involved with this site, in fact he believes that no firm is involved at all. He was involved on a site project adjacent from this one: Dynamic Delivery was the contractor involved with the clean-up. He said this site already received an NFA. I said, based on the report, the GW condition must be established. He said it might be worth-while to review the reports from the neighboring site, which is also downgradient from this one (closer to the Hudson.) He said to contact a John Houshmand, of Clark Construction, who discovered the tanks during renovation work on the property. - SK 08/18/06: Left a message for John Houshmand (917-553-4333). - SK 08/22/06: John Houshmand called back. He gave me the contact info for Mary Boone, owner of the gallery. Gallery: 212-753-2929, Cell: 917-861-2929. She is not the property owner of the site, she only rents the space. According to John, contractor for the building and several others nearby, after the abatement of the gasoline tanks, fuel oil tank and sump pit the entire area was covered in concrete and established as the Mary Boone Gallery. He also mentioned the adjacent site which supposedly has GW wells and may be useful in characterizing the GW condition for this site. I told John I would look into this other site and get back to him, since he regularly deals with the owner. - SK 08/29/06: I discussed the site situation with JK. The site needs a GW investigation, unfortunately there is no access to the interior so the MWs need to be placed on the sidewalk next to the former gasoline USTs and oil/water separator pit. Also, a soil boring next to the gasoline fill port will be needed. I called John Houshmand (917-553-4333) and explained what work would need to be done. I also asked him for the property owner's contact info since it is not on file. He will find out, plus he asked about other consultants to do the work since The Whitman company had a falling out with Mary Boone. I said to convince her that he seems like a reputable company based on the report. Letter was sent out asking for two MWs, a soil boring and sub-slab soilgas sampling. Property owner is a Samuel Weinberg. - SK 11/09/06: Reassigned from Stephen Kraszewski to Chanda. (Chanda) 01/02/07: Kartik Chnada of DEC sent a letter to Property Owner (Mr. Samuel Weinberg), requiring that an additional investigation of GW and additional monitoring wells at the site. A work plan is mandated by 03/02/07 for approval. 01/10/07: Chanda received an e-mail from John Houshmand, Clark Construction Corp. He said that the RP will be retained Long Island Analytical Laboratories (LIAL), Inc. to perform this work. 2/27/07: Chanda received a limited subsurface investigation work plan prepared by LIAL dated on 2/26/07. 2/28/07: Chnada reviewed the limited subsurface investigation work plan. On 2/28/07, the Department conditionally approves this work plan. On 2/28/07, Chanda sent a letter to RP (Samuel Weinberg) and his consultant (John Houshmand), Michael Veraldi (LIAL), requiring that an investigation summary report be submitted to DEC for review by April 16, 2007. 4/19/07: Chnada received a phone call from Michael Veraldi, LIAL concerning the status of the site. He explained to me the cause

of the delay on the investigation work report. 4/23/07: Chanda received a letter from Michael veraldi, LIAL regarding an extension to complete the approved work plan at the site. 4/24/07: Chanda sent a time extension approval letter to the RP( Samuel Weingberg) and his consultant ( John Hushmand), Michael Veraldi (LIAL). An Investigation Summary Report must be submitted to the Department by May 4, 2007. (Chanda) 5/24/07: Chanda called John Hushmand (Clark Construction Corp.)and Micheael Veraldi (LIAL) regarding the investigation Summary Report and present site status. Micheal told me all work has been done and he is wating for analytical results. The report will be submitted to DEC for review by 5/31/07. 6/6/07: On 6/5/07, Chanda received a Limited sub-surface site investigation report prepared by LIAL dated May 30, 2007. 6/8/07:Kartik Chanda of DEC reviewed the imited sub-surface site investigation report regarding this spill. The soil samples, grondwater samples and soil vapor samples showed that results is not exceed our NYSDEC and NYSDOH guideline. Chanda discussed with Joe Sun (NYSDEC) regarding the results of soil, groundwater, and soil vapor samples. Based on the information presented to the Department DEC closed this spill case. 6/11/07: Chanda sent a NFA letter to Samual Weinberg, Weinberg Properties and his consultants (John Houshmand, and Miciael Vrraldi) regarding closed this spill case.

Remarks: while removing tanks contaminated soil found -

DEC Memo: Prior to Sept, 2004 data translation this spill Lead\_DEC Field was "SAWYER" 4/23/2004 Sangesland spoke to Mark at PTC. He said PTC was hired to clean out a tank. During this cleanout a small hole was found. The owner told PTC to take the tank out. Tank was aboveground and wrapped in concrete. Contaminated sand was found in the area behind the concrete wrap. The wrap & contaminated material was removed and so was the tank. Floor under the tank appears in good condition. Clean up should be complete, but Mark will need to conduct one more site visit to confirm cleanup is complete. 4/29/04 - Sawyer - Spoke to Letty of the management company and she is going to try to obtain the work and disposal documentation for closure. 5/10/04 - Sawyer - Letty of Hand on management sent the receipts from PTC for

DEC Remarks: CALLER IS GOING TO REMOVE ALL CONTAMINATED SOIL. DEC Sigona) called Mike Tumulty on 7/28/98. He called back left message on 7/29/98 said they removed a 550 at former taxi storage facility. They will try to remove all of the contaminated soil and take end-point samples and send results to DEC. This is the site of the former set for the TV show Taxi. DEC Sigona) would perform field inspection if further excavation and remediation is necessary depending on laboratory results. 7/29/98 2:30 P.M. Developer is nervous because they plan to erect 7 story building at site.

Spill Cause: caller pulling old tank at taxi station, encountered contaminated soil.

DEC Memo: CALLER IS GOING TO REMOVE ALL CONTAMINATED SOIL. DEC (Sigona) called Mike Tumulty on 7/28/98. He called back left message on 7/29/98 said they removed a 550 at former taxi storage facility. They will try to remove all of the contaminated soil and take end-point samples and send results to DEC. This is the site of the former set for the TV show Taxi. DEC (Sigona) would perform field inspection if further excavation and remediation is necessary depending on laboratory results. 7/29/98 2:30 P.M. Developer is nervous because they plan to erect 7 story building at site. This gasoline spill case has been reassigned from DEC (Sigona) to Rommel on January 7, 2004. 9/28/04 Transferred from Rommel to K Foley. 12/7/05 Transferred from Foley to Andersen. 12/23/05: Reviewed file. A 550 gas tank was removed and surrounding contaminated soil. GW was impacted. Latest monitoring report from H2M is dated 10/20/1999. Report indicates a significant increase in BTEX concentration after ORC was applied. H2M concluded there is an off site source and additional remedial action wasn't planned. Sigona visited the gas station (107 Charles Street/540 Hudson Street) and confirmed that they have un-registered UST's. The other potential source (6th precinct, spill # 92-12918) does not appear to be a significant contributor (see Jon Kolleenys memo). I called Chuck Martello (H2M) and left a message requesting recent monitoring data and informing him I will draft a letter with results of my potential off site source investigation. 1/3/06: Sent an additional delineation letter requiring a MW by 107 Charles Street by 2/28/06, and quarterly reports. 3/20/2006: Called Chuck Martello of H2M and he does not have any recent info about the site and has not spoken to Sligo Realty since 1999. Phone number for Gerald Cunningham of Sligo Realty is not in service. NYSDOS dept of corporations entity info lists Sligo's address as SLIGO REALTY AND SERVICE CORP., 248 W. 60TH ST., NEW YORK, NEW YORK, 10023. Property shark and acris show no title info. Recent building permits show the contact to be Seth Weinstein (212-307-0500 x228). Spoke with Seth Weinstein. He is the current owner/manager of the property, which is a condominium. He requested a fax with information regarding the spill (fax: 212-262-5697). 3/21/06: Faxed Seth Weinstein a letter requiring additional delineation and quarterly reports, a FOIL spill report, and the H2M letter/report dated 10/20/1999. 3/23/06: Received phone call from Gerald Cunningham's attorney: Matt Parisi of Bleakley, Platt and Schmidt, he is going to trial in 1 week and will give me an

update on the case afterwards. Matthew G. Parisi Bleakley Platt & Schmidt, LLP One North Lexington Ave. White Plains, New York 10601 www.bpslaw.com P: 914-287-6184 F: 914-683-6956 mparisi@bpslaw.com  
5/23/06: Spoke to Matthew Parisi. He will contact rp and consultant and get back to me. 6/20/06: Left voice message for Matthew Parisi to followup on overdue delineation and quarterly reporting. 6/21/06: Received phone message from Matt Parisi, he will speak with the consultant and get back to me. 7/26/06: Left voice message with Matt Parisi on status of overdue quarterly report. 8/11/06: Left phone message with Matt Parisi on status of site. 8/21/06: Sent stipulation agreement. Due back 9/18/06. 8/25/06: Spoke with Matt Parisi. A FOIL request will be submitted for 6th precinct spill upgradient. 8/28/06: Received the cc of a FOIL request for 6th precinct spill. 10/6/06: Spoke to Matthew Parisi. I recommended he call Gloria Silva regarding the FOIL request. 10/23/06: Spoke to Matthew Parisi. He will call Gloria Silva and then call me back with an update. 10/27/06: Received email from Matthew Parisi: "Following up on our recent conversations, Gloria Silva is going to send all the documents subject to my FOIL requests to a printer for copying. I will contact you when I receive the copies." 11/13/06: Left voice message with Matthew Parisi to followup on site status. A new deadline for Stip, update report, and delineation should be established. 11/15/06: Received email from Matthew Parisi (mparisi@bpslaw.com): "I finished picking a jury this morning and the trial is starting tomorrow morning. On this matter, we received a disc containing "a portion of the 6th Precinct DEC file." It was my understanding that the rest of the documents were being copied already. However, Ms. Silva called me today and said that they were going to send them to the copy center today. She said that I would get a call about the cost involved from the copy place, who I will tell to copy the entire file. I will let you know when I hear from them and will expedite the review process as best I can. As far as deadlines, Ms. Silva told me that she was going to copy about 2 to 3 inches worth of files. When I get them I will send them right out to H2M. If Ms. Silva's estimate is correct, I would think that we could have them reviewed within 2-3 weeks of receipt." 11/28/06: File was sent out to be copied by the Department for the FOIL request. 1/2/07: Sent email to Matthew Parisi indicating that a signed stip, update report, and delineation report are due on 2/2/07. 1/3/07: Received call from Matthew Parisi, copies from the FOIL request have not been received yet. 2/15/07: Spoke to Chuck Martello at H2M (973-942-0700 x 230). FOIL documents are under review. Groundwater will be sampled. 5/1/07: Left phone message for Chuck Martello to followup on groundwater sampling. 5/9/07: Left phone message for Chuck Martello to followup on site status. 5/10/07: Emailed Chuck Martello (cmartello@h2m.com) to followup on groundwater sampling. 5/11/07: Received phone message from Chuck Martello. He has not been able to contact the client for this site. Left voice message for Matt Parisi. 5/17/07: Received email from Matt Parisi: "Earlier today I reached both my client and Chuck Martello from H2M regarding the outstanding issues. I believe that Chuck will be reaching out to you (or may have already). In any event, they are going to address the outstanding issues and get back to you shortly." Spoke to Chuck Martello. Groundwater sampling planned for next week. 6/4/07: Received phone message from Churck Martello. Contract expected to be signed this week. 6/6/07: Groundwater sampling scheduled for 6/8/07, 10:30 am. 6/8/07: Witnessed groundwater sampling of MW11 and MW13. The site is currently a Rite Aid (ground floor), apartment building

(hudson street entrance), and nursing home (charles street entrance).  
7/17/07: Spoke to Chuck Martello. Report is in preparation. 7/31/07:  
Emailed Chuck Martello to followup on submittal date for groundwater  
sampling report. 8/15/07: Left voice message for Chuck Martello  
regarding overdue report. Spoke to Chuck Martello. He is waiting for  
authorization to release the report from the attorney Matt Parisi.  
8/22/07: Reviewed letter report. BTEX 229 ppb (MW12). MTBE 64 ppb  
(MW12). Sent letter requiring quarterly sampling and reporting.  
2/14/08: Received phone call from Chuck Martello of H2M. Wells have  
been sealed with grout. He is investigating to see who sealed wells  
(maybe consultant for 6 precinct spill). Wells will need to be  
reinstalled. 3/10/08: Received phone message from Chuck Martello, URS  
will replace well on Monday. 3/12/08: Spoke to Chuck Martello  
(973-942-0700). Well was not installed because scaffolding was  
present around the building. Well will be installed when scaffolding  
is removed. Reviewed letter dated 1/22/08 proposing the use of ORC  
socks in the well when it is reinstalled. 3/18/08: Sent letter  
approving use of ORC socks in MW12, when it is reinstalled. (Curt  
Schmidt: cschmidt@h2m.com) 8/6/08 - Carlson: Left phone message for  
Curt Schmidt (973-942-0700 x2234) - quarterly report is overdue.  
Spoke to Curt Schmidt - scaffolding is still in place, well can't be  
reinstalled until the end of the year. He will send letter. 9/4/08 -  
Carlson: Received letter from H2M. MW12 can't be reinstalled until  
scaffolding removal in later 2008. 11/26/08 - Carlson: Received  
letter from H2M. Well installation still delayed because scaffolding  
is in place. 3/20/09 - Carlson: Received letter notifying that well  
installation scheduled for 4/1/09. Need to confirm soil sampling will  
be conducted during well installation. 4/10/09 - Carlson: Received  
letter from Curt Schmidt. MW12 was reinstalled in the same borehole,  
ORC socks installed in well. 7/9/09 - Carlson: Received email from  
curt schmidt, orc socks removed, site will be sampled on 7/16/09.  
2/19/2010 - Carlson: Sent email to Curt Schmidt - quarterly report  
overdue. Spoke to Curt Schmidt. Report will be submitted in one or  
two weeks.

Remarks: Caller pulling old tank at taxi station, encountered contaminated soil.

DEC Remarks: DEC (SIGONA) RECEIVED A CLEANUP REPORT from H2M Group dated October 26, 1998. DEC reviewed the results of endpoint soil testing and found that the levels met STARS Memo No. 1 guidance values. This closes the spill associated with the waste oil USTs (see letter to Sligo Realty Co, dated Nov 24, 1998). However, the spill investigation no. 9805274 associated with the removal of the former gasoline USTs is being cleaned up by a separate cleanup plan from H2M Group, dated September 25th Oct. 2nd, 1998 were approved in a letter to Sligo Realty,

DEC Region: 2  
DER Facility ID: 272958  
DEC Memo: Sangesland spoke with Roux Assoc. Tank excavation with some spillage around tanks. (Tanks had been previously abandoned in place). Now tanks are being pulled. Sangesland asked for several end point soil samples taken from tank grave after removal. Test for VOC & SVOC. 3/16/2005 Sangesland reviewed a report from Roux Assoc. dated 3/9/05 On 2/18/05 Roux collected 6 post-ex samples. One per each side & 2 bottom VOC's - All samples contained low levels of VOC's, but they were ALL BELOW RSCO Stds. SVOC's - Some minor "Hits" on PAHs consistant with historical fill levels. Results show some contaminants exceed regulatory standards. Samples taken on removed (waste) soils showed much higher VOC & SVOC levels. Roux conclusion says that the contamination "source" has been removed and the site should be closed out. Based on the soil sampling work performed on the site and the report prepared by Roux Assoc., the NYSDEC agrees with the conclusion and the spill case is closed with: "No Further Action - Does Not Meet Standards"  
Remarks: REMOVING TANK, JUST AN ODOR IN THE SOIL: NOT SURE HOW TO MOVE FORWARD WITH PROJECT:

 DEC Region: 2  
 DER Facility ID: 345584  
 DEC Memo: 04/13/10 - LZ Reviewed a TT report and and a letter from Approved Oil Co.(eDocs), asserting that the fill and vent lines have been repaired, and the tank system has passed the tightness test. The spill case is closed. 03/29/10 - LZ Sent a certified TTF letter(eDocs) to Friedman Mgt. Corp at 225 West 34th Street New York, NY 10122 4/23/08 bf: sent ttf letter to: Adam Stryker Chelrae Estates, Inc. 225 West 18th St., Suite 2010 New York, NY 10122 4/30/08 Received call from Steve Braun (718)238-1050. Tank is AST. He wanted to know if tank still needs retest. Tank probably failed because of fillbox. I told him tank system needs retest. He will also prepare letter/report and include contasmiation findings. bf

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

## STANDARD ENVIRONMENTAL RECORDS

### ***Federal NPL site list***

#### **NPL: National Priority List**

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 03/31/2010	Source: EPA
Date Data Arrived at EDR: 04/02/2010	Telephone: N/A
Date Made Active in Reports: 04/12/2010	Last EDR Contact: 07/14/2010
Number of Days to Update: 10	Next Scheduled EDR Contact: 10/25/2010
	Data Release Frequency: Quarterly

#### **Proposed NPL: Proposed National Priority List Sites**

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 03/31/2010	Source: EPA
Date Data Arrived at EDR: 04/02/2010	Telephone: N/A
Date Made Active in Reports: 04/12/2010	Last EDR Contact: 07/14/2010
Number of Days to Update: 10	Next Scheduled EDR Contact: 10/25/2010
	Data Release Frequency: Quarterly

#### **NPL LIENS: Federal Superfund Liens**

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991	Source: EPA
Date Data Arrived at EDR: 02/02/1994	Telephone: 202-564-4267

Number of Days to Update: 56	Next Scheduled EDR Contact: 08/30/2010
	Data Release Frequency: No Update Planned

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## ***Federal Delisted NPL site list***

### DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 03/31/2010	Source: EPA
Date Data Arrived at EDR: 04/02/2010	Telephone: N/A
Date Made Active in Reports: 04/12/2010	Last EDR Contact: 07/14/2010
Number of Days to Update: 10	Next Scheduled EDR Contact: 10/25/2010
	Data Release Frequency: Quarterly

## ***Federal CERCLIS list***

### CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 01/29/2010	Source: EPA
Date Data Arrived at EDR: 02/09/2010	Telephone: 703-412-9810
Date Made Active in Reports: 04/12/2010	Last EDR Contact: 07/12/2010
Number of Days to Update: 62	Next Scheduled EDR Contact: 10/11/2010
	Data Release Frequency: Quarterly

### FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA's Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 06/23/2009	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/15/2010	Telephone: 703-603-8704
Date Made Active in Reports: 02/10/2010	Last EDR Contact: 07/21/2010
Number of Days to Update: 26	Next Scheduled EDR Contact: 10/25/2010
	Data Release Frequency: Varies

## ***Federal CERCLIS NFRAP site List***

### CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Date of Government Version: 06/23/2009	Source: EPA
Date Data Arrived at EDR: 09/02/2009	Telephone: 703-412-9810
Date Made Active in Reports: 09/21/2009	Last EDR Contact: 07/12/2010
Number of Days to Update: 19	Next Scheduled EDR Contact: 09/13/2010
	Data Release Frequency: Quarterly

## ***Federal RCRA CORRACTS facilities list***

### CORRACTS: Corrective Action Report

CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Date of Government Version: 03/25/2010

## ***Federal RCRA non-CORRACTS TSD facilities list***

### **RCRA-TSDF: RCRA - Treatment, Storage and Disposal**

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 02/17/2010  
Date Data Arrived at EDR: 02/19/2010

Data Release Frequency: Quarterly

## ***Federal RCRA generators list***

### **RCRA-LQG: RCRA - Large Quantity Generators**

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 02/17/2010  
Date Data Arrived at EDR: 02/19/2010  
Date Made Active in Reports: 05/17/2010  
Number of Days to Update: 87

Source: Environmental Protection Agency

### **RCRA-SQG: RCRA - Small Quantity Generators**

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 02/17/2010  
Date Data Arrived at EDR: 02/19/2010  
Date Made Active in Reports: 05/17/2010  
Number of Days to Update: 87

Next Scheduled EDR Contact: 10/18/2010  
Data Release Frequency: Quarterly

### **RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators**

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 02/17/2010  
Date Data Arrived at EDR: 02/19/2010

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## ***Federal institutional controls / engineering controls registries***

### US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 12/20/2009	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/20/2010	Telephone: 703-603-0695
Date Made Active in Reports: 04/12/2010	Last EDR Contact: 06/14/2010
Number of Days to Update: 82	Next Scheduled EDR Contact: 09/27/2010
	Data Release Frequency: Varies

### US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 12/20/2009	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/20/2010	Telephone: 703-603-0695
Date Made Active in Reports: 04/12/2010	Last EDR Contact: 06/14/2010
Number of Days to Update: 82	Next Scheduled EDR Contact: 09/27/2010
	Data Release Frequency: Varies

## ***Federal ERNS list***

### ERNS: Emergency Response Notification System

Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances.

Date of Government Version: 12/31/2009	Source: National Response Center, United States Coast Guard
Date Data Arrived at EDR: 01/22/2010	Telephone: 202-267-2180
Date Made Active in Reports: 02/11/2010	Last EDR Contact: 07/09/2010

	Data Release Frequency: Annually

## ***State- and tribal - equivalent CERCLIS***

### NY SHWS: Inactive Hazardous Waste Disposal Sites in New York State

Referred to as the State Superfund Program, the Inactive Hazardous Waste Disposal Site Remedial Program is the cleanup program for inactive hazardous waste sites and now includes hazardous substance sites

Date of Government Version: 05/24/2010	Source: Department of Environmental Conservation
Date Data Arrived at EDR: 05/26/2010	Telephone: 518-402-9622
Date Made Active in Reports: 06/21/2010	Last EDR Contact: 05/26/2010
Number of Days to Update: 26	Next Scheduled EDR Contact: 09/06/2010
	Data Release Frequency: Annually

### NJ SHWS: Known Contaminated Sites in New Jersey

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

The Known Contaminated Sites in New Jersey includes sites under the purview of the Site Remediation Program which have contamination present at levels greater than the applicable cleanup criteria for soil and/or groundwater standards. The sites appearing in Known Contaminated Sites in New Jersey are classified as either active, where the site is assigned to a specific remedial program area, or pending, where the site is awaiting assignment to a specific remedial program area. Sites where no further action (NFA) designation has been given are not included in this report unless there are other areas of identified contamination which have not been remediated. This report includes sites being remediated under all of the various regulatory programs administered by the Site Remediation Program such as: Federal Superfund Program, Federal Resource Conservation and Recovery Act (RCRA), New Jersey's Industrial Site Recovery Act (ISRA), New Jersey's Underground Storage of Hazardous Substances Act, New Jersey's Spill Compensation and Control Act, New Jersey's Solid Waste Management Act, New Jersey's Water Pollution Control Act.

Date of Government Version: 01/07/2010  
Date Data Arrived at EDR: 03/03/2010  
Date Made Active in Reports: 03/23/2010  
Number of Days to Update: 20

Source: New Jersey Department of Environmental Protection  
Telephone: 609-292-8761  
Last EDR Contact: 06/11/2010  
Next Scheduled EDR Contact: 09/13/2010  
Data Release Frequency: Varies

### NY VAPOR REOPENED: Vapor Intrusion Legacy Site List

"Vapor intrusion" refers to the process by which volatile chemicals move from a subsurface source into the indoor air of overlying or adjacent buildings. The subsurface source can either be contaminated groundwater or contaminated soil which releases vapors into the pore spaces in the soil. Improvements in analytical techniques and knowledge gained from site investigations in New York and other states has led to an increased awareness of soil vapor as a medium of concern and of the potential for exposures from the soil vapor intrusion pathway. Based on this additional information, New York is currently re-evaluating previous assumptions and decisions regarding the potential for soil vapor intrusion exposures at sites. As a result, all past, current, and future contaminated sites will be evaluated to determine whether these sites have the potential for exposures related to soil vapor intrusion.

## ***State and tribal leaking storage tank lists***

### **NY LTANKS: Spills Information Database**

Leaking Storage Tank Incident Reports. These records contain an inventory of reported leaking storage tank incidents reported from 4/1/86 through the most recent update. They can be either leaking underground storage tanks or leaking aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills.

Date of Government Version: 05/24/2010	Source: Department of Environmental Conservation
Date Data Arrived at EDR: 05/26/2010	Telephone: 518-402-9549

## **State and tribal voluntary cleanup sites**

### NY VCP: Voluntary Cleanup Agreements

New York established its Voluntary Cleanup Program (VCP) to address the environmental, legal and financial barriers that often hinder the redevelopment and reuse of contaminated properties. The Voluntary Cleanup Program was developed to enhance private sector cleanup of brownfields by enabling parties to remediate sites using private rather than public funds and to reduce the development pressures on "greenfield" sites.

Date of Government Version: 05/24/2010  
Date Data Arrived at EDR: 05/26/2010

## **State and tribal Brownfields sites**

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## NY ERP: Environmental Restoration Program Listing

In an effort to spur the cleanup and redevelopment of brownfields, New Yorkers approved a \$200 million Environmental Restoration or Brownfields Fund as part of the \$1.75 billion Clean Water/Clean Air Bond Act of 1996 (1996 Bond Act). Enhancements to the program were enacted on October 7, 2003. Under the Environmental Restoration Program, the State provides grants to municipalities to reimburse up to 90 percent of on-site eligible costs and 100% of off-site eligible costs for site investigation and remediation activities. Once remediated, the property may then be reused for commercial, industrial, residential or public use.

## ADDITIONAL ENVIRONMENTAL RECORDS

### **Local Brownfield lists**

#### US BROWNFIELDS: A Listing of Brownfields Sites

Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities--especially those without EPA Brownfields Assessment Demonstration Pilots--minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients--States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

Date of Government Version: 03/02/2010	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/23/2010	Telephone: 202-566-2777
Date Made Active in Reports: 05/17/2010	Last EDR Contact: 06/25/2010
Number of Days to Update: 55	Next Scheduled EDR Contact: 10/11/2010
	Data Release Frequency: Semi-Annually

### **Local Lists of Landfill / Solid Waste Disposal Sites**

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## DEBRIS REGION 9: Torres Martinez Reservation Illegal Dump Site Locations

A listing of illegal dump sites location on the Torres Martinez Indian Reservation located in eastern Riverside County and northern Imperial County, California.

Date of Government Version: 01/12/2009	Source: EPA, Region 9
Date Data Arrived at EDR: 05/07/2009	Telephone: 415-947-4219
Date Made Active in Reports: 09/21/2009	Last EDR Contact: 07/28/2010
Number of Days to Update: 137	Next Scheduled EDR Contact: 09/20/2010
	Data Release Frequency: Varies

## ODI: Open Dump Inventory

An open dump is defined as a disposal facility that does not comply with one or more of the Part 257 or Part 258 Subtitle D Criteria.

Date of Government Version: 06/30/1985	Source: Environmental Protection Agency
Date Data Arrived at EDR: 08/09/2004	Telephone: 800-424-9346
Date Made Active in Reports: 09/17/2004	Last EDR Contact: 06/09/2004
Number of Days to Update: 39	Next Scheduled EDR Contact: N/A
	Data Release Frequency: No Update Planned

## NY SWRCY: Registered Recycling Facility List

A listing of recycling facilities.

Date of Government Version: 07/14/2010	Source: Department of Environmental Conservation
Date Data Arrived at EDR: 07/16/2010	Telephone: 518-402-8705
Date Made Active in Reports: 08/10/2010	Last EDR Contact: 07/12/2010
Number of Days to Update: 25	Next Scheduled EDR Contact: 10/25/2010
	Data Release Frequency: Semi-Annually

## NY SWTIRE: Registered Waste Tire Storage & Facility List

A listing of facilities registered to accept waste tires.

Date of Government Version: 08/01/2006	Source: Department of Environmental Conservation
Date Data Arrived at EDR: 11/15/2006	Telephone: 518-402-8694
Date Made Active in Reports: 11/30/2006	Last EDR Contact: 07/30/2010
Number of Days to Update: 15	Next Scheduled EDR Contact: 11/08/2010
	Data Release Frequency: Annually

## NJ SWRCY: Approved Class B Recycling Facilities

"Class B recyclable material" means a source separated recyclable material which is subject to Department approval prior to receipt, storage, processing or transfer at a recycling center in accordance with N.J.S.A. 13:1E-99.34b.

Date of Government Version: 01/01/2010	Source: Department of Environmental Protection
Date Data Arrived at EDR: 02/11/2010	Telephone: 609-984-6650
Date Made Active in Reports: 03/23/2010	Last EDR Contact: 05/21/2010
Number of Days to Update: 40	Next Scheduled EDR Contact: 08/23/2010
	Data Release Frequency: Varies

## INDIAN ODI: Report on the Status of Open Dumps on Indian Lands

Location of open dumps on Indian land.

Date of Government Version: 12/31/1998	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/03/2007	Telephone: 703-308-8245
Date Made Active in Reports: 01/24/2008	Last EDR Contact: 08/09/2010
Number of Days to Update: 52	Next Scheduled EDR Contact: 11/22/2010

## **Local Lists of Hazardous waste / Contaminated Sites**

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 08/19/2009	Source: Drug Enforcement Administration
Date Data Arrived at EDR: 12/29/2009	Telephone: 202-307-1000
Date Made Active in Reports: 02/10/2010	Last EDR Contact: 03/08/2010
Number of Days to Update: 43	Next Scheduled EDR Contact: 09/20/2010
	Data Release Frequency: Quarterly

## NY DEL SHWS: Delisted Registry Sites

A database listing of sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites.

Date of Government Version: 03/26/2010	Source: Department of Environmental Conservation
Date Data Arrived at EDR: 03/26/2010	Telephone: 518-402-9622
Date Made Active in Reports: 04/28/2010	Last EDR Contact: 05/26/2010
Number of Days to Update: 33	Next Scheduled EDR Contact: 09/06/2010
	Data Release Frequency: Annually

## US HIST CDL: National Clandestine Laboratory Register

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 09/01/2007	Source: Drug Enforcement Administration
Date Data Arrived at EDR: 11/19/2008	Telephone: 202-307-1000
Date Made Active in Reports: 03/30/2009	Last EDR Contact: 03/23/2009
Number of Days to Update: 131	Next Scheduled EDR Contact: 06/22/2009
	Data Release Frequency: No Update Planned

## **Local Lists of Registered Storage Tanks**

### NY HIST UST: Historical Petroleum Bulk Storage Database

These facilities have petroleum storage capacities in excess of 1,100 gallons and less than 400,000 gallons. This database contains detailed information per site. It is no longer updated due to the sensitive nature of the information involved. See UST for more current data.

Date of Government Version: 01/01/2002	Source: Department of Environmental Conservation
Date Data Arrived at EDR: 06/02/2006	Telephone: 518-402-9549
Date Made Active in Reports: 07/20/2006	Last EDR Contact: 10/23/2006
Number of Days to Update: 48	Next Scheduled EDR Contact: 01/22/2007
	Data Release Frequency: Varies

### NY HIST AST: Historical Petroleum Bulk Storage Database

These facilities have petroleum storage capabilities in excess of 1,100 gallons and less than 400,000 gallons. This database contains detailed information per site. No longer updated due to the sensitive nature of the information involved. See AST for more current data.

Date of Government Version: 01/01/2002	Source: Department of Environmental Conservation
Date Data Arrived at EDR: 06/02/2006	Telephone: 518-402-9549
Date Made Active in Reports: 07/20/2006	Last EDR Contact: 10/23/2006
Number of Days to Update: 48	Next Scheduled EDR Contact: 01/22/2007
	Data Release Frequency: No Update Planned

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## **Local Land Records**

### **LIENS 2: CERCLA Lien Information**

A Federal CERCLA ('Superfund') lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. These monies are spent to investigate and address releases and threatened releases of contamination. CERCLIS provides information as to the identity of these sites and properties.

Date of Government Version: 05/06/2010	Source: Environmental Protection Agency
Date Data Arrived at EDR: 05/11/2010	Telephone: 202-564-6023
Date Made Active in Reports: 08/09/2010	Last EDR Contact: 08/02/2010
Number of Days to Update: 90	Next Scheduled EDR Contact: 11/15/2010
	Data Release Frequency: Varies

### **LUCIS: Land Use Control Information System**

LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

Date of Government Version: 12/09/2005	Source: Department of the Navy
Date Data Arrived at EDR: 12/11/2006	Telephone: 843-820-7326
Date Made Active in Reports: 01/11/2007	Last EDR Contact: 05/24/2010
Number of Days to Update: 31	Next Scheduled EDR Contact: 09/06/2010
	Data Release Frequency: Varies

## **Records of Emergency Release Reports**

### **HMIRS: Hazardous Materials Information Reporting System**

Hazardous Materials Incident Report System. HMIRS contains hazardous material spill incidents reported to DOT.

