Job Description

The Financial Information Services Agency (FISA) has a vacancy for a Web Application Developer to support the Pension Payroll and Payroll System (PPMS/PMS). The candidate will be responsible for new Web-based development and maintenance of applications relating to the citys Pension Payroll, Payroll and W2 Systems. In support of these applications, the tasks will include: Graphical User Interface and Database Design, coding, working with a source control system, unit testing, supporting system testing, security testing, development planning, and troubleshooting production problems. These tasks must take place within FISAs quality control and development standards, and software life cycle methodology context.

Qualification Requirements

1. A master's degree in computer science from an accredited college and three years of progressively more responsible, full-time, satisfactory experience using mainframe, mini- or micro-computer technology in computer applications programming, systems programming, computer systems development, data telecommunications, data base administration, or planning of data processing, at least 18 months of this experience must have been in an administrative, managerial or executive capacity in the areas of computer applications programming, systems programming, computer systems development, data telecommunications, data base administration, or planning of data processing or in the supervision of staff performing these duties; or 2. A baccalaureate degree from an accredited college and four years of experience as described in "1" above; or 3. A four-year high school diploma or its educational equivalent and six years of experience as described in "1" above; or 4. Education and experience equivalent to "1", "2" or "3" above. However, all candidates must have at least a four-year high school diploma or its educational equivalent and must possess at least three years of experience as described in "1" above, including the 18 months of administrative, managerial, executive or supervisory experience as described in "1" above.

Essential Skills

Hands-on experience in developing large Internet and Intranet projects, utilizing state of the art web development architectures and tools: J2EE(Java), WebSphere Application Developer, SQL (DB2 preferred), WebSphere Application Server, Struts. Web application development for at least two (2) full SDLC implementations as a hands-on developer/architect. Hands-on development of large scale payroll systems preferably in the context of business intelligence information. Experience working with web development for Payroll/Pension systems in a government or civil service environment. Experience working within a matrix environment. Experience working with planning, process and analysis/reporting tools such as: Oracle, SQL, Crystal Reports, MS Access, Excel, MS Project and MS Visio. Strong communication (oral and written), organizational and interpersonal skills. Proficiency in detailed documentation. Ability to monitor and report on the status of development and to resolve issues that are uncovered.

To Apply:

Please e-mail resume to: jvn-1149@fisa.nyc.gov

Be sure the JVN# you are interested in is clearly indicated in the upper right hand corner of your resume.

PLEASE NOTE: Applications that do not reference a JVN # will be considered incomplete. While all complete applications will be given consideration, only candidates selected for an interview will be contacted by FISA.
