Job Description

The Financial Information Services Agency (FISA) has a vacancy for a Rational Tools Process Technical Analyst within the Information Management Group (IMG) to support the implementation and management of six IBM/Rational Applications. Under the guidance of the Director of Change Management, Rational Tools Process Technical Analyst will be primarily responsible for: assisting with the implementation of the Rational Applications, customizing the deployed applications, develop processes and procedures within the Rational framework to support Change Management, establish and document Change/Request Management processes, and create and run queries and reports for various teams out of the applications and provide first level support to the end users of the Rational toolset. These responsibilities will be applied across three (3) tracks of work: Applications Implementation: The Analyst will be responsible for the requirements, analysis and functional design tasks associated with the implementation of the Rational toolset and the customization of the toolset to meet with defined Change Management policies and procedures; Application Support: The Analyst will be responsible for supporting the end users of the toolset and provide mentorship in the use of all defined Change Management Policies and Procedures. As well the Analyst will be responsible for participating/coordinating the Change Control Board (CCB) including the preparation of any and all documentation and action items to and from the Board and the promotion of any and all Change Management policies, standards and procedures; Change Management Support and Analysis: The Analyst will be responsible for analysis, assessment and reporting to management on the Change Management Program Performance and adherence.

Qualification Requirements

1. A master’s degree in computer science from an accredited college and three years of progressively more responsible, full-time, satisfactory experience using mainframe, mini- or micro-computer technology in computer applications programming, systems programming, computer systems development, data telecommunications, data base administration, or planning of data processing, at least 18 months of this experience must have been in an administrative, managerial or executive capacity in the areas of computer applications programming, systems programming, computer systems development, data telecommunications, data base administration, or planning of data processing or in the supervision of staff performing these duties; or **2.** A baccalaureate degree from an accredited college and four years of experience as described in “1” above; or **3.** A four-year high school diploma or its educational equivalent and six years of experience as described in “1” above; or **4.** Education and experience equivalent to “1”, “2” or “3” above. However, all candidates must have at least a four-year high school diploma or its educational equivalent and must possess at least three years of experience as described in “1” above, including the 18 months of administrative, managerial, executive or supervisory experience as described in “1” above.

Essential Skills

4+ years experience with implementation, configuration, trouble shooting, upgrading and support of the following IBM/Rational tools: • ClearQuest • ClearCase RequisitePro • TestManager Functional Tester • SoDa • 2+ years experience with at least two successful implementations of integrating tools within the IBM/Rational Team Unifying Platform (i.e. ClearQuest, TestManager and RequisitePro) .2+ years experience with usage and customization of the following Rational Tools: • ClearQuest (e.g. hooks, Email rules, queries, charts and reports) . ClearCase (e.g. UCM modeling and working with: VOBs, triggers, views, scripts). RequisitePro TestManager Functional Tester. Soda (also from a generation, execution and trouble shooting of Reports). 2+ years experience in accessing the Rational API’s using, Perl, Shell Scripts, Visual Basic and Java.