Date of Government Version: 04/06/2010	Source: U.S. Department of Transportation
Date Data Arrived at EDR: 04/07/2010	Telephone: 202-366-4555
Date Made Active in Reports: 05/27/2010	Last EDR Contact: 07/09/2010
Number of Days to Update: 50	Next Scheduled EDR Contact: 10/18/2010
	Data Release Frequency: Annually

### **NY SPILLS: Spills Information Database**

Data collected on spills reported to NYSDEC as required by one or more of the following: Article 12 of the Navigation Law, 6 NYCRR Section 613.8 (from PBS regs), or 6 NYCRR Section 595.2 (from CBS regs). It includes spills active as of April 1, 1986, as well as spills occurring since this date.

Date of Government Version: 05/24/2010	Source: Department of Environmental Conservation
Date Data Arrived at EDR: 05/26/2010	Telephone: 518-402-9549
Date Made Active in Reports: 06/21/2010	Last EDR Contact: 05/26/2010
Number of Days to Update: 26	Next Scheduled EDR Contact: 09/06/2010
	Data Release Frequency: Varies

### **NY HIST SPILLS: SPILLS Database**

This database contains records of chemical and petroleum spill incidents. Under State law, petroleum and hazardous chemical spills that can impact the waters of the state must be reported by the spiller (and, in some cases, by anyone who has knowledge of the spills). In 2002, the Department of Environmental Conservation stopped providing updates to its original Spills Information Database. This database includes fields that are no longer available from the NYDEC as of January 1, 2002. Current information may be found in the NY SPILLS database. Department of Environmental Conservation.

Date of Government Version: 01/01/2002	Source: Department of Environmental Conservation
Date Data Arrived at EDR: 07/08/2005	Telephone: 518-402-9549
Date Made Active in Reports: 07/14/2005	Last EDR Contact: 07/07/2005
Number of Days to Update: 6	Next Scheduled EDR Contact: N/A
	Data Release Frequency: No Update Planned

## **Other Ascertainable Records**

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## RCRA-NonGen: RCRA - Non Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

Date of Government Version: 02/17/2010	Source: Environmental Protection Agency
Date Data Arrived at EDR: 02/19/2010	Telephone: (212) 637-3660
Date Made Active in Reports: 05/17/2010	Last EDR Contact: 07/09/2010
Number of Days to Update: 87	Next Scheduled EDR Contact: 10/18/2010
	Data Release Frequency: Varies

## DOT OPS: Incident and Accident Data

Department of Transportation, Office of Pipeline Safety Incident and Accident data.

Date of Government Version: 01/12/2010	Source: Department of Transportation, Office of Pipeline Safety
Date Data Arrived at EDR: 02/09/2010	Telephone: 202-366-4595
Date Made Active in Reports: 04/12/2010	Last EDR Contact: 05/12/2010
Number of Days to Update: 62	Next Scheduled EDR Contact: 08/23/2010
	Data Release Frequency: Varies

## DOD: Department of Defense Sites

This data set consists of federally owned or administered lands, administered by the Department of Defense, that have any area equal to or greater than 640 acres of the United States, Puerto Rico, and the U.S. Virgin Islands.

Date of Government Version: 12/31/2005	Source: USGS
Date Data Arrived at EDR: 11/10/2006	Telephone: 703-692-8801
Date Made Active in Reports: 01/11/2007	Last EDR Contact: 07/22/2010
Number of Days to Update: 62	Next Scheduled EDR Contact: 11/01/2010
	Data Release Frequency: Semi-Annually

## FUDS: Formerly Used Defense Sites

The listing includes locations of Formerly Used Defense Sites properties where the US Army Corps of Engineers is actively working or will take necessary cleanup actions.

Date of Government Version: 12/31/2008	Source: U.S. Army Corps of Engineers
Date Data Arrived at EDR: 09/30/2009	Telephone: 202-528-4285
Date Made Active in Reports: 12/01/2009	Last EDR Contact: 06/16/2010
Number of Days to Update: 62	Next Scheduled EDR Contact: 09/27/2010
	Data Release Frequency: Varies

## CONSENT: Superfund (CERCLA) Consent Decrees

Major legal settlements that establish responsibility and standards for cleanup at NPL (Superfund) sites. Released periodically by United States District Courts after settlement by parties to litigation matters.

Date of Government Version: 04/11/2010	Source: Department of Justice, Consent Decree Library
Date Data Arrived at EDR: 04/19/2010	Telephone: Varies
Date Made Active in Reports: 05/17/2010	Last EDR Contact: 07/08/2010
Number of Days to Update: 28	Next Scheduled EDR Contact: 10/18/2010
	Data Release Frequency: Varies

## ROD: Records Of Decision

Record of Decision. ROD documents mandate a permanent remedy at an NPL (Superfund) site containing technical and health information to aid in the cleanup.

Date of Government Version: 04/29/2010	Source: EPA
Date Data Arrived at EDR: 05/07/2010	Telephone: 703-416-0223
Date Made Active in Reports: 05/27/2010	Last EDR Contact: 06/16/2010
Number of Days to Update: 20	Next Scheduled EDR Contact: 09/27/2010
	Data Release Frequency: Annually

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

Date of Government Version: 01/05/2009	Source: Department of Energy
Date Data Arrived at EDR: 05/07/2009	Telephone: 505-845-0011
Date Made Active in Reports: 05/08/2009	Last EDR Contact: 06/01/2010
Number of Days to Update: 1	Next Scheduled EDR Contact: 09/13/2010
	Data Release Frequency: Varies

## MINES: Mines Master Index File

Contains all mine identification numbers issued for mines active or opened since 1971. The data also includes violation information.

Date of Government Version: 02/12/2010	Source: Department of Labor, Mine Safety and Health Administration
Date Data Arrived at EDR: 03/10/2010	Telephone: 303-231-5959
Date Made Active in Reports: 05/17/2010	Last EDR Contact: 06/09/2010
Number of Days to Update: 68	Next Scheduled EDR Contact: 09/20/2010
	Data Release Frequency: Semi-Annually

## TRIS: Toxic Chemical Release Inventory System

Toxic Release Inventory System. TRIS identifies facilities which release toxic chemicals to the air, water and land in reportable quantities under SARA Title III Section 313.

Date of Government Version: 12/31/2008	Source: EPA
Date Data Arrived at EDR: 01/13/2010	Telephone: 202-566-0250
Date Made Active in Reports: 02/18/2010	Last EDR Contact: 06/04/2010
Number of Days to Update: 36	Next Scheduled EDR Contact: 09/13/2010
	Data Release Frequency: Annually

## TSCA: Toxic Substances Control Act

Toxic Substances Control Act. TSCA identifies manufacturers and importers of chemical substances included on the TSCA Chemical Substance Inventory list. It includes data on the production volume of these substances by plant site.

Date of Government Version: 12/31/2002	Source: EPA
Date Data Arrived at EDR: 04/14/2006	Telephone: 202-260-5521
Date Made Active in Reports: 05/30/2006	Last EDR Contact: 07/07/2010
Number of Days to Update: 46	Next Scheduled EDR Contact: 10/11/2010
	Data Release Frequency: Every 4 Years

## FTTS: FIFRA/ TSCA Tracking System - FIFRA (Federal Insecticide, Fungicide, & Rodenticide Act)/TSCA (Toxic Substances Control Act)

FTTS tracks administrative cases and pesticide enforcement actions and compliance activities related to FIFRA, TSCA and EPCRA (Emergency Planning and Community Right-to-Know Act). To maintain currency, EDR contacts the Agency on a quarterly basis.

Date of Government Version: 04/09/2009	Source: EPA/Office of Prevention, Pesticides and Toxic Substances
Date Data Arrived at EDR: 04/16/2009	Telephone: 202-566-1667
Date Made Active in Reports: 05/11/2009	Last EDR Contact: 06/01/2010
Number of Days to Update: 25	Next Scheduled EDR Contact: 09/13/2010
	Data Release Frequency: Quarterly

## FTTS INSP: FIFRA/ TSCA Tracking System - FIFRA (Federal Insecticide, Fungicide, & Rodenticide Act)/TSCA (Toxic Substances Control Act)

A listing of FIFRA/TSCA Tracking System (FTTS) inspections and enforcements.

Date of Government Version: 04/09/2009	Source: EPA
Date Data Arrived at EDR: 04/16/2009	Telephone: 202-566-1667
Date Made Active in Reports: 05/11/2009	Last EDR Contact: 06/01/2010
Number of Days to Update: 25	Next Scheduled EDR Contact: 09/13/2010
	Data Release Frequency: Quarterly

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/01/2007	Telephone: 202-564-2501
Date Made Active in Reports: 04/10/2007	Last EDR Contact: 12/17/2007
Number of Days to Update: 40	Next Scheduled EDR Contact: 03/17/2008
	Data Release Frequency: No Update Planned

## HIST FTTS INSP: FIFRA/TSCA Tracking System Inspection & Enforcement Case Listing

A complete inspection and enforcement case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/01/2007	Telephone: 202-564-2501
Date Made Active in Reports: 04/10/2007	Last EDR Contact: 12/17/2008
Number of Days to Update: 40	Next Scheduled EDR Contact: 03/17/2008
	Data Release Frequency: No Update Planned

## SSTS: Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

Date of Government Version: 12/31/2008	Source: EPA
Date Data Arrived at EDR: 01/06/2010	Telephone: 202-564-4203
Date Made Active in Reports: 02/10/2010	Last EDR Contact: 08/03/2010
Number of Days to Update: 35	Next Scheduled EDR Contact: 11/15/2010
	Data Release Frequency: Annually

## ICIS: Integrated Compliance Information System

The Integrated Compliance Information System (ICIS) supports the information needs of the national enforcement and compliance program as well as the unique needs of the National Pollutant Discharge Elimination System (NPDES) program.

Date of Government Version: 04/24/2010	Source: Environmental Protection Agency
Date Data Arrived at EDR: 04/29/2010	Telephone: 202-564-5088
Date Made Active in Reports: 05/17/2010	Last EDR Contact: 06/25/2010
Number of Days to Update: 18	Next Scheduled EDR Contact: 10/11/2010
	Data Release Frequency: Quarterly

## PADS: PCB Activity Database System

PCB Activity Database. PADS Identifies generators, transporters, commercial storers and/or brokers and disposers of PCB's who are required to notify the EPA of such activities.

Date of Government Version: 02/01/2010	Source: EPA
Date Data Arrived at EDR: 04/22/2010	Telephone: 202-566-0500
Date Made Active in Reports: 08/09/2010	Last EDR Contact: 07/30/2010
Number of Days to Update: 109	Next Scheduled EDR Contact: 11/01/2010
	Data Release Frequency: Annually

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## MLTS: Material Licensing Tracking System

MLTS is maintained by the Nuclear Regulatory Commission and contains a list of approximately 8,100 sites which possess or use radioactive materials and which are subject to NRC licensing requirements. To maintain currency, EDR contacts the Agency on a quarterly basis.

Date of Government Version: 03/18/2010	Source: Nuclear Regulatory Commission
Date Data Arrived at EDR: 04/06/2010	Telephone: 301-415-7169
Date Made Active in Reports: 05/27/2010	Last EDR Contact: 06/14/2010
Number of Days to Update: 51	Next Scheduled EDR Contact: 09/27/2010
	Data Release Frequency: Quarterly

## RADINFO: Radiation Information Database

The Radiation Information Database (RADINFO) contains information about facilities that are regulated by U.S. Environmental Protection Agency (EPA) regulations for radiation and radioactivity.

Date of Government Version: 07/13/2010	Source: Environmental Protection Agency
Date Data Arrived at EDR: 07/14/2010	Telephone: 202-343-9775
Date Made Active in Reports: 08/09/2010	Last EDR Contact: 07/14/2010
Number of Days to Update: 26	Next Scheduled EDR Contact: 10/25/2010
	Data Release Frequency: Quarterly

## FINDS: Facility Index System/Facility Registry System

Facility Index System. FINDS contains both facility information and 'pointers' to other sources that contain more detail. EDR includes the following FINDS databases in this report: PCS (Permit Compliance System), AIRS (Aerometric Information Retrieval System), DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes), FURS (Federal Underground Injection Control), C-DOCKET (Criminal Docket System used to track criminal enforcement actions for all environmental statutes), FFIS (Federal Facilities Information System), STATE (State Environmental Laws and Statutes), and PADS (PCB Activity Data System).

Date of Government Version: 04/14/2010	Source: EPA
Date Data Arrived at EDR: 04/16/2010	Telephone: (212) 637-3000
Date Made Active in Reports: 05/27/2010	Last EDR Contact: 07/07/2010
Number of Days to Update: 41	Next Scheduled EDR Contact: 09/27/2010
	Data Release Frequency: Quarterly

## RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995	Source: EPA
Date Data Arrived at EDR: 07/03/1995	Telephone: 202-564-4104
Date Made Active in Reports: 08/07/1995	Last EDR Contact: 06/02/2008
Number of Days to Update: 35	Next Scheduled EDR Contact: 09/01/2008
	Data Release Frequency: No Update Planned

## BRS: Biennial Reporting System

The Biennial Reporting System is a national system administered by the EPA that collects data on the generation and management of hazardous waste. BRS captures detailed data from two groups: Large Quantity Generators (LQG) and Treatment, Storage, and Disposal Facilities.

Date of Government Version: 12/31/2007	Source: EPA/NTIS

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

### NY HSWDS: Hazardous Substance Waste Disposal Site Inventory

The list includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-Registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity. The last version of the study inventory is frozen in time. The sites on the study will not automatically be made Superfund sites, rather each site will be further evaluated for listing on the Registry. So overtime they will be added to the registry or not.

Date of Government Version: 01/01/2003  
Date Data Arrived at EDR: 10/20/2006

Data Release Frequency: Varies

### NY SPDES: State Pollutant Discharge Elimination System

New York State has a state program which has been approved by the United States Environmental Protection Agency for the control of wastewater and stormwater discharges in accordance with the Clean Water Act. Under New York State law the program is known as the State Pollutant Discharge Elimination System (SPDES) and is broader in scope than that required by the Clean Water Act in that it controls point source discharges to groundwaters as well as surface waters.

## NY E DESIGNATION: E DESIGNATION SITE LISTING

The (E (Environmental)) designation would ensure that sampling and remediation take place on the subject properties, and would avoid any significant impacts related to hazardous materials at these locations. The (E) designations would require that the fee owner of the sites conduct a testing and sampling protocol, and remediation where appropriate, to the satisfaction of the NYCDEP before the issuance of a building permit by the Department of Buildings pursuant to the provisions of Section 11-15 of the Zoning Resolution (Environmental Requirements). The (E) designations also include a mandatory construction-related health and safety plan which must be approved by NYCDEP.

## EDR PROPRIETARY RECORDS

### *EDR Proprietary Records*

#### Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

## OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

### CT MANIFEST: Hazardous Waste Manifest Data

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

### Electric Power Transmission Line Data

Source: Rextag Strategies Corp.

Telephone: (281) 769-2247

U.S. Electric Transmission and Power Plants Systems Digital GIS Data

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

### AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

### Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

### Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

### Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

### Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

### Daycare Centers: Day Care Providers

Source: Department of Health

Telephone: 212-676-2444

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2009 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

### State Wetlands Data: Freshwater Wetlands

Source: Department of Environmental Conservation

Telephone: 518-402-8961

### Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

East Map:	40073-F8 BROOKLYN, NY
Most Recent Revision:	1995

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

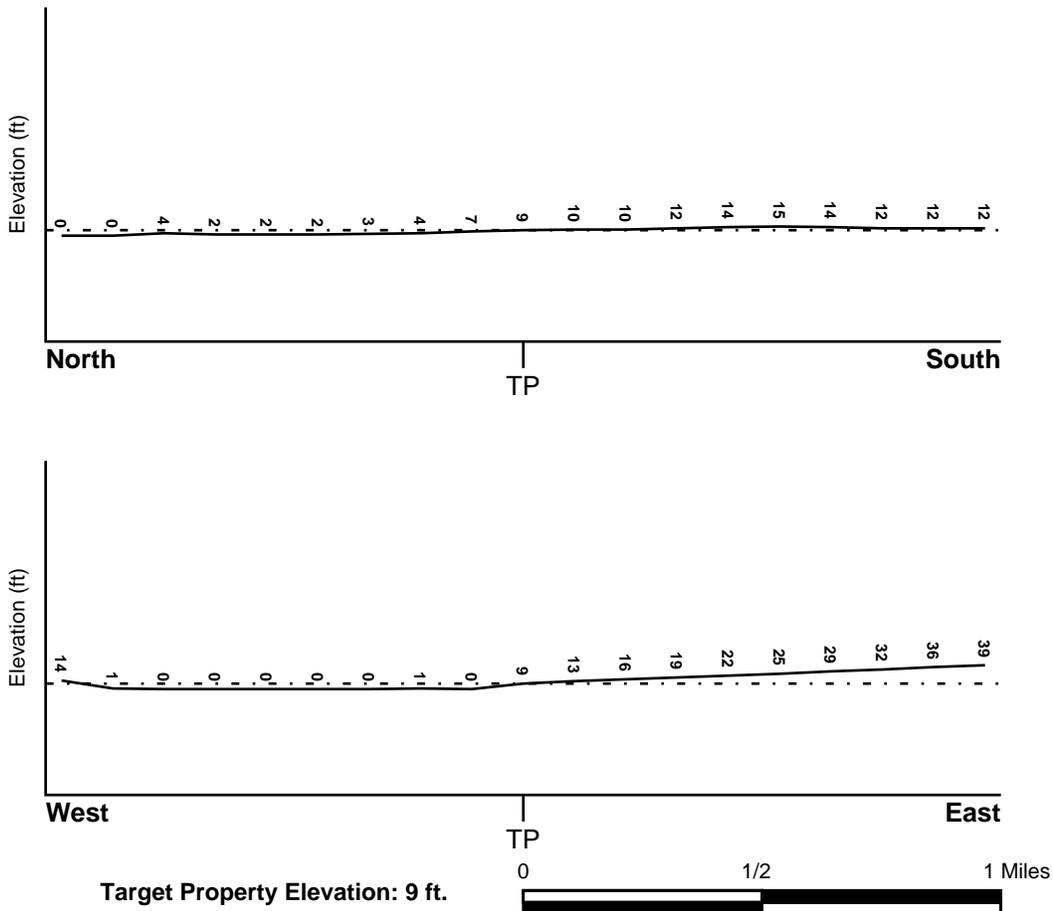

## TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

## TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General WNW

## SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

## FEMA FLOOD ZONE

<u>Target Property County</u> NEW YORK, NY	FEMA Flood <u>Electronic Data</u> YES - refer to the Overview Map and Detail Map
---	--

Flood Plain Panel at Target Property: 360497 - FEMA DFIRM Flood data

Additional Panels in search area: 34017C - FEMA DFIRM Flood data

## NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u> JERSEY CITY	NWI Electronic <u>Data Coverage</u> YES - refer to the Overview Map and Detail Map
---	--

## HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

### Site-Specific Hydrogeological Data\*:

Search Radius:	1.25 miles
Location Relative to TP:	1/2 - 1 Mile NE
Site Name:	MANHATTAN GENERAL MAIL FACILITY
Site EPA ID Number:	NY6180000352
Groundwater Flow Direction:	NOT AVAILABLE.
Inferred Depth to Water:	not available. Saturated layers impacted by salt water intrusion are present in the overburden. It is generally inferred that the depth to the uppermost 'aquifer' is greater than 70 feet at the surface of the bedrock/sediment interface.
Hydraulic Connection:	Detailed hydraulic connection information is not available. Glacial till and outwash deposit sediments overlie the Manhattan Schist, the uppermost bedrock unit at the site. The surface elevation of bedrock decreases to the southwest of the site.
Sole Source Aquifer:	No information about a sole source aquifer is available
Data Quality:	Information is inferred in the CERCLIS investigation report(s)

## AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION</u> <u>FROM TP</u>	<u>GENERAL DIRECTION</u> <u>GROUNDWATER FLOW</u>

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

### GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

#### ROCK STRATIGRAPHIC UNIT

Era: Paleozoic  
System: Ordovician  
Series: Lower Ordovician and Cambrian carbonate rocks  
Code: OC (*decoded above as Era, System & Series*)

#### GEOLOGIC AGE IDENTIFICATION

Category: Stratified Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

### DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Permeability Rate (in/hr)	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

## OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: silt loam  
loamy sand  
sandy loam  
fine sandy loam

Surficial Soil Types: silt loam  
loamy sand  
sandy loam  
fine sandy loam

Shallow Soil Types: sandy loam

Deeper Soil Types: unweathered bedrock  
very gravelly - loamy sand  
stratified  
sandy loam

## LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

# GEOCHECK® - PHYSICAL SETTING SOURCE MAP FINDINGS RADON

## AREA RADON INFORMATION

State Database: NY Radon

### Radon Test Results

Zip	Num Sites	< 4 Pci/L	>= 4 Pci/L	>= 20 Pci/L	Avg > 4 Pci/L	Max Pci/L
10014	7	6 (85.7%)	1 (14.3%)	0 (0%)	1.66	5.4

Federal EPA Radon Zone for NEW YORK County: 3

Note: Zone 1 indoor average level > 4 pCi/L.

: Zone 2 indoor average level >= 2 pCi/L and <= 4 pCi/L.

: Zone 3 indoor average level < 2 pCi/L.

Not Reported

# PHYSICAL SETTING SOURCE RECORDS SEARCHED

## TOPOGRAPHIC INFORMATION

### USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

### Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

## HYDROLOGIC INFORMATION

**Flood Zone Data:** This data, available in select counties across the country, was obtained by EDR in 2003 & 2009 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

**NWI:** National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

### State Wetlands Data: Freshwater Wetlands

Source: Department of Environmental Conservation

Telephone: 518-402-8961

## HYDROGEOLOGIC INFORMATION

### AQUIFLOW<sup>R</sup> Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

## GEOLOGIC INFORMATION

### Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

### STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

### SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

## LOCAL / REGIONAL WATER AGENCY RECORDS

### FEDERAL WATER WELLS

#### PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

#### PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

#### USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

### STATE RECORDS

#### New York Public Water Wells

Source: New York Department of Health

Telephone: 518-458-6731

## OTHER STATE DATABASE INFORMATION

#### Oil and Gas Well Database

Department of Environmental Conservation

Telephone: 518-402-8056

These files contain records, in the database, of wells that have been drilled.

### RADON

#### State Database: NY Radon

Source: Department of Health

Telephone: 518-402-7556

Radon Test Results

#### Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

#### EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

### OTHER

**Re: Freedom of Information Request  
Borough of Manhattan  
46-56 10<sup>th</sup> Avenue  
New York, NY 10014  
Block: 646 / Lots 1, 5, 6, 7, 8, and 9  
Langan Project No.: 170119302**

Dear Sir or Madam:

Pursuant to the Federal Freedom of Information Act (5 U.S.C 552 et seq.) dealing with the examination and duplication of documents maintained by public agencies, Langan is requesting any information or copies of files regarding environmental conditions on the above properties, such as environmental permits, notices of violations, spill/discharge incidents, storage or disposal of hazardous substances, Underground Storage Tanks (USTs), Leaking Underground Storage Tanks (LUSTs), asbestos abatement, and any other environmental reports that your department may have.

The subject property is located at **46-56 10<sup>th</sup> Avenue, New York, New York (Block 646 and Lots 1, 5, 6, 7, 8, and 9)**. The property is bounded by West 14<sup>th</sup> Street to the north, 439 West 13<sup>th</sup> Street (Lot 20) and 450 West 14<sup>th</sup> Street (Lot 10) to the east, West 13<sup>th</sup> Street to the south, and 10<sup>th</sup> Avenue to the west.

Please contact me at 212-479-5537 or send your response to my attention at:

Langan Engineering and Environmental Services, P.C.  
21 Penn Plaza  
360 West 31<sup>st</sup> Street, 8<sup>th</sup> floor  
New York, New York 10001-2727

Thank you in advance for your cooperation.

Very truly yours,  
**LANGAN ENGINEERING &  
ENVIRONMENTAL SERVICES, PC**

Jennifer Armstrong  
Senior Staff Scientist

Block: 646 / Lots 1, 5, 6, 7, 8, and 9  
Langan Project No.: 170119302**

Dear Ms. Bryant:

Pursuant to the Federal Freedom of Information Act (5 U.S.C 552 et seq.) dealing with the examination and duplication of documents maintained by public agencies, Langan is requesting any information or copies of files regarding environmental conditions on the above properties, such as environmental permits, notices of violations, spill/discharge incidents, storage or disposal of hazardous substances, Underground Storage Tanks (USTs), Leaking Underground Storage Tanks (LUSTs), asbestos abatement, and any other environmental reports that your department may have.

The subject property is located at **46-56 10<sup>th</sup> Avenue, New York, New York (Block 646 and Lots 1, 5, 6, 7, 8, and 9)**. The property is bounded by West 14<sup>th</sup> Street to the north, 439 West 13<sup>th</sup> Street (Lot 20) and 450 West 14<sup>th</sup> Street (Lot 10) to the east, West 13<sup>th</sup> Street to the south, and 10<sup>th</sup> Avenue to the west.

Please contact me at 212-479-5537 or send your response to my attention at:

Langan Engineering and Environmental Services, P.C.  
21 Penn Plaza  
360 West 31<sup>st</sup> Street, 8<sup>th</sup> floor  
New York, New York 10001-2727

Thank you in advance for your cooperation.

Very truly yours,

DEPARTMENT OF BUILDINGS  
**BUREAU OF BUILDINGS**  
 BOROUGH OF MANHATTAN, CITY OF NEW YORK

HVC **CERTIFICATE OF OCCUPANCY No. 19747**

**193**

Supersedes Certificate of Occupancy No.

To the owner or owners of the building:

New York **July 16, 1934**

THIS CERTIFIES that the building located on Block **646**, Lot **2**  
 known as **42-6 77th Street** **1208 Alt of 1931**  
**386 Alt. of 1931**

under a permit, Application No. **19**, conforms to the approved plans and specifications accompanying said permit and any approved amendments thereto, and to the requirements of the building code and all other laws and ordinances and to the rules and regulations of the Board of standards and appeals, applicable to a building of its class and kind, except that in the case of a building heretofore existing and for which no previous certificate of occupancy has been issued and which has not been altered or converted since March 14, 1916, to a use that changed its classification as defined in the building code, this certificate confirms and continues the existing uses to which the building has been put; and

CERTIFIES FURTHER that the building is of **nonfireproof** construction within the meaning of the building code and may be used and occupied as a **business** building as hereinafter qualified, in a **unrestricted** district under the building zone resolution, subject to all the privileges, requirements, limitations and conditions prescribed by law or as hereinafter specified.

STORY	LIVE LOADS Lbs. per Sq. Ft.	PERSONS ACCOMMODATED			USE
		MALE	FEMALE	TOTAL	
Cellar	on ground			6	Cold Storage
1st Story	350-175			24	Cold Storage
2nd "	350-175			10	Cold Storage and Offices
3rd "	350-175			5	Cold Storage

*[Handwritten signature and stamp]*  
 1934

This certificate is issued to **Edward A. Dougherty, representative**  
**466 Lexington Avenue, City.**

for the owner or owners.

The superimposed, uniformly distributed loads, or their equivalent concentrated loads in any story shall not exceed the live loads specified above; the number of persons of either sex in any story shall not exceed that specified when sex is indicated, nor shall the aggregate number of persons in any story exceed the specified total; and the use to which any story may be put shall be restricted to that fixed by this certificate except as specifically stated.

The building or any part thereof shall not be used for any purpose other than that for which it is certified.

Unless specifically stated above, the building or any part thereof, if certified as a public building, shall not be used as a building in which persons are harbored to receive medical, charitable or other care or treatment, such as a hospital, asylum, etc., or in which persons are held or detained under legal restraint, such as a police station, jail, etc.; nor shall it be used as a motion picture theatre as defined in section 30, chapter 3, Code of Ordinances; nor as a theatre or opera house or other building intended to be used for theatrical or operatic purposes, or for public entertainment of any kind, for the accommodation of more than 300 persons.

Unless specifically stated above, the building or any part thereof, if certified as a residence building, shall not be used as a tenement house as defined in the tenement house law; nor shall it be used as any form of residence building having more than 15 sleeping rooms; nor shall it be used as a lodging house within the meaning of Sec. 1305 of the Greater New York Charter.

Unless specifically stated above, the building or any part thereof, if certified as a business building, shall not be used as a garage; motor vehicle repair shop or oil selling station as defined in section 1, chapter 10, Code of Ordinances; nor shall it be used for the generation or compression of acetylene; nor as a factory building as defined in the labor law; nor as a grain elevator; nor as a coal pocket.

Except as otherwise noted above, the building, or any part thereof, if located elsewhere than in an unrestricted district, shall not be used for any of the purposes enumerated in paragraph (a) of section 4 of the building zone resolution; nor for any trade, industry or use that is noxious or offensive by reason of the emission of odor, dust, smoke, gas or noise; nor for any kind of manufacturing not already prohibited, except that, if located in a business district, not more than twenty-five per cent of the total floor space may be so used, or space equal to the area of the lot in any case.

Except as otherwise noted above, the building, if certified as a garage, may not be used for more than five cars on any portion of a street between two intersecting streets, in which portion there exists an exit from or an entrance to a public school, or in which portion there exists any hospital maintained as a charitable institution; and in no case within a distance of 200 feet from the nearest exit from or entrance to a public school; nor within two hundred feet of any hospital maintained as a charitable institution.

If the building has, at any time previous to the issuance of this certificate, been the subject of an appeal to the board of appeals or of a petition to the board of standards and appeals resulting in modification or variation of law or any lawful requirement, the construction and arrangement of the building as specified in the resolution granting such modification or variation, must be maintained, and all conditions imposed by either board must be observed.

No change or re-arrangement in the structural parts of the building, or affecting the lighting or ventilation of any part thereof, or in the exit facilities, shall be made; no enlargement, whether by extending on any side or by increasing in height shall be made; nor shall the building be moved from one location or position to another; nor shall there be any reduction or diminution of the area of the lot or plot on which the building is located, until an approval of the same has been obtained from the superintendent of buildings.

This certificate supersedes each and every previously issued certificate of occupancy for this building or any part thereof, and each and every such previously issued certificate shall be null and void; and this certificate in turn becomes null and void upon the issuance of any new lawful certificate.

This certificate does not in any way relieve the owner or owners, or any other person or persons in possession or control of the building, or any part thereof, from obtaining such other permits or licenses as may be prescribed by law for the uses or purposes for which the building is designed or intended; nor from complying with any lawful order issued with the object of maintaining the building in a safe or lawful condition; nor from complying with any authorized direction to remove encroachments into a public highway or other public place, whether attached to or part of the building or not.

This certificate does not authorize the use or operation of any elevator in the building without the special certificate required by section 563 of the building code.

If the building is or is required to be equipped with standpipes or other fire extinguishing or gas shut off appliances, this certificate is not complete until such standpipes or other appliances have been inspected by the fire department (or by the Tenement House Department in the case of a gas shut off in a tenement house) and approved in writing, either in a separate certificate or by endorsement upon this certificate. (Space for such endorsement is provided on page 4 of this certificate.)

If this certificate is marked "Temporary," it is applicable only to those parts of the building indicated on its face, and certifies to the legal use and occupancy of only such parts of the building; it is subject to all the provisions and conditions applying to a final or permanent certificate; it is not applicable to a tenement house unless also approved by the tenement house commissioner; and it must be replaced by a full certificate as soon as the entire building is completed according to law and ready for occupancy.

The word "class" as used in this certificate refers to the classification of buildings in the building code (section 70).

This certificate is issued in accordance with the provisions of section 411-a of the Greater New York Charter and of section 5 of chapter 5 (Building Code) of the Code of Ordinances of the City of New York.

Examined. *JB*

*James J. [Signature]*  
Superintendent of Buildings, Borough of Manhattan.

Corrections

Additional copies of this certificate will be issued, upon written request, to persons having a proprietary interest in the building.

If you have any questions please review these [Frequently Asked Questions](#), the [Glossary](#), or call the 311 Citizen Service Center by dialing 311 or (212) NEW YORK outside of New York City.

**BUREAU OF BUILDINGS**  
**BOROUGH OF MANHATTAN, CITY OF NEW YORK**

**HVC CERTIFICATE OF OCCUPANCY No.**

**1923**

Supersedes Certificate of Occupancy No.

To the owner or owners of the building: New York Nov. 22, 1923.

