Job Vacancy Notice

Civil Service Title: COMPUTER SYSTEMS MANAGER **Level/Grade:** M4
Title: 10050 **Salary:** \$63,090/ \$68,036- \$137,000
Office Title: Technical Systems Manager
Division/Work Unit: Fin Sys, TechSys **Number of Positions:** 1
Hours/Shift: Monday Friday 9am to 5pm
Work location: 450 West 33 St, New York NY

Job Description

The Technical Systems Manager (Applications) will be responsible for a diverse set of development teams that include Identity & Access Solution development, Financial Management Systems (FMS) development (mainframe and Unix integrated systems), and development work produced by the Debt Management System. The candidates primary focus will be the FMS development area which covers all systems being deployed within FMS that include: applications already deployed to production (IFA, PIP, OTPS) those in test phases (VENDEX) and the largest track which is a replacement of major business components for the accounting system as well as integration of a budget system. S/he will be responsible for managing any cross development team resource issues and ensuring that resources across the group are aligned with key agency initiatives. The candidate will interface with the managers of business, operations, infrastructure, and testing teams. S/he will manage the resources by periodically reviewing workloads with leads and will ensure appropriate team for initiatives that span development teams, e.g., coding standards, and solutions. The candidate will also ensure application team coverage for initiatives that span financial systems teams. Initial priorities for this role include: 1) help drive issue escalation and resolution for citywide implementation tracks, eg., interfaces, 2) active participation in staffing for unfilled roles, 3) build out of a resource plan for key application architect staff allocated to production support activities. The Technical Systems Manager will also ensure that standards, processes, and other controls are in place and those managers of application architect and development solutions are following established standards, process and controls. This may entail technical review of all deliverables and work products including the application architecture, technical specifications, application coding and configuration, build/release and configuration management, intergration/system testing of application code and third party tools.

Qualification Requirements

1. A master's degree in computer science from an accredited college and three years of progressively more responsible, full-time, satisfactory experience using mainframe, mini- or micro-computer technology in computer applications programming, systems programming, computer systems development, data telecommunications, data base administration, or planning of data processing, at least 18 months of this experience must have been in an administrative, managerial or executive capacity in the areas of computer applications programming, systems programming, computer systems development, data telecommunications, data base administration, or planning of data processing or in the supervision of staff performing these duties; or 2. A baccalaureate degree from an accredited college and four years of experience as described in "1" above; or 3. A four-year high school diploma or its educational equivalent and six years of experience as described in "1" above; or 4. Education and experience equivalent to "1", "2" or "3" above. However, all candidates must have at least a four-year high school diploma or its educational equivalent and must possess at least three years of experience as described in "1" above, including the 18 months of administrative, managerial, executive or supervisory experience as described in "1" above.

Essential Skills

Experience managing a minimum of 2 full SDLC implementations of a multi-tiered application with full responsibility for application development tasks including: online and batch interfaces, conversion analysis and development, build/configuration management tasks, testing and implementation support. Experience with at least one implementation involving real time, online or batch interface with a legacy application. Experience in application development or a related area.