THIS CERTIFIES that the building located on Block 646, Lot 5 & 6

known as 48-50 Tenth Avenue  
 40' 4" front

under a permit, Application No. 2484 Alt of 1922, conforms to the approved plans and specifications accompanying said permit and any approved amendments thereto, and to the requirements of the building code and all other laws and ordinances and to the rules and regulations of the board of standards and appeals, applicable to a building of its class and kind, except that in the case of a building heretofore existing and for which no previous certificate of occupancy has been issued and which has not been altered or converted since March 14, 1916, to a use that changed its classification as defined in the building code, this certificate confirms and continues the existing uses to which the building has been put; and

CERTIFIES FURTHER that the building is ~~of non-fireproof~~ construction within the meaning of the building code and may be used and occupied as a **business** building as hereinafter qualified, in an ~~unrestricted~~ district under the building zone resolution, subject to all the privileges, requirements, limitations, and conditions prescribed by law or as hereinafter specified.

STORY	LIVE LOADS Lbs. per Sq. Ft.	PERSONS ACCOMMODATED			USE
		MALE	FEMALE	TOTAL	
Basement					Storage
1st floor				10	Storage and Packing House
2nd "				5	" " " "
3rd "				25	" " " "

This certificate is issued to **Wilson & Company**  
 816 First Avenue, N.Y. City. , for the owner or owners.

The superimposed, uniformly distributed loads, or their equivalent concentrated loads in any story shall not exceed the live loads specified above; the number of persons of either sex in any story shall not exceed that specified when sex is indicated, nor shall the aggregate number of persons in any story exceed the specified total; and the use to which any story may be put shall be restricted to that fixed by this certificate except as specifically stated.

The building or any part thereof shall not be used for any purpose other than that for which it is certified.

Unless specifically stated above, the building or any part thereof, if certified as a public building, shall not be used as a building in which persons are harbored to receive medical, charitable or other care or treatment, such as a hospital, asylum, etc., or in which persons are held or detained under legal restraint, such as a police station, jail, etc.; nor shall it be used as a motion picture theatre as defined in section 30, chapter 3, Code of Ordinances; nor as a theatre or opera house or other building intended to be used for theatrical or operatic purposes, or for public entertainment of any kind, for the accommodation of more than 300 persons.

Unless specifically stated above, the building or any part thereof, if certified as a residence building, shall not be used as a tenement house as defined in the tenement house law; nor shall it be used as any form of residence building having more than 15 sleeping rooms; nor shall it be used as a lodging house within the meaning of Sec. 1305 of the Greater New York Charter.

Unless specifically stated above, the building or any part thereof, if certified as a business building, shall not be used as a garage, motor vehicle repair shop or oil selling station as defined in section 1, chapter 10, Code of Ordinances; nor shall it be used for the generation or compression of acetylene; nor as a factory building as defined in the labor law; nor as a grain elevator; nor as a coal pocket; but if approved as a factory building for less than twenty-five persons, it shall not be used for any other purpose.

Except as otherwise noted above, the building, or any part thereof, if located elsewhere than in an unrestricted district, shall not be used for any of the purposes enumerated in paragraph (a) of section 4 of the building zone resolution; nor for any trade, industry or use that is noxious or offensive by reason of the emission of odor, dust, smoke, gas or noise; nor for any kind of manufacturing not already prohibited, except that, if located in a business district, not more than twenty-five per cent. of the total floor space may be so used, or space equal to the area of the lot in any case.

Except as otherwise noted above, the building, if certified as a garage, may not be used for more than five cars on any portion of a street between two intersecting streets, in which portion there exists an exit from or an entrance to a public school, or in which portion there exists any hospital maintained as a charitable institution; and in no case within a distance of 200 feet from the nearest exit from or entrance to a public school; nor within two hundred feet of any hospital maintained as a charitable institution.

If the building has, at any time previous to the issuance of this certificate, been the subject of an appeal to the board of appeals or of a petition to the board of standards and appeals resulting in modification or variation of law or any lawful requirement, the construction and arrangement of the building as specified in the resolution granting such modification or variation, must be maintained, and all conditions imposed by either board must be observed.

No change or re-arrangement in the structural parts of the building, or affecting the lighting or ventilation of any part thereof, or in the exit facilities, shall be made; no enlargement, whether by extending on any side or by increasing in height shall be made; nor shall the building be moved from one location or position to another; nor shall there be any reduction or diminution of the area of the lot or plot on which the building is located, until an approval of the same has been obtained from the superintendent of buildings.

This certificate supersedes each and every previously issued certificate of occupancy for this building or any part thereof, and each and every such previously issued certificate shall be null and void; and this certificate in turn becomes null and void upon the issuance of any new lawful certificate.

This certificate does not in any way relieve the owner or owners, or any other person or persons in possession or control of the building, or any part thereof, from obtaining such other permits or licenses as may be prescribed by law for the uses or purposes for which the building is designed or intended; nor from complying with any lawful order issued with the object of maintaining the building in a safe or lawful condition; nor from complying with any authorized direction to remove encroachments into a public highway or other public place, whether attached to or part of the building or not.

This certificate does not authorize the use or operation of any elevator in the building without the special certificate required by section 563 of the building code.

If the building is or is required to be equipped with standpipes or other fire extinguishing appliances, this certificate is not complete until such standpipes or other appliances have been inspected by the fire department and approved in writing, either in a separate certificate or by endorsement upon this certificate. (Space for such endorsement is provided on page 4 of this certificate.)

If this certificate is marked "Temporary," it is applicable only to those parts of the building indicated on its face, and certifies to the legal use and occupancy of only such parts of the building; it is subject to all the provisions and conditions applying to a final or permanent certificate; it is not applicable to a tenement house unless also approved by the tenement house commissioner; and it must be replaced by a full certificate as soon as the entire building is completed according to law and ready for occupancy.

The word "class" as used in this certificate refers to the classification of buildings in the building code (section 70).

This certificate is issued in accordance with the provisions of section 417-a of the Greater New York Charter and of section 5 of chapter 5 (Building Code) of the Code of Ordinances of the City of New York.

Examined.

Superintendent of Buildings, Borough of Manhattan.

Additional copies of this certificate will be issued, upon written request, to persons having a proprietary interest in the building.

C.P.

## The EDR Aerial Photo Decade Package

# EDR Aerial Photo Decade Package

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

**When delivered electronically by EDR, the aerial photo images included with this report are for ONE TIME USE ONLY. Further reproduction of these aerial photo images is prohibited without permission from EDR. For more information contact your EDR Account Executive.**

***Thank you for your business.***  
Please contact EDR at 1-800-352-0050  
with any questions or comments.

## **Disclaimer - Copyright and Trademark Notice**

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. **NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OF DAMAGE, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES. ANY LIABILITY ON THE PART OF ENVIRONMENTAL DATA RESOURCES, INC. IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT.** Purchaser accepts this Report AS IS. Any analyses, estimates, ratings, environmental risk levels or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only a Phase I Environmental Site Assessment performed by an environmental professional can provide information regarding the environmental risk for any property. Additionally, the information provided in this Report is not to be construed as legal advice.

# EDR Historical Topographic Map Report

# EDR Historical Topographic Map Report

Environmental Data Resources, Inc.s (EDR) Historical Topographic Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topographic Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the early 1900s.

***Thank you for your business.***  
Please contact EDR at 1-800-352-0050  
with any questions or comments.

## **Disclaimer - Copyright and Trademark Notice**

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. **NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OF DAMAGE, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES. ANY LIABILITY ON THE PART OF ENVIRONMENTAL DATA RESOURCES, INC. IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT.** Purchaser accepts this Report AS IS. Any analyses, estimates, ratings, environmental risk levels or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only a Phase I Environmental Site Assessment performed by an environmental professional can provide information regarding the environmental risk for any property. Additionally, the information provided in this Report is not to be construed as legal advice.

## 2009 Enhancements to EDR City Directory Abstract

New for 2009, the EDR City Directory Abstract has been enhanced with additional information and features. These enhancements will make your city directory research process more efficient, flexible, and insightful than ever before. The enhancements will improve the options for selecting adjoining properties, and will speed up your review of the report.

**City Directory Report.** Three important enhancements have been made to the EDR City Directory Abstract:

1. *Executive Summary.* The report begins with an Executive Summary that lists the sources consulted in the preparation of the report. Where available, a parcel map is also provided within the report, showing the locations of properties researched.
2. *Page Images.* Where available, the actual page source images will be included in the Appendix, so that you can review them for information that may provide additional insight. EDR has copyright permission to include these images.
3. *Findings Listed by Location.* Another useful enhancement is that findings are now grouped by address. This will significantly reduce the time you need to review your abstracts. Findings are provided under each property address, listed in reverse chronological order and referencing the source for each entry.

**Options for Selecting Adjoining Properties.** Ensuring that the right adjoining property addresses are searched is one of the biggest challenges that environmental professionals face when conducting city directory historical research. EDR's new enhancements make it easier for you to meet this challenge. Now, when you place an order for the EDR City Directory Abstract, you have the following choices for determining which addresses should be researched.

1. *You Select Addresses and EDR Selects Addresses.* Use the "Add Another Address" feature to specify the addresses you want researched. Your selections will be supplemented by addresses selected by EDR researchers using our established research methods. Where available, a digital map will be shown, indicating property lines overlaid on a color aerial photo and their corresponding addresses. Simply use the address list below the map to check off which properties shown on the map you want to include. You may also select other addresses using the "Add Another Address" feature at the bottom of the list.
2. *EDR Selects Addresses.* Choose this method if you want EDR's researchers to select the addresses to be researched for you, using our established research methods.
3. *You Select Addresses.* Use this method for research based solely on the addresses you select or enter into the system.
4. *Hold City Directory Research Option.* If you choose to select your own adjoining addresses, you may pause production of your EDR City Directory Abstract report until you have had a chance to look at your other EDR reports and sources. Sources for property addresses include: your Certified Sanborn Map Report may show you the location of property addresses; the new EDR Property Tax Map Report may show the location of property addresses; and your field research can supplement these sources with additional address information. To use this capability, simply click "Hold City Directory research" box under "Other Options" at the bottom of the page. Once you have determined what addresses you want researched, go to your EDR Order Status page, select the EDR City Directory Abstract, and enter the addresses and submit for production.

Questions? Contact your EDR representative at 800-352-0050. For more information about all of EDR's 2009 report and service enhancements, visit [www.edrnet.com/2009enhancements](http://www.edrnet.com/2009enhancements)

## EXECUTIVE SUMMARY

### DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2006. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 100 feet of the target property.

A summary of the information obtained is provided in the text of this report.

### RESEARCH SUMMARY

# The EDR Environmental LienSearch™ Report

## The EDR Environmental LienSearch™ Report

The EDR Environmental LienSearch Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

***Thank you for your business.***

Please contact EDR at 1-800-352-0050  
with any questions or comments.

## QUITCLAIM DEED

THIS QUITCLAIM DEED ("Deed"), made as of the 4<sup>th</sup> day of ~~October~~ <sup>NOVEMBER</sup>, 2005, between CSX TRANSPORTATION, INC., a Florida corporation, whose mailing address is 500 Water Street (J-910), Jacksonville, Florida 32202, hereinafter called "Grantor", and THE CITY OF NEW YORK, a municipal corporation having its principal place of business at City Hall, New York, New York 10007, hereinafter called "Grantee",

### WITNESSETH:

(Wherever used herein, the terms "Grantor" and "Grantee" may be construed in the singular or plural as the context may require or admit, and for purposes of exceptions, reservations and/or covenants, shall include the successors and assigns of each.)

WHEREAS, Grantee has agreed with Grantor to take title to the Premises conveyed hereby and to use and operate same for railbanking and as a trail for public use pursuant to and in accordance with and 49 C.F.R. 1152.29 and Section 8(d) of the National Trails System Act (also known as the "Rails-to-Trails Act"), 16 U.S.C. 1247(d); and

WHEREAS, in furtherance of such use, Grantor has agreed to make to Grantee a tax-free contribution of the Premises, including lines of railroad thereon;

NOW THEREFORE, KNOW ALL MEN BY THESE PRESENTS, THAT, for and in consideration of the premises above, Grantor does hereby GRANT, CONVEY, RELEASE, REMISE and forever QUITCLAIM unto Grantee, all right, title and interest of Grantor in and to certain portions of Grantor's railroad rights-of-way and real property, operating or nonoperating and regardless of width, including any permanent easements for rail carriage, railroad use and purposes, located, within two (2) Segments in the County of New York, New York, and consisting of approximately 1.1 miles of right-of-way, designated "the Premises";

ALL as generally shown on Exhibit A, as more particularly described on Exhibit B, with Beginning and Ending Points of one Segment shown on Exhibits B-1 and B-2, and with metes and bounds of a second Segment described on Exhibit B and shown on Exhibit C, all of which are easements encumbering the blocks and lots set forth on Exhibit E, all of which Exhibits are attached hereto and incorporated herein;

NOTE: Reduced prints of each Valuation Section Map referenced herein are attached hereto and incorporated herein as collective Exhibit D; print reduction may alter any scale stated on such Maps.

TOGETHER WITH: (a) all buildings, structures, fixtures and improvements on the Premises, in "as is, where is" condition, including but not limited to all tracks, rails, ties, ballast, grading, switches, crossings, bridges, trestles, supports, culverts, signals, crossing diamonds and protection devices, radio antennae, communication lines, poles and facilities, loading platforms, depots, and any other associated structures, that are affixed as of the date of this deed to the Premises, (b) all strips and gores, (c) all and singular the rights, alleys, ways, waters, minerals and mineral rights, timber and timber rights, air rights, hereditaments, franchises, privileges, advantages and appurtenances to the same belonging or in anyway incident or appertaining,

including any items, rights or interests retained, excepted or reserved in any post-acquisition conveyances, (d) all reversions, remainders, rents, issues and profits thereof, (e) any easements for support or retention rights in streets, waterways or adjacent lands, (f) any rights to cross any river, stream, creek or other body of water within the Premises, or to cross or lay tracks in any streets adjacent to or connecting parcels herein conveyed, (g) all right, title and interest of Grantor, or any predecessor of Grantor in the Premises, created and/or held by the hostile, actual, visible, exclusive and notorious occupation of any portion thereof for a continuous period of twenty-one (21) years or more prior to the date of this Deed, (h) all connected and/or contiguous sidetracks, spur tracks, lead tracks and yards, and facilities thereon, and (i) all contracts, leases, licenses, agreements, and all rights in and third party easements or occupations in, on, under, over or along the Premises;

it being the intent of this Deed to include all right, title and interest held by Grantor in and to any lands and improvements within said County between said Beginning Point and said Ending Point, whether in any recorded or unrecorded deeds (other than identified in Exhibit B); and

it being the intent of the parties hereto that the estate in the Premises shall include, but not be limited to, the series of Parcels denominated Parcel 16 (Parcel C-19 upon the Enlarged Plan) through Parcel 36 (Parcel C-38 upon the Enlarged Plan) as set forth in the certain Indenture dated July 2, 1929, by and between the City of New York, as grantor, and The New York Central Railroad Company, as grantee, recorded on August 6, 1929, in Liber 3736 Cp 8 et seq. (the "1929 Indenture") and reprinted on pages 129 through 146 of the Printed Conveyance of the 1929 Indenture as defined in, and amended by, that certain Indenture dated June 10, 1935, by and between the City of New York, as grantor, and The New York Central Railroad Company, as grantee, recorded on September 9, 1935 in Liber 3903 Cp 289, and further

that the estate in the Premises shall not merge with the fee estates in property encumbered by the Premises (including street beds) which are owned in fee by Grantee prior to the delivery of this Deed;

PROVIDED, HOWEVER, that in the event of a re-institution of rail service in or on the Premises by Grantor, Grantor shall pay to Grantee on or within one hundred eighty (180) days after the date of such re-institution an amount equal to the fair market value of the Premises on such date, as determined by an agreement of the parties hereto, or if such agreement on such fair market value cannot be achieved by such re-institution date, then as may be determined in binding arbitration by a panel of three (3) qualified and certified appraisers, one appointed by each party hereto and the third appointed by the first two appraisers, in accordance with the then-applicable rules and procedures of the American Arbitration Association.

TO HAVE AND TO HOLD the Premises, all remised, released and quitclaimed herein, and the appurtenances thereto, and all the estate, right, title, lien, interest and claim whatsoever of Grantor therein, either in law or equity, unto the proper use, benefit and enjoyment of Grantee, Grantee's successors and assigns, forever;

SUBJECT TO: (A) reservations, exceptions, easements, covenants, restrictions and limitations of record or platted affecting the same; (B) any existing rail crossings, public utilities

and roadways; (C) any, pipes, wires, poles, cables, conduit, culverts, drainage courses or systems (and appurtenances) now in, on, under, over or across the same (and any contracted rights to retain, same); (D) any streams, rivers, creeks or other navigable waterways passing under or across the same; and (E) reservation of the right of a petitioner to the Surface Transportation Board (or its successor-in-function) to reinstitute rail service on the Premises (provided, however, that for itself, its affiliates, and its successors and assigns, Grantor covenants and agrees that it shall not seek nor permit any affiliate to seek reinstatement of rail service on the Premises for its own account or that of any affiliate).

THIS INSTRUMENT is executed and delivered by Grantor, and accepted by Grantee, subject to the covenants set forth herein, which shall be deemed part of the consideration of this conveyance and shall be in lieu of any rights, rule, law, custom or statute of the State of New York, now or hereafter in force with respect to any covenants. Grantor, however, does warrant and covenant to assign or convey to Grantee any right, title or interest in and to the Premises acquired by Grantor after the date of this Deed, and Grantor executes and delivers this deed with no intent to dedicate the Premises as parkland.

IN WITNESS WHEREOF, CSX TRANSPORTATION, INC., pursuant to due corporate authority, has caused its name to be signed hereto by its officer(s) hereunto duly authorized and its corporate seal, duly attested, to be hereunto affixed.

Signed, Sealed and delivered  
in the presence of:

CSX TRANSPORTATION, INC., a Florida  
corporation

retain, same); (D) any streams, rivers, creeks or other navigable waterways passing under or across the same; and (E) reservation of the right of a petitioner to the Surface Transportation Board (or its successor-in-function) to reinstitute rail service on the Premises (provided, however, that for itself, its affiliates, and its successors and assigns, Grantor covenants and agrees that it shall not seek nor permit any affiliate to seek reinstatement of rail service on the Premises for its own account or that of any affiliate).

THIS INSTRUMENT is executed and delivered by Grantor, and accepted by Grantee, subject to the covenants set forth herein, which shall be deemed part of the consideration of this conveyance and shall be in lieu of any rights, rule, law, custom or statute of the State of New York, now or hereafter in force with respect to any covenants. Grantor, however, does warrant and covenant to assign or convey to Grantee any right, title or interest in and to the Premises acquired by Grantor after the date of this Deed, and Grantor executes and delivers this deed with no intent to dedicate the Premises as parkland.

IN WITNESS WHEREOF, CSX TRANSPORTATION, INC., pursuant to due corporate authority, has caused its name to be signed hereto by its officer(s) hereunto duly authorized and its corporate seal, duly attested, to be hereunto affixed.

Signed, Sealed and delivered  
in the presence of:

CSX TRANSPORTATION, INC., a Florida

## **Deed Exhibit 2**

**CONSULT YOUR LAWYER BEFORE SIGNING THIS INSTRUMENT - THIS INSTRUMENT SHOULD BE USED BY LAWYERS ONLY**

THIS INDENTURE, made the **25** day of **June**, nineteen hundred and ninety-nine

BETWEEN **GINGOLD PACKING CORP.**, a New York corporation having its principal place of business at 54 Tenth Avenue, New York, New York,

party of the first part, and

**40-56 TENTH AVE. LLC**, c/o William Gottlieb, 544 Hudson Street, New York, New York 10014

party of the second part,

**WITNESSETH**, that the party of the first part, in consideration of ten dollars and other valuable consideration paid by the party of the second part, does hereby grant and release unto the party of the second part, the heirs or successors and assigns of the party of the second part forever,

**ALL** that certain plot, piece or parcel of land, with the buildings and improvements thereon erected, situate, lying and being in the Borough of Manhattan, County of New York, City and State of New York, bounded and described as follows:

**BEGINNING** at the corner formed by the intersection of the Southerly side of West 14<sup>th</sup> Street with the Easterly side of De Lamater Square, formerly known as Tenth Avenue; running thence **EASTERLY** along the Southerly side of West 14<sup>th</sup> Street, 75 feet; thence **SOUTHERLY** parallel with the Easterly side of De Lamater Square, 103 feet 3 inches to the center line of the block; thence **WESTERLY** along the center line of the block and parallel with the Southerly side of West 14<sup>th</sup> Street and through a party wall 75 feet to the Easterly side of De Lamater Square; thence **NORTHERLY** along the Easterly side of De Lamater Square, 103 feet 3 inches to the point or place of **BEGINNING**.

**TOGETHER** with the rights and easements, and **SUBJECT TO** all of the terms, provisions, covenants and agreements, contained in a certain Indenture dated the 24 day of October, 1962 between New York State Realty and Terminal Company, as Grantor, and Grantor herein, as Grantee, which Indenture was recorded on the 1<sup>st</sup> day of November, 1962 in Liber 5206, Page 200, in the Office of the Register of the City of New York; and a certain Easement Modification Agreement dated June 30, 1992 between 450 West 14<sup>th</sup> St. Corp. and Gingold Packing Corp., recorded in said Register's Office on July 9, 1992 in Reel 1885 Page 2228.

Delivery of this deed has been authorized by the board of directors and the holders of two-thirds of the outstanding shares of Grantor in compliance with Section 909 of the New York Business Corporation Law.

**TOGETHER** with all right, title and interest, if any, of the party of the first part in and to any streets and roads abutting the above described premises to the center lines thereof; **TOGETHER** with the appurtenances and all the estate and rights of the party of the first part in and to said premises; **TO HAVE AND TO HOLD** the premises herein granted unto the party of the second part, the heirs or successors and assigns of the party of the second part forever.

**AND** the party of the first part covenants that the party of the first part has not done or suffered anything whereby the said premises have been encumbered in any way whatever, except as aforesaid.

**AND** the party of the first part, in compliance with Section 13 of the Lien Law, covenants that the party of the first part will receive the consideration for this conveyance and will hold the right to receive such consideration as a trust fund to be applied first for the purpose of paying the cost of the improvement and will apply the same first to the payment of the cost of the improvement before using any part of the total of the same for any other purpose.

The word "party" shall be construed as if it read "parties" whenever the sense of this indenture so requires.

**IN WITNESS WHEREOF**, the party of the first part has duly executed this deed the day and year first above written.

**IN PRESENCE OF:**

**GINGOLD PACKING CORP.**

## **APPENDIX M**

## JOEL B. LANDES, P.E.

Senior Associate  
Langan Engineering and Environmental Services, Inc.

Regulatory Compliance  
Environmental Engineering  
Hazardous Waste Management  
Environmental Due Diligence and Risk Management

---

### EDUCATION

Polytechnic Institute of Brooklyn: B.S. Chemical Engineering  
The Cooper Union, New York: M.E. Environmental Planning and Management  
Union College, New York: Graduate studies in Business Management

### REGISTRATIONS:

Registered Professional Engineer – New York – New Jersey

### SUMMARY QUALIFICATIONS

Mr. Landes has twenty-eight years project engineering and management experience, the last 15 years as a senior consultant and the prior seven years as manager of engineering and environmental affairs for a worldwide organic and specialty chemical manufacturer. Experience includes environmental compliance audits, risk management and due diligence assignments in the United States and Internationally, Phase I and Phase II environmental assessments, power plant site selection and permitting evaluation, remedial investigations, feasibility studies and remedial measures for transportation-related, industrial and manufacturing facilities. Mr. Landes has managed assignments throughout North and South America, western and central Europe, and Australia. Expertise includes soil and groundwater remediation, permitting, risk management and hazard assessment.

### RELEVANT EXPERIENCE

**Peter Cooper Village/Stuyvesant Town, New York, NY** Mr. Landes managed a team that prepared an Environmental Assessment of both properties, which consisted of 21 residential buildings at Peter Cooper Village and over 100 residential and commercial buildings at Stuyvesant Town. Both communities are home to approximately 25,000 residents. The properties which encompass approximately 100 acres on the east side of Manhattan is home to four former Con Edison manufactured gas plant properties including manufacturing and gas storage facilities. Extensive site characterization work was completed by Con Edison. Our due diligence teams summarized the available data and provided an accurate assessment of environmental conditions on both sites. Environmental Assessment Reports were provided to prospective buyers of the properties. During the negotiations, Mr. Landes provided answers to buyer's questions. This ultimately concluded as the largest real estate deal in history (\$5.4 Billion).

**New York City Board of Education** – Provided senior environmental and geotechnical consultation to the Chief Executive of Board of Education's Division of School Facilities. Assisted in the decision on the development of new additions to an existing school that was constructed on a site formerly used to manufacture pharmaceuticals in Brooklyn, NY. Numerous remedial investigation and remediation reports were reviewed as well as the owner's conceptual plans for the additions (PS 333). Concerns identified included protection of the health and safety of children, workers and the general public during construction, and the ability to maintain the integrity of a proposed vapor barrier.

## **JOEL B. LANDES, P.E.**

---

**Silverstein Properties, New York** – Provided environmental services to assist in the redevelopment of the 7 World Trade Center site destroyed in the 9/11 attacks.

1. Prepared Environmental Assessment Forms as required under the New York SEQRA for the development project.
2. Evaluated previous investigations and developed and implemented a soil and groundwater management plan, approved by NYSDEC, for the excavation of approximately 25,000 cubic yards of soil and demolition of subsurface building features to allow for the construction of a new building foundation.
3. Planned, provided oversight and prepared a closure report (received NYSDEC NFA letter) for the removal of two vaulted 11,500-gallon fuel oil USTs.
4. Provided oversight for the excavation and removal of two 6,500-gallon fuel oil USTs that were damaged and spilled during the 9/11 attacks.

**Silverstein Properties, New York** – Program Manager for the preparation of specification for management of clean and contaminated soil at the site of a proposed high-rise residential building in midtown New York City. Investigation of subsurface soil and groundwater indicated that the site had been used as a service station and for the manufacture of gas at the turn of the century. The specifications included provisions for handling, characterization and disposal of soil and groundwater that would be disturbed during construction of a subsurface parking garage in the proposed building, and to protect the health of construction workers and future occupants from potential exposure to contaminants.

**Pnemo Abex, Cleveland, Ohio** – Mr. Landes managed the investigation and cleanup of a 700,000 sq. ft. former aircraft parts manufacturing facility under the Ohio Voluntary Action program. The facility had been in disuse for many years. Through initial site inspections and surveys, our team developed plans and specifications for the decontamination of building components, including wood block floors, asbestos, lead-based paint, and various pits, drains and sumps. Plans and specifications were also prepared for demolition of building, and remediation of soil and groundwater.

### **Waterside Generating Plant and Office Building, New York, New York**

Mr. Landes managed a team that participated with other consultants, attorneys and insurance brokers to evaluate the risks of purchasing and redeveloping four Con Edison properties, one a 1.2 million sq. ft. office and service building that was a former manufactured gas plant (MGP) and one an operating steam and electric generating station covering 6 acres. Based on the limited data available, Langan recommended a geotechnical and environmental investigation program be implemented to evaluate the need for estimate the cost of remediation and redevelopment. The data collected was utilized, along with Langan's construction and remediation experience to evaluate potential remedial cost. A Monte Carlo simulation was developed to assess all probabilities for potential scenarios. Findings indicated that previous estimates were inadequate to cover most probable scenarios. Recommendations were provided to assure adequate insurance coverage.

**The Hertz Corporation, New Jersey** – Responsible for their program to prepare SPCC Plans for over 200 Hertz car and truck rental facilities throughout the United States. Coordinated and managed six separate operations offices and Professional Engineers in more than 20 states to accomplish this task.

## **JOEL B. LANDES, P.E.**

---

**Sterling Organics, Division of Sterling Drug, Inc., Rensselaer, New York** – Responsible for environmental compliance and affairs for a 27 acre specialty chemical and pharmaceutical intermediates manufacturing facility.

- Responsible for preparing and implementing an SPCC Plan for this entire facility. Storage included more than 100,000 gallons of inorganic liquids, 20,000 gallons of fuel oil and 60,000 gallons of organic solvents.
- Filed and obtained permits for over 300 individual emission points for numerous organic chemicals utilized as raw materials and process by-products. These emission points included process vents, general and local exhaust systems, vacuum discharges and storage tanks. Full compliance required two years of negotiation with NYSDEC representatives during which no violations were issued.
- Responsible for the disposal of all solid and hazardous waste generated by the facility. Personally conducted compliance audits of waste transportation contractors and treatment, storage and disposal facilities including landfills, incinerators and fuel processing facilities.
- Responsible for maintaining compliance with wastewater pretreatment requirements and reducing the quantity of contaminants discharged into the wastewater pretreatment system. Conducted internal assessments of plant processes and designed systems that resulted in waste discharge reductions. Provided liaison between plant management and local sewer authority.
- Advised management on environmental impacts of proposed processes.

**Confidential Metal Processor, Sofia, Bulgaria** – Conducted an environmental, health and safety compliance audit of a privatized copper processing facility. The audit was performed in accordance with World Bank and European Union guidelines and included assessment of air discharge to the atmosphere (including impact on public health) and into the workplace, wastewater discharge to the local sewer treatment system, groundwater discharges from injection wells and stormwater runoff, and noise generation. Also evaluated were former waste disposal practices and current liabilities. Performed air, soil and groundwater investigations and developed baseline environmental conditions of the facility from the point of acquisition. Assisted the client in obtaining financing from the World Bank for proposed environmental improvements.

**Confidential Independent Power Producer, Midwest, Mid Atlantic and South** – Managed implementation of fatal flaw analyses to evaluate power plant permitting in the following states: Illinois, Maryland, Delaware, New Jersey, Pennsylvania, Kentucky, Ohio and Arkansas. Responsible for developing the technical strategy, selecting the project team, reviewing all deliverables and assisting in the presentations of results to the client. Scope of Work included development and implementation of a Geographic Information System (GIS) tool to assist in locating sites suitable for siting power plants in the PJM region. Collected location data for pipelines, transmission lines, power plants, wastewater treatment plants, land use, population density and other factors, integrated this data into our GIS database and created source maps showing preferred sites. This tool has proven itself through the savings in time and effort to screen a proposed power plant site.

**TXU Energy, Brooklyn, New York** – Evaluated the Article X Public Service Commission submittal to license a 530 MW, combined cycle power generation facility in Brooklyn, New York. This assignment was part of our due diligence for the acquisition of the right to complete the

## **JOEL B. LANDES, P.E.**

---

licensing and develop a new power generation site to be constructed on a barge and moored at a Brooklyn pier in Upper New York Bay. Reviewed the impact analysis particularly with respect to the use of river water for cooling on a once-through basis. Found insufficient attention spent on the key stakeholders including the Bay Keeper and accurately predicted significant delays in obtaining the necessary approvals.

**Colgate-Palmolive, Paris, France, Mexico City, Mexico, Brazil and Argentina, South America** – Managed environmental compliance and due diligence, soil and groundwater investigations, and remedial planning and implementation for the divestiture of manufacturing facilities for Colgate-Palmolive.

**CPC International**, New Jersey and Illinois – Compliance audits and due diligence of 5 pharmaceutical and specialty chemical manufacturing facilities.

**Confidential IPP, Virginia** – Due diligence for the acquisition of 7 coal-fired PEPCO power generation facilities in Washington, DC, Delaware and Virginia.

**Sithe Energy**, New York – Due diligence for the construction of a co-generation facility on the site of pharmaceutical manufacturing facility in Kenilworth, NJ.

**Confidential Pharmaceutical Co., Europe, Caribbean, Africa** - Due diligence for the acquisition of 24 health care product manufacturing facilities. Phase II site investigations were conducted at each of the facilities. The entire project was managed and the work coordinated from New Jersey.

**AMF, Throughout US, Australia, Puerto Rico** – Due diligence for the acquisition of 285 manufacturing and end use sporting goods facilities (bowling alleys).

**Riverwood, US, Mexico, Central and South America** – Due diligence of 14 wood products manufacturing facilities, including two pulp plants. Phase II investigations and permitting assessment were conducted at the facilities.

**FPL Energy**, Florida – Due diligence for the acquisition of 32 power generation facilities in New Jersey and Massachusetts.

**American Home Products, Mexico** – Due diligence of a consumer products manufacturing facility for acquisition.

**NL Chemicals, New Jersey and Missouri** – A hazard and risk assessment of diisocyanate manufacturing facilities. Developed detailed Process and Instrument diagrams, developed and implemented a modified HazOp study to identify, quantify and prioritize potential accidental discharges, and finally, modeled toxic releases and developed recommendations for process alterations.

**Elizabethtown Gas Co., - Elizabeth, NJ** – Developed and conducted remedial investigations of two former manufactured gas plant sites. Assisted the utility and outside counsel with the negotiation of a Memorandum of Agreement with NJDEP. Recommendations for remedial action justified in the RIR included paving over localized areas that exceeded soil cleanup

## **JOEL B. LANDES, P.E.**

---

criteria, a Declaration of Environmental Restriction and natural attenuation of groundwater contamination.

**New Jersey Turnpike Authority, East Brunswick, NJ** – Provided Quality Review for the NJ Turnpike widening project from Exit 11 to Exit 15. This included review and discussion of proposed strategies, such as the reuse of contaminated soil as underlying roadway fill prior to submittal to NJDEP for approval, and review of all proposals and reports prior to deliver to client.

**YEARS OF EXPERIENCE:** 11

**SUMMARY QUALIFICATIONS**

Mr. Burke is a Geologist/Environmental Scientist whose experience involves site investigation and remediation, environmental site assessments, in-situ remedial technology, sub-slab depressurization system design, emergency response, environmental and geotechnical site investigations, and health and safety monitoring. Mr. Burke has experience with projects in the NYSDEC Brownfield Cleanup, Voluntary Cleanup, and Spill Programs and NYCDEP "E" Designated sites. He has extensive experience in soil and groundwater investigation and remediation, design of in-situ chemical oxidation and enhanced bioremediation strategies, Phase I Site Assessments, Phase II site investigations, UST Closures, NYSDEC spill closure, remedial excavation oversight, and excavation and off-site treatment and/or disposal of contaminated soils.

**RELEVANT EXPERIENCE**

**82 Irving Place, New York, NY** – Served as the project manager for a catastrophic fuel tank rupture within a residential building in historic Gramercy Park, Manhattan. Duties included, but were not limited to, remedial investigation utilizing limited access investigation techniques, health and safety monitoring, and preparation of a remedial action plan. After petroleum impacts were adequately delineated, he managed the remedial measures, completed in accordance with a NYSDEC-approved Remedial Action Plan. Most work was completed utilizing Level C personal protection equipment within a negative pressure enclosure. Mr. Burke served as liaison for the building co-op board, lawyers, DEC and insurance carrier for this project.

**1113 York Avenue, New York, NY** – Served as the project manager for the closure of 17 underground storage tanks and management of the associated soil remediation at a former car dealership in the Lenox Hill Section of Manhattan, New York. Site activities were conducted under NYCDEP and NYSDEC Spill Prevention and Response Section's oversight. Duties included, but were not limited to the following: NYS BCP application, spill reporting, coordination of investigation and remediation activities, registration and closure of decommissioned underground storage tanks, vapor mitigation, mass excavation and disposal of approximately 25,000 tons of petroleum-impacted soil, development of an odor control and monitoring program, preparation of a NYSDEC and NYCDEP approved Spill Closure Work Plan, MTA coordination, and NYSDEC correspondence. Site work is ongoing.

## MICHAEL D. BURKE

---

**Peter Cooper Village/Stuyvesant Town, New York, N.Y.** – served as the project manager for the Phase I Environmental Site Assessment of the largest real estate transaction in U.S history. The Phase I was conducted, on an expedited schedule, in accordance with the user’s standard scope of services, and in conformance with the ASTM Standard Practice for Environmental Site Assessments E1527-05 and the USEPA’s All Appropriate Inquiry rule for the purpose of identifying recognized environmental conditions in connection with the subject property. Due diligence included comprehensive review of environmental databases and existing environmental reports. The subject property is a residential development, built on a former MGP site, consisting of 90 acres and 110 buildings on the east side of Manhattan, New York.

**Superior Ink, New York, NY** – served as the project manager providing oversight for a former commercial site (Superior Ink), which since November 2004, has been in the process of removing petroleum contaminants that were found to have leaked from an underground storage tank (previously removed). Duties included the preparation and implementation of a Waste Characterization Plan and a NYSDEC and NYCDEP-approved Remedial Action Plan, preparation of a NYS BCP application, due diligence for soil disposal, point sampling and soil remediation, confirmation of acceptable residual contamination levels for NYSDEC, remediation oversight, and SSDS and vapor mitigation design. The NYSDEC requirements for spill closure have been met and the spill has been administratively closed. A Final Engineering Report has been submitted to the NYCDEP and a Notice of Satisfaction is eminent.

**Bronx Mental Health Redevelopment Project, Bronx, NY** – Langan provided due diligence services for redevelopment of the existing hospital facilities that will include a new Adult Facility, Children’s Facility, a Transitional Living Facility, Work Control Facility, and Campus Utilities. The project budget is around \$250 million. As project manager, Mr. Burke was responsible for Phase I services in accordance with the USEPA AA1 Rule and ASTM 1525-05 regulations. Duties included due diligence management and operations including a complete historical review of the site; environmental database review, and comprehensive review of available environmental reports. Services for this 80-acre site were conducted in accordance with DASNY requirements.

**2950 Atlantic Avenue, East New York, Brooklyn, NY** – Mr. Burke served as project manager in charge of overseeing the site characterization investigation at a Con Edison garage facility. Responsibilities included subsurface investigation to differentiate gasoline contamination from MGP impacts resulting from the operations of a separate responsible party. Duties included installation of 14 soil borings (later converted to permanent monitoring wells), sampling/ testing of monitoring wells contaminants, natural attenuation modeling using the USEPA BIOSCREEN Natural Attenuation Decision Support System model, and preparation of a site characterization report to detail findings for NYSDEC.

**Con Edison, East 74<sup>th</sup> Street Generating Station, New York, NY** – served as the project manager for a subsurface investigation of a kerosene spill in the basement of an active Con Edison steam generating facility. Based on the findings of the investigation, Mr. Burke designed the remediation program required to close out the NYSDEC spill number, prepared a NYSDEC approved remedial action plan, and generated the construction bid package. Remediation performed within restricted access under a negative air enclosure. Basement floor drains were replaced and reinforced concrete slab restored to its original condition. Site work is ongoing.

**Gowanus Village I, Brooklyn, NY** – Managed the implementation of a Remedial Investigation Work Plan for a NYS BCP project sited on a 3.5 acre former coal-fired power plant and sulfur works. Duties included, but were not limited to, implementation of a remedial investigation, preparation of a RIR, and coordination with NYSDEC and NYSDOH.

**Con Edison, First Avenue Properties, New York, NY** – served as the Assistant Project Manager and Environmental Site Supervisor for the demolition, remedial investigation and excavation of a Con Edison

## **MICHAEL D. BURKE**

---

Steam Plant, Office Building and associated structures. Most remedial and investigation actions were performed in an active Con Edison steam generating station. Soil was excavated to accommodate site development for commercial and residential use. Duties included but were not limited to the following: report preparation, supervision of field personnel, contractor oversight, implementation of enhanced receptor and soil gas surveys, operations monitoring and maintenance, oversight of cofferdam and slurry wall construction, and addressing questions and concerns from the client and sub-contractors. Responsible for adhering closely to the NYSDEC approved Work Plan and ensuring that remediation activities were completed accordingly.

**Queens West Development Corp. Stage II, Long Island City, NY** – served as the Assistant Project Manager and Site Remediation Supervisor for the implementation of a large scale Remedial Investigation/Remedial Action conducted as part of the NY State Voluntary Clean-Up Program. Duties included but were not limited to the following: construction management, onsite coordination of remediation activities, scheduling of sub-contractors and field team, report preparation, supervision of onsite personnel, addressing questions and concerns of the client. Responsible for adhering closely to the approved Work Plan and ensured that remedial activities were completed accordingly. Remedial activities included: investigation and closure of four USTs and numerous reported spills, mass excavation and disposal of impacted soils, geoprobe investigations, and soil vapor sampling for the purpose of sub-slab depressurization system design, implementation of enhanced odor control and monitoring program, design and implementation of enhanced bioremediation and in situ chemical oxidation and marine spill response. Upon completion of remediation activities in each operable unit, an Interim Remedial Measures Final Report was generated and summarized all of the remedial work. Project is ongoing.

**Poletti Generating Station, Astoria, NY** – served as project geologist for a baseline subsurface investigation at an active NY Power Authority facility. Responsibilities included but were not limited to the following: coordination of investigation activities with drilling subcontractors, involved in daily coordination meetings, health and safety oversight, soil boring and groundwater monitoring well installation and addressing questions and concerns of the client. Following completion of investigative work, coordinated the preparation of a Preliminary Site Assessment report.

**Arthur Kill Generating Station, Staten Island, NY** – served as the environmental site supervisor and health and safety officer for an investigation and remediation oversight program at an active Con Edison facility in Staten Island, NY. Work was performed during a critical response period following a large PCB spill in which there was intense federal, state and city scrutiny. Involved in daily coordination meetings, scheduling, cost control, field design modifications, and daily interaction with sub-contractors and regulatory agencies. Remedial actions included excavation, removal and dewatering of PCB contaminated sediment, in a discharge canal and treatment of resulting wastewater, and scarification of PCB-contaminated brick within the building structure.

**K. Hovanian, New Jersey Development Sites, N.J.** – served as a field geologist for septic feasibility studies, preliminary geotechnical assessments and oversight of building foundation installations in numerous geologic settings in New Jersey.

**LANGAN START: 2007**

**YEARS OF EXPERIENCE: 10**

## **SUMMARY OF QUALIFICATIONS**

Ms. Armstrong has 10 years of experience working on environmental projects in New York. She has conducted Phase I and II Environmental Site Assessments, soil vapor and indoor air quality surveys, and waste characterization investigations. She has also developed remediation investigation and work plans. Her field experience includes soil, soil vapor, groundwater, and indoor air investigations, remedial excavation oversight, and Community Air Monitoring Program (CAMP) management. Ms. Armstrong also has several years of experience in evaluating asbestos consultants and contractors.

## **LANGAN EXPERIENCE**

**New York City School Construction Authority (NYCSCA), Various Sites in New York City –** Environmental due diligence, including 16 Phase I Environmental Site Assessments for new acquisitions and lease sites. Project sites were located throughout the five boroughs and consisted of properties with various land uses including auto repair facilities, former filling stations and manufacturing facilities, and other commercial properties. Ms. Armstrong has also prepared investigation work plans, performed Phase II Environmental Site Investigations, sub-surface investigations and Indoor Air Quality Investigations for several NYCSCA projects.

**84 West 3<sup>rd</sup> Street, New York, NY –** Phase I Environmental Site Assessment and Soil Vapor Investigation. Ms. Armstrong prepared a Phase I Environmental Site Assessment and subsequently performed a Soil Vapor

## JENNIFER ARMSTRONG, LEED AP

---

Intrusion Investigation consisting of sub-slab soil vapor, indoor air, and ambient air samples.

**John Jay College Expansion, New York, NY** – Project involved the demolition of a parking garage and construction of a multi-story academic building at John Jay College located on 11<sup>th</sup> Avenue between 58<sup>th</sup> and 59<sup>th</sup> Streets. Ms. Armstrong managed the project's Community Air Monitoring Program Management (CAMP) at the site, monitored the serpentine (asbestos-containing) rock and petroleum contaminated soil excavation, and managed the load out and transportation of contaminated soil and rock. She also conducted due diligence of the disposal facilities suggested by the foundation construction contractor.

**Pelham Plaza, Pelham Manor, NY** – Remedial construction oversight at a former Manufactured Gas Plant (MGP) site. Ms. Armstrong provided oversight on behalf of the property owner to verify that the remediation was performed in accordance with the approved work plan and specifications. Ms. Armstrong was responsible for monitoring the overall project schedule.

**Con Edison, East 74<sup>th</sup> Street Steam Generation Plant, New York, NY** – Ms. Armstrong assisted with the investigation and remediation of kerosene-impacted concrete related to a NYSDEC Spill. Ms. Armstrong performed a remedial investigation within an operating steam generation facility, prepared bid specifications and drawings, and assisted Con Edison throughout the bid package finalization process. Familiarity with Con Edison's specific standard procedures was required.

**Former Queens County Family Court House, Jamaica, NY** – Waste characterization and remediation oversight that included demolition of the Queens County Family Courthouse building and development of the site into a multi-story residential complex and parking garage. Ms. Armstrong performed soil and groundwater sampling and subsequently prepared a Soil Characterization Report. She oversaw the remedial excavation, load out and transportation of contaminated soil and collected post-excavation samples for hot-spot contamination identified at various locations throughout the site. Ms. Armstrong prepared the Remedial Action Report.

**Bronx Terminal Market, Bronx, NY** – Remediation for a development that will consist of commercial retail space, associated parking, and improvements along the Harlem River waterfront including an esplanade and park. The 17± acre site is located in the Bronx, New York, adjacent to the Harlem River, between the Macombs Avenue Bridge and the 145<sup>th</sup> Street Bridge. Ms. Armstrong provided contractor oversight for remedial excavation and backfilling, collected endpoint soil samples, and participated in the CAMP.

**Pier 4, Bronx, New York** - Spill remediation oversight. Ms. Armstrong provided contractor oversight for remedial excavation and backfilling, collected endpoint samples, and prepared a Closure Report for submission to the NYSDEC.

**40 Bond Street, New York, New York** – Site Management Plan. Ms. Armstrong prepared a Site Management Plan (SMP) for submission to the NYSDEC. The SMP described remedial actions, including excavation and the installation of a sub-slab depressurization system with a vapor barrier, and planned mitigation and monitoring services.

**Bronx Mental Health Redevelopment Project, Bronx, New York** –Phase I services for an 80-acre hospital facility that will include a new Adult Facility, new Children's Facility, a new Transitional Living Facility, new Work Control Facility, and Campus Utilities. Ms. Armstrong prepared a Phase I ESA in accordance with the AA1 Rule and ASTM 1525-05.

**Silvercup West – NYPA Site, Queens, NY** – Brownfield Program Application and Waste Characterization

## **JENNIFER ARMSTRONG, LEED AP**

---

Investigation for the proposed development of the 3.4 acre site for commercial use. Responsibilities included collection of soil samples from Geoprobe® borings and oversight of the installation of temporary monitoring wells. Ms. Armstrong also reviewed the analytical results and prepared the corresponding summaries for the Site Characterization Report.

**New York City School Construction Authority (NYCSCA), Queens, NY** – Provided compliance audits and general oversight for the asbestos consultants and contractors working under requirements contracts with the NYCSCA. Her main role was to ensure that applicable regulations and contractual obligations were being followed through both document review and on-site audits during abatement activities. She also managed the scheduling of the survey and design group and all project consultants to ensure that project abatement specifications were completed on time to meet the NYCSCA’s financial commitments.

**Freshkills Landfill, Staten Island, New York** – Public Relations and Operations and Maintenance Plan Preparation. Ms. Armstrong performed public relations for the New York City Department of Sanitation (NYCDOS) and the Fresh Kills Landfill including an annual public consent order meeting involving the New York State Department of Environmental Conservation. She also worked closely with the NYCDOS and updated the Operations and Maintenance Plan as needed.

**Various Site Throughout Upstate New York** – Environmental due diligence, data review, and general research. Ms. Armstrong completed over 20 Phase I Environmental Site Assessments consisting of historical and regulatory document review for various sites throughout upstate New York including Dutchess and Albany Counties and the Finger Lakes Region. She also reviewed and interpreted laboratory data and provided research for ongoing projects.

## EXECUTIVE SUMMARY

Property Solutions Incorporated (Property Solutions) has conducted a Limited Phase II Subsurface Investigation (SI) of Chelsea Carwash located at 70 10<sup>th</sup> Avenue a.k.a. 461-469 West 14<sup>th</sup> Street (odd) in New York, New York County, New York 10011 in (subject property) at the request of BlackRock Realty Advisors Inc.

The Phase II SI was performed based on the findings and recommendations presented in the Draft Phase I Environmental Assessment (EA) prepared by Property Solutions and dated June 24, 2008 (Property Solutions project number 20081436). The potential environmental concerns identified in the Phase I EA include the following:

- During the property visit Mr. Erez Shternlicht, owner of the Chelsea Carwash, informed Property Solutions that a leak occurred in the gasoline supply line servicing the dispenser islands located on the northwestern portion of the subject property in 2001. The release was reported to the NYSDEC and spill number 0103052 was issued on June 19, 2001. According to Mr. Shternlicht, the area of the release was excavated and the supply line was repaired. Review of the environmental database indicates the spill was closed on July 12, 2006. In addition, due to an overfill of the USTs during a fuel delivery on January 13, 2005, NYSDEC Spill number 0412142 was issued to the subject property. Review of the NYSDEC spill database indicates the case was closed on May 17, 2006.

Review of the Limited Subsurface Investigation Reports dated September 9, 2005 and November 29, 2005 indicates Fenley and Nicol advanced three soil borings on the subject property to investigate the potential impact of two former releases on the subject property (NYSDEC Spill nos. 0103052 and 0412142). One boring (SB-1) was advanced in the vicinity of the former overfill (NYSDEC Spill no. 0412142) and two borings were advanced in the northwestern (SB-2) and western (SB-3) portions of subject property to investigate the potential impact from the former release from the fuel supply lines (NYSDEC Spill no. 0103052).

The soil sample collected from SB-1 in the vicinity of the former overfill (NYSDEC Spill no. 0412142) indicated the concentrations of VOCs detected were below the respective NYSDEC Guidance Values. This soil sample was collected at a depth of 14 feet below ground surface and no other soil samples were collected at a shallower depth. Fenley and Nicol stated that based on the analytical results the soil and groundwater have not been adversely impacted, however, no groundwater samples were collected during the investigation.

Soil samples taken from SB-2 and SB-3 with the purpose of investigating the former fuel supply line release indicated the presence of VOCs exceeding the NYSDEC Guidance Values. Fenley and Nicol attributes the contamination detected in these borings to the fuel supply line release however, review of the diagram included in the Limited Subsurface Investigation Report as well as the Tenth Avenue Car Wash plan prepared by Walter T. Gorman and dated March 13, 1998 indicates SB- 2 was approximately 40 feet from depicted location of the fuel supply line release the SB-3 was approximately 80 feet from the depicted location of the fuel supply line release.

Review of the Limited Subsurface Investigation Reports prepared by Fenley and Nicol and dated September 9, 2005 and November 29, 2005 did not identify impacted soil in SB-1. Based on this information, Fenley and Nicol concluded that the former overfill did not impact the subject property, however, based on the depth at which the soil sample was collected, it is not expected the impacted soils would be located at this depth.

Fenley and Nicol also identified impacted soils located on the western and northern portion of the subject property. Fenley and Nicol attributed the impacted soils to the release from the fuel supply lines (NYSDEC Spill no. 0103052). Based on the distance from the location of the reported fuel supply line release and the soil borings in which the soil samples were collected, the impacted soils are not expected to be associated with the fuel supply line release.

Based on the above information and the planned redevelopment of the subject property, Property Solutions recommended performing a Limited Phase II Subsurface Investigation at the subject property. The Limited Phase II Subsurface Investigation will investigate potential contamination on the subject property as it relates to the former releases or other undocumented or undiscovered releases on the subject property.

Property Solutions was contracted by BlackRock Realty Advisors, Inc. to determine the potential presence/absence of subsurface contamination as it relates to the former fuel line leak and gasoline UST overfill or other undocumented or undiscovered releases on the subject property.

On July 29, 2008 through August 1, 2008 Property Solutions advanced a total of ten soil borings (SB-01 through SB-10) at the subject property. Soil boring SB-01 was advanced to the northwest of the gasoline USTs. Soil borings SB-02 through SB-05 were advanced on the northern portion of the subject property in the vicinity of the former fuel supply line leak. Soil borings SB-06 through SB-10 were advanced on the southern portion of the subject property in the vicinity of the gasoline USTs. The soil borings were advanced to a depth of approximately 20 feet below ground surface (bgs). Groundwater was encountered during the subsurface investigation in all ten boring locations at a depth of approximately 12 feet bgs.

Two soil samples were collected from each soil boring and one additional soil sample was collected from soil boring SB-09 for a total of 21 soil samples. The soil samples were collected in laboratory-supplied glassware, stored on ice, and submitted under chain-of-custody to a New York-certified laboratory for analysis. The soil samples were analyzed for New York Spill Technology and Remediation Series (NYSTARS) volatile organic compounds (VOCs) and NYSTARS Semi-volatile organic compounds (SVOCs) by USEPA Method 8260 and 8270, respectively.

On August 4, 2008 through August 6, 2008, Property Solutions installed a total of six groundwater monitoring wells (MW-01 through MW-06) at the subject property. MW-01 was installed in the former location of SB-06 located to the west of the gasoline USTs. MW-02 and MW-03 were installed in the former soil borings SB-02 and SB-03, respectively. MW-02 and MW-03 are located in the northern portion of the subject property to the west of the fuel dispenser islands. MW-04 was installed in the former location of SB-04 located to the north of the gasoline USTs. MW-05 was installed in the former location of SB-09 located to the east of the gasoline USTs. MW-06 was installed approximately two feet from SB-01 located to the west of the subject building along Tenth Avenue.

One groundwater sample was collected from each monitoring well for a total of six groundwater samples. The groundwater samples were collected in laboratory-supplied glassware, stored on ice, and submitted under chain-of-custody to a New York-certified laboratory. The groundwater samples were analyzed for NYSTARS VOCs and NYSTARS SVOCs by USEPA Method 8260 and 8270, respectively.

Based on a review of the analytical laboratory data reported for the soil samples, a concentration of one volatile organic compound exceeding New York State Department of Environmental Conservation (NYSDEC) recommended soil cleanup objectives for gasoline and fuel oil contaminated soils was detected in soil boring SB-02. Review of the analytical laboratory data indicates concentrations of three volatile organic compounds exceeding the NYSDEC recommended soil cleanup objectives for gasoline and fuel oil contaminated soils were detected in SB-03. Review of the analytical data also indicates elevated levels of various volatile organic compounds in the soil borings SB-05. Based on the analytical results, the former fuel supply line leak has impacted the soils in this location of the subject property at an approximate depth of 16 to 20 feet bgs.

Review of the analytical laboratory data for the remaining soil borings advanced on the subject property indicate no other compounds were detected exceeding the NYSDEC recommended soil cleanup objectives for gasoline and fuel oil contaminated soils with the exception of SB-09. Various semi-volatile organic compounds were detected in this soil boring exceeding the NYSDEC recommended soil cleanup objectives for gasoline and fuel oil contaminated soils at a depth of 7 to 8 feet bgs. Based on the depth at which these compounds were detected, and the analytical results of the other soil samples collected on the subject property, it is expected the compounds detected are due to the fill material utilized during the construction of the subject building and not indicative of gasoline or fuel oil impacted soils.

Based on a review of the analytical laboratory data for the groundwater samples, concentrations of volatile organic compounds exceeding the NYSDEC groundwater quality standards were detected in all six of the monitoring wells. Concentrations of the volatile organic compounds detected were much greater in the downgradient monitoring wells MW-01, MW-02, MW-03, and MW-06 than the upgradient well MW-05. Based on this information, it is expected that the source of groundwater contamination is located on the subject property.

Based on the results of this Limited Phase II SI, Property Solutions has the following recommendations:

Property Solutions recommends NYSDEC and the New York City Department of Environmental Protection (NYCDEP) are contacted and the administratively closed spill cases associated with the subject property are reopened. The soil and groundwater impacts detected on the subject property are to be remediated during the redevelopment activities of the subject property. Based on this information, Property Solutions recommends BlackRock Realty Advisors, Inc works with the NYSDEC and NYCDEP to obtain proper closure of the spill cases.

## 1.0 INTRODUCTION

### 1.1 Purpose

Property Solutions Incorporated (Property Solutions) has conducted a Limited Phase II Subsurface Investigation (SI) of Chelsea Carwash located at 70 10<sup>th</sup> Avenue a.k.a. 461-469 West 14<sup>th</sup> Street (odd) in New York, New York County, New York 10011 in (subject property) at the request of BlackRock Realty Advisors Inc.

The Phase II SI was performed based on the findings and recommendations presented in the Draft Phase I Environmental Assessment (EA) prepared by Property Solutions and dated June 24, 2008 (Property Solutions project number 20081436). The potential environmental concerns identified in the Phase I EA include the following:

- During the property visit Mr. Erez Shternlicht, owner of the Chelsea Carwash, informed Property Solutions that a leak occurred in the gasoline supply line servicing the dispenser islands located on the northwestern portion of the subject property in 2001. The release was reported to the NYSDEC and spill number 0103052 was issued on June 19, 2001. According to Mr. Shternlicht, the area of the release was excavated and the supply line was repaired. Review of the environmental database indicates the spill was closed on July 12, 2006. In addition, due to an overfill of the USTs during a fuel delivery on January 13, 2005, NYSDEC Spill number 0412142 was issued to the subject property. Review of the NYSDEC spill database indicates the case was closed on May 17, 2006.

Review of the Limited Subsurface Investigation Reports dated September 9, 2005 and November 29, 2005 indicates Fenley and Nicol advanced three soil borings on the subject property to investigate the potential impact of two former releases on the subject property (NYSDEC Spill nos. 0103052 and 0412142). One boring (SB-1) was advanced in the vicinity of the former overfill (NYSDEC Spill no. 0412142) and two borings were advanced in the northwestern (SB-2) and western (SB-3) portions of subject property to investigate the potential impact from the former release from the fuel supply lines (NYSDEC Spill no. 0103052).

The soil sample collected from SB-1 in the vicinity of the former overfill (NYSDEC Spill no. 0412142) indicated the concentrations of VOCs detected were below the respective NYSDEC Guidance Values. This soil sample was collected at a depth of 14 feet below ground surface and no other soil samples were collected at a shallower depth. Fenley and Nicol stated that based on the analytical results the soil and groundwater have not been adversely impacted, however, no groundwater samples were collected during the investigation.

Soil samples taken from SB-2 and SB-3 with the purpose of investigating the former fuel supply line release indicated the presence of VOCs exceeding the NYSDEC Guidance Values. Fenley and Nicol attributes the contamination detected in these borings to the fuel supply line release however, review of the diagram included in the Limited Subsurface Investigation Report as well as the Tenth Avenue Car Wash plan prepared by Walter T. Gorman and dated March 13, 1998 indicates SB- 2 was approximately 40 feet from depicted location of the fuel supply line release the SB-3 was approximately 80 feet from the depicted location of the fuel supply line release.

Review of the Limited Subsurface Investigation Reports prepared by Fenley and Nicol and dated September 9, 2005 and November 29, 2005 did not indentify impacted soil in SB-1. Based on this information, Fenley and Nicol concluded that the former overfill did not impact the subject property, however, based on the depth at which the soil sample was collected, it is not expected the impacted soils would be located at this depth.

Fenley and Nicol also identified impacted soils located on the western and northern portion of the subject property. Fenley and Nicol attributed the impacted soils to the release from the fuel supply lines (NYSDEC Spill no. 0103052). Based on the distance from the location of the reported fuel supply line release and the soil borings in which the soil samples were collected, the impacted soils are not expected to be associated with the fuel supply line release.

Based on the above information and the planned redevelopment of the subject property, Property Solutions recommended performing a Limited Phase II Subsurface Investigation at the subject property. The Limited Phase II Subsurface Investigation will investigate potential contamination on the subject property as it relates to the former releases or other undocumented or undiscovered releases on the subject property.

Property Solutions was contracted by BlackRock Realty Advisors, Inc. to determine the potential presence/absence of subsurface contamination as it relates to the former fuel line leak and gasoline UST overfill or other undocumented or undiscovered releases on the subject property.

## **1.2 Scope of Work**

Property Solutions performed the following Scope of Work:

1. Coordinated with a New York-certified driller to contact the utility mark-out.
2. Coordinated with a certified consultant to perform a geophysical survey at the subject property for utility clearance purposes.
3. Coordinated with a New York-certified analytical laboratory for analysis of the environmental samples collected during this subsurface investigation.
4. Coordinated the certified driller to advance soil borings at the subject property. The soil borings were advanced utilizing hand equipment and hydraulic push technology (Geoprobe). All environmental sampling equipment was decontaminated prior to the advancement of each boring. The certified driller also coordinated and obtained the necessary sidewalk opening permits.
5. During advancement of the soil borings, continuous soil evaluation took place. The samples were logged and field screened with a photoionization detector (PID) for the presence of organic vapors. The PID was calibrated to a known isobutylene standard prior to the sampling event.

Soil samples were collected from each soil boring. The samples were collected in laboratory-supplied containers, stored on ice, and submitted under chain-of-custody to a New York-certified laboratory for analysis.

6. Six of the soil borings were converted to groundwater monitoring wells. One, grab groundwater sample was collected from each monitoring well in laboratory-supplied

containers, stored on ice, and submitted under chain-of-custody to a New York-certified laboratory for analysis.

7. The certified driller containerized soil cuttings accumulated during monitoring well installation in 55-gallon steel drums which were staged at the subject property pending proper disposal.
8. Property Solutions compared the analytical results to applicable soil and groundwater cleanup standards.
9. Property Solutions prepared a plan identifying the locations of the soil borings based upon field measurements taken during the limited subsurface investigation.
10. Property Solutions prepared a summary report to document the activities and findings of this limited subsurface investigation.

### 1.3 Special Terms and Conditions

This Limited Phase II SI was performed in accordance with the above Scope of Work. No special terms and conditions apply

### 1.4 Reliance

This report has been prepared for the sole benefit of BlackRock Realty Advisors, Inc. and may not be relied upon by any other person or entity without the written authorization of Property Solutions.

## 2.0 BACKGROUND INFORMATION

### 2.1 Property Location

Property Location	
Property Name	Chelsea Carwash
Property Addresses	70 10 <sup>th</sup> Avenue a.k.a. 461 -469 West 14 <sup>th</sup> Street
Property Town, County, State, Zip	New York, New York County, New York 10011
Property Tax Identification	Block 712 lot 6 (New York City Department of Finance)
Property Topographic Quadrangle	<u>Jersey City, New Jersey - New York</u>
Nearest Intersection	10 <sup>th</sup> Avenue and West 14 <sup>th</sup> Street
Area Description	Highly developed, urban, and commercial

An excerpt from the USGS 7.5-minute series topographic quadrangle map of Jersey City, New Jersey - New York, locating the subject property, is included in Appendix A.

## 2.2 Property Description

Property Information	
Property Ownership Name	Tenth Avenue Car Wash Inc. (New York City Department of Finance)
Date of Acquisition	1996 (Mr. Erez Shternlicht, owner of the Chelsea Carwash)
Property Acreage	0.47 acres (New York City Department of Finance)
Property Shape	Rectangular
Property Use	Gasoline station, oil change garage, and carwash
Number of Buildings	One building
Number of Stories	One story
Construction Date	1999 (Mr. Erez Shternlicht, owner of the Chelsea Carwash)
Building Square Footage	11,390 square feet (New York City Department of Finance)
Basement/Slab-on-grade	Partial basement
Number of Units	One unit
Ceiling Finishes	Ceiling tile and exposed structure
Floor Finishes	Vinyl tile, concrete, and ceramic tile
Wall Finishes	Drywall and masonry block.
HVAC (Energy Source & Type of System)	Natural gas and electric forced air
Renovation Date	None reported
Renovation Description	Not applicable
Vehicular Access	Via 10 <sup>th</sup> Avenue, West 14 <sup>th</sup> Street, and West 15 <sup>th</sup> Street
Other Improvements	Support structures for portion of Highline elevated roadway
Property Coverage	Footprint of the subject building, associated parking areas, and portion of the Highline elevated railway

A property diagram of the subject property is included in Appendix A. A property plan of the subject property is included in Appendix A, and photographs of the subject property are included in Appendix B.

## 2.3 Property Operations

The subject property is currently utilized as a gasoline service station, oil change garage, a carwash, and a convenience store. A total of eight fuel dispenser islands are located on the subject property. Five of the fuel dispenser islands are located in the southern portion of the subject property parallel to West 14<sup>th</sup> Street. The remaining three dispenser islands are located in the northern portion of the subject property parallel to 10<sup>th</sup> Avenue. Six 6,000-gallon USTs and ten ASTs of various volumes are utilized in the operations conducted on the subject property. The subject property is also improved with several of the support

structures for the Highline elevated railway and covered by a portion of the Highline elevated railway.

## 2.4 Property History

Based on a review of the historical sources, the subject property consisted of several stores, dwellings, offices, a wagon yard, lumber yards and a scrap iron and metal yard. The subject property was utilized as a parking lot from at least 1979 until 1996. The subject property was also improved with a portion of the Highline elevated railway from at least 1943. Review of the aerial photographs revealed that the subject building was constructed after 1997 and prior to 2000.

## 3.0 PHYSICAL SETTINGS

### 3.1 Topography/Regional Drainage

Topographic Quadrangle Name	Jersey City, New Jersey - New York
Property Elevation	<u>Approximately 10 feet above mean sea level</u>
Surface Gradient	West decline
Property Drainage	Overland flow
Regional Drainage	West
Closest Perennial Water body	Hudson River approximately 0.10 miles away

A copy of the USGS 7.5-minute series topographic quadrangle map of Jersey City, New Jersey - New York, is included in Appendix A.

### 3.2 Soils

Information Source	Soils of New York Landscapes (Cline & Marshall)
Soil Name	Urban Land
Description: Urban Land is found in highly built up areas of New York County. The soils and foundation material are highly variable. Urban structures and works cover so much of this land type that the identification of the soils is not practical. Most areas have been smoothed and the original soil materials have been disturbed, filled over, or otherwise destroyed prior to construction.	
Expected depth to bedrock	Not reported

### 3.3 Underlying Formation

Information Source	University of the State of New York
Title of Publication	<u>Geologic Map of New York-Lower Hudson Sheet</u>
Date of Publication	1970
Name of Unit	Manhattan Formation
Description of Unit: The Manhattan Formation underlies the south and west portions of New York, New York and consists of pelitic schist, amphibolite undivided, sillimanite, garthrust, plagioclase schistose gneiss, and discontinuous units of amphibolite from the Trenton Group.	

### 3.4 Groundwater

Information Source	United States Geological Survey
Title of Publication	<u>Ground Water Atlas for the United States Segment 12</u>
Date of Publication	1995
Underlying Aquifer	Crystalline rock aquifer
Description: This type of aquifer covers most of the northeastern United States. In New York, the aquifer is made up of igneous and metamorphic rocks which have a very small porosity rate. Because the hydraulic conductivity of the crystalline rocks is very low, the water does not penetrate the spaces between the mineral crystals but travels through secondary fractures and joints in the bedrock. These aquifers receive recharge directly from outcrop areas or indirectly through overlying glacial deposits. The crystalline rock aquifer contains high concentrations of iron.	

Expected Depth to Shallow Groundwater	Approximately 12 feet below ground surface
Information Source	Limited Phase II Subsurface Investigation conducted July 29, 2008 through August 6, 2008
Expected Direction of Shallow Groundwater Flow	Local groundwater is expected to mirror local topography and migrate west towards the Hudson River
Information Source	USGS topographic quadrangle map of <u>Jersey City, New Jersey - New York</u>

## 4.0 FIELD INVESTIGATION ACTIVITIES

### 4.1 Field Activities

Field activities commenced on July 29, 2008, when Mr. Thomas Gulya, Environmental Scientist, and Mr. Craig Norris, Environmental Scientist, of Property Solutions, arrived at the subject property at 10:00 am to begin subsurface investigation activities. Weather conditions at the time of the field activities consisted of sunny skies with an approximate outside air temperature of 85 degrees Fahrenheit.

Prior to the start of the field investigation, Property Solutions coordinated Naeva Geophysics  
20081662

Inc. (Naeva) of Congers, New York, to perform a geophysical survey on portions of the subject property for clearance of utilities and subsurface features related to the fuel dispenser islands and underground storage tanks (USTs). On July 11, 2008, the geophysical survey was completed using ground-penetrating radar (GPR). The device radiates a polarized electromagnetic wave from a transmitter antenna into the earth and receives the reflected transmission via a receiving antenna. Radar reflections occur when the radio waves encounter a change in velocity or attenuation. The collection of GPR data was performed by pulling the antenna along grid lines while the positions of each radar reading were recorded with an odometer. The GPR data was recorded digitally in a portable computer for instant display and subsequent processing. Naeva informed Property Solutions of the locations of the utility lines entering the subject building along the southern portion of the subject building. Naeva also informed Property Solutions of locations of subsurface lines related to the fuel dispenser islands and USTs in the northern and southern portions of the subject property.

Soil borings for this Phase II Limited Subsurface Investigation were placed over the extent of the areas of concern. Six soil borings were advanced in the vicinity of the USTs and four soil borings were advanced in the vicinity of the former fuel line release by the certified driller.

Soil boring SB-01, SB-02, SB-09 and SB-10 were advanced in the vicinity of the previous soil borings completed by Fenley and Nicol as reported in the Limited Subsurface Investigation Reports dated September 9, 2005 and November 29, 2005 prepared by Fenley and Nicol.

Soil boring location maps are included in Appendix A.

#### **4.2 Sampling Methods**

Property Solutions contracted Warren George Inc. (WGI) of Jersey City, New Jersey, a certified Geoprobe operator, to advance the soil borings for the collection of the representative subsurface samples. WGI utilizes a Davey Drill DK 525 track-mounted hydraulic rig equipped with a push probe, which advances a four-foot long stainless steel "Macro-Core" sampler. Per each four-foot advancement, a dedicated, disposable polybutyl acetate liner is used in which the samples are held for field assessment. Prior to advancement of each boring, the operator decontaminated the cutting shoe using a mixture of liquinox and water. The operator also inserted a dedicated disposable macro-core liner in each stainless steel sampling tube to prevent cross contamination of the soils encountered.

The equipment utilized by Property Solutions to transfer the soil to the sampling jar was disposed of upon completion of each sampling event and Property Solutions field personnel utilized disposable latex gloves during sample collection and whenever they were in contact with the soils.

The following table is a summary of the soil borings advanced during this investigation.

Soil Boring	Depth (ft.)	Boring Advanced To	Area of Concern Addressed
SB-01	20.0	Maximum proposed depth	Gasoline UST overfill
SB-02	20.0	Maximum proposed depth	Former fuel supply line leak
SB-03	20.0	Maximum proposed depth	Former fuel supply line leak
SB-04	20.0	Maximum proposed depth	Former fuel supply line leak
SB-05	20.0	Maximum proposed depth	Former fuel supply line leak
SB-06	20.0	Maximum proposed depth	Gasoline UST overfill
SB-07	20.0	Maximum proposed depth	Gasoline UST overfill
SB-08	20.0	Maximum proposed depth	Gasoline UST overfill
SB-09	20.0	Maximum proposed depth	Gasoline UST overfill
SB-10	20.0	Maximum proposed depth	Gasoline UST overfill

Property Solutions coordinated the installation of six permanent monitoring wells on the subject property. The wells are identified as MW-01 through MW-06. Monitoring wells MW-01 through MW-05 were installed in the locations of the soil borings SB-02, SB-03, SB-06, SB-09, and SB-10. MW-06 was installed approximately two feet south of SB-01 due to refusal encountered during the installation at SB-01 at approximately four feet bgs. The monitoring wells were installed by WGI utilizing a Davey Drill DK 525 track-mounted hydraulic rig equipped with a 6-inch diameter hollow stem augur. The hollow stem augur was advanced to a depth of approximately 20 feet bgs. The well screen was constructed of 0.010 slot Schedule 40 PVC and the well casing was also Schedule 40 PVC. The well was finished with approximately 10.0 feet of well screen and approximately 10.0 feet of casing. The void surrounding the screens was filled with No. 1 Morie sand and the well was grouted with neat cement and bentonite.

The following table is a summary of the monitoring wells advanced during this investigation.

Monitoring Well	Depth (ft.)	Former soil boring	Area of Concern Addressed
MW-01	20.0	SB-06	Gasoline UST overfill
MW-02	20.0	SB-02	Former fuel supply line leak
MW-03	20.0	SB-03	Former fuel supply line leak
MW-04	20.0	SB-10	Gasoline UST overfill
MW-05	20.0	SB-09	Gasoline UST overfill
MW-06	20.0	Approximately two feet south of SB-01	Gasoline UST overfill

Photographs documenting the drilling procedures are included in Appendix B.

A field log was maintained for each boring which details the observed soil conditions and drilling procedures. A copy of the soil boring field log is included in Appendix C.

#### **4.3 Analytical Laboratory Information**

The soil and groundwater samples were submitted under chain of custody to Test America located at 1008 West Ninth Avenue, King of Prussia, Pennsylvania 19406 (Test America). Test America is certified by the State of New York (New York Certification Number 11593) to analyze samples collected in the State of New York.

The environmental samples were collected in laboratory-cleaned and supplied containers and stored on ice prior to delivery to Test America. As each sample was collected, the sampling containers were labeled. The label denoted the name of the subject property, the sample location, the time and date the sample was collected, any preservatives added to the sample, and the analysis required for each sample. The information from each label was transferred onto the chain of custody form provided by Test America. Upon completion of the fieldwork, the soil samples were delivered under chain of custody to Test America, for analysis.

The soil samples collected from the subject property were analyzed for NYSTARS VOCs and NYSTARS SVOCs by USEPA Method 8260 and 8270, respectively. The groundwater samples collected from the subject property were analyzed for NYSTARS VOCs and NYSTARS SVOCs by USEPA Method 8260 and 8270, respectively.

Analytical results were provided to Property Solutions by Test America in reduced-deliverables format.

Per the agreed upon scope of work, no laboratory-prepared trip blanks or field blanks were collected or analyzed as part of this investigation.

#### **4.4 Field Data Collection**

Property Solutions field logged the soil borings continuously to determine property specific lithology. A field log was maintained for each boring detailing the observed soil conditions and drilling procedures. A copy of the soil boring field log is located in Appendix C.

Property Solutions field screened each soil boring for the presence of total volatile organic compounds (VOCs) using a MiniRAE Lite photoionization detector (PID) with a 10.6 electron-volt (eV) lamp. The PID is a trace gas analyzer calibrated to an isobutylene standard, which is capable of detecting total volatile organic vapor concentrations to a lower limit of approximately one part per million (ppm).

During the field screening, elevated PID readings were detected in SB-01 at a depth 12.5 to  
20081662 9

15.5 feet bgs with a range of 12.3 to 21.5 ppm. A petroleum odor and black staining were encountered in SB-01 at approximately 15.5 to 16 feet bgs. Elevated PID readings were also detected in SB-01 at depth of 19.0 to 20.0 feet bgs with a range of 14.5 to 23.0 ppm.

Elevated PID readings were detected in SB-02 at a depth of 17.5 feet bgs to 19.5 feet bgs with a range of 37.9 to 43.2 ppm. Elevated PID readings were detected in SB-03 at a depth of 16.5 to 18.5 feet bgs with a range of 162.0 to 311.0 ppm. A petroleum odor was encountered in SB-03 at a depth of approximately 16.5 feet bgs.

Elevated PID readings were detected in SB-04 at a depth of 15.0 to 16.0 feet bgs and with a range of 229.0 to 295.0 ppm. A petroleum odor was also encountered at approximately 16.0 feet bgs. Elevated PID readings were detected in SB-05 at a depth of 15.0 to 16.0 feet bgs with a range of 241.0 to 398.0 ppm. A petroleum odor and black staining were also encountered at approximately 15.0 feet bgs. Elevated PID readings were also detected in SB-05 at depth of 17.0 to 18.5 feet bgs with a range of 23.2 to 111.0 ppm

Elevated PID readings were detected in SB-06 at a depth of 16.0 to 17.0 with a range of 15.4 to 24.7 ppm. A petroleum odor and black staining were encountered at a depth of approximately 19.0 feet bgs. No elevated PID readings were detected in SB-07 however a slight petroleum odor was detected at around 11.0 feet bgs. No elevated PID readings were detected in SB-08, SB-09, or SB-10.

Prior to the sampling event, the condition of each well was noted and the wells were opened. Property Solutions utilized a Solinist Model 101 water level indicator to measure the depth to the groundwater table in each well prior to the start of any sampling activities. During the initial sampling round, the finished depth of the well was determined. In order to collect the groundwater samples for NYSTARS VOC and NYSTARS SVOC analysis, Property Solutions utilized a dedicated disposable polyethylene bailer.

## 5.0 REGULATORY STANDARDS

Property Solutions used the following New York State Department of Environmental Conservation (NYSDEC) standards for comparison with contaminant levels identified in the soil and groundwater samples.

- *NYSDEC Response to Comments Relative to December 20, 2000 Soil Cleanup Consolidation Memo* Memorandum dated April 10, 2001 with recommended soil cleanup objectives for gasoline and fuel oil contaminated soils and groundwater quality standards.

## 6.0 EXPLORATION RESULTS

Property Solutions installed a total of ten soil borings on the subject property to a depth of 20 feet bgs. Two soil samples were collected from each of the borings and were analyzed for NYSTARS VOCs and NYSTARS SVOCs.

Based on the results of the ten soil borings installed on the subject property, the subsurface conditions on the subject property can be generally described as follows:

The soils encountered at the subject property generally consisted of red to brown coarse to fine sand with some gravel to a depth of approximately 14.0 feet bgs. From 14.0 feet bgs to 20.0 feet bgs the soils encountered consisted of red to brown coarse to fine sand with some areas of sand and gravel. Several areas of silt were also encountered at approximately 17.0 to 20.0 feet bgs. Groundwater was encountered during the subsurface investigation in all ten boring locations at depths ranging from approximately 12 to 16 feet bgs.

Analytical results, as reported by Test America, are provided in the following tables. The concentrations are provided in  $\mu\text{g}/\text{kg}$  (parts per billion).

Based on a review of the analytical laboratory data reported for the soil samples, a concentration of one volatile organic compound exceeding New York State Department of Environmental Conservation (NYSDEC) recommended soil cleanup objectives for gasoline and fuel oil contaminated soils was detected in soil boring SB-02. Review of the analytical laboratory data indicates concentrations of three volatile organic compounds exceeding the NYSDEC recommended soil cleanup objectives for gasoline and fuel oil contaminated soils were detected in SB-03. Review of the analytical data also indicates elevated levels of various volatile organic compounds in the soil borings SB-05. Based on the analytical results, the former fuel supply line leak has impacted the soils in this location of the subject property at an approximate depth of 16 to 20 feet bgs.

Review of the analytical laboratory data for the remaining soil borings advanced on the subject property indicate no other compounds were detected exceeding the NYSDEC recommended soil cleanup objectives for gasoline and fuel oil contaminated soils with the exception of SB-09. Various semi-volatile organic compounds were detected in this soil boring exceeding the NYSDEC recommended soil cleanup objectives for gasoline and fuel oil contaminated soils at a depth of 7 to 8 feet bgs. Based on the depth at which these compounds were detected, and the analytical results of the other soil samples collected on the subject property, it is expected the compounds detected are due to the fill material utilized during the construction of the subject building and not indicative of gasoline or fuel oil impacted soils.

Based on the conditions encountered during this investigation, the soil-groundwater interface appears to occur at a depth of approximately 12 feet below ground surface (bgs). Monitoring wells MW-01 through MW-06 were advanced to an approximate depth of 20 feet bgs. A total of six grab groundwater samples were collected during this investigation.

Analytical results, as reported by Test America, are provided in the following tables. The concentrations are provided in  $\mu\text{g/L}$  (parts per billion).

J - Data indicates the presence of a compound that meets identification criteria. The concentration is less than the quantitation limit but greater than zero. The concentration is an estimated value.

**Bold** - Compound detected at a concentration above an applicable standard

Based on a review of the analytical laboratory data for the groundwater samples, concentrations of volatile organic compounds exceeding the NYSDEC groundwater quality standards were detected in all six of the monitoring wells. Concentrations of the volatile organic compounds detected were much greater in the downgradient monitoring wells MW-01, MW-02, MW-03, and MW-06 than the upgradient well MW-05. Based on this information, it is expected that the source of groundwater contamination is located on the subject property.

### 7.0 CONCLUSIONS

This Limited Phase II SI took place to determine the potential presence/absence of subsurface contamination at the subject property as it relates to the former releases or other undocumented or undiscovered releases on the subject property.

Based on a review of the analytical laboratory data reported for the soil samples, a concentration of one volatile organic compound exceeding New York State Department of Environmental Conservation (NYSDEC) recommended soil cleanup objectives for gasoline and fuel oil contaminated soils was detected in soil boring SB-02. Review of the analytical laboratory data 20081662

indicates concentrations of three volatile organic compounds exceeding the NYSDEC recommended soil cleanup objectives for gasoline and fuel oil contaminated soils were detected in SB-03. Review of the analytical data also indicates elevated levels of various volatile organic compounds in the soil borings SB-05. Based on the analytical results, the former fuel supply line leak has impacted the soils in this location of the subject property at an approximate depth of 16 to 20 feet bgs.

Review of the analytical laboratory data for the remaining soil boring advanced on the subject property indicate no other compounds were detected exceeding the NYSDEC recommended soil cleanup objectives for gasoline and fuel oil contaminated soils with the exception of SB-09. Various semi-volatile organic compounds were detected in this soil boring exceeding the NYSDEC recommended soil cleanup objectives for gasoline and fuel oil contaminated soils at a depth of 7 to 8 feet bgs. Based on the depth at which these compounds were detected, and the analytical results of the other soil samples collected on the subject property, it is expected the compounds detected are due to the fill material utilized during the construction of the subject building and not indicative of gasoline or fuel oil impacted soils.

Based on a review of the analytical laboratory data for the groundwater samples, concentrations of volatile organic compounds exceeding the NYSDEC groundwater quality standards were detected in all six of the monitoring wells. Concentrations of the volatile organic compounds detected were much greater in the downgradient monitoring wells MW-01, MW-02, MW-03, and MW-06 than the upgradient well MW-05. Based on this information, it is expected that the source of groundwater contamination is located on the subject property and not indicative of a source located in the vicinity of the subject property.

## **8.0 RECOMMENDATIONS**

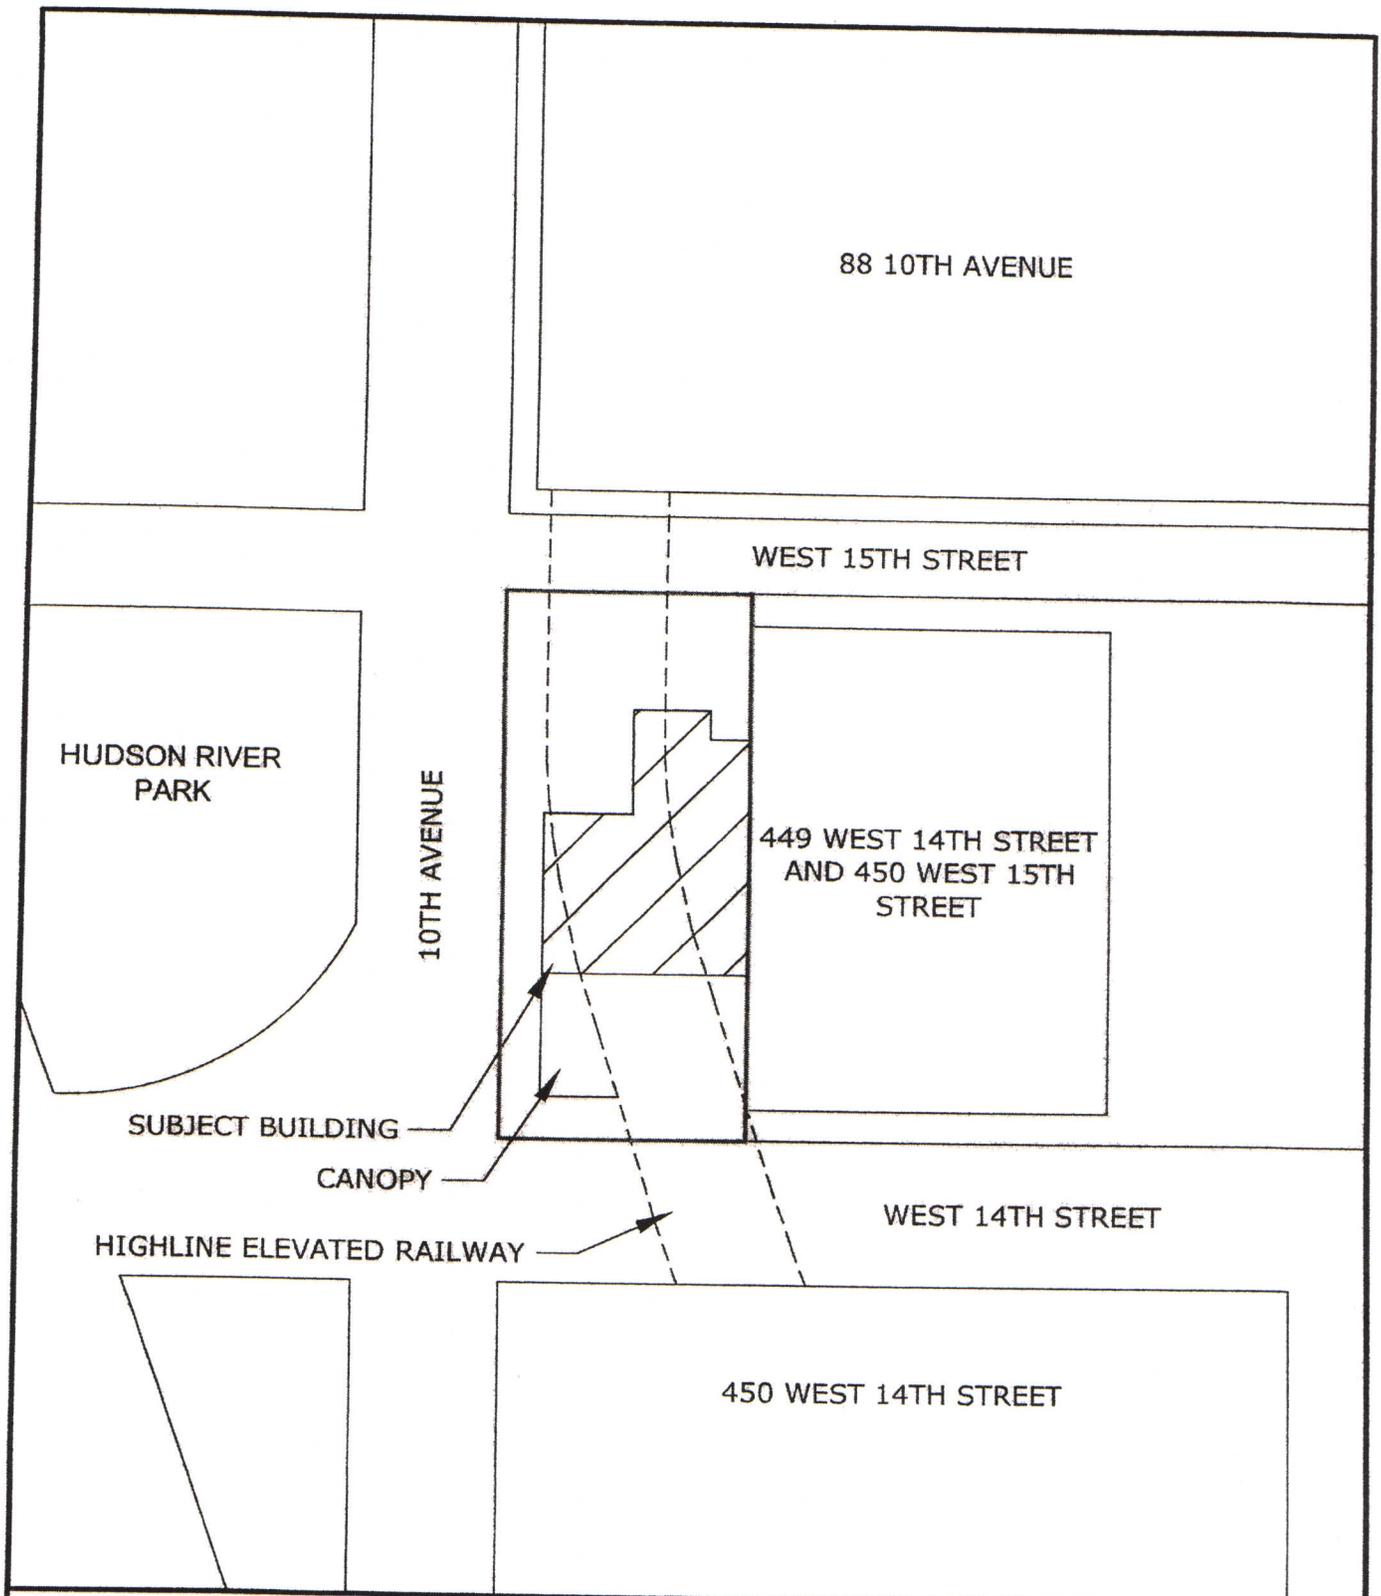

Based on the reported analytical data, Property Solutions has the following recommendations:

Property Solutions recommends NYSDEC and the New York City Department of Environmental Protection (NYCDEP) are contacted and the administratively closed spill cases associated with the subject property are reopened. The soil and groundwater impacts detected on the subject property are to be remediated during the redevelopment activities of the subject property. Based on this information, Property Solutions recommends BlackRock Realty Advisors, Inc works with the NYSDEC and NYCDEP to obtain proper closure of the spill cases.

## Notes and Definitions

- RL7 Sample required dilution due to high concentrations of target analyte.
- J Estimated value. Analyte detected at a level less than the Reporting Limit (RL) and greater than or equal to the Method Detection Limit (MDL). The user of this data should be aware that this data is of limited reliability.
- E Concentration exceeds the calibration range and therefore result is semi-quantitative.
- A-01 Analyte reported from 50x run because 1x run contained carryover.
- DET Analyte DETECTED
- ND Analyte NOT DETECTED at or above the reporting limit
- NR Not Reported
- dry Sample results reported on a dry weight basis
- RPD Relative Percent Difference

APPENDIX E  
PROFESSIONAL QUALIFICATIONS

# **TIM BIERCZ**

## **PROJECT MANAGER**

---

---

**EDUCATION** Bachelor of Natural Resource Management and Applied Ecology  
Cook College, Rutgers – The State University of New Jersey  
New Brunswick, New Jersey

**ACCREDITATIONS** OSHA 40-hour HAZWOPER Training  
USEPA-AHERA Certified Asbestos Inspector  
Certified NJDEP Subsurface Evaluator #463476  
Certified NJDEP Underground Storage Tank Closure #463476

### **SUMMARY OF QUALIFICATIONS**

Mr. Biercz has experience performing Phase I Environmental Assessments, Phase II Subsurface Investigations, and Regulatory Compliance Assessments for industrial, commercial, and residential properties. These assessments involve the researching of historical information, field evaluation, interviews, interpreting environmental database reports, identification of potential contamination and liability, and documentation through technical report writing. These environmental assessments also include the interpreting of results from the sampling of asbestos-containing materials, lead-based paints, drinking water, and radon. Mr. Biercz is also experienced in the design, management, and implementation of soil and groundwater sampling projects. Mr. Biercz has also designed and implemented asbestos and lead-based paint operations and maintenance plans.

### **REPRESENTATIVE PROJECT EXPERIENCE**

#### ***Landfill Redevelopment – Edison, New Jersey***

Mr. Biercz has performed a Phase I Environmental Assessment and environmental document review of a closed landfill located in Edison, New Jersey. The assessment included an evaluation of the prior use of the property, field evaluation, and a review of previous reports for the landfill. Additional document review included the evaluation of applications and plans of a proposed development of the landfill. These documents included: Modification to Landfill Closure and Post-Closure Care Plan, Joint Application for Upland and Waterward Waterfront Development Permit, Water Quality Certification, and Coastal Consistency, and an application for the Department of the Army, Army Corps of Engineers Nationwide Permit #14.

#### ***Residential Apartments – Hartford, Connecticut***

Mr. Biercz performed a Phase II Subsurface Investigation at a residential apartment building with a removed underground storage tank (UST). The on-site subsurface evaluation was to determine the presence or absence of soil and/or ground water contamination at the property. Mr. Biercz supervised the collection of soil samples, in the vicinity of the UST, utilizing Geoprobe technologies. Mr. Biercz also supervised the collection of groundwater samples utilizing temporary well points.

#### ***Commercial Office Building – Medford, Massachusetts***

Mr. Biercz performed a Phase I Environmental Assessment of a commercial office building in Medford, Massachusetts. The assessment included the investigation of prior uses of the property and the evaluation of remedial actions pertaining to a prior UST release. Reference to the Massachusetts Contingency Plan determined that restrictions set forth in an Activity and Use Limitation for the property satisfied federal, state, and local regulations.

#### ***Retail Strip Mall – Garden City, New York***

Mr. Biercz performed a Phase II Subsurface Investigation at a retail strip mall with both historic and current dry cleaning activities located on the property. Mr. Biercz supervised the collection of soil and groundwater samples to determine the potential impact of the dry cleaning operations. Samples were analyzed for volatile organic compounds and compared to applicable soil and groundwater standards.

**KEVIN J. BILLINGS, P.E.**  
**SENIOR VICE PRESIDENT**

---

**EDUCATION** Bachelor of Electrical Engineering  
Villanova University  
Villanova, Pennsylvania

**ACCREDITATIONS** Professional Engineer – PA **ENVIRONMENTAL**  
EPA Accredited AHERA Asbestos Inspector & Management Planner  
40-hour Health & Safety Training  
8-hour Supervisor Training  
Air & Waste Management Association

**HUD MAP TRAINING** Baltimore  
Philadelphia  
New York

**SUMMARY OF QUALIFICATIONS**

Mr. Billings background includes execution of environmental evaluations involving: Historic research of site usage, potential contamination identification, formulation of sampling and analysis plans, interpretation of analytical results, soil gas surveys, documentation through technical report writing; Resource Conservation and Recovery Act (RCRA) waste characterization; Industrial Waste management Audits; Toxic Substances Control Act (TSCA) Compliance Audits Recyclable Materials Research. Mr. Billings has completed 40-hour OSHA training and has performed infield testing on numerous occasions.

Mr. Billings has overseen and performed Hundreds of Phase I Environmental Assessments for HUD as well as HUD MAP Phase I Environmental Assessments.

Mr. Billings has also been involved with NEPA studies including Environmental Impact statements, Environmental Assessments, and Categorical Exclusions.

Mr. Billings has been specifically involved in performing HUD MAP Environmental Assessments in Arkansas, Illinois, New York, Indiana, Ohio, Colorado, Kentucky, Massachusetts, New Jersey, Maryland, South Carolina, Washington, Texas, California, Idaho, Oregon, and Rhode Island and overseen others.

Mr. Billings technically reviewed and developed the Environmental Scope of services and guide for Federal Home Loan Bank of Boston which follows the HUD MAP scope but has specific requirements for each of the New England states.

In addition to the Phase I Environmental Assessments for HUD, Mr. Billings has performed and overseen thousands of assessments for Fannie Mae and Freddie Mac.

Mr. Billings has also performed and overseen well over 10,000 Phase I Environmental Assessments in the last 10 years in all 50 states.

Mr. Billings has also performed Phase II Subsurface Investigations for HUD and asbestos consulting.

The below information relates to Mr. Billings' large Superfund scale remediation and investigation experience:

**REPRESENTATIVE PROJECT EXPERIENCE**

**Front Royal, VA- NPL Site**

Performed a review and evaluation of past environmental studies and remedial efforts undertaken at a large-scale industrial facility. Performed TSCA and site evaluations for bankruptcy court appointed trustee. Evaluations also included development of cost effective work plans for site remediation and power grid consolidation, saving approximately \$276,000 per year in electricity costs.

**Marcus Hook, PA- NPL Site**

Assisted in development of a detailed work plan for the removal of friable asbestos materials and developed a detailed work plan addressing PCB concerns on behalf of a client under an EPA administrative order at this site. Developed and implemented sampling and analysis plan for PCB contamination. EPA approved a cost-effective remediation plan encapsulating PCB contamination and foregoing supplementary sampling and analysis.

**Emergency Response - Media, PA**

Team leader and project manager representing Media Water Company. A release of heating oil to a creek immediately upgradient of the client's drinking water intake occurred, impacting a population of approximately 45,000. An immediate threat to human health was evident; therefore, a temporary intake line was installed upgradient of the impacted area, mitigating the potential for a local fire disaster.

Combined efforts with the responsible party's cleanup contractor put the water filtration plant on-line within 24 hours.

**CERCLIS - Bensalem, PA**

Project Management efforts involving site evaluation and remedial investigation of a one-hundred acre former Publiker Industries site. Investigations included ground penetrating radar surveys, installation of groundwater monitoring wells, advancement of soil borings, surface water and sediment sample collection, data evaluation, risk assessment, hazardous and non-hazardous waste remediation alternatives. The site was a former butadiene production plant that was located adjacent to another CERCLIS site identified as a wood preserving plant.

**CERCLIS - Norristown, PA**

Project Management of comprehensive site evaluation of former fiber/paper plant and former tenant that handled hazardous wastes.

**State Superfund - Meadville, PA**

Review and evaluation of previous reports and studies concerning the site. Performance of site inspection documenting current site conditions. After acceptance by State regulators, the site was redeveloped as an industrial/office park.

**State Superfund - Paoli, PA**

Project management and site construction management of remedial efforts of former research and development facility under order of PADER. Contamination, including hex and trivalent chromium, lead, and arsenic, as well as volatile organic compounds, was remediated.

**Remediation - Carlisle Army Barracks, Carlisle, PA**

Provided consulting engineering services for investigation of petroleum contamination related to underground storage tanks located at the barracks; development of corrective action plans, including removal/replacement of the USTs; and soil and groundwater remediation.

**Remediation - Former Industrial Site/Fuel Distribution Center, Philadelphia, PA**

Performed review and evaluation of historic site operations dating back to the late 1800s that led to the discovery of a former oil tank farm. Preliminary sampling revealed the presence of contamination. After the development of a sampling and analysis plan, using probabilistic methods of contaminate flow analysis, the type, source and extent of contamination was determined.

## **1.0 EXECUTIVE SUMMARY**

At the request of Real Estate Equities Corporation, Environmental Maintenance Contractors, Inc. (EMC) has completed the environmental subsurface soil and groundwater site inspection and sampling, hereafter referred to as the Investigative Site Work (ISW), of the property located at 70 10<sup>th</sup> Avenue (a.k.a. 461-469 East 14<sup>th</sup> Street) in New York City, New York 10011, hereafter referred to as the subject property, as per the New York State Department of Environmental Conservation (NYS DEC) Approved Investigative Work Plan (IWP) prepared by EMC, dated March 24, 2010. The ISW was performed in response to the findings and recommendations presented in the Phase I Environmental Assessment (EA) Report prepared by EMC, dated March 1, 2010 and the Limited Phase II Subsurface Investigation Report prepared by Property Solutions, dated August 22, 2008. The IWP and ISW are in response to the open NYS DEC Spill Case #09-11962.

EMC was contracted by Real Estate Equities Corporation to determine the potential presence/absence of subsurface contamination, as it relates to the former fuel line leak and gasoline UST overfills indicated on the former NYS DEC Spill Reports, and any other undocumented or undiscovered releases on the subject property.

On April 6, 2010 to April 12, 2010 EMC advanced a total of thirteen (13) soil borings and installed a ground water monitoring well at each of the thirteen (13) soil boring locations at the subject property, as indicated on the attached drawings. The soil borings were advanced and the ground water monitoring wells were installed to a depth of approximately 20 feet below ground surface (bgs). Ground water was encountered during the ISW at a depth of approximately 13 feet bgs at all thirteen locations of the subject property.

Based on the results of this ISW, Environmental Maintenance Contractors, Inc. (EMC) has the following recommendations:

EMC recommends that the soil and ground water contamination, detected during the ISW, be remedied during the proposed development activities at the subject property. Upon completion of remedial activities Real Estate Equities Corporation should work with the NYS DEC to obtain proper closure of the open Spill Case #09-11962.

## **2.0 INTRODUCTION**

As per the NYS DEC request, and the information gathered (the Phase I Environmental Site Assessment (ESA) Report prepared by EMC & the Limited Phase II Subsurface Investigation report prepared by Property Solutions), EMC performed Subsurface Investigative Site Work (ISW) in accordance with the EMC IWP, approved by the NYS-DEC dated March 24, 2010.

### **2.1 Purpose**

The purpose of the ISW is to investigate potential contamination on the subject property as it relates to the former releases or other undocumented or undiscovered releases on the subject property.

## 2.2 Scope of Work

The specific scope of this project was conducted as follows:

- 2.2.1 Coordinated with a New York Certified subsurface drilling firm to contact the utility mark out (DIG-SAFE).
- 2.2.2 Coordinated with a Certified Consultant to perform a Geophysical Survey (GPRS) at the subject property for utility clearance purposes.
- 2.2.3 Coordinated with a New York Certified analytical laboratory for analysis of the environmental soil and ground water samples collected during this subsurface investigation.
- 2.2.4 Coordinated the Certified Driller to advance soil borings at the subject property. Soil borings were advanced utilizing a Split Tube Sampler (SS) and Hollow Stem Auger (HSA) apparatus. The Certified Driller also coordinated and obtained the necessary sidewalk opening permits with the NYC DOT.
- 2.2.5 During advancement of soil borings, continuous soil evaluation was performed by an EMC environmental technician. The samples were logged and field screened with a Photo-Ionization Detector (PID) for the presence of organic vapors. The PID was calibrated to a known isobutylene standards prior to the sampling event.

Soil samples were collected from each soil boring location. The samples were collected in laboratory-supplied containers, stored on ice, and submitted under chain-of-custody to a New York Certified laboratory for analysis.

- 2.2.6 All thirteen (13) soil borings locations were converted to ground water monitoring wells.
- 2.2.7 The Certified Driller containerized soil cuttings accumulated during the soil boring and monitoring well installation activities in 55-gallon steel drums which were staged at the subject property pending proper disposal.
- 2.2.8 EMC compared the analytical results to the applicable NYS DEC Soil and Groundwater cleanup standards.
- 2.2.9 EMC prepared a scaled site plan/drawing identifying the locations of the soil borings and ground water well installation locations based upon field measurements taken during the ISW.
- 2.2.10 EMC prepared a summary report to document the activities and findings of this ISW.

### **2.3 Special Terms and Conditions**

This ISW was performed in accordance with the above detailed Scope of Work. No special terms and conditions apply.

### **2.4 Reliance**

This report has been prepared for the sole benefit of Real Estate Equities Corporation and may not be relied upon by any other person or entity without the written authorization of Environmental Maintenance Contractors, Inc.

## **3.0 FIELD INVESTIGATION ACTIVITIES**

### **3.1 Field Activities**

The ISW field activities were commenced on April 6, 2010 and were completed on April 12, 2010. Prior to the start of the field investigation, EMC coordinated with Ground Penetrating Radar Systems, Inc. (GPRS) of 8534 W. Central Ave. Sylvania, OH 43560, to perform a geophysical survey on the subject property for clearance of utilities and subsurface features related to the fuel dispenser islands and underground storage tanks (UST's). On March 30, 2010, the geophysical survey was completed using a 400MHz ground-penetrating radar (GPR). The device radiates a polarized electromagnetic wave from a transmitter antenna into the earth and receives the reflected transmission via receiving antenna. Radar reflections occur when the radio waves encounter a change in velocity or attenuation. The collection of GPR data was performed by pulling the antenna along the grid lines while the positions of each reading were recorded with an odometer. GPRS marked the utilities and UST's directly onto the ground surface. GPRS also rescanned the subject property with the radio detection unit and marked the locations of electrical or telecommunication lines directly onto the ground surface.

Soil borings were advanced and ground water monitoring well locations were installed at thirteen (13) locations as detailed on the attached drawing.

### **3.2 Sampling Methods**

EMC contracted with SOIL TESTING, INC. of 140 Oxford Rd. Oxford, CT 06478, to advance soil borings at thirteen (13) locations for the collection of the representative subsurface soil/fill samples. SOILTESTING, INC. utilized a Truck-Mounted hydraulic rig equipped with a Hollow Stem Auger, which advances a two-foot long "Split Tube Sampler" for subsurface soil/fill collection. At each two-foot advancement soil/fill samples were collected and placed into sampling jars/glassware and held for field screening. Each sample was logged, numbered and field screened with a Photo-Ionization-Detector (PID) for the presence of organic vapors.

Soil Samples were collected from each of the thirteen (13) soil boring locations. The soil sample with the highest reading, as per the PID screening results, for each soil boring location was collected in laboratory-supplied containers, noted/numbered on a chain of custody, stored on ice, and submitted to a New

York certified laboratory for analysis for Semi-Volatile Organic Compounds (SVOC) and Volatile Organic Compounds (VOC) analysis.

The following table is a summary of the soil borings and ground water monitoring wells advanced during this investigation.

Soil Boring w/ Monitoring Well	Depth (feet)	Boring Advanced To	Area of Concern Addressed
SB01/MW01	20	Maximum proposed depth	Gasoline UST overfill
SB02/MW02	20	Maximum proposed depth	Former fuel supply line leak
SB03/MW03	20	Maximum proposed depth	Former fuel supply line leak
SB04/MW04	20	Maximum proposed depth	Former fuel supply line leak
SB05/MW05	20	Maximum proposed depth	Gasoline UST overfill
SB06/MW06	20	Maximum proposed depth	Gasoline UST overfill
SB07/MW07	20	Maximum proposed depth	Former fuel supply line leak
SB08/MW08	20	Maximum proposed depth	Former fuel supply line leak
SB09/MW09	20	Maximum proposed depth	Former fuel supply line leak
SB10/MW10	20	Maximum proposed depth	Former fuel supply line leak
SB11/MW11	20	Maximum proposed depth	Gasoline UST overfill
SB12/MW12	20	Maximum proposed depth	Gasoline UST overfill
SB13/MW13	20	Maximum proposed depth	Gasoline UST overfill

During the advancement of the soil borings, SOIL TESTING, Inc. installed the ground water monitoring wells at a depth of approximately 20 feet bgs utilizing a track-mounted hydraulic rig equipped with a 6-inch diameter hollow stem auger. The well screen was constructed of a two (2) inch diameter Schedule 40 PVC and the well casing was also two (2) inch diameter Schedule 40 PVC. The ground water monitoring well was completed utilizing approximately 10 feet of well screen and approximately 10 feet of casing. The void surrounding the screens was filled with Graded Silica Sand and Coarse Grade Bentonite and the well were grouted with neat Portland Cement and Powdered Bentonite.

A field log was maintained by SOIL TESTING, Inc. for each boring, detailing the observed soil conditions and drilling procedures. A copy of the soil borings field log is included in Appendix A.

### 3.3 Analytical Laboratory Information

The environmental samples were collected and stored in laboratory-cleaned and supplied containers and stored on ice. Upon completion of the field work, the soil samples were brought to the EMC office for PHOENIX Environmental Laboratories, Inc. to pick-up for analysis.

The soil samples collected from the subject property were analyzed for NYSTARS VOC's and NYSTARS SVOC's by USEPA Method 8260 and 8270, respectively. The groundwater samples collected from the subject property were analyzed for NYSTARS VOC's and NYSTARS SVOC's by USEPA Method 8260 and 8270, respectively.

Analytical results were provided to Environmental Maintenance Contractors, Inc. (EMC) by PHOENIX Environmental Laboratories, Inc. Please find analytical data attached in Appendix B.

### 3.4 Field Data Collection

EMC field logged the activities related to the subsurface soil borings and ground water monitoring wells continuously to determine property specific lithology. A field log was maintained for each boring detailing the observed soil conditions and drilling procedures.

EMC field screened each soil boring for the presence of total volatile organic compounds (VOC's) using a MiniRae 2000 Photo-Ionization Detector (PID). Mini RAE 2000 is a hand held volatile organic compound (VOC) monitor containing a Photo-Ionization Detector (PID) with an extended range of 0-10,000 ppm.

The following table is a summary of field observations made during soil boring activities.

SB/MW No.	Highest PID Reading (ppm)	Observation	Level of Groundwater
SB01	427 @ 14 ft. bgs	Petroleum odor and black staining at approx. 12-14ft.	13
SB02	3379 @ 6 ft. bgs	Petroleum odor and black staining at approx. 14-16ft.	13
SB03	3968 @ 16 ft. bgs	Petroleum odor and black staining at approx. 14-16ft.	13
SB04	1219 @ 16 ft. bgs	Petroleum odor and black staining at approx. 14-16ft.	13
SB05	1410 @ 2 ft. bgs	Petroleum odor and black staining at approx. 14-16ft.	13

SB06	2048 @ 2 ft. bgs	Petroleum odor and black staining at approx. 14-16ft.	13
SB07	1571 @ 2 ft. bgs	Petroleum odor and black staining at approx. 12-14ft.	13
SB08	1682 @ 18 ft. bgs	Petroleum odor at approx. 12-14ft. and black staining at approx. 14-16ft.	13
SB09	1406 @ 16 ft.bgs	Petroleum odor at approx. 12-14ft. and black staining at approx. 14-16ft.	13
SB10	1398 @ 16 ft. bgs	Petroleum odor at approx. 12-14ft. and black staining at approx. 14-16ft.	13
SB11	304 @ 2 ft. bgs	Slight petroleum odor	13
SB12	278 @ 12 ft. bgs	Slight petroleum odor	13
SB13	93.3 @ 8.5 ft. bgs	Slight petroleum odor	13

The following table is a summary of field observations made during groundwater monitoring well sampling activities.

SB/MW No.	PID Reading (ppm)	Observation	Level of Groundwater
MW01	0.7	Petroleum odor and presence of gas/oil on water	11'10"
MW02	0.1	Petroleum odor and presence of gas/oil on water	12'6"
MW03	6.4	Petroleum odor and presence of gas/oil on water	12'4"
MW04	100	Petroleum odor and presence of gas/oil on water	12'5"
MW05	893	Petroleum odor and presence of gas/oil on water	12'4"
MW06	148	Petroleum odor and presence of gas/oil on water	12'6"
MW07	357	Petroleum odor and presence of gas/oil on water	12'4"
MW08	792	Petroleum odor and presence of gas/oil on water	12'
MW09	1016	Petroleum odor and presence of gas/oil on water	11'11"
MW10	869	Petroleum odor and presence of gas/oil on water	12'

MW11	67.1	Slight petroleum odor	11'5"
MW12	30.6	Slight petroleum odor	10'10"
MW13	12.3	Slight petroleum odor	10'10"

Prior to the sampling event, at each ground water monitoring well location, EMC utilized a measuring stick to measure the depth of the groundwater table. EMC utilized a dedicated disposable polyethylene bailer at each ground water monitoring well to collect the ground water samples for analysis via NYSTARS VOC's and NYSTARS SVOC's.

#### **4.0 REGULATORY STANDARDS**

EMC used the NYS DEC standards for comparison with the contaminant levels identified in the soil and groundwater samples collected.

#### **5.0 EXPLORATION RESULTS**

Based on the field observations and screening for the soil/fill material and ground water collected from the thirteen (13) locations on the subject property, the subsurface conditions on the subject property can be generally described as follows:

The soil encountered at the subject property generally consisted of brown coarse to fine sand with some gravel to a depth of approximately 14 feet bgs. From 14 feet bgs to 20 feet bgs the soils encountered consisted of brown coarse to fine sand with some areas of sand and gravel. Groundwater was encountered during the subsurface investigation in all thirteen (13) boring locations at a depth of approximately 13 feet bgs.

Analytical results, as reported by PHOENIX Environmental Laboratories, Inc., are provided in the following tables. The concentrations are provided in µg/kg (parts per billion). Please find Table and Sample Data attached in Appendix B.

Based on the conditions encountered during this investigation, soil-groundwater interface appears to occur at a depth of approximately 13 feet below ground surface (bgs). Thirteen Monitoring wells advanced to an approximate depth of 20 feet bgs. A total of thirteen (13) ground water samples were collected during this investigation.

#### **6.0 CONCLUSIONS**

This limited subsurface ISW took place to delineate the location(s) of subsurface soil/fill petroleum product contamination as it relates to the former releases or other undocumented or undiscovered releases on the subject property and to determine the groundwater flow direction in that zone of the subject property.

Based on a review of the analytical laboratory data reported for the soil and ground water samples collected, the analytical results indicate that SB-01, SB-02, SB-07, SB-09 & SB-10 and MW-01, MW-02, MW-04, MW-05, MW-06, MW-07, MW-08, MW-09, MW-10, MW-11, MW-12 & MW-13 contain petroleum contaminants that exceed the NYS DEC recommended limits for petroleum contaminants in soil and ground water. Sample

results indicate that the historical uses and spills reported to the NYS DEC have impacted the subject property.

Based on local topography (information source is USGS topographic quadrangle map of Jersey City, New Jersey – New York (See Appendix D)) and groundwater contour map (See Appendix E), it is expected that the flow of the local groundwater migrates in a South Western direction toward the Hudson River.

## 7.0 **RECOMMENDATIONS**

Based on the reported analytical data, EMC has the following recommendations:

That this Investigative Site Work report be submitted for review by the NYS DEC for comment.

That a Remedial Action Plan be prepared with a Site Specific Health and Safety Plan be submitted to the NYS DEC for review and approval prior to the start of any subsurface construction related work.

That the contaminated subsurface soil/fill material be abated in accordance with a NYS DEC approved Remedial Action Work Plan and Site Specific Health and Safety Plan during the proposed construction activities.

## **GENERAL / DISCLAIMER**

In the professional judgment of the site assessor, the scope of this investigation was sufficient to determine whether further investigation was warranted, given the nature and specific circumstances of the site. The site assessor performed the work on this Subject Site in conformance with the care and skill currently exercised by reputable environmental consulting firms practicing under similar conditions in the State of New York. No other warranty of representation of any kind, expressed or implied, at common law or created by statute, is extended, made or intended by the site assessor's rendering consulting services or furnishing oral and/or written reports of its findings.

The site assessor has no obligation to any third party who intends to, or will, rely on this report and specifically disclaims any such responsibility. The site assessor assumes no obligation for reporting any facts revealed by the site investigation or what is contained in the Phase I Environmental Site Assessment report to anyone other than the Client.

This report does not constitute legal advice, nor does the site assessor purport to give legal advice. Environmental conditions and regulations are subject to constant change and reinterpretation. It should not be assumed that current conditions and/or regulatory positions will remain constant. Furthermore, because the facts stated in this report are subject to professional interpretation, differing conclusions could be reached by other professionals.

Certain information contained in this report may have been obtained from agencies or through personal interviews. The site assessor can not warrant that such information is accurate. Except as discussed in the report, the site assessor has not verified the accuracy of such information.

Contaminants may be hidden in subsurface materials or covered by foliage, water, snow, concrete, asphalt, or other materials. This contamination may not be present in predictable locations. The most that the site assessor can do is formulate a logical assessment program to reduce the client's risk of later discovering previously unknown contamination. The greater the extent of exploration on a property, the greater the probability of finding contamination, if present. Even with extensive exploration, it is not possible to say with total certainty that contaminants are not present at a particular site.

Many environmental assessments are undertaken to satisfy "due diligence" requirements in federal Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) and appropriate state requirements. The level of investigative work required to demonstrate "due diligence" has not been legislatively defined by Congress, the USEPA, or appropriate state bodies. Although the site assessor strives to investigate each site to discover all possible sources of contamination, the site assessor cannot warrant that the work undertaken for this report will provide a due diligence defense asserted under CERCLA, or any other federal, state, or local laws.

No warranty can be made that conditions observed were representative of areas not observed. Tests or data collected for this report were obtained only for the purposes stated in this report, and should not be used for reasons other than those intended.

The inspector assumes no responsibility for legal issues affecting the property inspected, nor does the inspector render any opinion as to the marketability of title.

Any sketch(es) in the report may show approximate dimensions. Sketch(es) are only included to assist the reader in visualizing the property.

Unless arrangements have been previously made, the inspector will not be required to give testimony or appear in court because of having made the Environmental Site Assessment with reference to the property in question.

The assessor assumes that there are no hidden, unapparent, or latent conditions or defects on the property, subsoil, or structures that would render it more valuable, less valuable or hazardous. The assessor assumes no responsibility for such conditions or for the inspection, engineering, or repair that might be required to discover or correct such factors.

Information, estimates, and opinions furnished to the environmental assessor and contained in the report were obtained from sources considered reliable and believed to be true and correct. The assessor, however, assumes no responsibility for the accuracy of such information.

This Environmental Site Assessment is not intended to (but indeed may) have a direct effect on the value of the property inspected. It is conducted solely for the educational benefit of the principal parties.

The contents of this report, including any conclusions as to value or hazards and the identity of the assessor shall not be disseminated to the public through advertising media, public relations media, news media, sales media, or any other public means of communication without the prior written consent and approval of the environmental assessor.

MDL - Method Detection Limit

Thursday, April 15, 2010

Attn: Mr. Richard Stumbo  
EMCI  
5 Anderson Lane  
Goldens Bridge, NY 10526

Project ID: 70 10TH AVE., NEW YORK CITY, NY  
Sample ID#s: AS92552 - AS92557

This laboratory is in compliance with the QA/QC procedures outlined in EPA 600/4-79-019, Handbook for Analytical Quality in Water and Waste Water, March 1979, SW846 QA/QC and NELAC requirements of procedures used.

This report contains results for the parameters tested, under the sampling conditions described on the Chain Of Custody, as received by the laboratory.

A scanned version of the COC form accompanies the analytical report and is an exact duplicate of the original.

If you have any questions concerning this testing, please do not hesitate to contact Phoenix Client Services at ext. 200.

Sincerely yours,

A handwritten signature in black ink that reads "Phyllis Shiller". The signature is written in a cursive style.

**Comments:**

Elevated reporting limits for volatiles due to the presence of target and non-target compounds.

If there are any questions regarding this data, please call Phoenix Client Services at extension 200.

**Comments:**

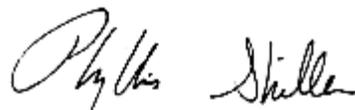

\*\*Poor surrogate recovery was observed for volatiles due to matrix interference.

\* The surrogate failed method criteria due to sample matrix interference for the semivolatile analysis. The other surrogates associated with this sample were within QA/QC criteria. No further action was necessary.

**Comments:**

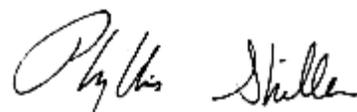

\*\*Poor surrogate recovery was observed for volatiles due to matrix interference.

\* The surrogate failed method criteria due to sample matrix interference for the semivolatile analysis. The other surrogates associated with this sample were within QA/QC criteria. No further action was necessary.

Comment:

A blank ms/msd was analyzed with this batch.

2 = This parameter is outside laboratory lcs/lcsd specified limits.  
 3 = This parameter is outside laboratory ms/msd specified limits.

If there are any questions regarding this data, please call Phoenix Client Services at extension 200.

- RPD - Relative Percent Difference
- LCS - Laboratory Control Sample
- LCSD - Laboratory Control Sample Duplicate
- MS - Matrix Spike
- MS Dup - Matrix Spike Duplicate
- NC - No Criteria

Project ID: 70 10TH AVE., NEW YORK CITY, NY  
Sample ID#s: AS93540 - AS93546

This laboratory is in compliance with the QA/QC procedures outlined in EPA 600/4-79-019, Handbook for Analytical Quality in Water and Waste Water, March 1979, SW846 QA/QC and NELAC requirements of procedures used.

This report contains results for the parameters tested, under the sampling conditions described on the Chain Of Custody, as received by the laboratory.

A scanned version of the COC form accompanies the analytical report and is an exact duplicate of the original.

If you have any questions concerning this testing, please do not hesitate to contact Phoenix Client Services at ext. 200.

Sincerely yours,

A handwritten signature in black ink that reads "Phyllis Shiller". The signature is written in a cursive style.

3 = This parameter exceeds laboratory specified limits.

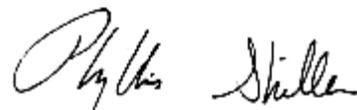

**Comments:**

\* Poor surrogate recovery was observed for semivolatiles. The other surrogates associated with this sample were within QA/QC criteria. No further action was necessary.

If there are any questions regarding this data, please call Phoenix Client Services at extension 200.

**Comments:**

Elevated reporting limits for volatiles due to the presence of target and non-target compounds.

If there are any questions regarding this data, please call Phoenix Client Services at extension 200.

Phoenix Laboratories does not assume responsibility for the data contained in this report. It is provided as an additional tool to identify requested criteria exceedences. All efforts are made to ensure the accuracy of the data (obtained from appropriate agencies). A lack of exceedence information does not necessarily suggest conformance to the criteria. It is ultimately the site professional's responsibility to determine appropriate compliance.

Attn: Mr. Richard Stumbo  
EMCI  
5 Anderson Lane  
Goldens Bridge, NY 10526

Project ID: 70 10TH AVE., NEW YORK CITY, NY  
Sample ID#s: AS96199 - AS96212

This laboratory is in compliance with the QA/QC procedures outlined in EPA 600/4-79-019, Handbook for Analytical Quality in Water and Waste Water, March 1979, SW846 QA/QC and NELAC requirements of procedures used.

This report contains results for the parameters tested, under the sampling conditions described on the Chain Of Custody, as received by the laboratory.

A scanned version of the COC form accompanies the analytical report and is an exact duplicate of the original.

If you have any questions concerning this testing, please do not hesitate to contact Phoenix Client Services at ext. 200.

Sincerely yours,

A handwritten signature in black ink that reads "Phyllis Shiller". The signature is written in a cursive style.

Comments:

\* Poor surrogate recovery was observed for semivolatiles and there was insufficient sample for re-extraction. The other surrogates associated with this sample were within QA/QC criteria.

\* Poor surrogate recovery was observed for semivolatiles.

Comments:

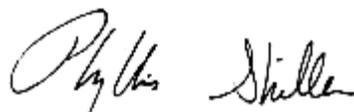

Elevated reporting limits for volatiles due to the presence of non-target compounds.

\* Poor surrogate recovery was observed for semivolatiles. The other surrogates associated with this sample were within QA/QC criteria. No further action was necessary.

If there are any questions regarding this data, please call Phoenix Client Services at extension 200.

# Analysis Report

April 29, 2010

FOR: Attn: Mr. Richard Stumbo  
 EMCI  
 5 Anderson Lane  
 Goldens Bridge, NY 10526

## Sample Information

Matrix: GROUND WATER  
 Location Code: EMCI  
 Rush Request:  
 P.O.#:

## Custody Information

Collected by: JG  
 Received by: LB  
 Analyzed by: see "By" below

Date: 04/19/10 12:54  
 04/20/10 17:56

## Laboratory Data

SDG ID: GAS96199  
 Phoenix ID: AS96207

Project ID: 70 10TH AVE., NEW YORK CITY, NY

Client ID: MW-09

# Analysis Report

April 29, 2010

FOR: Attn: Mr. Richard Stumbo  
 EMCI  
 5 Anderson Lane  
 Goldens Bridge, NY 10526

## Sample Information

Matrix: GROUND WATER  
 Location Code: EMCI  
 Rush Request:  
 P.O.#:

## Custody Information

Collected by: JG  
 Received by: LB  
 Analyzed by: see "By" below

Date: 04/19/10 12:38  
 04/20/10 17:56

## Laboratory Data

SDG ID: GAS96199  
 Phoenix ID: AS96208

Project ID: 70 10TH AVE., NEW YORK CITY, NY

Client ID: MW-10

Comments:

\* Poor surrogate recovery was observed for semivolatiles and there was insufficient sample for re-extraction. The other surrogates associated with this sample were within QA/QC criteria.

If there are any questions regarding this data, please call Phoenix Client Services at extension 200.

Phoenix Laboratories does not assume responsibility for the data contained in this report. It is provided as an additional tool to identify requested criteria exceedences. All efforts are made to ensure the accuracy of the data (obtained from appropriate agencies). A lack of exceedence information does not necessarily suggest conformance to the criteria. It is ultimately the site professional's responsibility to determine appropriate compliance.

**RE: Proposal for Phase II Environmental Engineering Services  
Proposed Highline 13,14, 10 ("The Site")  
New York, New York  
Langan Project No.: 170119302**

Dear Mr. Bender :

We are pleased to submit this proposal to provide Phase II environmental services for the proposed development within the western Chelsea/Highline area of Manhattan. The site is located at 42-56 10<sup>th</sup> Avenue and 449-451 West 13<sup>th</sup> Street (Block 646, Lots 1, 5, 6, 7, 8, and 9) and is bordered by West 14<sup>th</sup> Street to the north, the highline to the east, West 13<sup>th</sup> Street to the south, and 10<sup>th</sup> Avenue to the west. The Site is being considered for the development of a 260 foot high building that will be built directly west of, and partially under, the Highline Park structure. Our services include a Phase II Environmental Site Investigation (ESI) at the Site consisting of soil, groundwater, soil vapor, and drum sampling. The scope of work is based on recognized environmental conditions that were identified in a Phase I Environmental Site Assessment (ESA) completed by Langan in September 2010.

**PROJECT BACKGROUND**

The Subject Property is "L"-shaped and occupies an approximate area of 23,500 square feet. Lot 1 is improved with 2 abandoned 3-story buildings encompassing an approximate combined area of 15,800 square feet. Lots 5-9 are vacant and surrounded by wood construction fencing with a locked gate on 10th Avenue. Three-story buildings that were previously located on Lots 5-9 were destroyed in a fire in approximately 2003. The Highline Park runs northwest-southeast above the easternmost portion of the Subject Property. The buildings on Lot 1 and the former buildings on Lots 5-9 were previously used for many purposes, including cold storage of meat products. Redevelopment plans for the Subject Property have not been finalized, but it is assumed that at least one basement level will be incorporated into the project design.

Langan prepared a Phase I ESA for the Site in September 2010 and identified on-site Recognized Environmental Conditions (RECs) associated with petroleum bulk storage, existing

monitoring wells, historic Site usage, and historic fill that was used to bring the Site to grade for development purposes. In addition to the Site RECs, RECs associated with the surrounding properties include an open gasoline spill and historic usage.

The purpose of the proposed Phase II ESI is to investigate the potential impacts of the RECs identified in the Phase I ESA.

## **SCOPE OF SERVICE**

Langan proposes the following tasks to address the above described concerns:

### **Task 1 – Geophysical Survey**

Prior to the commencement of intrusive field activities (i.e., soil borings and soil vapor sampling), a geophysical consultant will conduct a geophysical survey throughout the Site using ground penetrating radar (GPR) and electromagnetic detection equipment. We will coordinate and supervise the geophysical survey. The objective of the survey will be to identify remnant UST structures and associated piping and subsurface utilities that may be encountered during the investigation. During this time we will inspect the Site and confirm sample locations. We anticipate that the survey can be completed in two days. The geophysical subcontractor will generate a geophysical survey report that includes a map of utility locations and USTs, if any. The geophysical report will be included as an appendix to the Phase II ESI Report.

### **Task 2 – Sub-Surface Investigation**

#### Soil Sampling

We will retain a licensed drilling contractor to advance 12 environmental borings. The contractor will be responsible for contacting the One-Call utility mark-out system. The borings will be advanced to around 15 feet below grade surface (bgs). Soil samples will be collected continuously into 4-foot or 5-foot dedicated acetate sleeves. The samples will be screened for organic vapors with a photoionization detector (PID) and inspected for visual and olfactory evidence of contamination. Up to two grab samples will be collected from each boring: one sample from the interval that exhibits the highest PID readings or degree of staining and one sample from the interval immediately beneath impacted soil that does not exhibit signs of contamination. In the absence of apparent contamination one sample will be collected from historic fill, or in the absence of fill, from the depth interval immediately above the groundwater interface. A Sample Location Map is included as Figure 1. The following describes the rationale for each soil boring:

- Soil borings SB1 and SB2 will be advanced along the northern Site border to evaluate impacts from an open spill at a Mobil gasoline station across 14<sup>th</sup> Street from the Site and a filling station at 501 West 14<sup>th</sup> Street.

- Borings SB3 and SB5 will be advanced in the northern portion of the Site, on Lots 7 and 1, respectively, to address impacts from historic urban fill material.
- Boring SB4 will be advanced in the center of Lot 5 to address impacts from historical use of the lot for Central Tool and Machine Co.
- Borings SB6 and SB7 will be advanced in the northern central portion of Lot 1 to address potential impacts from an independent electric plant partially located on the Site between 1904 and 1921.
- Borings SB8-SB11 will be advanced around the ASTs identified in the south-eastern portion of Lot 1; and
- Boring SB12 will be advanced in the southwest corner of Lot 1 to address potential impacts from historic urban fill material.

All samples will be placed in laboratory-supplied containers and submitted to a NYSDOH ELAP-certified laboratory to be analyzed for Target Compound List (TCL) volatile organic compounds (VOCs) and semi-volatile organic compounds (SVOCs), Target Analyte List (TAL) metals, and polychlorinated biphenyls (PCBs). Samples will be submitted for analysis under a 5-day turnaround time.

Grossly contaminated soil generated during the Phase II ESI will be placed in labeled, sealed 55-gallon drums and transported off-site by the drilling contractor. Soil cuttings that do not exhibit indications of environmental impacts will be used to backfill the borings after collection of soil samples.

#### Ground Water Sampling

We will sample three wells (B3-OW, B7-OW, and B2-OW) installed during Langan's geotechnical investigation. We will also convert soil borings SB-1, SB6, SB-7 and SB-11 into temporary monitoring wells. If evidence of contamination is observed in any of the other borings, additional temporary monitoring wells will be installed and groundwater samples will be collected.

The temporary wells will be constructed by inserting 10 ft of 0.01-inch slotted, one-inch diameter, Schedule 40 polyvinyl chloride (PVC) screen and attached riser into each of the open borings. Groundwater samples will be collected using a peristaltic pump and dedicated tubing. Prior to collection of the groundwater samples, a minimum of three well volumes will be purged from each well into a labeled 55-gallon drum for storage and off-site disposal (to be handled by drilling contractor). Chemical and physical groundwater parameters such as temperature, pH, electroconductivity, turbidity, oxidation-reduction potential, and dissolved oxygen concentration will be recorded during purging of the well. The groundwater samples

will be collected into laboratory-supplied containers when the chemical and physical parameters have stabilized to within 10% variability between successive measurements.

The groundwater samples will be submitted under chain-of-custody protocol to a NYSDOH ELAP-certified laboratory for analysis of TCL VOCs and SVOCs, PCBs and TAL metals (filtered) under a five-day turnaround. The sample collected from B3-OW will also be analyzed for New York City Department of Environmental Protection (NYCDEP) sewer discharge parameters.

#### Soil Vapor Sampling

The soil vapor investigation will be conducted in accordance with the New York State Department of Health (NYSDOH) Guidance for Evaluating Soil Vapor Intrusion in the State of New York, dated October 2006. Prior to sample collection, we will conduct a pre-sampling inspection to document chemicals and potential sub-surface pathways at the Site. The pre-sampling inspection will assess the type of structure, floor and exterior layout, physical conditions, and the potential for soil vapor impacts from chemical storage within the building.

The soil vapor investigation will consist of three sub-slab soil vapor samples in building at 42-46 10<sup>th</sup> Avenue, two sub-surface soil vapor samples collected in the vacant lot to the north of the building, and one ambient air sample.

The sub-slab soil vapor samples will be collected within 6-inches of the base of the floor slab. The exterior sub-surface soil vapor samples will be collected by boring through the surface cover to a depth of 10 feet below existing grade (i.e., the anticipated cellar depth). A soil vapor probe attached to polyethylene tubing will be inserted at each soil vapor sample location and the annulus around the probe/tubing will be filled with glass beads and/or sand to a few inches above the probe. Bentonite slurry will be applied to the top of the sand pack up to the surface to seal the sampling points from ambient air. The sub-slab and sub-surface soil vapor samples will be collected into laboratory-supplied, batch certified-clean Summa® canisters that are calibrated for a sampling rate of one hour per sample. Prior to sample collection, the soil vapor will be screened with a PID. As a quality assurance/quality control (QA/QC) measure, an inert tracer gas (e.g., helium) will be introduced into a sampling chamber at the existing grade to ensure that the soil vapor sampling points are properly sealed and ambient air does not infiltrate the canister. The ambient air sample will be collected into a laboratory-supplied, individually certified-clean Summa® canister that is calibrated for a sampling rate of six hours. The soil vapor sample and ambient air sample canisters will be submitted to an NYSDOH ELAP-certified laboratory for analysis for VOC via USEPA Method TO-15.

Following sample collection, the in-hole sampling materials will be removed, and the sampling points will be filled with soil cuttings, patched with grout, and the surface will be restored to grade with a material matching the existing surface (e.g. concrete).

**Task 3 – Drum Investigation and Inspection of 449-451 West 13<sup>th</sup> Street**

Two partially filled, unlabeled 55-gallon drums observed during the Phase I ESA will be opened and sampled. Samples collected from the drums will be shipped to an NYSDOH-ELAP certified laboratory for analysis of TCL VOCs and SVOCs, TAL metals, and PCBs.

The building at 449-451 West 13<sup>th</sup> Street was inaccessible during the Phase I ESA. Upon gaining access to this building, Langan will perform an inspection to determine if additional sampling is required.

**Task 4 – Phase II ESI Report**

We will prepare a report that describes our scope of work and presents the field and analytical results of the investigation. Analytical results will be presented in summary tables, and soil borings and monitoring wells will be shown on an attached Site plan. The report will provide conclusions regarding potential soil, soil vapor, and groundwater impacts and recommendations for further investigation or remedial action, if necessary.

**ESTIMATED COST AND SCHEDULE**

The proposed not-to-exceed cost for engineering services is \$19,500, plus \$35,500 for reimbursable expenses including, geophysical and drilling contractor fees, laboratory analysis and environmental equipment rental costs. A breakdown of the proposed costs is provided in the following tables.

**LANGAN FEES**

<p><b>Task 1 – Geophysical Survey</b>  Field Oversight and Report Review</p> <p style="text-align: right;">Task 1 Estimate</p>	<p>\$ 2,500</p>
<p><b>Task 2 – Sub-Surface Investigation</b></p> <p>Office Support and coordination \$2,300  Engineering oversight (8 days @\$1,400/day) <u>\$11,200</u></p> <p style="text-align: right;">Task 2 Estimate</p>	<p>\$13,500</p>
<p><b>Task 3 – Drum Sampling and Inspection of 449-451 West 13<sup>th</sup> Street</b></p> <p>Office Support and coordination \$300  Engineering oversight (1/2 day @\$1,400/day) <u>\$700</u></p> <p style="text-align: right;">Task 3 Estimate</p>	<p>\$1,000</p>

<b>Task 4 – Phase II ESI Report</b>	<u>\$10,000</u>
Task 4 Estimate	
<b>LANGAN ESTIMATED FEES SUBTOTAL</b>	<b>\$ 27,000</b>

**REIMBURSABLE AND SUBCONTRACTOR EXPENSES (ALLOWANCE)**

**Geophysical Survey Contractor Costs**

(Two days survey and report) \$4,500

**Driller Costs**

(mob/de-mob, drill rigs, and sampling materials) \$15,500

**Analytical Laboratory Fees**

(Soil, groundwater, soil vapor, and drum samples) \$20,000

**Miscellaneous Expenses**

(environmental equipment, travel, insurance, etc.) \$2,000

**EXPENSES SUBTOTAL (ALLOWANCE) \$ 42,000**

**Assumptions:**

1. Estimated costs are based on the assumed number of inspection workdays, for an 8-hour workday.
2. We will bill William Gottlieb Real Estate/40-56 Tenth Avenue, LLC on a time and material basis in accordance with the attached 2010 Schedule of Fees and Conditions. We will not exceed the proposed costs without your prior authorization.

We will proceed with the pre-remediation tasks upon your authorization to proceed. We anticipate that the field work can be completed within about 2 weeks. We will submit a draft Phase II report to you for review within 3 weeks following completion of the field work.

---

## CLOSURE

We appreciate the opportunity to provide this proposal for environmental engineering services for the Site. If you find this proposal acceptable, please sign and return one copy of this proposal to our office to authorize the above scope of work.

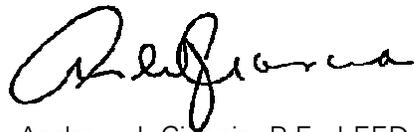

Please call if you have any questions.

Very truly yours,

**LANGAN ENGINEERING AND  
ENVIRONMENTAL SERVICES, P.C.**

Re: Geophysical Survey Report  
Commercial Property  
48-56 10<sup>th</sup> Avenue & 449-451 West 13<sup>th</sup> Street  
New York, New York

Dear Mr. Burke:

Nova Geophysical Services (NOVA) is pleased to provide findings of our geophysical survey at the above referenced project site located at 10<sup>th</sup> Avenue between West 13<sup>th</sup> Street and West 14<sup>th</sup> Street, New York, New York (the "Site"). Please see attached Geophysical Survey map for more details.

## **INTRODUCTION TO GEOPHYSICAL SURVEY**

NOVA performed a Geophysical survey consisting of Ground Penetrating Radar (GPR), Electromagnetic (EM) surveys and comprehensive subsurface utility (CSUL) surveys at the project Site. The purpose of this survey is to identify underground anomalies such as underground storage tanks (USTs), current and former utility lines, former structures, abnormalities and to verify that proposed environmental soil boring locations are clear of subsurface structures and utilities located at the project site on November 22<sup>nd</sup> & 23<sup>rd</sup>. 2010.

The equipment selected for this investigation will be included a CSUL Pipe and Cable Locator (an magnetic detector), Ditch-Witch utility locator, Electromagnetic detector (Geonics EM61), MALAs and NOGGIN's 250 MHz and 500 MHz ground-penetrating radar (GPR) units, and a Conquest Concrete based GPR with 750 to 1000 MHz antenna units.

# GEOPHYSICAL SURVEY REPORT

## Langan Engineering & Environmental Services, Inc.

Commercial Property  
48-56 10<sup>th</sup> Avenue & 449-451 West 13<sup>th</sup> Street  
New York, New York

---

A GPR system consists of a radar control unit, control cable and a transducer (antenna). The control unit transmits a trigger pulse at a normal repetition rate of 500 MHz. The trigger pulse is sent to the transmitter electronics in the transducer via the control cable. The transmitter electronics amplify the trigger pulses into bipolar pulses that are radiated to the surface. The transformed pulses vary in shape and frequency according to the transducer used. In the subsurface, variations of the signal occur at boundaries where there is a dielectric contrast (void, steel, soil type, etc.). Signal reflections travel back to the control unit and are represented as color graphic images for interpolation.

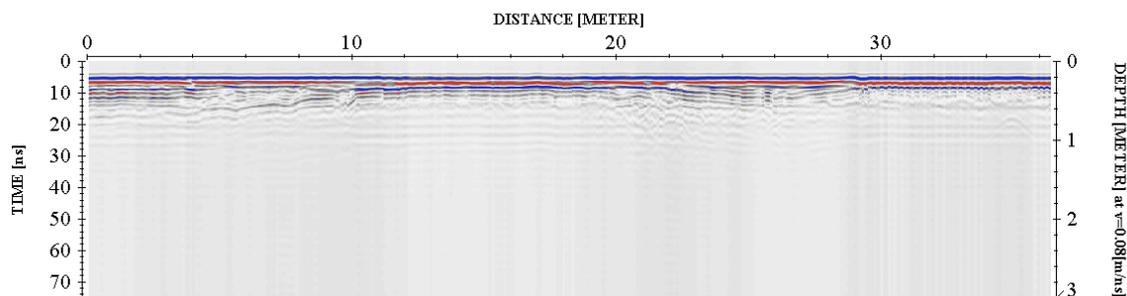

### GEOPHYSICAL METHODS

The project Site and proposed soil boring locations were first screened using the Geonics(tm) electromagnetic detector by carrying the instrument over the boring locations at the site in 5' x 5' traverses. When evidence of anomalies were observed, the Ditch-witch(tm) utility locator was then used to determine if the anomalies were utilities or other large sub-surface metal objects. Finally, GPR profiles were collected over each metal-detector anomaly and inspected for reflections, which could be indicative of USTs. Proposed environmental Sample locations were established in areas that were not conflict with subsurface structures or utilities.

### DATA PROCESSING

In order to improve the quality of the results and to better identify subsurface anomalies NOVA processed the collected data. The processes flow is briefly described at this section.

#### **Step 1.** Import raw RAMAC data to standard processing format

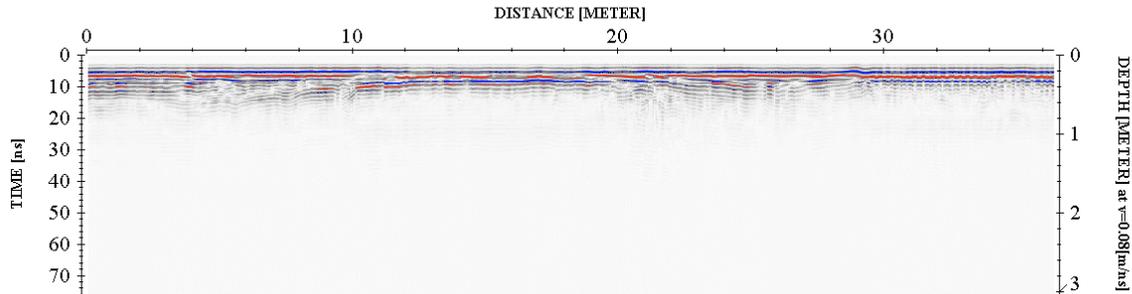

# GEOPHYSICAL SURVEY REPORT

## Langan Engineering & Environmental Services, Inc.

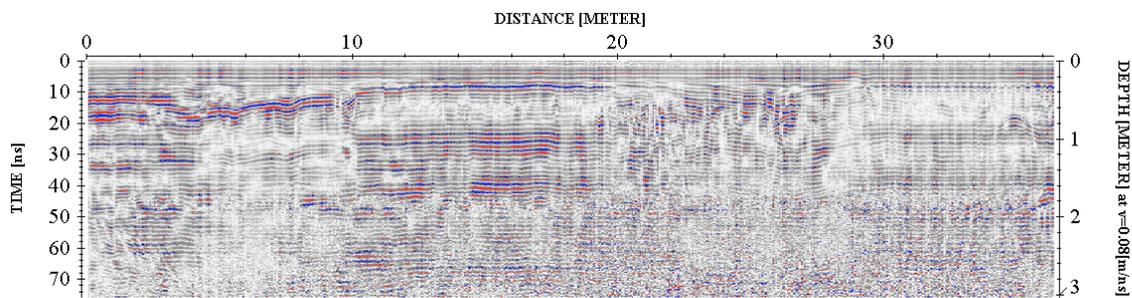

Commercial Property  
48-56 10<sup>th</sup> Avenue & 449-451 West 13<sup>th</sup> Street  
New York, New York

---

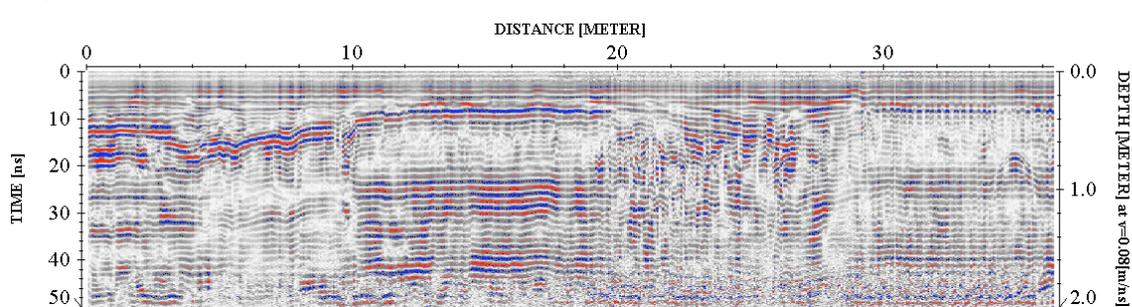

### Step 2. Remove instrument noise (*dewow*)

### Step 3. Correct for attenuation losses (*energy decay function*)

### Step 4. Remove static from bottom of profile (*time cut*)

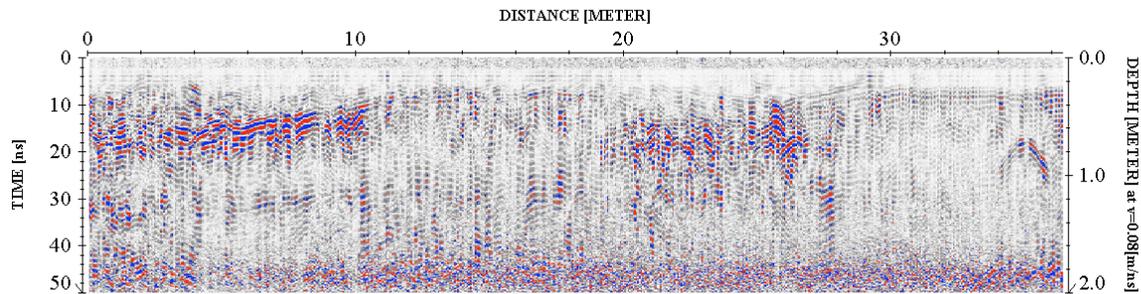

### Step 5. Mute horizontal ringing/noise (*subtracting average*)

# GEOPHYSICAL SURVEY REPORT

## Langan Engineering & Environmental Services, Inc.

Commercial Property  
48-56 10<sup>th</sup> Avenue & 449-451 West 13<sup>th</sup> Street  
New York, New York

---

The above example shows the significance of data processing. The last image (step 5) has higher resolution than the starting image (raw data – step 1) and describes the subsurface anomalies more accurately.

### PHYSICAL SETTINGS

Nova observed following physical conditions at the time of the survey:

**The weather:** Mostly Cloudy

**Temp:** 38 degrees

**Surface:** Non-paved vacant lot and concrete paved city sidewalks and concrete paved basement slab.

**Geophysical Noise Level (GNL):** Excessive Geophysical Noise Level (GNL) was low to medium level due to existence of former building foundations and existing mechanical components located within the basement.

### RESULTS

The results of the geophysical survey identified following anomalies located at the project Site:

- Geophysical survey identified major anomalies located outside, within the sidewalk along the 10<sup>th</sup> Avenue portion of the project Site. Further evaluation of these anomalies indicated that the one of the major anomaly was connected to the existing vent pipe located at the project Site.
- Geophysical survey identified number of minor anomalies located throughout the project Site. Further evaluations of these anomalies were appeared to be reflection of remnant of former building foundations including but not limited to steel beams, bricks, concrete blocks, and unconsolidated soils located throughout of the project site.

## **GEOPHYSICAL SURVEY REPORT**

### **Langan Engineering & Environmental Services, Inc.**

Commercial Property  
48-56 10<sup>th</sup> Avenue & 449-451 West 13<sup>th</sup> Street  
New York, New York

---

- Geophysical survey identified scattered anomalies located throughout of the surveyed areas. None of these anomalies were consistent with any underground storage tanks (USTs).
- Geophysical survey identified former utility lines (electric, sewer, gas, water) located along the west side of the project Site.
- NOVA cleared and marked all of the proposed environmental soil boring locations at the project Site.
- Geophysical Survey Plan portrays the areas investigated during the geophysical survey.

If you have any questions please do not hesitate to contact the undersigned.  
Sincerely,

## Purpose and Results

This report contains the analytical data for the sample(s) identified on the attached chain-of-custody received in our laboratory on November 24, 2010 and listed below. The project was identified as your project: **170119302**.

The analyses were conducted utilizing appropriate EPA, Standard Methods, and ASTM methods as detailed in the data summary tables.

All samples were received in proper condition meeting the customary acceptance requirements for environmental samples except those indicated under the Notes section of this report.

All analyses met the method and laboratory standard operating procedure requirements except as indicated by any data flags, the meaning of which are explained in the attachment to this report, and case narrative if applicable.

The results of the analyses, which are all reported on dry weight basis (soils) unless otherwise noted, are detailed in the following pages.

Please contact Client Services at 203.325.1371 with any questions regarding this report.

## **General Notes for York Project (SDG) No.: 10K0809**

1. The RLs and MDLs (Reporting Limit and Method Detection Limit respectively) reported are adjusted for any dilution necessary due to the levels of target and/or non-target analytes and matrix interference. The RL(REPORTING LIMIT) is based upon the lowest standard utilized for the calibration where applicable.
2. Samples are retained for a period of thirty days after submittal of report, unless other arrangements are made.
3. York's liability for the above data is limited to the dollar value paid to York for the referenced project.
4. This report shall not be reproduced without the written approval of York Analytical Laboratories, Inc.
5. All samples were received in proper condition for analysis with proper documentation, unless otherwise noted.
6. All analyses conducted met method or Laboratory SOP requirements. See the Qualifiers and/or Narrative sections for further information.
7. It is noted that no analyses reported herein were subcontracted to another laboratory, unless noted in the report.
8. This report reflects results that relate only to the samples submitted on the attached chain-of-custody form(s) received by York.

## Notes and Definitions

---

S-AC	Acid surrogate recovery outside of control limits. The data was accepted based on valid recovery of remaining two acid surrogates.
QL-02	This LCS analyte is outside Laboratory Recovery limits due the analyte behavior using the referenced method. The reference method has certain limitations with respect to analytes of this nature.
J	Detected below the Reporting Limit but greater than or equal to the Method Detection Limit (MDL); therefore, the result is an estimated concentration.
B	Analyte is found in the associated analysis batch blank.

---

ND	Analyte NOT DETECTED at the stated Reporting Limit (RL) or above.
RL	REPORTING LIMIT - the minimum reportable value based upon the lowest point in the analyte calibration curve.
MDL	METHOD DETECTION LIMIT - the minimum concentration that can be measured and reported with a 99% confidence that the concentration is greater than zero. If requested or required, a value reported below the RL and above the MDL is considered estimated and is noted with a "J" flag.
NR	Not reported
RPD	Relative Percent Difference
Wet	The data has been reported on an as-received (wet weight) basis
Low Bias	Low Bias flag indicates that the recovery of the flagged analyte is below the laboratory or regulatory lower control limit. The data user should take note that this analyte may be biased low but should evaluate multiple lines of evidence including the LCS and site-specific MS/MSD data to draw bias conclusions. In cases where no site-specific MS/MSD was requested, only the LCS data can be used to evaluate such bias.
High Bias	High Bias flag indicates that the recovery of the flagged analyte is above the laboratory or regulatory upper control limit. The data user should take note that this analyte may be biased high but should evaluate multiple lines of evidence including the LCS and site-specific MS/MSD data to draw bias conclusions. In cases where no site-specific MS/MSD was requested, only the LCS data can be used to evaluate such bias.
Non-Dir.	Non-dir. flag (Non-Directional Bias ) indicates that the Relative Percent Difference (RPD) (a measure of precision) among the MS and MSD data is outside the laboratory or regulatory control limit. This alerts the data user where the MS and MSD are from site-specific samples that the RPD is high due to either non-homogeneous distribution of target analyte between the MS/MSD or indicates poor reproducibility for other reasons.

**Langan Engineering & Environmental Services**  
21 Penn Plaza, 360 West 31st Street  
New York NY, 10001  
Attention: Mike Burke

## Purpose and Results

This report contains the analytical data for the sample(s) identified on the attached chain-of-custody received in our laboratory on November 29, 2010 and listed below. The project was identified as your project: **170119302**.

The analyses were conducted utilizing appropriate EPA, Standard Methods, and ASTM methods as detailed in the data summary tables.

All samples were received in proper condition meeting the customary acceptance requirements for environmental samples except those indicated under the Notes section of this report.

All analyses met the method and laboratory standard operating procedure requirements except as indicated by any data flags, the meaning of which are explained in the attachment to this report, and case narrative if applicable.

The results of the analyses, which are all reported on dry weight basis (soils) unless otherwise noted, are detailed in the following pages.

Please contact Client Services at 203.325.1371 with any questions regarding this report.

## General Notes for York Project (SDG) No.: 10K0874

1. The RLs and MDLs (Reporting Limit and Method Detection Limit respectively) reported are adjusted for any dilution necessary due to the levels of target and/or non-target analytes and matrix interference. The RL(REPORTING LIMIT) is based upon the lowest standard utilized for the calibration where applicable.
2. Samples are retained for a period of thirty days after submittal of report, unless other arrangements are made.
3. York's liability for the above data is limited to the dollar value paid to York for the referenced project.
4. This report shall not be reproduced without the written approval of York Analytical Laboratories, Inc.
5. All samples were received in proper condition for analysis with proper documentation, unless otherwise noted.
6. All analyses conducted met method or Laboratory SOP requirements. See the Qualifiers and/or Narrative sections for further information.
7. It is noted that no analyses reported herein were subcontracted to another laboratory, unless noted in the report.
8. This report reflects results that relate only to the samples submitted on the attached chain-of-custody form(s) received by York.

## Notes and Definitions

---

S-BN	Base/Neutral surrogate recovery outside of control limits. The data was accepted based on valid recovery of remaining two base/neutral surrogates.
QL-02	This LCS analyte is outside Laboratory Recovery limits due the analyte behavior using the referenced method. The reference method has certain limitations with respect to analytes of this nature.
J	Detected below the Reporting Limit but greater than or equal to the Method Detection Limit (MDL); therefore, the result is an estimated concentration.
B	Analyte is found in the associated analysis batch blank.

---

ND	Analyte NOT DETECTED at the stated Reporting Limit (RL) or above.
RL	REPORTING LIMIT - the minimum reportable value based upon the lowest point in the analyte calibration curve.
MDL	METHOD DETECTION LIMIT - the minimum concentration that can be measured and reported with a 99% confidence that the concentration is greater than zero. If requested or required, a value reported below the RL and above the MDL is considered estimated and is noted with a "J" flag.
NR	Not reported
RPD	Relative Percent Difference
Wet	The data has been reported on an as-received (wet weight) basis
Low Bias	Low Bias flag indicates that the recovery of the flagged analyte is below the laboratory or regulatory lower control limit. The data user should take note that this analyte may be biased low but should evaluate multiple lines of evidence including the LCS and site-specific MS/MSD data to draw bias conclusions. In cases where no site-specific MS/MSD was requested, only the LCS data can be used to evaluate such bias.
High Bias	High Bias flag indicates that the recovery of the flagged analyte is above the laboratory or regulatory upper control limit. The data user should take note that this analyte may be biased high but should evaluate multiple lines of evidence including the LCS and site-specific MS/MSD data to draw bias conclusions. In cases where no site-specific MS/MSD was requested, only the LCS data can be used to evaluate such bias.
Non-Dir.	Non-dir. flag (Non-Directional Bias ) indicates that the Relative Percent Difference (RPD) (a measure of precision) among the MS and MSD data is outside the laboratory or regulatory control limit. This alerts the data user where the MS and MSD are from site-specific samples that the RPD is high due to either non-homogeneous distribution of target analyte between the MS/MSD or indicates poor reproducibility for other reasons.

## Purpose and Results

This report contains the analytical data for the sample(s) identified on the attached chain-of-custody received in our laboratory on November 30, 2010 and listed below. The project was identified as your project: **170119302**.

The analyses were conducted utilizing appropriate EPA, Standard Methods, and ASTM methods as detailed in the data summary tables.

All samples were received in proper condition meeting the customary acceptance requirements for environmental samples except those indicated under the Notes section of this report.

All analyses met the method and laboratory standard operating procedure requirements except as indicated by any data flags, the meaning of which are explained in the attachment to this report, and case narrative if applicable.

The results of the analyses, which are all reported on dry weight basis (soils) unless otherwise noted, are detailed in the following pages.

Please contact Client Services at 203.325.1371 with any questions regarding this report.

**General Notes for York Project (SDG) No.: 10L0036**

1. The RLs and MDLs (Reporting Limit and Method Detection Limit respectively) reported are adjusted for any dilution necessary due to the levels of target and/or non-target analytes and matrix interference. The RL(REPORTING LIMIT) is based upon the lowest standard utilized for the calibration where applicable.
2. Samples are retained for a period of thirty days after submittal of report, unless other arrangements are made.
3. York's liability for the above data is limited to the dollar value paid to York for the referenced project.
4. This report shall not be reproduced without the written approval of York Analytical Laboratories, Inc.
5. All samples were received in proper condition for analysis with proper documentation, unless otherwise noted.
6. All analyses conducted met method or Laboratory SOP requirements. See the Qualifiers and/or Narrative sections for further information.
7. It is noted that no analyses reported herein were subcontracted to another laboratory, unless noted in the report.
8. This report reflects results that relate only to the samples submitted on the attached chain-of-custody form(s) received by York.

**Approved By:**

Robert Q. Bradley  
Managing Director

**Date:** 12/21/2010

## Sample Information

**Client Sample ID:** R. Pipes 1\_11/29/2010

**York Sample ID:** 10L0036-09

York Project (SDG) No.  
10L0036

Client Project ID  
170119302

Matrix  
Water

Collection Date/Time  
November 29, 2010 12:00 am

Date Received  
11/30/2010

**Metals, Dissolved - Target Analyte (TAL)**

Log-in Notes:

## Notes and Definitions

S-AC	Acid surrogate recovery outside of control limits. The data was accepted based on valid recovery of remaining two acid surrogates.
QL-02	This LCS analyte is outside Laboratory Recovery limits due the analyte behavior using the referenced method. The reference method has certain limitations with respect to analytes of this nature.
J	Detected below the Reporting Limit but greater than or equal to the Method Detection Limit (MDL); therefore, the result is an estimated concentration.
GC-Surr	Surrogate recovery outside of control limits. The data was accepted based on valid recovery of the alternate surrogate.
GC-21	Pattern is similar to Lubricating Oil
B-Dil	Detected in method blank(s) associated with the sample analysis. This is a common lab artifact which is found at ND-25 ppb. No dilution factor has been applied to these compounds to eliminate artificially inflated results.
B	Analyte is found in the associated analysis batch blank.
<hr/>	
ND	Analyte NOT DETECTED at the stated Reporting Limit (RL) or above.
RL	REPORTING LIMIT - the minimum reportable value based upon the lowest point in the analyte calibration curve.
MDL	METHOD DETECTION LIMIT - the minimum concentration that can be measured and reported with a 99% confidence that the concentration is greater than zero. If requested or required, a value reported below the RL and above the MDL is considered estimated and is noted with a "J" flag.
NR	Not reported
RPD	Relative Percent Difference
Wet	The data has been reported on an as-received (wet weight) basis
Low Bias	Low Bias flag indicates that the recovery of the flagged analyte is below the laboratory or regulatory lower control limit. The data user should take note that this analyte may be biased low but should evaluate multiple lines of evidence including the LCS and site-specific MS/MSD data to draw bias conclusions. In cases where no site-specific MS/MSD was requested, only the LCS data can be used to evaluate such bias.
High Bias	High Bias flag indicates that the recovery of the flagged analyte is above the laboratory or regulatory upper control limit. The data user should take note that this analyte may be biased high but should evaluate multiple lines of evidence including the LCS and site-specific MS/MSD data to draw bias conclusions. In cases where no site-specific MS/MSD was requested, only the LCS data can be used to evaluate such bias.
Non-Dir.	Non-dir. flag (Non-Directional Bias ) indicates that the Relative Percent Difference (RPD) (a measure of precision) among the MS and MSD data is outside the laboratory or regulatory control limit. This alerts the data user where the MS and MSD are from site-specific samples that the RPD is high due to either non-homogeneous distribution of target analyte between the MS/MSD or indicates poor reproducibility for other reasons.

## Technical Report

prepared for:

### **Langan Engineering & Environmental Services**

21 Penn Plaza, 360 West 31st Street

New York NY, 10001

**Attention: Mike Burke**

Report Date: 12/10/2010

**Client Project ID: 170119302**

York Project (SDG) No.: 10L0147

CT License No. PH-0723

New Jersey License No. CT-005

New York License No. 10854

PA Reg. 68-04440

Report Date: 12/10/2010  
Client Project ID: 170119302  
York Project (SDG) No.: 10L0147

**Langan Engineering & Environmental Services**

New York NY, 10001  
Attention: Mike Burke

---

## Purpose and Results

This report contains the analytical data for the sample(s) identified on the attached chain-of-custody received in our laboratory on December 02, 2010 and listed below. The project was identified as your project: **170119302**.

The analyses were conducted utilizing appropriate EPA, Standard Methods, and ASTM methods as detailed in the data summary tables.

All samples were received in proper condition meeting the customary acceptance requirements for environmental samples except those indicated under the Notes section of this report.

All analyses met the method and laboratory standard operating procedure requirements except as indicated by any data flags, the meaning of which are explained in the attachment to this report, and case narrative if applicable.

The results of the analyses, which are all reported on dry weight basis (soils) unless otherwise noted, are detailed in the following pages.

Please contact Client Services at 203.325.1371 with any questions regarding this report.

**General Notes for York Project (SDG) No.: 10L0147**

1. The RLs and MDLs (Reporting Limit and Method Detection Limit respectively) reported are adjusted for any dilution necessary due to the levels of target and/or non-target analytes and matrix interference. The RL(REPORTING LIMIT) is based upon the lowest standard utilized for the calibration where applicable.
2. Samples are retained for a period of thirty days after submittal of report, unless other arrangements are made.
3. York's liability for the above data is limited to the dollar value paid to York for the referenced project.
4. This report shall not be reproduced without the written approval of York Analytical Laboratories, Inc.
5. All samples were received in proper condition for analysis with proper documentation, unless otherwise noted.
6. All analyses conducted met method or Laboratory SOP requirements. See the Qualifiers and/or Narrative sections for further information.
7. It is noted that no analyses reported herein were subcontracted to another laboratory, unless noted in the report.
8. This report reflects results that relate only to the samples submitted on the attached chain-of-custody form(s) received by York.

**Approved By:**

Robert Q. Bradley  
Managing Director

## Notes and Definitions

S-BN	Base/Neutral surrogate recovery outside of control limits. The data was accepted based on valid recovery of remaining two base/neutral surrogates.
S-AC	Acid surrogate recovery outside of control limits. The data was accepted based on valid recovery of remaining two acid surrogates.
QL-02	This LCS analyte is outside Laboratory Recovery limits due the analyte behavior using the referenced method. The reference method has certain limitations with respect to analytes of this nature.
J	Detected below the Reporting Limit but greater than or equal to the Method Detection Limit (MDL); therefore, the result is an estimated concentration.
GC-Surr	Surrogate recovery outside of control limits. The data was accepted based on valid recovery of the alternate surrogate.
GC-19	Pattern is similar to Transmission Fluid
B-Dil	Detected in method blank(s) associated with the sample analysis. This is a common lab artifact which is found at ND-25 ppb. No dilution factor has been applied to these compounds to eliminate artificially inflated results.
B	Analyte is found in the associated analysis batch blank.

---

ND	Analyte NOT DETECTED at the stated Reporting Limit (RL) or above.
RL	REPORTING LIMIT - the minimum reportable value based upon the lowest point in the analyte calibration curve.
MDL	METHOD DETECTION LIMIT - the minimum concentration that can be measured and reported with a 99% confidence that the concentration is greater than zero. If requested or required, a value reported below the RL and above the MDL is considered estimated and is noted with a "J" flag.
NR	Not reported
RPD	Relative Percent Difference
Wet	The data has been reported on an as-received (wet weight) basis
Low Bias	Low Bias flag indicates that the recovery of the flagged analyte is below the laboratory or regulatory lower control limit. The data user should take note that this analyte may be biased low but should evaluate multiple lines of evidence including the LCS and site-specific MS/MSD data to draw bias conclusions. In cases where no site-specific MS/MSD was requested, only the LCS data can be used to evaluate such bias.
High Bias	High Bias flag indicates that the recovery of the flagged analyte is above the laboratory or regulatory upper control limit. The data user should take note that this analyte may be biased high but should evaluate multiple lines of evidence including the LCS and site-specific MS/MSD data to draw bias conclusions. In cases where no site-specific MS/MSD was requested, only the LCS data can be used to evaluate such bias.
Non-Dir.	Non-dir. flag (Non-Directional Bias ) indicates that the Relative Percent Difference (RPD) (a measure of precision) among the MS and MSD data is outside the laboratory or regulatory control limit. This alerts the data user where the MS and MSD are from site-specific samples that the RPD is high due to either non-homogeneous distribution of target analyte between the MS/MSD or indicates poor reproducibility for other reasons.

Report Date: 12/16/2010  
Client Project ID: 170119302  
York Project (SDG) No.: 10L0428

**Langan Engineering & Environmental Services**  
21 Penn Plaza, 360 West 31st Street  
New York NY, 10001  
Attention: Mike Burke

## Purpose and Results

This report contains the analytical data for the sample(s) identified on the attached chain-of-custody received in our laboratory on November 24, 2010 and listed below. The project was identified as your project: **170119302**.

The analyses were conducted utilizing appropriate EPA, Standard Methods, and ASTM methods as detailed in the data summary tables.

All samples were received in proper condition meeting the customary acceptance requirements for environmental samples except those indicated under the Notes section of this report.

All analyses met the method and laboratory standard operating procedure requirements except as indicated by any data flags, the meaning of which are explained in the attachment to this report, and case narrative if applicable.

The results of the analyses, which are all reported on dry weight basis (soils) unless otherwise noted, are detailed in the following pages.

Please contact Client Services at 203.325.1371 with any questions regarding this report.

<u>York Sample ID</u>	<u>Client Sample ID</u>	<u>Matrix</u>	<u>Date Collected</u>	<u>Date Received</u>
10L0428-01	SB-2 (10-12)_11/23/2010	Soil	11/23/2010	11/24/2010

## General Notes for York Project (SDG) No.: 10L0428

1. The RLs and MDLs (Reporting Limit and Method Detection Limit respectively) reported are adjusted for any dilution necessary due to the levels of target and/or non-target analytes and matrix interference. The RL(REPORTING LIMIT) is based upon the lowest standard utilized for the calibration where applicable.
2. Samples are retained for a period of thirty days after submittal of report, unless other arrangements are made.
3. York's liability for the above data is limited to the dollar value paid to York for the referenced project.
4. This report shall not be reproduced without the written approval of York Analytical Laboratories, Inc.
5. All samples were received in proper condition for analysis with proper documentation, unless otherwise noted.
6. All analyses conducted met method or Laboratory SOP requirements. See the Qualifiers and/or Narrative sections for further information.
7. It is noted that no analyses reported herein were subcontracted to another laboratory, unless noted in the report.
8. This report reflects results that relate only to the samples submitted on the attached chain-of-custody form(s) received by York.

## Notes and Definitions

---

ND	Analyte NOT DETECTED at the stated Reporting Limit (RL) or above.
RL	REPORTING LIMIT - the minimum reportable value based upon the lowest point in the analyte calibration curve.
MDL	METHOD DETECTION LIMIT - the minimum concentration that can be measured and reported with a 99% confidence that the concentration is greater than zero. If requested or required, a value reported below the RL and above the MDL is considered estimated and is noted with a "J" flag.
NR	Not reported
RPD	Relative Percent Difference
Wet	The data has been reported on an as-received (wet weight) basis
Low Bias	Low Bias flag indicates that the recovery of the flagged analyte is below the laboratory or regulatory lower control limit. The data user should take note that this analyte may be biased low but should evaluate multiple lines of evidence including the LCS and site-specific MS/MSD data to draw bias conclusions. In cases where no site-specific MS/MSD was requested, only the LCS data can be used to evaluate such bias.
High Bias	High Bias flag indicates that the recovery of the flagged analyte is above the laboratory or regulatory upper control limit. The data user should take note that this analyte may be biased high but should evaluate multiple lines of evidence including the LCS and site-specific MS/MSD data to draw bias conclusions. In cases where no site-specific MS/MSD was requested, only the LCS data can be used to evaluate such bias.
Non-Dir.	Non-dir. flag (Non-Directional Bias ) indicates that the Relative Percent Difference (RPD) (a measure of precision) among the MS and MSD data is outside the laboratory or regulatory control limit. This alerts the data user where the MS and MSD are from site-specific samples that the RPD is high due to either non-homogeneous distribution of target analyte between the MS/MSD or indicates poor reproducibility for other reasons.

## Purpose and Results

This report contains the analytical data for the sample(s) identified on the attached chain-of-custody received in our laboratory on December 30, 2010 and listed below. The project was identified as your project: **170119302**.

The analyses were conducted utilizing appropriate EPA, Standard Methods, and ASTM methods as detailed in the data summary tables.

All samples were received in proper condition meeting the customary acceptance requirements for environmental samples except those indicated under the Notes section of this report.

All analyses met the method and laboratory standard operating procedure requirements except as indicated by any data flags, the meaning of which are explained in the attachment to this report, and case narrative if applicable.

The results of the analyses, which are all reported on dry weight basis (soils) unless otherwise noted, are detailed in the following pages.

Please contact Client Services at 203.325.1371 with any questions regarding this report.

## **General Notes for York Project (SDG) No.: 11A0044**

1. The RLs and MDLs (Reporting Limit and Method Detection Limit respectively) reported are adjusted for any dilution necessary due to the levels of target and/or non-target analytes and matrix interference. The RL(REPORTING LIMIT) is based upon the lowest standard utilized for the calibration where applicable.
2. Samples are retained for a period of thirty days after submittal of report, unless other arrangements are made.
3. York's liability for the above data is limited to the dollar value paid to York for the referenced project.
4. This report shall not be reproduced without the written approval of York Analytical Laboratories, Inc.
5. All samples were received in proper condition for analysis with proper documentation, unless otherwise noted.
6. All analyses conducted met method or Laboratory SOP requirements. See the Qualifiers and/or Narrative sections for further information.
7. It is noted that no analyses reported herein were subcontracted to another laboratory, unless noted in the report.
8. This report reflects results that relate only to the samples submitted on the attached chain-of-custody form(s) received by York.

## Notes and Definitions

---

S-04	The surrogate recovery for this sample is outside of established control limits due to a sample matrix effect.
QL-02	This LCS analyte is outside Laboratory Recovery limits due the analyte behavior using the referenced method. The reference method has certain limitations with respect to analytes of this nature.
J	Detected below the Reporting Limit but greater than or equal to the Method Detection Limit (MDL); therefore, the result is an estimated concentration.
B-Dil	Detected in method blank(s) associated with the sample analysis. This is a common lab artifact which is found at ND-25 ppb. No dilution factor has been applied to these compounds to eliminate artificially inflated results.
B	Analyte is found in the associated analysis batch blank.

---

ND	Analyte NOT DETECTED at the stated Reporting Limit (RL) or above.
RL	REPORTING LIMIT - the minimum reportable value based upon the lowest point in the analyte calibration curve.
MDL	METHOD DETECTION LIMIT - the minimum concentration that can be measured and reported with a 99% confidence that the concentration is greater than zero. If requested or required, a value reported below the RL and above the MDL is considered estimated and is noted with a "J" flag.
NR	Not reported
RPD	Relative Percent Difference
Wet	The data has been reported on an as-received (wet weight) basis
Low Bias	Low Bias flag indicates that the recovery of the flagged analyte is below the laboratory or regulatory lower control limit. The data user should take note that this analyte may be biased low but should evaluate multiple lines of evidence including the LCS and site-specific MS/MSD data to draw bias conclusions. In cases where no site-specific MS/MSD was requested, only the LCS data can be used to evaluate such bias.
High Bias	High Bias flag indicates that the recovery of the flagged analyte is above the laboratory or regulatory upper control limit. The data user should take note that this analyte may be biased high but should evaluate multiple lines of evidence including the LCS and site-specific MS/MSD data to draw bias conclusions. In cases where no site-specific MS/MSD was requested, only the LCS data can be used to evaluate such bias.
Non-Dir.	Non-dir. flag (Non-Directional Bias ) indicates that the Relative Percent Difference (RPD) (a measure of precision) among the MS and MSD data is outside the laboratory or regulatory control limit. This alerts the data user where the MS and MSD are from site-specific samples that the RPD is high due to either non-homogeneous distribution of target analyte between the MS/MSD or indicates poor reproducibility for other reasons.

## Technical Report

prepared for:

### **Langan Engineering & Environmental Services**

21 Penn Plaza, 360 West 31st Street

New York NY, 10001

**Attention: Mike Burke**

Report Date: 12/06/2010

**Client Project ID: 170119302**

York Project (SDG) No.: 10K0874

CT License No. PH-0723

New Jersey License No. CT-005

New York License No. 10854

PA Reg. 68-04440

Report Date: 12/06/2010  
Client Project ID: 170119302  
York Project (SDG) No.: 10K0874

**Langan Engineering & Environmental Services**  
21 Penn Plaza, 360 West 31st Street  
New York NY, 10001  
Attention: Mike Burke

## Purpose and Results

This report contains the analytical data for the sample(s) identified on the attached chain-of-custody received in our laboratory on November 29, 2010 and listed below. The project was identified as your project: **170119302**.

The analyses were conducted utilizing appropriate EPA, Standard Methods, and ASTM methods as detailed in the data summary tables.

All samples were received in proper condition meeting the customary acceptance requirements for environmental samples except those indicated under the Notes section of this report.

All analyses met the method and laboratory standard operating procedure requirements except as indicated by any data flags, the meaning of which are explained in the attachment to this report, and case narrative if applicable.

The results of the analyses, which are all reported on dry weight basis (soils) unless otherwise noted, are detailed in the following pages.

Please contact Client Services at 203.325.1371 with any questions regarding this report.

<u>York Sample ID</u>	<u>Client Sample ID</u>	<u>Matrix</u>	<u>Date Collected</u>	<u>Date Received</u>

## General Notes for York Project (SDG) No.: 10K0874

1. The RLs and MDLs (Reporting Limit and Method Detection Limit respectively) reported are adjusted for any dilution necessary due to the levels of target and/or non-target analytes and matrix interference. The RL(REPORTING LIMIT) is based upon the lowest standard utilized for the calibration where applicable.
2. Samples are retained for a period of thirty days after submittal of report, unless other arrangements are made.
3. York's liability for the above data is limited to the dollar value paid to York for the referenced project.
4. This report shall not be reproduced without the written approval of York Analytical Laboratories, Inc.
5. All samples were received in proper condition for analysis with proper documentation, unless otherwise noted.
6. All analyses conducted met method or Laboratory SOP requirements. See the Qualifiers and/or Narrative sections for further information.
7. It is noted that no analyses reported herein were subcontracted to another laboratory, unless noted in the report.
8. This report reflects results that relate only to the samples submitted on the attached chain-of-custody form(s) received by York.

## Notes and Definitions

S-BN	Base/Neutral surrogate recovery outside of control limits. The data was accepted based on valid recovery of remaining two base/neutral surrogates.
QL-02	This LCS analyte is outside Laboratory Recovery limits due the analyte behavior using the referenced method. The reference method has certain limitations with respect to analytes of this nature.
J	Detected below the Reporting Limit but greater than or equal to the Method Detection Limit (MDL); therefore, the result is an estimated concentration.
B	Analyte is found in the associated analysis batch blank.
<hr/>	
ND	Analyte NOT DETECTED at the stated Reporting Limit (RL) or above.
RL	REPORTING LIMIT - the minimum reportable value based upon the lowest point in the analyte calibration curve.
MDL	METHOD DETECTION LIMIT - the minimum concentration that can be measured and reported with a 99% confidence that the concentration is greater than zero. If requested or required, a value reported below the RL and above the MDL is considered estimated and is noted with a "J" flag.
NR	Not reported
RPD	Relative Percent Difference
Wet	The data has been reported on an as-received (wet weight) basis
Low Bias	Low Bias flag indicates that the recovery of the flagged analyte is below the laboratory or regulatory lower control limit. The data user should take note that this analyte may be biased low but should evaluate multiple lines of evidence including the LCS and site-specific MS/MSD data to draw bias conclusions. In cases where no site-specific MS/MSD was requested, only the LCS data can be used to evaluate such bias.
High Bias	High Bias flag indicates that the recovery of the flagged analyte is above the laboratory or regulatory upper control limit. The data user should take note that this analyte may be biased high but should evaluate multiple lines of evidence including the LCS and site-specific MS/MSD data to draw bias conclusions. In cases where no site-specific MS/MSD was requested, only the LCS data can be used to evaluate such bias.
Non-Dir.	Non-dir. flag (Non-Directional Bias ) indicates that the Relative Percent Difference (RPD) (a measure of precision) among the MS and MSD data is outside the laboratory or regulatory control limit. This alerts the data user where the MS and MSD are from site-specific samples that the RPD is high due to either non-homogeneous distribution of target analyte between the MS/MSD or indicates poor reproducibility for other reasons.

Corrective Action:

## Purpose and Results

This report contains the analytical data for the sample(s) identified on the attached chain-of-custody received in our laboratory on November 30, 2010 and listed below. The project was identified as your project: **170119302**.

The analyses were conducted utilizing appropriate EPA, Standard Methods, and ASTM methods as detailed in the data summary tables.

All samples were received in proper condition meeting the customary acceptance requirements for environmental samples except those indicated under the Notes section of this report.

All analyses met the method and laboratory standard operating procedure requirements except as indicated by any data flags, the meaning of which are explained in the attachment to this report, and case narrative if applicable.

The results of the analyses, which are all reported on dry weight basis (soils) unless otherwise noted, are detailed in the following pages.

Please contact Client Services at 203.325.1371 with any questions regarding this report.

**General Notes for York Project (SDG) No.: 10L0036**

1. The RLs and MDLs (Reporting Limit and Method Detection Limit respectively) reported are adjusted for any dilution necessary due to the levels of target and/or non-target analytes and matrix interference. The RL(REPORTING LIMIT) is based upon the lowest standard utilized for the calibration where applicable.
2. Samples are retained for a period of thirty days after submittal of report, unless other arrangements are made.
3. York's liability for the above data is limited to the dollar value paid to York for the referenced project.
4. This report shall not be reproduced without the written approval of York Analytical Laboratories, Inc.
5. All samples were received in proper condition for analysis with proper documentation, unless otherwise noted.
6. All analyses conducted met method or Laboratory SOP requirements. See the Qualifiers and/or Narrative sections for further information.
7. It is noted that no analyses reported herein were subcontracted to another laboratory, unless noted in the report.
8. This report reflects results that relate only to the samples submitted on the attached chain-of-custody form(s) received by York.

**Approved By:**

Robert Q. Bradley  
Managing Director

**Date:** 12/21/2010

## Notes and Definitions

S-AC	Acid surrogate recovery outside of control limits. The data was accepted based on valid recovery of remaining two acid surrogates.
QL-02	This LCS analyte is outside Laboratory Recovery limits due the analyte behavior using the referenced method. The reference method has certain limitations with respect to analytes of this nature.
J	Detected below the Reporting Limit but greater than or equal to the Method Detection Limit (MDL); therefore, the result is an estimated concentration.
GC-Surr	Surrogate recovery outside of control limits. The data was accepted based on valid recovery of the alternate surrogate.
GC-21	Pattern is similar to Lubricating Oil
B-Dil	Detected in method blank(s) associated with the sample analysis. This is a common lab artifact which is found at ND-25 ppb. No dilution factor has been applied to these compounds to eliminate artificially inflated results.
B	Analyte is found in the associated analysis batch blank.

---

ND	Analyte NOT DETECTED at the stated Reporting Limit (RL) or above.
RL	REPORTING LIMIT - the minimum reportable value based upon the lowest point in the analyte calibration curve.
MDL	METHOD DETECTION LIMIT - the minimum concentration that can be measured and reported with a 99% confidence that the concentration is greater than zero. If requested or required, a value reported below the RL and above the MDL is considered estimated and is noted with a "J" flag.
NR	Not reported
RPD	Relative Percent Difference
Wet	The data has been reported on an as-received (wet weight) basis
Low Bias	Low Bias flag indicates that the recovery of the flagged analyte is below the laboratory or regulatory lower control limit. The data user should take note that this analyte may be biased low but should evaluate multiple lines of evidence including the LCS and site-specific MS/MSD data to draw bias conclusions. In cases where no site-specific MS/MSD was requested, only the LCS data can be used to evaluate such bias.
High Bias	High Bias flag indicates that the recovery of the flagged analyte is above the laboratory or regulatory upper control limit. The data user should take note that this analyte may be biased high but should evaluate multiple lines of evidence including the LCS and site-specific MS/MSD data to draw bias conclusions. In cases where no site-specific MS/MSD was requested, only the LCS data can be used to evaluate such bias.
Non-Dir.	Non-dir. flag (Non-Directional Bias ) indicates that the Relative Percent Difference (RPD) (a measure of precision) among the MS and MSD data is outside the laboratory or regulatory control limit. This alerts the data user where the MS and MSD are from site-specific samples that the RPD is high due to either non-homogeneous distribution of target analyte between the MS/MSD or indicates poor reproducibility for other reasons.

## Purpose and Results

This report contains the analytical data for the sample(s) identified on the attached chain-of-custody received in our laboratory on December 02, 2010 and listed below. The project was identified as your project: **170119302**.

The analyses were conducted utilizing appropriate EPA, Standard Methods, and ASTM methods as detailed in the data summary tables.

All samples were received in proper condition meeting the customary acceptance requirements for environmental samples except those indicated under the Notes section of this report.

All analyses met the method and laboratory standard operating procedure requirements except as indicated by any data flags, the meaning of which are explained in the attachment to this report, and case narrative if applicable.

The results of the analyses, which are all reported on dry weight basis (soils) unless otherwise noted, are detailed in the following pages.

Please contact Client Services at 203.325.1371 with any questions regarding this report.

**General Notes for York Project (SDG) No.: 10L0147**

1. The RLs and MDLs (Reporting Limit and Method Detection Limit respectively) reported are adjusted for any dilution necessary due to the levels of target and/or non-target analytes and matrix interference. The RL(REPORTING LIMIT) is based upon the lowest standard utilized for the calibration where applicable.
2. Samples are retained for a period of thirty days after submittal of report, unless other arrangements are made.
3. York's liability for the above data is limited to the dollar value paid to York for the referenced project.
4. This report shall not be reproduced without the written approval of York Analytical Laboratories, Inc.
5. All samples were received in proper condition for analysis with proper documentation, unless otherwise noted.
6. All analyses conducted met method or Laboratory SOP requirements. See the Qualifiers and/or Narrative sections for further information.
7. It is noted that no analyses reported herein were subcontracted to another laboratory, unless noted in the report.
8. This report reflects results that relate only to the samples submitted on the attached chain-of-custody form(s) received by York.

## Notes and Definitions

S-BN	Base/Neutral surrogate recovery outside of control limits. The data was accepted based on valid recovery of remaining two base/neutral surrogates.
S-AC	Acid surrogate recovery outside of control limits. The data was accepted based on valid recovery of remaining two acid surrogates.
QL-02	This LCS analyte is outside Laboratory Recovery limits due the analyte behavior using the referenced method. The reference method has certain limitations with respect to analytes of this nature.
J	Detected below the Reporting Limit but greater than or equal to the Method Detection Limit (MDL); therefore, the result is an estimated concentration.
GC-Surr	Surrogate recovery outside of control limits. The data was accepted based on valid recovery of the alternate surrogate.
GC-19	Pattern is similar to Transmission Fluid
B-Dil	Detected in method blank(s) associated with the sample analysis. This is a common lab artifact which is found at ND-25 ppb. No dilution factor has been applied to these compounds to eliminate artificially inflated results.
B	Analyte is found in the associated analysis batch blank.

---

ND	Analyte NOT DETECTED at the stated Reporting Limit (RL) or above.
RL	REPORTING LIMIT - the minimum reportable value based upon the lowest point in the analyte calibration curve.
MDL	METHOD DETECTION LIMIT - the minimum concentration that can be measured and reported with a 99% confidence that the concentration is greater than zero. If requested or required, a value reported below the RL and above the MDL is considered estimated and is noted with a "J" flag.
NR	Not reported
RPD	Relative Percent Difference
Wet	The data has been reported on an as-received (wet weight) basis
Low Bias	Low Bias flag indicates that the recovery of the flagged analyte is below the laboratory or regulatory lower control limit. The data user should take note that this analyte may be biased low but should evaluate multiple lines of evidence including the LCS and site-specific MS/MSD data to draw bias conclusions. In cases where no site-specific MS/MSD was requested, only the LCS data can be used to evaluate such bias.
High Bias	High Bias flag indicates that the recovery of the flagged analyte is above the laboratory or regulatory upper control limit. The data user should take note that this analyte may be biased high but should evaluate multiple lines of evidence including the LCS and site-specific MS/MSD data to draw bias conclusions. In cases where no site-specific MS/MSD was requested, only the LCS data can be used to evaluate such bias.
Non-Dir.	Non-dir. flag (Non-Directional Bias ) indicates that the Relative Percent Difference (RPD) (a measure of precision) among the MS and MSD data is outside the laboratory or regulatory control limit. This alerts the data user where the MS and MSD are from site-specific samples that the RPD is high due to either non-homogeneous distribution of target analyte between the MS/MSD or indicates poor reproducibility for other reasons.

## Technical Report

prepared for:

### **Langan Engineering & Environmental Services**

21 Penn Plaza, 360 West 31st Street

New York NY, 10001

**Attention: Mike Burke**

Report Date: 12/16/2010

**Client Project ID: 170119302**

York Project (SDG) No.: 10L0428

CT License No. PH-0723

New Jersey License No. CT-005

New York License No. 10854

PA Reg. 68-04440

Report Date: 12/16/2010  
Client Project ID: 170119302  
York Project (SDG) No.: 10L0428

**Langan Engineering & Environmental Services**  
21 Penn Plaza, 360 West 31st Street  
New York NY, 10001  
Attention: Mike Burke

## Purpose and Results

This report contains the analytical data for the sample(s) identified on the attached chain-of-custody received in our laboratory on November 24, 2010 and listed below. The project was identified as your project: **170119302**.

The analyses were conducted utilizing appropriate EPA, Standard Methods, and ASTM methods as detailed in the data summary tables.

All samples were received in proper condition meeting the customary acceptance requirements for environmental samples except those indicated under the Notes section of this report.

All analyses met the method and laboratory standard operating procedure requirements except as indicated by any data flags, the meaning of which are explained in the attachment to this report, and case narrative if applicable.

The results of the analyses, which are all reported on dry weight basis (soils) unless otherwise noted, are detailed in the following pages.

Please contact Client Services at 203.325.1371 with any questions regarding this report.

<u>York Sample ID</u>	<u>Client Sample ID</u>	<u>Matrix</u>	<u>Date Collected</u>	<u>Date Received</u>

## General Notes for York Project (SDG) No.: 10L0428

1. The RLs and MDLs (Reporting Limit and Method Detection Limit respectively) reported are adjusted for any dilution necessary due to the levels of target and/or non-target analytes and matrix interference. The RL(REPORTING LIMIT) is based upon the lowest standard utilized for the calibration where applicable.
2. Samples are retained for a period of thirty days after submittal of report, unless other arrangements are made.
3. York's liability for the above data is limited to the dollar value paid to York for the referenced project.
4. This report shall not be reproduced without the written approval of York Analytical Laboratories, Inc.
5. All samples were received in proper condition for analysis with proper documentation, unless otherwise noted.
6. All analyses conducted met method or Laboratory SOP requirements. See the Qualifiers and/or Narrative sections for further information.
7. It is noted that no analyses reported herein were subcontracted to another laboratory, unless noted in the report.
8. This report reflects results that relate only to the samples submitted on the attached chain-of-custody form(s) received by York.

## Notes and Definitions

---

ND	Analyte NOT DETECTED at the stated Reporting Limit (RL) or above.
RL	REPORTING LIMIT - the minimum reportable value based upon the lowest point in the analyte calibration curve.
MDL	METHOD DETECTION LIMIT - the minimum concentration that can be measured and reported with a 99% confidence that the concentration is greater than zero. If requested or required, a value reported below the RL and above the MDL is considered estimated and is noted with a "J" flag.
NR	Not reported
RPD	Relative Percent Difference
Wet	The data has been reported on an as-received (wet weight) basis
Low Bias	Low Bias flag indicates that the recovery of the flagged analyte is below the laboratory or regulatory lower control limit. The data user should take note that this analyte may be biased low but should evaluate multiple lines of evidence including the LCS and site-specific MS/MSD data to draw bias conclusions. In cases where no site-specific MS/MSD was requested, only the LCS data can be used to evaluate such bias.
High Bias	High Bias flag indicates that the recovery of the flagged analyte is above the laboratory or regulatory upper control limit. The data user should take note that this analyte may be biased high but should evaluate multiple lines of evidence including the LCS and site-specific MS/MSD data to draw bias conclusions. In cases where no site-specific MS/MSD was requested, only the LCS data can be used to evaluate such bias.
Non-Dir.	Non-dir. flag (Non-Directional Bias ) indicates that the Relative Percent Difference (RPD) (a measure of precision) among the MS and MSD data is outside the laboratory or regulatory control limit. This alerts the data user where the MS and MSD are from site-specific samples that the RPD is high due to either non-homogeneous distribution of target analyte between the MS/MSD or indicates poor reproducibility for other reasons.

## Technical Report

prepared for:

### **Langan Engineering & Environmental Services**

21 Penn Plaza, 360 West 31st Street

New York NY, 10001

**Attention: Mike Burke**

Report Date: 01/10/2011

**Client Project ID: 170119302**

York Project (SDG) No.: 11A0044

CT License No. PH-0723

New Jersey License No. CT-005

New York License No. 10854

PA Reg. 68-04440

Report Date: 01/10/2011  
Client Project ID: 170119302  
York Project (SDG) No.: 11A0044

**Langan Engineering & Environmental Services**  
21 Penn Plaza, 360 West 31st Street  
New York NY, 10001  
Attention: Mike Burke

---

## Purpose and Results

This report contains the analytical data for the sample(s) identified on the attached chain-of-custody received in our laboratory on December 30, 2010 and listed below. The project was identified as your project: **170119302**.

The analyses were conducted utilizing appropriate EPA, Standard Methods, and ASTM methods as detailed in the data summary tables.

All samples were received in proper condition meeting the customary acceptance requirements for environmental samples except those indicated under the Notes section of this report.

All analyses met the method and laboratory standard operating procedure requirements except as indicated by any data flags, the meaning of which are explained in the attachment to this report, and case narrative if applicable.

The results of the analyses, which are all reported on dry weight basis (soils) unless otherwise noted, are detailed in the following pages.

Please contact Client Services at 203.325.1371 with any questions regarding this report.

## **General Notes for York Project (SDG) No.: 11A0044**

1. The RLs and MDLs (Reporting Limit and Method Detection Limit respectively) reported are adjusted for any dilution necessary due to the levels of target and/or non-target analytes and matrix interference. The RL(REPORTING LIMIT) is based upon the lowest standard utilized for the calibration where applicable.
2. Samples are retained for a period of thirty days after submittal of report, unless other arrangements are made.
3. York's liability for the above data is limited to the dollar value paid to York for the referenced project.
4. This report shall not be reproduced without the written approval of York Analytical Laboratories, Inc.
5. All samples were received in proper condition for analysis with proper documentation, unless otherwise noted.
6. All analyses conducted met method or Laboratory SOP requirements. See the Qualifiers and/or Narrative sections for further information.
7. It is noted that no analyses reported herein were subcontracted to another laboratory, unless noted in the report.
8. This report reflects results that relate only to the samples submitted on the attached chain-of-custody form(s) received by York.

## Notes and Definitions

---

S-04	The surrogate recovery for this sample is outside of established control limits due to a sample matrix effect.
QL-02	This LCS analyte is outside Laboratory Recovery limits due the analyte behavior using the referenced method. The reference method has certain limitations with respect to analytes of this nature.
J	Detected below the Reporting Limit but greater than or equal to the Method Detection Limit (MDL); therefore, the result is an estimated concentration.
B-Dil	Detected in method blank(s) associated with the sample analysis. This is a common lab artifact which is found at ND-25 ppb. No dilution factor has been applied to these compounds to eliminate artificially inflated results.
B	Analyte is found in the associated analysis batch blank.

---

ND	Analyte NOT DETECTED at the stated Reporting Limit (RL) or above.
RL	REPORTING LIMIT - the minimum reportable value based upon the lowest point in the analyte calibration curve.
MDL	METHOD DETECTION LIMIT - the minimum concentration that can be measured and reported with a 99% confidence that the concentration is greater than zero. If requested or required, a value reported below the RL and above the MDL is considered estimated and is noted with a "J" flag.
NR	Not reported
RPD	Relative Percent Difference
Wet	The data has been reported on an as-received (wet weight) basis
Low Bias	Low Bias flag indicates that the recovery of the flagged analyte is below the laboratory or regulatory lower control limit. The data user should take note that this analyte may be biased low but should evaluate multiple lines of evidence including the LCS and site-specific MS/MSD data to draw bias conclusions. In cases where no site-specific MS/MSD was requested, only the LCS data can be used to evaluate such bias.
High Bias	High Bias flag indicates that the recovery of the flagged analyte is above the laboratory or regulatory upper control limit. The data user should take note that this analyte may be biased high but should evaluate multiple lines of evidence including the LCS and site-specific MS/MSD data to draw bias conclusions. In cases where no site-specific MS/MSD was requested, only the LCS data can be used to evaluate such bias.
Non-Dir.	Non-dir. flag (Non-Directional Bias ) indicates that the Relative Percent Difference (RPD) (a measure of precision) among the MS and MSD data is outside the laboratory or regulatory control limit. This alerts the data user where the MS and MSD are from site-specific samples that the RPD is high due to either non-homogeneous distribution of target analyte between the MS/MSD or indicates poor reproducibility for other reasons.
